Manual abstract:

For further information, read the complete user guide. @ @ Obey all instructions in restricted areas. ROAD SAFETY COMES FIRST Obey all local laws.

Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety. @ @ @ @ Do not connect incompatible products. KEEP YOUR DEVICE DRY Your device is not water-resistant. Keep it dry. GLASS PARTS The device screen is made of glass. This glass can break if the device is dropped on a hard surface or receives a substantial impact.

If the glass breaks, do not touch the glass parts of the device or attempt to remove the broken glass from the device. Stop using the device until the glass is replaced by qualified service personnel. Safety PROTECT YOUR HEARING Listen to a headset at a moderate level, and do not hold the device near your ear when the loudspeaker is in use. 5 6 Get started Get started Keys and parts 1 2 3 4 5 6 7 8 9 10 11 12 Connector for headphones and loudspeakers (3.5 mm)

Second microphone Micro-USB connector.

Also used to charge the battery. SIM card holder Volume keys Power key/Key lock button Camera key Search key Start/Home key Back key Front camera Earpiece Get started 7 13 14 15 16 Camera flash Camera lens Microphone Loudspeaker Back, start, and search keys The back, start, and search keys help you to navigate your phone. Back key Return to the previous screen Press . @ @ @ @ Start key Go to the start screen Press . @ @ @ @ Do not put stickers on your SIM card.

Tip: Use the SIM door key to unlock the SIM tray. If you lose the tool, you can use a paperclip. 1 Push the SIM door key into the hole in the SIM door until the SIM tray is released, then pull the tray out. 2 Make sure the contact area is facing up, then put the SIM card in the SIM tray. Get started 9 3 Push the SIM tray back into your phone until it locks into place. Remove the SIM card 1 Switch the phone off. 2 Unlock and pull out the SIM tray. 3 Pull the SIM card out of the tray. Charge your phone About the battery Your phone has an internal, nonremovable, rechargeable battery. Use only Nokia approved chargers designated for this phone.

You can also use a compatible USB cable to charge your phone (included). You can set your phone to automatically save power when the battery charge level is > and battery saver > Always turn on Battery Saver when battery low. Select is low. When your phone goes into battery saver mode, you may not be able to change the settings of all apps. Do not attempt to remove the battery from the device. To replace the battery, take the device to your nearest authorized service facility. 10 Get started Authorized retail points may also offer a battery replacement service. Important: Only qualified personnel or an authorized service facility should replace the battery. Unauthorized battery replacement may invalidate your warranty. Charge the battery Your battery has been partially charged at the factory, but you may need to recharge it before you can switch on your phone for the first time.

You do not need to charge the battery for a specific length of time, and you can use the phone while it is charging. If your phone is off when you start to charge the phone, it automatically switches on. Make sure you use a compatible USB charger to charge your phone. If the phone indicates a low charge, do the following: Charge from a wall outlet 1 First connect the USB cable to the charger, plug the charger into a wall outlet, then connect the micro-USB end of the USB cable to your phone. 2 When the battery is full, unplug the charger from the phone, then from the wall outlet.

Get started To avoid breaking the USB cable connector, be careful when connecting or disconnecting the charger cable. 11 Charge from a computer You can use USB charging when a wall outlet is not available. Data can be transferred while charging the device. The efficiency of USB charging power varies significantly, and it may take a long time for charging to start and the device to start functioning. 1 First connect the USB cable to the computer, then to your phone.

2 When the battery is full, first unplug the USB cable from your phone, then from the computer. If the battery is completely discharged, it may take several minutes before the charging indicator is displayed or before any calls can be made. If the battery has not been used for a long time, to begin charging, you may need to connect the charger, then disconnect and reconnect it. 12 Get started Antenna locations Avoid touching the antenna area while the antenna is in use. Contact with antennas affects the communication quality and may reduce battery life due to higher power level during operation. The antenna area is highlighted. Switch the phone on or off Switch the phone on Press and hold the power key, until the phone vibrates. Switch the phone off Press and hold the power key, and drag the lock screen down. Create your Windows Live ID Your phone guides you through the initial setup when you put your SIM card in your phone and switch your phone on for the first time. To access all Windows Live services, create your Windows Live ID.

