Note: When installing an app, make sure you read the alerts that tell you what information the app will access. If you don't want the app to have access to this information, cancel the installation. Apps & updates 29 Choose carefully Apps are great.

There's something for everyone. Play, communicate, work or have fun. But remember, choose your apps carefully. Here are a few tips: · To help prevent spyware, phishing or viruses from affecting your phone or privacy, use apps from trusted sites, like Market. · In Market, check the apps' ratings and comments before installing. · If you doubt the safety of an app, don't install it. · Like all apps, downloaded apps will use up memory, data, battery and processing power--some more than others. After installing an app, if you're not happy with how much memory, data, battery or processing power it's using, uninstall it. You can always install it again later. · Just like web browsing, you may want to monitor children's access to apps to help prevent exposure to inappropriate content. · Certain apps may not provide completely accurate information. Take care, especially when it comes to personal health. Touch the app to open the details screen--from here you can review, uninstall and more.
