Your screen will show Safe Mode in the lower left corner, and you can remove the app. To reinstall apps from Android Market, touch > (in the top right) > My apps. The apps you downloaded are listed and available for download. Choose Carefully Apps are great. There's something for everyone. Play, communicate, work, or have fun. But remember, choose your apps carefully. Here are a few tips: · To help prevent spyware, phishing, or viruses from affecting your phone or privacy, use apps from trusted sites, like Market. · In Market, check the apps' ratings and comments before installing. · If you doubt the safety of an app, don't install it.

· Like all apps, downloaded apps will use up memory, data, battery, and processing power--some more than others. For example, a simple battery level widget will use less than a streaming music player app. After installing an app, if you're not happy with how much memory, data, battery or processing power it's using, uninstall it. You can always install it again later. · Just like web browsing, you may want to monitor childrens' access to apps to help prevent exposure to inappropriate content. · Certain apps may not provide completely accurate information. Take care, especially when it comes to personal health. Update Your Phone You can use your phone or computer to check, download, and install phone software updates: · Using your phone: If your phone notifies you about an update, follow the instructions to download and install it. To manually check for updates, touch Menu > Settings > About phone > System updates.

Your phone downloads any updates over your mobile network.

Remember, these updates can be quite large (25MB or more) and may not be available in all countries. If you don't have an unlimited data plan, or mobile network updates are not available in your country, you can update using a computer. Apps 15 · Using your computer: On your computer, go to [www.motorola.com/support](http://www.motorola.com/support) and check the "Software" links.

If an update is available, just follow the installation instructions. Calls it's good to talk Quick Start: Calls Dial numbers, see recent calls, and more. 2.Touch Wi-Fi to turn on and scan. If Wi-Fi is already on, touch Menu > Scan. Your phone lists the networks it finds within range. Tip: To show your phone's MAC address or other Wi-Fi details, touch Menu > Advanced. 3.Touch a network to connect. If necessary, enter pass codes from the network administrator and touch Connect. When Wi-Fi power is on and your phone finds a network you've used, it automatically reconnects and shows in the status bar. To turn off Wi-Fi power: Touch Menu > Settings > Wireless & networks > Wi-Fi.

48 BluetoothTM & Wi-Fi Connections Wi-Fi hotspot Your can make your phone a Wi-Fi hotspot to provide portable, convenient internet access to other Wi-Fi enabled devices. Note: Keep it secure. To protect your phone and hotspot from unauthorized access, it is strongly recommended that you set up hotspot security (WPA2 is the most secure), including password. To set up your phone as a Wi-Fi hotspot: 1. Turn off Wi-Fi power by touching Menu > Settings > Wireless & networks > Wi-Fi. 2.Touch Menu > Settings > Wireless & networks > Tethering & Mobile hotspot 3.Touch Mobile hotspot to turn on the hotspot. 4.Touch Wi-Fi hotspot settings to change hotspot security and configuration: · SSID--Enter a unique name for your hotspot.

· Security--Select the type of security you want: Open or WPA2. For WPA2, enter a unique password that others will need to access your Wi-Fi hotspot. Note: WPA2 is recommended by IEEE. · Channel--If you notice interference after your hotspot has been active for a while, you can try different channels. 5. Touch Save when the settings are complete. When your Wi-Fi hotspot is active, other Wi-Fi enabled devices can connect by entering your hotspot's SSID, selecting a Security type, and entering the correct Wireless password. DLNATM Media Devices You can use DLNA Certified computers, TVs, and other devices to play or transfer the videos, pictures, and music stored on your phone. 1. Make sure your phone is connected to a Wi-Fi network that has another DLNA Certified device.

2.Touch > DLNA 3.Touch Play media, Copy media to server, Copy media to phone, or Share media. Your phone searches for DLNA devices on your network. To search again, touch Menu > Refresh. 4.Choose a device to connect. For more about DLNA devices, visit [www.dlna.org](http://www.dlna.org).