Get started 13 To create a Windows Live ID, you need an internet connection. For info about possible data costs, contact your network service provider. If you can't connect to the internet, you can create the account later. If you already have a Windows Live ID, sign in with your existing username and password. Tip: Forgotten your password? You can request it to be sent to you in a mail or text message. To create a Windows Live ID later, connect your phone to your PC, then open the Zune PC app you are asked to create an account. To download and install Zune on your PC, go to www.zune.net. To make an emergency call during the initial setup, select emergency call.

Windows Live ID With a Windows Live ID, you can access all Windows Live and Zune services with a single username and password on your computer or phone. You can also use the same username and password to access Xbox Live services on your Xbox. With your Windows Live ID, you can, for example: Download content from Marketplace Back up your contacts in Windows Live Upload, store, and share pictures and documents on SkyDrive Keep track of and lock your lost phone with Find My Phone Get your gaming achievements on your phone, and add to them when you play games on your phone 14 Get started To learn more about Windows Live ID and Windows Live services, go to www.live.com.

Lock or unlock the keys and screen To avoid accidentally making a call when your phone is in your pocket or bag, lock the keys and screen of your phone. Lock the keys and screen Press the power key. Unlock the keys and screen Press the power key, and drag the lock screen up. Set the keys and screen to lock automatically > and lock+wallpaper > Screen times out after, and select the length Select of time after which the keys and screen are locked automatically. Headset You can connect a compatible headset or compatible headphones to your phone.

Get started 15 Do not connect products that create an output signal, as this may damage the device. Do not connect any voltage source to the audio connector. If you connect an external device or headset, other than those approved by Nokia for use with this device, to the audio connector, pay special attention to volume levels. Change the volume Press the volume keys up or down. The volume keys control all sounds, including the volume of alarms and reminders. The built-in loudspeaker allows you to speak and listen from a short distance without having to hold the phone to your ear. Switch the loudspeaker on or off during a call or . Select Access codes PIN or PIN2 code (4-8 digits) These protect your SIM card against unauthorized use or are required to access some features. You can set your phone to ask for the PIN code when you switch it on. If not supplied with your SIM card or you forget the codes, contact your service provider.

If you type in the code incorrectly three times in a row, you need to unblock the code with the PUK or PUK2 code. PUK or PUK2 code These are required to unblock a PIN or PIN2 code. 16 Get started If not supplied with your SIM card, contact your service provider. This is used to identify valid phones in the network. The number can also be used to block, for example, stolen phones. You may also need to give the number to Nokia Care services. To view your IMEI number, dial *#06#. (8 digits) IMEI number (15 digits) Lock code (security) This helps you protect your phone against unauthorized use. code) You can set your phone to ask for the lock code that you (min. 4 digits) define.

Keep the code secret and in a safe place, separate from your phone. If you forget the code and your phone is locked, your phone will require service. Additional charges may apply, and all the personal data in your phone may be deleted. The personal unblocking key (PUK) code and the universal personal unblocking key (UPUK) code (8 digits) are required to change a blocked PIN code and UPIN code, respectively. The PUK2 code (8 digits) is required to change a blocked PIN2 code.

These codes are not supplied with the SIM card. Contact your local service provider for the codes. Set your phone to sync with your computer With the Zune PC app, you can sync music, videos, and pictures between your phone and your compatible computer. You can also back up and update your phone with the latest software, to improve performance and get new features. Basics 17 To download and install the latest version on your PC, or to learn more about Zune, go to www.zune.net. Tip: If you're using an Apor. Tip: You can save battery power if you use a darker background. Change the background pictures Want to view your favorite landscape or pictures of your family more often? You can change the background picture of the lock screen and the Pictures hub and live tile. Change the lock screen wallpaper > and lock+wallpaper > change wallpaper. 1 Select 2 Select a picture, adjust it to get the best possible fit, and select Change the background of the Pictures hub and live tile > choose background. 1 In the Pictures hub, select 2 Select a picture, adjust it to get the best possible fit, and select . . Tip: If you like variety, select shuffle background, and the phone will shuffle through your pictures.

