21 3 For your safety For your safety Read these simple guidelines. Not following them may be dangerous or illegal. Read the complete user guide for further information. ROAD SAFETY COMES FIRST Obey all local laws. Always keep your hands free to operate the vehicle while driving. Your first consideration while driving should be road safety. INTERFERENCE All wireless devices may be susceptible to interference, which could affect performance. 4 Introduction

1. Introduction With the Nokia Speakerphone HF-510, you can make and answer calls hands free. You can also copy the phonebook of your compatible mobile device to the speakerphone and view the copied contacts on the built-in display to make calls.

You can connect the speakerphone to a compatible mobile device that supports Bluetooth wireless technology. Read this user guide carefully before using the speakerphone. Also, read the user guide for the device that you connect to the speakerphone. For the latest version of the user guide and additional information related to your Nokia product, see www.nokia.com/support or your local Nokia website.

This product may contain small parts. Keep them out of the reach of small children. The surface of this device does not contain nickel in the platings. The surface of this device contains stainless steel.

Bluetooth wireless technology In a Bluetooth connection, the mobile device and the speakerphone should be within 10 meters (33 feet) of each other. Connections can be subject to interference from other electronic devices. The speakerphone is compliant with the Bluetooth Specification 2.1 supporting the Hands-Free Profile (HFP) 1.5, Phone Book Access Profile (PBAP) 1.1, and Object Push Profile (OPP) 1.1. Check with the manufacturers of other devices to determine their compatibility with this device. 5 Get started 2. Get started The speakerphone contains the following parts: 1.

Power key 2. Microphone 3. Speaker 4. Display 5. Volume wheel 6. Indicator light 7. Answer/end key 8. Charger connector Before using the speakerphone, you must charge the battery and pair the speakerphone with a compatible device. 2 3 1 5 4 8 7 6 Parts of the speakerphone are magnetic. Metallic materials may be attracted to the speakerphone.

Do not place credit cards or other magnetic storage media near the speakerphone, because information stored on them may be erased. Charge the battery Before charging the battery, carefully read "Battery and charger information", p. 18. Warning: Use only chargers approved by Nokia for use with this particular model. The use of any other types may invalidate any approval or warranty, and may be dangerous.

When you disconnect the power cord of any accessory, grasp and pull the plug, not the cord. 1. Connect the charger cable to the charger connector. 2. Connect the charger to the power source.

For example, connect the DC-4 charger to the cigarette lighter socket of your car or the AC-5 6 Get started charger to a wall outlet. During charging, a battery animation scrolls on the display and the red indicator light is displayed. Charging the battery fully may take up to 2 hours and 10 minutes. If you use a charger that is connected to the cigarette lighter socket, power must be supplied by a 12-volt car battery. Ensure that the charger is properly inserted in the cigarette lighter socket and does not interfere with the normal operation of the car. In some car models, the cigarette lighter socket is powered by the car battery even when you remove the ignition key. In those cases, the car battery might be discharged even if the speakerphone is not in use. For more information, contact the vehicle manufacturer. 3. When the battery is fully charged, the speakerphone beeps and is displayed.

Disconnect the charger from the speakerphone, then from the power source. The fully charged battery has power for up to 30 hours of talk time or up to 180 hours of standby time. To check the battery charge when the speakerphone is not connected to a charger, see the battery indicator on the display. When the battery is fully charged, is displayed. When the battery charge is low, is displayed, the red indicator light flashes slowly, and the speakerphone beeps about

every 5 minutes. Recharge the battery. Switch on or off Switch on To switch on, press the power key. The speakerphone plays an ascending sequence of beeps, the green indicator light flashes once, and the display turns on. The speakerphone tries to connect to the device that was last connected to it (is displayed).
When the speakerphone is connected to your device and ready for use, the battery indicator and the Bluetooth name of the device is displayed.

SPEAKERPHONE HF-510 user guide](http://yourpdfguides.com/dref/2737740)
<http://yourpdfguides.com/dref/2737740>

7 Get started Switch off To switch off, press the power key. The speakerphone plays a descending sequence of beeps, the red indicator light flashes once, and the display turns off. If the speakerphone is not connected to a device within about 30 minutes, it switches off automatically. The display is automatically dimmed if the speakerphone is not used within about 10 seconds to save power. Pair and connect with another device 1.

Ensure that the speakerphone is switched off and your mobile device is switched on. 2. If you have not previously paired the speakerphone with a device, switch on the speakerphone. The speakerphone enters pairing mode, and is displayed. If you have previously paired the speakerphone with another device, switch off the device, and switch on the speakerphone.

