**Manual abstract:**

*Dterm Series i terminals enable your business to stay one step ahead of the competition when it comes to customer service. They integrate form and function to help your business take service and performance to newer, more profitable heights. The advanced digital technology of the Dterm Series i terminals deliver enhanced speed and efficiency, offering improved performance to your business environment. The perfect partner for ECP The Dterm Series i terminals are the perfect partner for NEC's Enterprise Communication Platforms (ECP). These platforms which offer voice, data and video solutions, from traditional telephony to an IP network infrastructure solution deliver tangible benefits to your organisation. Capitalising on the reliability of the Internet Protocol Server (IPS) and Internet Protocol Exchange (IPX) ECPs, the Dterm Series i terminals further enhance usability and functionality. Technology upgrades, combined with additional features will help your business reach new levels of connectivity. Proven Performance With the reputation as a leader in IT&T, NEC understands your business needs. The Dterm Series i terminals are opening the door to better connectivity for a growing number of businesses around Australia, providing state-of-the-art functionality and user-friendly interfacing. Built upon the reliability and performance for which NEC is recognised, Dterm Series i, the latest handset model, delivers superior flexibility.*

*Connectivity means success for any forward-thinking business. Connectivity means building networks between your colleagues, clients, suppliers and partners. Connectivity means staying in touch. Full-featured system To enhance the performance and functionality of your NEC telephony system, the Dterm Series i terminals come packed with features to enhance usability at the desktop. Every terminal comes with a four-metre handset cord and speakerphone.*

*Display models include long-loop circuitry and a head set jack. Help facility For the times when you accidentally press the wrong button or require assistance, help is at hand. The help facility, available on the Dterm Series i display, provides easy access to assistance on all elements of the system's operation. Menu Soft keys Allows users with display terminals to easily and efficiently access system features such as voicemail, speed dial and call forwarding. Visual ring indicator Enables you to 'see' the phone ringing from across the office, when you are surrounded by noise or have a message waiting.*

*Visual indication of volume control All display models now feature a visual volume control, allowing users to modulate volume level more accurately. LCD Display The LCD offers three lines of 24 characters per line. More information means more informed choices. One touch convenience The message button lets you check your voicemail with just one touch. Context sensitive soft keys allow you to easily access the telephony system features. With a single touch of the Mic key, the users microphone is muted, shutting off transmission from a noisy office or allowing the user to hold a separate, private conversation.*

*ABN 14 004 803 490 Telephone 1800 036 136 Facsimile 1800 501 255 Website [www.nec.com.au](http://www.nec.com.au) Features are subject to change without notice.*

*Not all features and functions are available on all Dterm handsets, or when used with some NEC ECPs. NBS15 10/02 .*