Personalize your ringtone and other tones You can personalize your phone tones. Select > and ringtones+sounds. Select the type of ringtone or alert you want to change, and select the sound. Tip: You can use the Zune PC app to create ringtones from your favorite songs. Basics Make your own ringtone You can use your own sound files as ringtones. 1 2 3 4 5 6 7 23 Connect your phone to your computer with a compatible USB cable. On your computer, open Zune. Select the sound file you want to use as a ringtone. The file must be in MP3 or WMA format, and should be less than 40 seconds long and less than 1 MB in size. Right-click the file, then select Edit.

Write ringtone in the genre field, or select it from the list. Drag and drop the new ringtone to your phone. On your phone, select > and ringtones+sounds, then select your ringtone. Silence your phone When you switch silent mode on, all ringtones and alert tones are muted. Use this when you are, for example, at the cinema or in a meeting. Press a volume key to see the volume status bar, then select ring . Silent mode is switched on. If you have set your phone to vibrate, vibrate mode is switched on instead of silent mode. Set your phone to vibrate Select > and ringtones+sounds, and switch Vibrate to On . Text input Use the virtual keyboard To open the virtual keyboard, select a text input field.

You can use the virtual keyboard when holding your phone upright or on its side. 1 2 Character keys Shift key 24 Basics 3 4 5 6 7 8 Numbers and symbols key Smiley key Space key Language key. Only available when more than one writing language has been selected. Enter key Backspace key The keyboard layout can vary in different apps. Switch between upper and lower case characters Select the shift key before inserting the character. To switch caps lock mode on, select the key twice. To return to normal mode, select the shift key again. Insert a number or a special character Select the numbers and symbols key. Some of the special character keys can bring up more syay cause interference or danger. Remember to comply with any applicable safety requirements.

Increase battery life If it seems you're always looking for a charger, there are steps you can take to reduce the power consumption of your phone. The key is to find the balance between getting the most out of your phone while getting the battery life you need. . . Always charge the battery fully. Close the apps you're not using. Example: The camera viewfinder can be a power drain, so after you've finished taking pictures, press . Switch battery saver mode on. > . Tip: To check the battery status, and switch battery saver mode on, select and battery saver. Save battery with sound and screen options . Mute unnecessary sounds, such as key press sounds. . Use wired headphones, rather than the loudspeaker. Set the phone screen to switch off after a short time > and lock+wallpaper > Screen times out after.

Select Use a dark theme > and theme > Background > Dark. Select Lower the screen brightness Select > and brightness, switch Automatically adjust to Off the desired level. , and select Use network connections selectively . If you're listening to music or otherwise using your phone, but don't want to make or receive calls, switch airplane mode on. . Set your phone to check for new mail less frequently. . Switch Bluetooth on only when needed. 28 . . Calls Use a Wi-Fi connection to connect to the internet, rather than a mobile data connection. Stop your phone scanning for available Wi-Fi networks. Select > , and switch Wi-Fi to Off . Calls Call a contact On the start screen, select Search for a contact On the start screen, select > > and the contact and the number.

28 . . Calls Use a Wi-Fi connection to connect to the internet, rather than a mobile data connection. Stop your phone scanning for available Wi-Fi networks. Select > , and switch Wi-Fi to Off . Calls Call a contact On the start screen, select Search for a contact On the start screen, select > > and the contact and the number.

, and start entering the contact's name.

Call the last dialed number Trying to call someone, but they are not answering? It is easy to call them again. In the call history view, you can see information about the calls you have made and received. On the start screen, select Select . next to the name or phone number. Call your voice mailbox You can divert your incoming calls to your voice mailbox. Callers can also leave you a message if you do not answer. Voice mailbox is a network service. 1 2 3 >. Select If your phone asks for the voicemail password, enter it. You can listen or reply to voicemails, delete them, or record a greeting message.

Follow the audible instructions. Change the phone number of your voice mailbox > > call settings and the voicemail number. 1 Select 2 Enter the new number, and select save. If the voice mailbox number is automatically set by your network service provider, you do not need to change the number. Divert calls to your voice mailbox or another phone number If you cannot answer your calls, you can divert incoming calls to your voice mailbox or another phone number. Remember to set up your voice mailbox before diverting your calls there. Calls To divert an incoming call to your voice mailbox, select ignore. Divert calls to another phone number > > call settings > Call forwarding. 1 On the start screen, select 2 Enter the phone number in the Forward calls to field, and select save. To check if call divert is being used, indicated with , tap the top of the screen.

