## Maxtor Shared Storage Drive

**NETWORK STORAGE**  
200GB 300GB

**HIGHLIGHTS**

- Add storage and share files, photos, and music
- Access files from multiple PCs simultaneously
- Easy installation with automatic network configuration
- Set privacy levels for shared folders with easy browser interface
- Exclusive Drag and Sort™ file organization
- 2 USB ports let you add shared printers or hard drives
- Automatic power management
- 100Base-T / 10Base-T Ethernet connection

**Shared storage for small office and home network**

The Maxtor Shared Storage Drive lets you easily centralize, organize and share family photos, music and data on a home or small office network. Installation is simple—just plug it into your router via Ethernet and the automatic configuration seamlessly integrates into small office and home TCP/IP-based networks.

The Quick Start CD sets up the Shared Storage Drive to look like a local drive on the configured PC as well as automatically placing an icon on the desktop for easy access to public and private network folders with a single click.

Organizing documents on the drive is also a breeze. Just drag your files onto the special shared desktop icon where the Maxtor exclusive Drag and Sort™ feature automatically sorts the files based on file type and places them into specific music, photo, video or data folders on the Shared Storage Drive.

An easy to use web browser interface makes assigning full access (public) or limited access (private) levels to your folders on the Shared Storage Drive simple.

Two USB ports are included on the drive to connect and share two USB printers, two additional external hard drives, or one of each.
