This will help you choose the best ones for you.

· If you doubt the safety of an app, don't install it. · Like all apps, downloaded apps will use up memory, data, battery, and processing power--some more than others. For example, simple settings widget will use less than a streaming music player app. After installing an app, if you're not happy with how much memory, data, battery or processing power it's using, uninstall it. You can always install it again later.

Select a category or touch Search to find the app you want. Then, touch Install (if app is free) or Buy. When installing an app, make sure you read the alerts that tell you what information the app will access. If you don't want the app to have access to this information, cancel the installation.