29 Call divert is a network service. For details, contact your network service provider. Make a conference call Your phone supports conference calls between two or more people. The maximum number of participants varies by the network operator. Conference call is a network service.

1 2 3 Make a call to the first participant. To make a call to another participant, select , and make the call. . When the new call is answered, to start the conference call, select Add a new participant to a conference call Make a call to another participant, and to add the new call to the conference call, select . Have a private conversation with a conference call participant Select and the person's name or phone number.

The conference call is put on hold on your phone. The other participants continue the conference call. To return to the conference call, select . 30 Contacts & social networking services End an active conference call Select end call. Silence an incoming call When a call arrives, press the volume key. Use your voice to call a contact You can use your voice to make calls with your phone. Press and hold . Say Call and the contact's name. To cancel making the call, press .

Tip: You can use your voice to make a phone call also through a Bluetooth headset.

Contacts & social networking services Contacts About the People hub You can save and organize your friends' phone numbers, addresses, and other contact information in the People hub. You can also get in touch with your friends through social networking services. The social networking services are third party services and not provided by Nokia. Check the privacy settings of the social networking service you are using as you may share information with a large group of people. The terms of use of the social networking service apply to sharing information on that service. Familiarize yourself with the terms of use and the privacy practices of that service. Using services or downloading content may cause transfer of large amounts of data, which may result in data traffic costs. Create, edit, or delete a contact You can save your friends' phone numbers, addresses, and other information to the People hub. Select People, and swipe to all. Add a new contact > new contact.

1 Select 2 If you have signed in to several accounts, select the account to which the contact is linked. Contacts & social networking services 3 4 Select a contact detail, fill in the fields, and select When you have added the details, select . . 31 Edit a contact . 1 Select the contact and 2 If the contact has several accounts linked in the contact card, select an account.

3 Select a contact detail, edit the fields, and select . Delete a contact > delete. 1 Select the contact and 2 If the contact has several accounts linked in the contact card, select an account and delete. The contact is deleted both from your phone and, with some exceptions, from the online service where it's stored. Save a number from a received call or message Have you received a call or message from a person whose phone number is not yet saved in the People hub? You can easily save the number in a new or existing contact list entry.

Save a number from a call 1 On the start screen, select 2 3 4 Select In the call history list, select a phone number and , edit the phone number and phone number type, and select Edit other contact details, including the name, and select Save a number from a message . 1 On the start screen, select 2 In the conversations list, select a conversation. 3 At the top of the conversation screen, select the phone number and 4 5 Select , edit the phone number and phone number type, and select . Edit other contact details, including the name, and select . . Search for a contact Is the People hub overflowing? Rather than scrolling through your entire contacts list, you can search, or jump to a letter of the alphabet.

You can also use a voice command to call or send a message to a contact. Select People, and swipe to all. 32 Contacts & social networking services , and start writing a name. The list filters as you write. Select Jump to a letter of the alphabet First select any letter, then the desired letter, and you jump to that point in your contacts list. Reduce the number of visible contacts > settings > filter my contact list, and select or clear the appropriate Select check boxes. Use a voice command 1 In any view, press and hold . 2 Say Call or Text and the contact's name. Tip: Pin your most important contacts or contact groups to the start screen. Select and hold a contact, then select pin to Start.

Create, edit, or delete a contact group When you have created contact groups, you can send a message to several people at the same time. For example, you can assign the members of your family to one group and reach them more easily with a single message. Select People, and swipe to all. Add a new contact group > new group. 1 Select 2 Enter a name for the group.

3 Select add a contact and a contact. To add another contact, select add a contact again. 4 Select . Edit a contact group Select the group and . Rename a group Select the group name, and enter the new name.

Add a new contact Select add a contact and a contact. Remove a contact Select the contact and remove from group > Remove. Contacts & social networking services 33 Change the preferred contact information for a contact Select the contact and the information you want to change, and when you're done, .

select Delete a contact group Select the group and > delete > delete. Link contacts Do you have contact information for the same person from different social networking services or mail accounts as separate contact entries? You can link multiple contacts so that their information is in a single contact card. Select People, and swipe to all. Link two or more contacts 1 Select the main contact you want to link to, and select 2 Select choose a contact and the contact to be linked. Unlink a contact 1 Select the main contact and . 2 Select the contact to be unlinked and unlink. Copy contacts from a SIM card to your phone If you have contacts stored on your SIM card, you can copy them to your phone.

