### BLACKARMOR NAS 220

Network Attached Storage Server

**Interface** 10/100/1000 Ethernet, USB 2.0  
**Capacities** 2TB, 4TB

#### Perfect for when you need to:

- Store and access files from a central, accessible location.
- Access and manage files remotely.
- Stream media with DLNA or iTunes®.
- Automatically perform full-system backups on network-connected PCs.\*
- Secure files with hardware-based encryption.
- Share a USB printer with network-connected PCs and Macs.

The BlackArmor NAS 220 server is a small-business-specific network attached storage solution designed to provide centralized storage and data backup, helping to deliver business continuity for up to 20 PCs. Automatically backs up business-critical data with RAID 1 mirroring, full-system backup; SafeDrill™ bare metal recovery software and powerful hardware-based encryption.

#### Highlights

- Designed to provide centralized storage and data backup for up to 20 PCs.
- Enables automatic data mirroring with RAID 1 configuration.
- Protect network-connected PCs with incremental and full-system, automatic backup.\*
- Functions as an FTP server for remote file access.
- Stream media to DLNA-compliant devices and computers running iTunes® software.
- Includes two reliable, user-replaceable Seagate® hard drives.
- Connect external drives, share a printer or utilize an uninterrupted power supply with the two USB 2.0 ports.
- Secure files with powerful hardware-based encryption.
- Integrates with Microsoft® Active Directory.
- Multi-volume management.
- Event email notification.
- 3-year limited warranty.

#### Connectivity

- One Ethernet port for local network connection, web-based management and remote access.
- Two USB 2.0 ports for external drive, off-line and unknown print power supplies (UPS).
- Two internal SATA II ports.

**Manual abstract:**

· Stream media with DLNA or iTunes®. · Share a USB printer with network connected PCs and Macs. Technical Specifications The BlackArmor® NAS 220 server is a small-business-specific network attached storage solution designed to provide centralized storage and data backup, helping to deliver business continuity for up to 20 PCs. Automatically backup business-critical data with RAID 1 mirroring, full-system backup, SafetyDrill+™ bare metal recovery software and powerful hardware-based encryption. Highlights · Designed to provide centralized storage and data backup for up to 20 PCs. · Enables automatic data mirroring with RAID 1 configuration. · Protect network connected PCs with incremental and full-system, automatic backup.\* · Functions as an FTP server for remote file access. · Stream media to DLNA® compliant devices and computers running iTunes® software. · Includes two reliable, user-replaceable Seagate® hard drives.

· Connect external drives, share a printer or utilize an uninterrupted power supply with the two USB 2.0 ports. · Secure files with powerful hardware-based encryption. · Integrates with Microsoft® Active Directory. · Multi-volume management.

· Event email notification. · 3-year limited warranty. · Share/folder-level access control list (ACL) support · Quotas setting · Drive standby mode · Client system backup, Bare MetalRestore (full-system recovery) over network Event Management Media Streaming Download Server Remote Access Software Requirements PC On Network · Pentium® III, 500MHz equivalent processor or higher · Microsoft Windows® XP or Vista® · Internet Explorer® 6.0 or later, or Firefox™ 2.X or later (for management interface and web access) · 256MB RAM · Local area network (LAN) · Internet connection (for system updates and web access) · BlackArmor NAS 220 storage server · 2M RJ45 cable · AC power cord · Quick Start Guide Mac On Network · Mac OS® X 10.4.11 or later · Apple® Safari® 3.1 or later Connectivity · Wired or wireless router with an available 10/100/1000 Ethernet port · USB printer or USB disk drive (optional) · CD-ROM with BlackArmor® Discovery Software for Windows® OS BlackArmor® Discovery Software for Mac® OS BlackArmor® Backup Software for Windows (5 licenses\*) Online registration link Warranty information card \*Additional licenses available for purchase at [www.seagate.com](http://www.seagate.com) System Requirements Inside the Box · One Ethernet port for local network connection, webbased management and remote access.

© All rights reserved. From the Discovery Tool, with a single click, you can view or map shared volumes to your computer, access the webbased management interface or back up the PC you are working from. The BlackArmor NAS 220 storage server can also be managed remotely with DDNS, which can be configured from the web-based management interface or backup. The BlackArmor® NAS 220 storage server can also function as an FTP server, allowing remote access to files. Using the web-based management interface, you can designate user access manually or integrate with Microsoft® Active Directory.

Moreover, the BlackArmor NAS 220 storage server can stream media files to DLNA® compliant devices or computers running iTunes® software, allowing you to centralize media in your office and display content simultaneously on multiple devices. Expansion The two rear-mounted USB 2.0 ports allow you to connect external USB hard drives for additional storage, easily share a USB printer with your network connected computers or connect an uninterrupted power supply (UPS) to safeguard from power failure. Business-grade Protection Software plays an important role in achieving business continuity and with the BlackArmor storage server, you can expect nothing less than business-grade protection. To help protect your critical data, our software package provides automatic, incremental and full-system backup. In the event of PC hardware failure, you can utilize the SafetyDrill+™ bare metal restore software feature to recover your entire system, including the operating system, programs and settings. ©.
