Manual abstract:

Before operating the machine, read carefully the following information. The machine here described is intended for commercial use only. The User Manual must be kept near the machine, inside an adequate case, away from liquids and other substances that can cause damage to it. @@@@This information is useful when requiring machine spare parts. @@Any repair must be performed at authorised Nilfisk Service Centers by qualified personnel, which will use original spare parts and accessories. Contact your Nilfisk Dealer for any repair or service, and specify your machine model and serial number. Nilfisk constantly improves its products and reserves the right to make changes and improvements at its discretion without being obliged to apply such benefits to the machines that were previously sold. Any change and/or addition of accessory must be approved and performed by Nilfisk. Upon delivery check that the packing and the machine were not damaged during transportation. In case of visible damages, keep the whole packing to have it checked.

Contact your Nilfisk Dealer immediately to file a freight damage claim. This machine is intended for commercial use only, i. e. Hotels, schools, factories, shops and offices, that is to say that it is not intended for domestic use. Read all the instructions before use.

It indicates a dangerous situation with risk of death for the operator. Pay careful attention to the paragraphs marked by this symbol. CONSULTATION It indicates that it is necessary to consult the User Manual before performing any procedure. Specific warnings and cautions to inform about potential damages to people and machine are shown below. wARNING! To reduce the risk of fire or personal injuries: Â This sweeper is not suitable for collecting dangerous powders.

Â Do not collect toxic, carcinogen, combustible materials or other dangerous materials such as asbestos, arsenic, barium, beryllium, lead, pesticide or other harmful materials. @@@@ â Do not use the sweeper on inclined surfaces. Â Do not allow to be used as a toy. Pay careful attention when using the machine near children. @@Using other brooms could reduce safety. @@@@Pay careful attention to the machine operation and use common sense. @@@@ 3. @@@@ Â Fold down the handlebar and lock it. Only perform the maintenance procedures described in this Manual. for other procedures , contact the Service Center.

Use only Nilfisk original spare parts and accessories. @@Procedure Place the machine in a vertical position Empty the hopper (3) Clean the main (8 and 9) and side brooms (6) Clean the machine Replace the main broom (9) when worn Replace the side brooms (6) when worn Replace the driving belt (*) After working Monthly When necessary After each use, perform the following procedures: Â Empty the collection tank (3). Â Check if there are foreign objects caught in the brooms or wheels and remove them immediately. Â Clean the brooms and remove any lace, wire, strings or similar, which can compromise the machine efficiency and cause damages due to the drive system sticking. Â Periodically check the side brooms for wear and replace them when the bristle length is reduced to 1/3. Regularly clean the machine with a wet cloth. cAUTION! Do not clean the machine with high-pressure jets! All bearings are protected against dust and do not require lubrication or maintenance. Adjust the broom height when the bristles are worn or when their efficiency is compromised. 1. Adjust the height of the main broom (9) with the two knobs (7).

When turning them, each step on the marked numbers amounts to a broom lowering. Check that the two knobs (7) are on the same marked number. Otherwise there will be a difference in the longitudinal pressure of the broom. When turning them counter-clockwise, each step amounts to a broom lowering. After the adjustment, push the machine to check that it moves smoothly, without difficulty or resistance.

Otherwise, repeat the broom adjustment procedure. @@Place the machine in a suitable place, with the bottom side up. remove the screws (A , Fig. 1), then remove the supports (B) with the main broom (C). Pay attention to the driving belt (D) of the front main broom.

Remove the main broom (F) and keep screws, supports and bearings (G) for next assembly. @@@@Place the machine in a suitable place, with the bottom side up. @@@@The following instructions should be useful to solve some machine problems. If the suggested remedies are not effective, it is necessary to contact the Service Center. There is a big foreign object caught into the brooms. the debris collection is not efficient. There is a rope or other foreign object caught by the main brooms. The machine speed is too high. Some dust may collect inside the housing behind the brooms. .