You can add more details to contacts that are stored on your phone, such as alternative phone numbers, addresses, or a picture. Select People. Select > settings > import SIM contacts. . Social networks Set up an account Set up your social networking service accounts. Select > and email+accounts. Select add an account and the name of the service, and follow the displayed instructions. 34 Contacts & social networking services Change your profile picture When you set up a Facebook or Windows Live account on your phone, your profile picture from one of these social networking services also becomes the picture in your contact card on your phone. If you change your picture on your phone, you can update your Facebook and Windows Live profiles at the same time.

Select People, and swipe to all.
1 2 3 4 5 Select your own contact card and your picture. Select your picture again, and in the Pictures hub, select a new picture. . Drag the picture around to adjust the cropping, and select To set where to update your picture, select Post to, select or clear the check boxes, and select . Select .

See your friends' status updates After you set up social networking services on your phone, you can follow your friends' status updates in the People hub. Select People, and swipe to what's new. Post your status If you feel like reaching out to your friends, let them know what's on your mind. Post your status to the social networking services that you use. Select People, and swipe to all.

1 2 3 4 Select your own contact card and post a message. Write your message. In the Post to field, select the check box next to each account to post to, and select . Select . Write on your friend's wall In Facebook, you can contact your friends by writing on their Facebook wall or by commenting on their status updates. Select People. 1 2 3 Swipe to all. Select a Facebook friend's profile and write on wall. . Write your message, and select Internet Comment on a friend's post 1 Swipe to what's new.

Recent posts from your friends are displayed. 2 On the post, select . 3 Write your comment, and select . 35 Upload a picture to a service After you take a picture, upload it to the web so all your friends can see what you're up to. You can also set up your phone to upload pictures automatically to social networking services. Select Pictures. 1 2 3 4 Browse your photo albums for the picture you want to share. Select and hold the picture, and select share... . Select the sharing method. You can send it in a text message or mail, or upload it to social networking services. . Add a picture caption if you want, and select Internet Internet connections Define how your phone connects to the internet Does your network service provider charge you a fixed fee for data transfer, or on a pay as you use basis? To use the optimal connection method, change the Wi-Fi and mobile data settings.

Select > . Use a Wi-Fi connection Select Wi-Fi and the connection you want to use. Using a Wi-Fi connection is generally faster and less expensive than using a mobile data connection. If both Wi-Fi and mobile data connections are available, your phone uses the Wi-Fi connection. Use a mobile data connection 1 Select cellular.

2 Switch Data connection to On . Use a mobile data connection when roaming Select cellular > Data roaming options > roam. 36 Internet Data roaming means using your phone to receive data over networks that your network service provider doesn't own or operate. Connecting to the internet when roaming, especially when abroad, can raise data costs substantially. Mobile data access points are usually sent to you by your network service provider. You can manually add access points. Manually add a mobile data access point 1 Select cellular > add APN. 2 Write the APN address in the APN field. 3 Type in the username and password for your mobile data account. 4 If the APN uses a proxy server, write the address and port number in the appropriate fields.

About Wi-Fi connections > and Wi-Fi. Select Tip: Your phone periodically checks for and notifies of available connections. The notification appears briefly at the top of the screen. To manage your Wi-Fi connections, select the notification. Important: Use encryption to increase the security of your Wi-Fi connection. Using encryption reduces the risk of others accessing your data. Note: Using Wi-Fi may be restricted in some countries. For example, in France, you are only allowed to use Wi-Fi indoors. For more information, contact your local authorities. Connect to a Wi-Fi network Connecting to a Wi-Fi network is a handy way of accessing the internet.

When out and about, you can connect to Wi-Fi networks in public places, such as a library or internet café. Select 1 2 > and Wi-Fi. . Make sure Wi-Fi networking is switched to On Select the desired Wi-Fi connection. Connect to a hidden Wi-Fi 1 Make sure Wi-Fi networking is switched to On 2 Select advanced > .

. Internet 3 Enter the network name, and select add. . 37 Close the Wi-Fi connection Switch Wi-Fi networking to Off Close a network connection If an app in the background is using an internet connection, you can close the connection without closing the app. Select > .

