Manual abstract:

For further information, read the complete user guide. @ @Obey all instructions in restricted areas. ROAD SAFETY COMES FIRST Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety. @ @ @ @Do not connect incompatible products. KEEP YOUR DEVICE DRY Your device is not water-resistant. Keep it dry. GLASS PARTS The device screen is made of glass. This glass can break if the device is dropped on a hard surface or receives a substantial impact.

If the glass breaks, do not touch the glass parts of the device or attempt to remove the broken glass from the device. Stop using the device until the glass is replaced by qualified service personnel. Safety PROTECT YOUR HEARING Listen to a headset at a moderate level, and do not hold the device near your ear when the loudspeaker is in use. 5 6 Get started Get started Keys and parts 1 2 3 4 5 6 7 8 9 Connector for headphones and loudspeakers (3.5 mm) Micro-USB connector.

Also used to charge the battery. Micro-SIM card holder Volume key Power key/Key lock button Camera key Back key Start key Search key Get started 7 10 11 12 13 Camera flash Camera lens Microphone Loudspeaker If there is protective tape on the camera lens, remove the tape. @ @Back key Return to the previous screen Press . @ @ @ @Start key Go to the start screen Press . @ @Insert the SIM card Your phone uses a micro-SIM card, also known as a mini-UICC card.

Do not attach any stickers to your SIM card. 1 You must first open the cover of the micro-USB connector. Press the left end of the cover, and carefully pull the cover away from the phone. 2 To unlock the SIM card holder, press and slide the holder to the left. Carefully pull out the holder. Get started 3 9 Make sure the contact area is facing up, and insert the SIM card into the SIM card holder. 4 Insert the SIM card holder back into the phone, and slide the holder to the right. 5 Close the cover of the micro-USB connector. Remove the SIM card 1 Switch the phone off. 2 Open the cover of the micro-USB connector.

3 Unlock the SIM card holder, and carefully pull out the holder. 4 Pull the card out of the holder. If you later change your network service provider, for instructions, go to www.nokia.com/support. Charge your phone About the battery Your phone has an internal, nonremovable, rechargeable battery. Use only Nokia approved chargers designated for this phone. You can also use a compatible USB data cable to charge your phone. You can set your phone to automatically save power when the battery charge level is > and battery saver > Always turn on Battery Saver when battery low. Select is low.

When battery saver mode is switched on, you may not be able to change the settings of all apps. 10 Get started Do not attempt to remove the battery from the device. To replace the battery, take the device to your nearest authorised service facility. Authorised retail points may also offer a battery replacement service. Important: Only qualified personnel or an authorised service facility should replace the battery.

Unauthorised battery replacement may invalidate your warranty. Charge the battery Your battery has been partially charged at the factory, but you may need to recharge it before you can switch on your phone for the first time. You do not need to charge the battery for a specific length of time, and you can use the phone while it is charging. If the phone indicates a low charge, do the following: Charge from a wall outlet 1 First connect the USB cable to the charger, and the charger to the wall outlet, then connect the USB cable to your phone. 2 When the battery is full, disconnect the charger from the phone, and then from the wall outlet.

Get started 11 To avoid breaking the charger connector, be careful when connecting or disconnecting the charger cable. Charge from a computer You can use USB charging when a wall outlet is not available. Data can be transferred while charging the device. The efficiency of USB charging power varies significantly, and it may take a long time for charging to start and the device to start functioning. 1 First connect the USB cable to the computer, then to your phone. 12 2 Get started When the battery is full, first disconnect the USB cable from your phone, then from the computer. If the battery is completely discharged, it may take several minutes before the charging indicator is displayed or before any calls can be made. If the battery has not been used for a long time, to begin charging, you may need to connect the charger, then disconnect and reconnect it. Antenna locations Avoid touching the antenna area while the antenna is in use. Contact with antennas affects the communication quality and may reduce battery life due to higher power level during operation.

The antenna area is highlighted. Switch the phone on or off Switch the phone on Press and hold the power key, until the phone vibrates. Get started 13 Switch the phone off Press and hold the power key, and drag the lock screen down. Create your accounts Your phone guides you through the initial setup when you insert your SIM card and switch your phone on for the first time. To access all Windows Live and Nokia services, create your Windows Live ID and Nokia account. 14 Get started To create a Windows Live ID and Nokia account, you need an internet connection. For information about possible data costs, contact your network service provider. If you can't connect to the internet, you can create the accounts later. If you already have a Windows Live ID or Nokia account, sign in with your existing username and password. Tip: Forgotten your password? You can request it to be sent to you in a mail or text message. To create a Windows Live ID later, connect your phone to your PC, and open the Zune PC app, and you are prompted to create an account. To create a Nokia account later, use your phone to access a Nokia service, and you are prompted to create an account. To make an emergency call during the initial setup, select emergency call. Get started 15 Windows Live ID With a Windows Live ID, you can access all Windows Live and Zune services with a single username and password on your computer or phone. You can also use the same username and password to access Xbox Live services on your Xbox.

