Manual abstract:

@@Temperature Heat makes the laundry easier to form. The higher the temperature the more permanent the result of ironing. The temperature selector is used to set the ironing temperature. The individual temperature range is distinguished by dot symbols. The pilot lamp goes out when the selected temperature is reached. @@@Thinner single articles, such as tea towels can be ironed at a higher roller speed. Perlon/artificial silk 200 degree F Silk/Wool 300 degree F Cotton/Linen 400 degree F Dampness of laundry When ironing an article with a high degree of dampness, a low speed of the iron is recommended. The article will be dried slowly when passing through the rotary iron. When ironing an article with a low degree of dampness, a high speed of the iron is adequate to receive a good result. Dampening an item with a spray mister will increase your result.

If a Miele tumble dryer is being used, select the program marked "Machine iron". To minimize preparation time and to redampen, use warm water. Frequently Asked Questions Temperature indicator lamp How long is the heating-up time for the iron? 3-4 minutes to pre-heat the iron. How long does it take to iron a sheet? 2-4 minutes. How long does it take to iron a shirt? 3-4 minutes.

How many napkins can I iron per hour? Approximately 100 napkins. Temperature selector Heater plate + finger guard Roller Roller speed selector On-Off switch Feed board Ironing table Bar for hanging laundry Floor pedal switch 208-240V 20A Single Phase Comes with NEMA 6-20P Plug What are the three settings of the foot pedal? 1) pressed down: ironing and roller moves 2) intermediate position (lift your foot slightly): just pressing, roller does not move 3) off How safe is the use of the iron? If during the ironing process you lose power, press the black heater plate release button to remove the item. A special feature of the rotary iron is the finger guard. If your fingers touch the heater plate, the roller stops rotating and the heater plate lifts off. Can I replace the ironing cover? @@How much space do I need to store the iron? @@@@. Then fold along the width.

@@@@@@@@@@@@@@@@@@@@1. @@Leave the cuff for the moment. · Iron the arm from the edge of the cuff to the armhole. · Iron both sides of the cuffs on the edge of the roller. 1. 2. 2. Shoulder yoke/back Shirts with a shoulder yoke: · Fold the back along the yoke seam. · Lay the yoke as shown in the illustration, diagonally on the roller and then iron from the shoulder to the collar. · Remove shirt, rearrange and repeat on the other side.

3. Back The back is ironed in two movements, from the middle back to the side seams. · Pull the shirt right side up on to the roller up to the yoke seam (or the collar seam where there is no yoke). Smooth it out. Iron from the middle of the back to the armhole. The last bit under the arm is ironed with the front. · Iron the other half of the shirt as the first half but inside out. 4. Front sides · Lay the front on to the left-hand end of the roller, iron from the bottom hem up to the armhole so that the unironed part of the back can be ironed. · Start with the left side.

@@ · Iron the right hand side, but inside out. 5. @@.