Close all mobile data connections 1 Select cellular. 2 Switch Data connection to Off . Close all Wi-Fi connections 1 Select Wi-Fi. 2 Switch Wi-Fi networking to Off . Close all network connections 1 Select airplane mode. 2 Switch Status to On . Internet About the web browser Select . Catch up on the news, and visit your favorite websites. You can use Internet Explorer 9 Mobile in your phone to view web pages on the internet. To browse the web, you must be connected to the internet.

Browse the web Select . Tip: If you do not have a flat-rate data plan from your network service provider, to save data costs in your phone bill, you can use a Wi-Fi network to connect to the internet. Go to a website Select the address bar, enter a web address, and select . 38 Internet Search the internet Select the address bar, and enter a search word. Zoom in or out Place two fingers on the screen, and slide your fingers apart or together. Tip: To quickly zoom in on a section of a web page, double-tap the screen. To zoom out, double-tap the screen again. You can open up to 6 browser tabs at the same time and switch between them.

Open a new tab > tabs > Select . Switch between tabs > tabs and a tab.

Select Close a tab Select . Send a web link > share page and the sharing method. Select A cache is a memory location that is used to store data temporarily. If you have, or have tried to, access confidential information or a secure service, requiring passwords, clear the cache after each use. Empty the cache > settings > delete history.

Select Add a website to your favorites If you visit the same websites all the time, add them to your favorites, so you can easily access them. Select . > add to favorites. While browsing, select Go to a favorite website > favorites and a website. Select Messaging & mail 39 Tip: You can also pin your favorite websites to the start screen.

While browsing the > pin to start. website, select Messaging & mail Messages About Messaging Select . You can send and receive different kinds of messages: . . . Text messages Multimedia messages that contain your pictures Instant messages (network service) Messages and chats between you and a particular contact are arranged into conversations. When you want to get in touch with a contact, your phone can help you pick the best method. If the contact is signed in to a chat service, you can send an instant message. Otherwise, a text message can be sent instead. If you make contact groups containing, for example, family or colleagues, you can send a message to a group. You can send text messages that are longer than the character limit for a single message. Longer messages are sent as two or more messages. Your service provider may charge accordingly.

Characters with accents, other marks, or some language options, take more space, limiting the number of characters that can be sent in a single message. Using services or downloading content may cause transfer of large amounts of data, which may result in data traffic costs. Send a message With text and multimedia messages, you can quickly contact your friends and family. In a multimedia message, you can attach your pictures. Select 1 2 3 . . Select Select and a contact. You can add more than one recipient. Select the message field, and write your message. 40 4 5 Messaging & mail To add an attachment, select To send the message, select .

and the file. Reply to a message 1 Select the conversation containing the message. 2 Select the message field, write your reply, and select Forward a message 1 Select the conversation containing the message. 2 Select and hold the message, and select forward. 3 Select the recipients.

4 Select the message field and . . Sending a message with an attachment may be more expensive than sending a normal text message. For more information, contact your service provider. If the item you insert in a multimedia message is too large for the network, the device may automatically reduce the size. Only compatible devices can receive and display multimedia messages. Messages may look different in different devices. Send a message to a group of people Would you like to send a message to all your family members? If you have assigned them to a group, you can send a text message or mail to all of them at the same time. Select People. Select the group and text or send email, and write and send your message. Chat with your friends Select . You need a Windows Live account to chat. Before starting to chat, set up a chat service. Swipe left to online, then follow the instructions shown on the phone. 1 2 3 Sign in to a chat service, if not signed in already.

In the People hub, select the contact you want to chat with. You can also chat with a group of people. Write your message, then select . Messaging & mail 41

View a conversation You can see the messages you have sent to and received from a particular contact in a single conversation thread, and continue the conversation from that thread. The thread can contain text messages, multimedia messages, and instant messages. On the start screen, select and the conversation. Reply to a message in a conversation Select the message field, write your reply, and send the message. Delete a conversation Select threads, select and hold the conversation, and select delete. When you send a new message, it is added to the current conversation. If no conversation exists, a new conversation is started.