With your Windows Live ID, you can, for example: Download content from Marketplace Back up your contacts in Windows Live Upload, store, and share pictures and documents on SkyDrive Keep track of and lock your lost phone with Find My Phone Get your gaming achievements on your phone, and add to them when you play games on your phone To learn more about Windows Live ID and Windows Live services, go to www.live.com. Nokia account When you switch your phone on for the first time, your phone guides you through creating a Nokia account. With your Nokia account, you can, for example: Access all Nokia services with a single username and password, both on your phone and a compatible computer Download content from Nokia services Save details about your phone model and contact information.

[You're reading an excerpt. Click here to read official NOKIA LUMIA 800 user guide](http://yourpdfguides.com/dref/4212015)
<http://yourpdfguides.com/dref/4212015>

You can also add your payment card details. To learn more about the Nokia account and Nokia services, go to www.nokia.com/support. To create a Nokia account later, use your phone to access a Nokia service, and you are prompted to create an account. Copy contacts from your old phone Have your nearest and dearest instantly at your fingertips. Use the Contacts Transfer app to easily copy your contacts from your old phone. Your old phone needs to support Bluetooth. The contacts on your old phone need to be stored in the phone memory, not on the SIM card. 16 Get started 1 2 3 4 On your old phone, switch Bluetooth on.

On the start screen of your new phone, swipe left to the apps menu, and select Contacts Transfer. Select Continue, and switch Bluetooth on. Select your old phone from the list of found devices, and follow the instructions shown on both phones. If your contacts are written in a language that is not supported by your new phone, the contact information may not be shown correctly. If you have previously backed up your contacts in Windows Live, you can also import them to your phone straight from the service. Lock or unlock the keys and screen To avoid accidentally making a call when your phone is in your pocket or bag, lock the keys and screen of your phone. Lock the keys and screen Press the power key. Unlock the keys and screen Press the power key, and drag the lock screen up. Get started 17 Set the keys and screen to lock automatically > and lock+wallpaper > Screen times out after, and select the length Select of time after which the keys and screen are locked automatically. Headset You can connect a compatible headset or compatible headphones to your phone.

Do not connect products that create an output signal, as this may damage the device. Do not connect any voltage source to the audio connector. If you connect an external device or headset, other than those approved by Nokia for use with this device, to the audio connector, pay special attention to volume levels. Change the volume Use the volume keys. They control all sounds, including the volume of alarms and reminders.

The built-in loudspeaker allows you to speak and listen from a short distance without having to hold the phone to your ear. Basics 23 Use your phone when it's locked You can use certain features of your phone when it is locked, without having to enter the security code. You can, for example: Make an emergency call Change how your phone notifies you about incoming calls Answer or reject an incoming call Pause or resume playing music, or skip to another song To wake up your phone, press the power key. Make an emergency call Swipe up on the lock screen, and select emergency call. Change how incoming calls are notified or .

Press a volume key, and select Pause or resume music, or skip to another song Use the music player controls displayed at the top of the screen. You can also see: The date and time Your next calendar event Missed calls or messages Switch between open apps You can see which apps and tasks are open in the background, and switch between them. Press and hold , swipe left or right, and select the desired app. 24 Basics Personalise your phone Personalise the start screen Would you like to have only the content you need on the start screen? Move or remove tiles, and pin contacts, apps, and websites to the start screen. You can also pin music and pictures, your latest mail, favourite contacts, and more. When you pin a contact, their feed updates are displayed on the tile, and you can call them directly from the start screen. Pin a contact In the People hub, select and hold the contact, and select pin to Start. Pin an app In the apps menu, select and hold the app, and select pin to Start. Pin a website At the website, select > pin to start. .

