All rights reserved. 2 Safety Read these simple guidelines. Not following them may be dangerous or illegal. For further info, read the complete user guide. SWITCH

**OFF IN RESTRICTED AREAS** Switch the device off when mobile phone use is not allowed or when it may cause interference or danger, for example, in aircraft, in hospitals or near medical equipment, fuel, chemicals, or blasting areas. Obey all instructions in restricted areas. **ROAD SAFETY COMES FIRST** Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety.

**INTERFERENCE** All wireless devices may be susceptible to interference, which could affect performance. **QUALIFIED SERVICE** Only qualified personnel may install or repair this product. **BATTERIES, CHARGERS, AND OTHER ACCESSORIES** Use only batteries, chargers, and other accessories approved by Nokia for use with this device. Do not connect incompatible products. **KEEP YOUR DEVICE DRY** Your device is not water-resistant.

**Keep it dry. PROTECT YOUR HEARING** To prevent possible hearing damage, do not listen at high volume levels for long periods. Exercise caution when holding your device near your ear while the loudspeaker is in use. **SAR** This device meets RF exposure guidelines when used either in the normal use position against the ear or when positioned at least 1.5 centimetres (5/8 inch) away from the body.

The specific maximum SAR values can be found in the Certification Information (SAR) section of this user guide. For more info, go to [www.sar-tick.com](http://www.sar-tick.com). When a carry case, belt clip or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the above-stated separation distance from the body. @@@@The following headsets have been approved by Nokia for use with this device: WH-108. Some of the accessories mentioned in this user guide may be sold separately. Get your phone ready Insert the SIM card and battery. 1. Place your thumb on the logo, and carefully pull the side edge of the back cover to remove the cover.

Note: Switch the device off and disconnect the charger and any other device before removing any covers. Avoid touching electronic components while changing any covers. Always store and use the device with any covers attached. 2. If the battery is in the phone, lift it out. © 2013 Nokia. All rights reserved. 4 3. Slide the SIM under the holder with the contact area face down. Important: This device is designed to be used with a standard SIM card (see figure) only. Use of incompatible SIM cards may damage the card or the device, and may corrupt data stored on the card. Please consult your mobile operator for the use of a SIM card that has a mini-UICC cutout. 4. Line up the battery contacts, and put the battery in. 5.

Press the back cover down until it locks into place. 6. To switch on, press and hold . Charge the battery Your battery has been partially charged at the factory, but you may need to recharge it before you can use your phone. 1.

Plug the charger into a wall outlet. © 2013 Nokia. All rights reserved. 5 2. Connect the charger to the phone. When done, unplug the charger from the phone, then from the wall outlet. If the battery is completely discharged, it may take several minutes before the charging indicator is displayed or before any calls can be made. Lock the keys Lock the keys when not using your phone. To lock, select Menu, and press \*. To unlock, select Unlock, and press \*.

Tip: You can set your phone to ask for the lock code that you define. The default lock code is 12345. © 2013 Nokia. All rights reserved. 6 Basics Learn how to get the most out of your new phone. Explore your phone Explore your phone with a simple key press. 1. To see the apps and features of your phone, press Menu. Menu 2. To go to an app or feature, press the scroll key up, down, left, or right.

3. To open the app or select the feature, press Select. Select 4. To go back to the previous view, press Back. Back 5.

To go back to the home screen, press . © 2013 Nokia. All rights reserved. 7 6. To use the flashlight, press the scroll key up twice.

To switch off, press up once. Do not shine the light in anyone's eyes. Menu Change the volume You can control the audio in several ways. 1. Scroll left or right to change the volume during a call or when listening to the radio. Volume 2. You can connect a compatible headset or other compatible device to the headset connector. 3. To use the loudspeaker on your phone when calling, select Loudsp..

You can also use the loudspeaker when listening to radio. 987654321 00:15:08 Loudsp. © 2013 Nokia. All rights reserved. 8 Change the ringtone Set a different ringtone for each profile. 1. Select Menu > Settings > Tone settings. Settings Tone settings Display settings Select 2. Select Ringing tone. Tone settings Ringing tone Nokia Tune Ringing volume Select 3.

Pick a ringtone, and select OK. Ringing tone Bold OK Beach Airy Brook Write text Writing with the keypad is easy and fun. Press a key repeatedly until the letter is shown. Type in a space Press 0. Type in a special character or punctuation mark Press and hold \*.

Switch between character cases Press # repeatedly. Type in a number Press and hold a number key. © 2013 Nokia. All rights reserved. 9 Use predictive text To speed up your writing, your phone can guess what you are starting to write.

Predictive text is based on a built-in dictionary. This feature is not available for all languages. 1. Select Opt. > Dictionary and the language. 2. Start writing a word. When the word you want is shown, press 0. Change a word Press \* repeatedly until the word you want is shown. Add a new word to the dictionary If the word you want isn't in the dictionary, write the word, select Spell, and type in the word.

Switch between predictive and traditional text Press # repeatedly. Switch predictive text off Select Opt. > Dictionary > Dictionary off. © 2013 Nokia. All rights reserved. 10 People & messaging Contact your friends and family using your phone. Make or answer a call Read on and learn how to make or answer a call with your new phone. 1. Type in the phone number. To type in the + character, used for international calls, press \* twice.

12 3456789 2. Press to make the call. To end the call, press Calling 123456789 . 3. When someone calls you, press to answer. calling 987654321 Save a name and phone number Add a new name and number to your phone.