When you open a received message from the start screen, the message opens in the conversation. Mail About Mail On the start screen, select a mailbox. You can use your phone to read and reply to mail when you are on the go. You can also combine mailboxes, so you can see all your mail in a unified inbox. Mails are organized into conversations.

Add a mailbox You can add several mailboxes to your phone. Select 1 2 3 > > email+accounts. Select add an account and an account. Enter your username and password in the appropriate fields. Select sign in.

Delete a mailbox Select and hold the mailbox, and select delete. View several mailboxes in a unified inbox If you have more than one mail account, you can choose which inboxes you want to link together in a unified inbox. The unified inbox lets you see all your mail at a glance. 42 Messaging & mail Link inboxes 1 On the start screen, select a mailbox. > link inboxes. 2 Select 3 In the other inboxes list, select the inboxes you want to link to the first one. 4 Select rename linked inbox, enter a new name, and select . The new unified inbox is pinned to the start screen. Unlink inboxes 1 On the start screen, select a unified inbox. > linked inboxes.

2 Select 3 In the this inbox list, select the inboxes you want to unlink and unlink. Read a received mail You can use your phone to read and reply to mail. On the start screen, select a mailbox. In the inbox, select the mail. Tip: To zoom in or out, place two fingers on the screen, and slide them together or apart. Open or save an attachment Select the attachment and the appropriate option. If there is more than one attachment, you can save them all at once. Reply to the mail . Select To reply to the sender only, select reply. To reply to the sender and all other recipients, select reply all.

Forward the mail Select forward. Delete a mail Open the mail, and select . Delete several mails at once In the inbox, tap to the left of a mail you want to delete. Select the check boxes that . appear next to the mails, and select Camera 43 Tip: If a mail contains a web address, to open the address in the phone web browser, select the address.

Send a mail You can use your phone to write and send mail, and attach files to your mail. On the start screen, select a mailbox. 1 2 3 4 5 6 7 Select . To add a recipient from the People hub, select in the To: field. To remove a recipient, select their name or mail address, and select Remove.

Enter a subject in the Subject: field. Write your mail. To attach a file, select . To send the mail, select . Open mail from the start screen You can have several mailboxes pinned to the start screen. For example, dedicate a tile for business mail and another for free time.

Assisted GPS (A-GPS) is a network service that sends you GPS data, improving the speed of the positioning.

Wi-Fi positioning improves position accuracy when GPS signals are not available, especially when you are indoors or between tall buildings. With cellular positioning, the position is determined through the cellular network antenna your phone is currently connected to. To save on data costs, you can switch A-GPS off in your phone positioning settings, but calculating your location may take much longer. You can also switch Wi-Fi and cellular positioning off in your phone settings. However, this prevents you from using positioning-related applications, such as Bing Maps. Depending on the available positioning methods, the accuracy of positioning may vary from a few meters to several kilometers. The availability and quality of GPS signals may be affected by your location, satellite positions, buildings, natural obstacles, weather conditions, and adjustments to GPS satellites made by the United States government. GPS signals may not be available inside buildings or underground. Do not use GPS for precise location measurement, and never rely solely on the location information provided by GPS and cellular networks. Switch location services on Applications can use your location information to offer you a wider variety of services.

Maps shows you your location and provides directions, and the camera can save your location to the pictures you take. Maps & navigation Select > . . 57 Select location, and switch Location services to On Bing Maps About Bing Maps > Maps. Select Office Change the cell and text format > format cell.... Select Find data from a workbook .

Select the Excel file and Send a workbook in a mail Select the Excel file and > share.... 65 Write a note Notes on paper are easy to lose. Instead of jotting them down on paper, you can write your notes with Microsoft OneNote Mobile. This way, you always have your notes with you. You can also sync your notes to Windows Live SkyDrive and view and edit them with OneNote on your phone, on your computer, or online in a web browser. Select 1 2 3 4 5 6 > Office, and swipe to notes. Select .

Write your note. To format the text, select To add a picture, select . > format. To record a sound clip, select . To save the changes, press . If you have a Windows Live ID set up on your phone, your changes will be saved and synched to your default Personal (Web) notebook on Windows Live SkyDrive. Otherwise, your changes will be saved on your phone. Send a note in a mail . Select the note and Tip: To access an important note quickly, you can pin it to the start screen. In the Office hub, select and hold the note, and select pin to start.