Move a tile Select and hold the tile, drag it to the new location, and press Remove a tile from the start screen Select and hold the tile, and select . Change your theme You can change the colours, to match your taste and mood. Select > and theme > Background or Accent colour. Tip: You can save battery power if you use a darker background. Basics 25 Change the background pictures Want to view your favourite landscape or pictures of your family more often? You can change the background picture of the lock screen and the Pictures hub and live tile. Change the lock screen wallpaper > and lock+wallpaper > change wallpaper. 1 Select 2 Select a picture, adjust it to get the best possible fit, and select Change the background of the Pictures hub and live tile > choose background. 1 In the Pictures hub, select 2 Select a picture, adjust it to get the best possible fit, and select . . Tip: If you like variety, select shuffle background, and the phone will shuffle through your pictures.

Personalise your ringtone and other tones You can personalise your phone tones. Select > and ringtones+sounds. Select the type of ringtone or alert you want to change, and select the sound. Tip: You can use the Zune PC app to create ringtones with your voice Got your hands full, but need to use your phone? You can use your voice to make a call, send a text message, search the web, or open an application. This feature may not be available in all languages.

1 2 Press and hold . Say a voice command. Example: To check your schedule, say open Calendar. Tip: For more examples, say Help. Indicators on the status bar The status bar at the top of the screen tells you the current time, battery and signal strength, and much more.

Tip: To see hidden icons, tap the status bar. Signal strength Basics A GPRS data connection (network service) is open. An EDGE data connection (network service) is open. Your phone is connected to a 3G network (network service). An HSDPA/HSUPA data connection (network service) is open. A Wi-Fi connection is available. A Wi-Fi connection is active. A Bluetooth device is connected to your phone. Your calls are diverted to another number or your voice mailbox. There is no SIM card in your phone.

Your SIM card is locked. Your phone is roaming and not on your home mobile network. Silent mode is switched on. Flight mode is switched on. Vibrate mode is switched on. Battery power level Battery saver mode is switched on. The battery is charging. The icons may vary depending on your region or network service provider. 29 Use your phone offline In places where you do not want to make or receive calls, you may still access your music, videos, and offline games if you switch flight mode on. Select > , and switch flight mode to On .

When flight mode is switched on, your connection to the mobile network is closed. All radio frequency signals between the phone and the mobile network are prevented. When flight mode is switched on, you can still connect to a Wi-Fi network to, for example, read your mail or browse the internet. You can also use Bluetooth. Switch the phone off when mobile phone use is not allowed or when it may cause interference or danger.

Remember to comply with any applicable safety requirements. Prolong battery life If it seems you're always looking for a charger, there are steps you can take to reduce the power consumption of your phone. The key is to find the balance between getting the most out of your phone while getting the battery life you need. · Always charge the battery fully. Close the apps you're not using.

30 Calls Example: The camera viewfinder can be a power drain, so after you've finished taking pictures, press . Switch battery saver mode on. > · Tip: To check the battery status, and switch battery saver mode on, select and battery saver. Save battery with sound and screen options · Mute unnecessary sounds, such as key press sounds. · Use wired headphones, rather than the loudspeaker. Set the phone screen to switch off after a short time > and lock+wallpaper >

Screen times out after. Select Use a dark theme > and theme > Background > Dark. Select Lower the screen brightness Select > and brightness, switch Automatically adjust to Off the desired level. , and select Use network connections selectively · If you are listening to music or otherwise using your phone, but do not want to make or receive calls, switch flight mode on. · Rather than streaming music wirelessly, use the Zune PC app to copy your favourite music to your phone.

· Set your phone to check for new mail less frequently. · Switch Bluetooth on only when needed. · Use a Wi-Fi connection to connect to the internet, rather than a mobile data (GPRS or 3G) connection. · Stop your phone scanning for available Wi-Fi networks. Select > , and switch WiFi to Off. Calls Call a contact On the start screen, select Search for a contact On the start screen, select > > and the contact and the number. , and start entering the contact's name. Calls 31 Call the last dialled number Trying to call someone, but they are not answering? It is easy to call them again. In the call history view, you can see information about the calls you have made and received. On the start screen, select Select .

next to the name or phone number. Call your voice mailbox You can divert your incoming calls to your voice mailbox. Callers can also leave you a message if you do not answer. Voice mailbox is a network service. 1 2 3 >.

Select If your phone asks for the voicemail password, enter it. You can listen or reply to voicemails, delete them, or record a greeting message. Follow the audible instructions. Change the phone number of your voice mailbox > > call settings and the voicemail number. 1 Select 2 Enter the new number, and select save.