@@@1. @@@@3. To set the hour, press up or down. To set the minutes, press right and then up or down. Press OK.

08 :00 © 2013 Nokia. @@@@1. To remove messages, select Menu > Messages > Delete messages. 2. @@@@3.

@@@4. @@@5. @@@@ You need a subscription with a service provider. You may also need to subscribe to some features. Emergency calls 1. Make sure the device is switched on. 2. Check for adequate signal strength. @@@@ If the device keys are locked, unlock them. 3.

Press the end key repeatedly, until the home screen is shown. 4. Type in the official emergency number for your present location. Emergency call numbers vary by location. 5. Press the call key. 6. Give the necessary info as accurately as possible. Do not end the call until given permission to do so.

@@@ Connections in all conditions cannot be guaranteed battery, or immerse or expose it to water or other liquids.

Batteries may explode if damaged. Use the battery and charger for their intended purposes only. @@@ Never use a damaged battery or charger. Do not charge your device during a lightning storm. @@ They may contain small parts.

Keep them out of the reach of small children. Medical devices Operation of radio transmitting equipment, including wireless phones, may interfere with inadequately shielded medical devices' function. Consult a physician or the medical device's manufacturer to determine if it is adequately shielded from external radio energy. Implanted medical devices To avoid potential interference, manufacturers of implanted medical devices recommend a minimum separation of 15.3 centimetres (6 inches) between a wireless device and the medical device.

Persons who have such devices should: © 2013 Nokia. All rights reserved. 19 •••• Always keep the wireless device more than 15.3 centimetres (6 inches) from the medical device. Not carry the wireless device in a breast pocket. Hold the wireless device to the ear opposite the medical device. Switch the wireless device off if there is any reason to suspect that interference is taking place. Follow the manufacturer directions for the implanted medical device. If you have any questions about using your wireless device with an implanted medical device, consult your health care provider. Hearing Warning: When you use the headset, your ability to hear outside sounds may be affected.

Do not use the headset where it can endanger your safety. Some wireless devices may interfere with some hearing aids. Nickel The surface of this device is nickel-free. Vehicles Radio signals may affect improperly installed or inadequately shielded electronic systems in vehicles. For more info, check with the manufacturer of your vehicle or its equipment. Only qualified personnel should install the device in a vehicle. Faulty installation may be dangerous and invalidate your warranty. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable or explosive materials in the same compartment as the device, its parts, or accessories. Do not place your device or accessories in the air bag deployment area.

Potentially explosive environments Switch your device off in potentially explosive environments, such as near petrol pumps. Sparks may cause an explosion or fire resulting in injury or death. Note restrictions in areas with fuel; chemical plants; or where blasting operations are in progress. Areas with a potentially explosive environment may not be clearly marked. These usually are areas where you are advised to switch your engine off, below deck on boats, chemical transfer or storage facilities, and where the air contains chemicals or particles.

Check with the manufacturers of vehicles using liquefied petroleum gas (such as propane or butane) if this device can be safely used in their vicinity.

Certification information (SAR) This mobile device meets international guidelines for exposure to radio waves. Your mobile device is a radio transmitter and receiver. It is designed not to exceed the limits for exposure to radio waves (radio frequency electromagnetic fields), recommended by international guidelines from the independent scientific organization ICNIRP. These guidelines incorporate substantial safety margins assure the protection of all persons regardless of age and health.

The exposure guidelines are based on the Specific Absorption Rate (SAR), which is an expression of the amount of radio frequency (RF) power deposited in the head or body when the device is transmitting. The ICNIRP SAR limit for mobile devices is 2.0 W/kg averaged over 10 grams of tissue. SAR tests are carried out with the device in standard operating positions, transmitting at its highest certified power level, in all its frequency bands. The maximum recorded SAR values for this device are: Maximum SAR value When held against the head When operated at a separation distance of 1.5 centimetres (5/8 inch) from the body 1.27 W/kg over 10g 0.65 W/kg over 10g Frequency bands used when Maximum SAR value was recorded GSM 900 GSM 900 © 2013 Nokia.

<http://yourpdfguides.com/dref/5584185>

All rights reserved. 20 This device meets RF exposure guidelines when used against the head or when positioned at least 1.

5 centimetres (5/8 inch) away from the body. When a carry case, belt clip or other form of device holder is used for body-worn operation, it should not contain metal and should provide at least the above stated separation distance from the body. To send data or messages, a good connection to the network is needed. Sending may be delayed until such a connection is available. Follow the separation distance instructions until the sending is finished. During general use, the SAR values are usually well below the values stated above. This is because, for purposes of system efficiency and to minimise interference on the network, the operating power of your mobile is automatically decreased when full power is not needed for the call. The lower the power output, the lower the SAR value. Device models may have different versions and more than one value. Component and design changes may occur over time and some changes could affect SAR values.

The latest available SAR information for this and other Nokia device models can be found at [www.nokia.com](http://www.nokia.com). The World Health Organization (WHO) has stated that current scientific information does not indicate the need for any special precautions when using mobile devices. If you are interested in reducing your exposure, they recommend you limit your usage or use a hands-free kit to keep the device away from your head and body.

For more information and explanations and discussions on RF exposure, go to the WHO website at [www.who.int/peh-emf/en](http://www.who.int/peh-emf/en). Copyrights and other notices