View and edit a PowerPoint presentation Add the finishing touches to your presentation en route to your meeting, with Microsoft PowerPoint Mobile. Select > Office, and swipe to documents. 66 1 2 3 4 5 6 Office Select a PowerPoint file, and turn your phone on its side, so it is in landscape mode. To browse between slides, swipe left or right. To go to a specific slide, select and the name of the slide.

To add a note to a slide, select To edit a slide, select . To save your presentation, select . > save. > share..

.. Send a presentation in a mail Select the PowerPoint file and Watch a PowerPoint broadcast You can attend a meeting on the go and watch a PowerPoint presentation broadcast over the internet on your phone. Open the mail containing the link to the broadcast presentation, and select the link. Share documents with SharePoint Workspace Mobile Work on shared Microsoft Office documents, and collaborate on projects, schedules, and ideas. With Microsoft SharePoint Workspace Mobile, you can browse, send, edit, and synchronize your documents online. Select 1 2 3 4 > Office, and swipe to locations. . Select SharePoint, enter the web address for a SharePoint site, and select When you select a document, a copy is downloaded to your phone. View or edit the document, and save your changes.

To return to SharePoint Workspace Mobile, press . Tip: To keep an offline copy of a document on your phone, select and hold the document, and select always keep offline. Store a file to Windows Live Skydrive Store, access, and share your Microsoft Office files on Windows Live SkyDrive. You can upload files saved on your phone to SkyDrive for easy access from both your phone and computer. To upload files, you need to be signed in to your Windows Live account. 1 2 > Office, then swipe to locations. Select Select Phone. Connectivity & phone management 3 Select and hold a file, then select share. 67 Use the calculator > Calculator. Select To use the basic calculator, hold your phone upright.

To use the scientific calculator, turn your phone on its side. 1 2 3 4 Enter the first number of the calculation. Select a function, such as add or subtract. Enter the second number of the calculation. Select =.

This feature is designed for personal use. Accuracy may be limited. Connectivity & phone management Bluetooth About Bluetooth connectivity > and Bluetooth. Select You can connect wirelessly to other compatible devices, such as phones, computers, headsets, and car kits. Since devices with Bluetooth wireless technology communicate using radio waves, they do not need to be in direct line-of-sight.

However, they must be within 10 meters (33 feet) of each other, although the connection may be subject to interference from obstructions such as walls or from other electronic devices. Paired devices can connect to your phone when Bluetooth is switched on. Other devices can detect your phone only if the Bluetooth settings view is open. 68 Connectivity & phone management Do not pair with or accept connection requests from an unknown device. This helps to protect your phone from harmful content. Connect to a wireless headset With a wireless headset, you can answer a call even if your phone is not directly at hand, and you can have your hands free, for example, to continue working at your computer during a call. Wireless headsets are available separately. Select 1 2 3 4 > and Bluetooth. Switch Searching and discoverable to On . Make sure that the accessory you want to pair is on.

To pair your phone and the headset, select the headset from the list. You may need to enter a passcode. For details, see the user guide of the headset. Select done. Copy a picture or other content between your phone and PC You can use the Zune PC app to copy pictures, videos, music, and other content created by you between your phone and a PC. 1 2 Use a compatible USB data cable to connect your phone to a compatible PC. On your PC, open Zune. For more information, see the Zune help. You can download the latest version of Zune from www.zune.net.

net. Keep your phone software and applications up to date About phone software and app updates Stay in step with the beat update your phone software and apps to get new and enhanced features for your phone. Updating the software may also improve your phone performance. Warning: If you install a software update, you cannot use the device, even to make emergency calls, until the installation is completed and the device is restarted. After the update, the instructions in the user guide may no longer be up to date.

You may find the updated user guide at www.nokia.com/support. Update your phone software Use the Zune PC app to update your phone software for new features and improved performance. When you update your phone software with Zune, your personal content is not deleted from your phone.

Connectivity & phone management You need: The Zune app A compatible computer A high-speed internet connection A compatible USB data cable 69 To download and install Zune to your PC, go to www.zune.net. Tip: If you're using an Apple Mac, download Windows Phone 7 Connector for Mac from Mac App Store. Before starting the update, make sure your phone has enough battery power.