If the voice mailbox number is automatically set by your network service provider, you do not need to change the number. Divert calls to your voice mailbox or another phone number If you cannot answer your calls, you can divert incoming calls to your voice mailbox or another phone number. Remember to set up your voice mailbox before diverting your calls there. To divert an incoming call to your voice mailbox, select ignore. Divert calls to another phone number > > call settings > Call forwarding. 1 On the start screen, select 2 Enter the phone number in the Forward calls to field, and select save. To check if call divert is being used, indicated with , tap the top of the screen. Call divert is a network service. For details, contact your network service provider. Make a conference call Your phone supports conference calls between two or more people.

The maximum number of participants varies by the network operator. Conference call is a network service. 32 Calls 1 2 3 Make a call to the first participant. To make a call to another participant, select , and make the call. When the new call is answered, to start the conference call, select . Add a new participant to a conference call Make a call to another participant, and to add the new call to the conference call, select . Have a private conversation with a conference call participant Select and the person's name or phone number. The conference call is put on hold on your phone. The other participants continue the conference call. To return to the conference call, select .

End an active conference call Select end call. Silence an incoming call When a call arrives, press the volume key. Use your voice to call a contact You can use your voice to make calls with your phone. Press and hold . Say Call and the contact's name.

To cancel making the call, press . Tip: You can use your voice to make a phone call also through a Bluetooth headset. Contacts & social networking services 33 Contacts & social networking services Contacts About the People hub You can save and organise your friends' phone numbers, addresses, and other contact information in the People hub. You can also get in touch with your friends through social networking services. The social networking services are third party services and not provided by Nokia.

Check the privacy settings of the social networking service you are using as you may share information with a large group of people. The terms of use of the social networking service apply to sharing information on that service. Familiarise yourself with the terms of use and the privacy practices of that service. Using services or downloading content may cause transfer of large amounts of data, which may result in data traffic costs. Create, edit, or delete a contact You can save your friends' phone numbers, addresses, and other information to the People hub. Select People, and swipe to all. Add a new contact > new contact. 1 Select 2 If you have signed in to several accounts, select the account to which the contact is linked. 3 Select a contact detail, fill in the fields, and select . 4 When you have added the details, select .

Edit a contact 1 Select the contact and . 2 If the contact has several accounts linked in the contact card, select an account. 3 Select a contact detail, edit the fields, and select . Delete a contact > delete. 1 Select the contact and 2 If the contact has several accounts linked in the contact card, select an account and delete. The contact is deleted both from your phone and, with some exceptions, from the online service where it's stored. 34 Contacts & social networking services Save a number from a received call or message Have you received a call or message from a person whose phone number is not yet saved in the People hub? You can easily save the number in a new or existing contact list entry. Save a number from a call 1 On the start screen, select 2 3 4 Select In the call history list, select a phone number and , edit the phone number and phone number type, and select Edit other contact details, including the name, and select Save a number from a message 1 On the start screen, select . 2 In the conversations list, select a conversation.

[800 user guide](http://yourpdfguides.com/dref/4212015)

<http://yourpdfguides.com/dref/4212015>

3 At the top of the conversation screen, select the phone number and 4 5 Select , edit the phone number and phone number type, and select . Edit other contact details, including the name, and select .

. Search for a contact Is the People hub overflowing? Rather than scrolling through your entire contacts list, you can search, or jump to a letter of the alphabet. You can also use a voice command to call or send a message to a contact. Select People, and swipe to all. Select , and start writing a name. The list filters as you write. Jump to a letter of the alphabet First select any letter, then the desired letter, and you jump to that point in your contacts list. Reduce the number of visible contacts > settings > filter my contact list, and select or clear the appropriate Select check boxes. Use a voice command 1 In any view, press and hold . 2 Say Call or Text and the contact's name. Contacts & social networking services 35 Tip: Pin your most important contacts or contact groups to the start screen. Select and hold a contact, then select pin to Start. Create, edit, or delete a contact group When you have created contact groups, you can send a message to several people at the same time. For example, you can assign the members of your family to one group and reach them more easily with a single message. Select People, and swipe to all.

Add a new contact group > new group. 1 Select 2 Enter a name for the group. 3 Select add a contact and a contact. To add another contact, select add a contact again. 4 Select . Edit a contact group Select the group and . Rename a group Select the group name, and enter the new name. Add a new contact Select add a contact and a contact. Remove a contact Select the contact and remove from group > Remove. Change the preferred contact information for a contact Select the contact and the information you want to change, and when you're done, select .

Delete a contact group Select the group and > delete > delete. Link contacts Do you have contact information for the same person from different social networking services or mail accounts as separate contact entries? You can link multiple contacts so that their information is in a single contact card. Select People, and swipe to all. 36 Contacts & social networking services Link two or more contacts 1 Select the main contact you want to link to, and select 2 Select choose a contact and the contact to be linked. Unlink a contact 1 Select the main contact and .

