Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card. Please consult your mobile operator for the use of a SIM card that has a mini-UICC cutout. 5 If the battery is completely discharged, it may take several minutes before the charging indicator is displayed or before any calls can be made. 6 You can send text messages that are longer than the character limit for a single message.

Longer messages are sent as two or more messages. Your service provider may charge accordingly. Characters with accents, other marks, or some language options, take more space, and limit the number of characters that can be sent in a single message. 7 Do not connect products that create an output signal, as this may damage the device. Do not connect any voltage source to the audio connector. If you connect an external device or headset, other than those approved for use with this device, to the audio connector, pay special attention to volume levels. 26 Product and safety information Network services and costs You can only use your device on the GSM 900, 1800 networks. You need a subscription with a service provider. @@@@• If the device keys are locked, unlock them. 3.

Press the end key repeatedly, until the home screen is shown. 4. Type in the official emergency number for your present location. Emergency call numbers vary by location. 5. Press the call key. 6. Give the necessary info as accurately as possible. Do not end the call until given permission to do so.

@@@@@Connections in all conditions cannot be guaranteed.

Never rely solely Emergency calls 1. Make sure the device is switched on. 2. @@The following suggestions help you keep your device operational. • Keep the device dry.

@@@@• Do not store the device in high temperatures. High temperatures may damage the device or battery. • Do not store the device in cold temperatures.

@@@@• Do not drop, knock, or shake the device. Rough handling can break it.

@@• Do not paint the device. Paint can prevent proper operation. @@• Keep the device away from magnets or magnetic fields. @@@@All materials of the device can be recovered as materials and energy. @@Nokia may make additional battery models available for this device. Charge your device with AC-11 charger. Charger plug type may vary. @@@Battery safety Always switch the device off and unplug the charger before removing the battery. To unplug a charger or an accessory, hold and pull the plug, not the cord. When ice, its parts, or accessories.

Do not place your device or 32 accessories in the air bag deployment area. Potentially explosive environments Switch your device off in potentially explosive environments, such as near petrol pumps. Sparks may cause an explosion or fire resulting in injury or death. Note restrictions in areas with fuel; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive environment may not be clearly marked. These usually are areas where you are advised to switch your engine off, below deck on boats, chemical transfer or storage facilities, and where the air contains chemicals or particles. Check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) if this device can be safely used in their vicinity. Certification information (SAR) This mobile device meets guidelines for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves recommended by international guidelines.

These guidelines were developed by the independent scientific organisation ICNIRP and include safety margins designed to assure the protection of all persons, regardless of age and health. The exposure guidelines for mobile devices employ a unit of measurement known as the Specific Absorption Rate or SAR. The SAR limit stated in the ICNIRP guidelines is 2.0 watts/ kilogram (W/kg) averaged over 10 grams of tissue. Tests for SAR are conducted using standard operating positions 33 with the device transmitting at its highest certified power level in all tested frequency bands.

The actual SAR level of an operating device can be below the maximum value because the device is designed to use only the power required to reach the network. That amount changes depending on a number of factors such as how close you are to a network base station. The highest SAR value under the ICNIRP guidelines for use of the device at the ear is 1.48 W/kg. Use of device accessories may result in different SAR values.

SAR values may vary depending on national reporting and testing requirements and the network band. Additional SAR information may be provided under product information at www.nokia.com. Nokia support messages To help you take maximum advantage of your phone and services, you receive free customised text messages from Nokia. The messages contain tips and tricks and support. To stop receiving the messages, select Menu. To provide the service described above, your mobile phone number, the serial number of your phone, and some identifiers of the mobile subscription are sent to Nokia when you use the phone for the first time. Some or all information may also be sent to Nokia when updating software. This information may be used as specified in the privacy policy, available at www.nokia.com.