2 Select the contact to be unlinked and unlink . Copy contacts from a SIM card to your phone If you have contacts stored on your SIM card, you can copy them to your phone. You can add more details to contacts that are stored on your phone, such as alternative phone numbers, addresses, or a picture. Select People.

Select > settings > import SIM contacts. Social networks Set up an account Set up your social networking service accounts. Select > and email+accounts.

Select add an account and the name of the service, and follow the displayed instructions. Change your profile picture When you set up a Facebook or Windows Live account on your phone, your profile picture from one of these social networking services also becomes the picture in your contact card on your phone. If you change your picture on your phone, you can update your Facebook and Windows Live profiles at the same time. Select People, and swipe to all. 1 2 3 4 5 Select your own contact card and your picture. Select your picture again, and in the Pictures hub, select a new picture. Drag the picture around to adjust the cropping, and select .

To set where to update your picture, select Post to, select or clear the check boxes, and select . Select . Contacts & social networking services 37 See your friends' status updates After you set up social networking services on your phone, you can follow your friends' status updates in the People hub. Select People, and swipe to what's new. Post your status If you feel like reaching out to your friends, let them know what's on your mind. Post your status to the social networking services that you use. Select People, and swipe to all. 1 2 3 4 Select your own contact card and post a message. Write your message. In the Post to field, select the check box next to each account to post to, and select .

Select . Write on your friend's wall In Facebook, you can contact your friends by writing on their Facebook wall or by commenting on their status updates. Select People. 1 2 3 Swipe to all. Select a Facebook friend's profile and write on wall.

Write your message, and select . Comment on a friend's post 1 Swipe to what's new. Recent posts from your friends are displayed. 2 On the post, select . 3 Write your comment, and select .

Upload a picture to a service After you take a picture, upload it to the web so all your friends can see what you're up to. You can also set up your phone to upload pictures automatically to social networking services. Select Pictures. 1 2 Browse your photo albums for the picture you want to share. Select and hold the picture, and select share.... 38 3 4 Internet Select the sharing method. You can send it in a text message or mail, or upload it to social networking services.

Add a picture caption if you want, and select . Internet Internet connections Define how your phone connects to the internet Does your network service provider charge you a fixed fee for data transfer, or on a pay as you use basis? To use the optimal connection method, change the Wi-Fi and mobile data settings. Select > . Use a Wi-Fi connection Select WiFi and the desired connection. Using a Wi-Fi connection is generally faster and less expensive than using a mobile data connection. If both Wi-Fi and mobile data connections are available, your phone uses the Wi-Fi connection. Use a mobile data connection 1 Select mobile network. 2 Switch Data connection to On , and select the desired connection. Use a mobile data connection when roaming Select mobile network > Data roaming options > roam. Data roaming means using your phone to receive data over networks that your network service provider doesn't own or operate.

Connecting to the internet when roaming, especially when abroad, can raise data costs substantially. . To use the fastest available mobile connection, switch 3G connection to On If the signal strength for a 3G network in your area is low, searching for or trying to stay connected to it can use more battery power.

Mobile data access points are usually sent to you by your network service provider. You can manually add access points.

Manually add a mobile data access point 1 Select mobile network > add APN. 2 Enter the APN address in the APN field. Internet 3 4 Enter the username and password for your mobile data account. If the APN uses a proxy server, enter the address and port number in the appropriate fields. 39 If you later change your network service provider, for instructions on how to get the internet settings, go to www.

nokia.com/support. About Wi-Fi connections > and Wi-Fi. Select Tip: Your phone periodically checks for and notifies of available connections. The notification appears briefly at the top of the screen. To manage your Wi-Fi connections, select the notification. Important: Use encryption to increase the security of your Wi-Fi connection. Using encryption reduces the risk of others accessing your data. Note: Using Wi-Fi may be restricted in some countries. For example, in France, you are only allowed to use Wi-Fi indoors.

For more information, contact your local authorities. Connect to a Wi-Fi network Connecting to a Wi-Fi network is a handy way of accessing the internet.

When out and about, you can connect to Wi-Fi networks in public places, such as a library or internet café. Select 1 2 > and Wi-Fi. . Make sure Wi-Fi networking is switched to On Select the desired Wi-Fi connection. Connect to a hidden Wi-Fi 1 Make sure Wi-Fi networking is switched to On 2 Select advanced > . 3 Enter the network name, and select add. Close the Wi-Fi connection Switch Wi-Fi networking to Off . .

Close a network connection If an application in the background is using an internet connection, you can close the connection without closing the application. 40 Internet > . Select Close all mobile data connections 1 Select mobile network. 2 Switch Data connection to Off . Close all Wi-Fi connections 1 Select Wi-Fi. 2 Switch Wi-Fi networking to Off . Close all network connections 1 Select flight mode. 2 Switch flight mode to On . Internet About the web browser Select .

Catch up on the news, and visit your favourite websites.

You can use Internet Explorer 9 Mobile in your phone to view web pages on the internet. To browse the web, you must be connected to the internet. Browse the web Select . Tip: If you do not have a flat-rate data plan from your network service provider, to save data costs in your phone bill, you can use a Wi-Fi network to connect to the internet. Go to a website Select the address bar, enter a web address, and select Search the internet Select the address bar, and enter a search word. Zoom in or out Place two fingers on the screen, and slide your fingers apart or together. Tip: To quickly zoom in on a section of a web page, double-tap the screen. To zoom out, double-tap the screen again. . Messaging & mail You can open up to 6 browser tabs at the same time and switch between them.

Open a new tab > tabs > Select . 41 Switch between tabs > tabs and a tab. Select Close a tab Select . Send a web link > share page and the sharing method. Select A cache is a memory location that is used to store data temporarily. If you have, or have tried to, access confidential information or a secure service, requiring passwords, clear the cache after each use. Empty the cache > settings > delete history. Select Add a website to your favourites If you visit the same websites all the time, add them to your favourites, so you can easily access them. Select . > add to favourites.

While browsing, select Go to a favourite website > favourites and a website. Select Tip: You can also pin your favourite websites to the start screen. While browsing the > pin to start. website, select Messaging & mail Messages About Messaging Select . You can send and receive different kinds of messages: 42 . . Messaging & mail Text messages Multimedia messages that contain your pictures Instant messages (network service) Messages and chats between you and a particular contact are arranged into conversations.

When you want to get in touch with a contact, your phone can help you pick the best method. If the contact is signed in to a chat service, you can send an instant message. Otherwise, a text message can be sent instead. If you make contact groups containing, for example, family or colleagues, you can send a message to a group. You can send text messages that are longer than the character limit for a single message.

Longer messages are sent as two or more messages. Your service provider may charge accordingly. Characters with accents, other marks, or some language options, take more space, limiting the number of characters that can be sent in a single message. Using services or downloading content may cause transfer of large amounts of data, which may result in data traffic costs. Send a message With text and multimedia messages, you can quickly contact your friends and family. In a multimedia message, you can attach your pictures. Select 1 2 3 4 5 . . Swipe to threads, and select Select and a contact. You can add more than one recipient.

Select the message field, and write your message. To add an attachment, select and the file. To send the message, select . Reply to a message 1 Select the conversation containing the message. 2 Select the message field, write your reply, and select Forward a message 1 Select the conversation containing the message. 2 Select and hold the message, and select forward. . Messaging & mail 3 4 Select the recipients. Select the message field and 43 . Sending a message with an attachment may be more expensive than sending a normal text message.

For more information, contact your service provider. If the item you insert in a multimedia message is too large for the network, the device may automatically reduce the size. Only compatible devices can receive and display multimedia messages. Messages may look different in different devices. Send a message to a group of people Would you like to send a message to all your family members? If you have assigned them to a group, you can send a text message or mail to all of them at the same time.

Select People. Select the group and text or send email, and write and send your message. Chat with your friends Select . You need a Windows Live account to chat. Before starting to chat, set up a chat service.

Swipe left to online, then follow the instructions shown on the phone. 1 2 3 Sign in to a chat service, if not signed in already. In the People hub, select the contact you want to chat with. You can also chat with a group of people. Write your message, then select . View a conversation You can see the messages you have sent to and received from a particular contact in a single conversation thread, and continue the conversation from that thread. The thread can contain text messages, multimedia messages, and instant messages. On the start screen, select and the conversation. Reply to a message in a conversation Select the message field, write your reply, and send the message. 44 Messaging & mail Delete a conversation Select threads, select and hold the conversation, and select delete.

When you send a new message, it is added to the current conversation. If no conversation exists, a new conversation is started. When you open a received message from the start screen, the message opens in the conversation. Mail About Mail On the start screen, select a mailbox. You can use your phone to read and reply to mail when you are on the go.