3. Within about 5 minutes, activate the Bluetooth feature on the mobile device, and set the device to search for Bluetooth devices. For details, see the user guide of your device. 4. On your device, select the speakerphone (Nokia HF-510) from the list of found devices. 5.

Alternatively, switch the speakerphone off and back on. Alternatively, rotate the speakerphone clockwise until it locks into place (2). (To detach the speakerphone, rotate it anticlockwise.) 2.

3. Thread the strap through the slot on the clip (4). 4. Fold the sunvisor up against the car roof (5). Attach to a windscreen You can store phone numbers saved in your device and you want three particular numbers to be copied to the speakerphone, save the three numbers as a new contact in your device. 14 Basic use Make or end a call To make a call from your mobile device that is connected to the speakerphone, use the device in the normal way.

Speak towards the speakerphone. During a call, is displayed. To call a number that you have copied to the speakerphone, turn the volume wheel when no call is in progress. If the name of the contact contains Latin characters, scroll to the initial letter, press the answer/end key, and scroll to the name.

If the name does not contain Latin characters, scroll to the name, and press the answer/end key. To make the call, scroll to the desired number, and press the answer/end key. To exit from the contacts, scroll to , and press the answer/end key; alternatively, wait for 10 seconds, or press the answer/end key twice. Call a recently dialled number To redial the number you last called (if your device supports this feature with the speakerphone), press the answer/end key twice when no call is in progress. Voice dialling To activate voice dialling (if your device supports this feature with the speakerphone), press and hold the answer/end key for about 2 seconds when no call is in progress.

When is displayed, say the voice tag of the desired contact clearly. For voice dialling, you must save voice tags for the desired contacts in your mobile device. For details, see the user guide of your device. End a call To end a call or cancel a call attempt, press the answer/end key. 15 Basic use Answer or reject a call

When you receive a call, you hear a ringing tone through the speakerphone.

The caller's number is displayed on the speakerphone if the cellular network supports this function. The name saved with the number is displayed if you have copied the name and number to the speakerphone. If the name and number are not available, only is displayed. To answer the call, press the answer/end key. To reject the call, press the answer/end key twice. Adjust volume To increase the speakerphone volume during a call, turn the volume wheel right. To decrease the volume, turn the wheel left. The volume level is displayed on the speakerphone. Warning: Do not hold the device near your ear when the loudspeaker is in use, because the volume may be extremely loud. Switch a call to the connected device To switch a call from the speakerphone to the connected device, switch off the speakerphone, or press and hold the answer/end key for about 2 seconds.

When the call is switched to the connected device, is displayed. To switch the call back to the speakerphone, switch on the speakerphone (if it is off), or press and hold the answer/end key for about 2 seconds. Clear settings or reset To clear the pairing settings and copied contacts from the speakerphone, press and hold the power key and the answer/end key (for over 4 seconds) until the red and green indicator lights start to alternate and is displayed. After the settings are cleared, the speakerphone enters pairing mode. 16 Basic use To reset the speakerphone if it stops functioning even though it is charged, connect the speakerphone to a charger while you press and hold the answer/end key. Troubleshooting If you cannot connect the speakerphone to your compatible device, do the following:

· Ensure that the speakerphone is charged, switched on, and paired with your device. · Ensure that the Bluetooth feature is activated on your device. · Ensure that the speakerphone is within 10 metres (33 feet) of your device and that there are no other electronic devices between the speakerphone and the device. If the name of the person who is calling you is not shown on the speakerphone display, even though it is saved in the connected mobile device, check that the device supports the PBAP Bluetooth profile and that the cellular network provides the caller's number. 17 Battery and charger information 5.

Battery and charger information This device has an internal, nonremovable, rechargeable battery. Do not attempt to remove the battery from the device as you may damage the device. This device is intended for use when supplied with power from the following chargers: AC-3, AC-4, AC-5, and DC-4. The exact charger model number may vary depending on the type of plug. The plug variant is identified by one of the following: E, EB, X, AR, U, A, C, or UB.

The battery can be charged and discharged hundreds of times, but it will eventually wear out. Recharge your battery only with Nokia approved chargers designated for this device. Use of an unapproved charger may present a risk of fire, explosion, leakage, or other hazard. If a battery is being used for the first time or if the battery has not been used for a prolonged period, it may be necessary to connect the charger, then disconnect and reconnect it to begin charging the battery. If the battery is completely discharged, it may take several minutes before the charging indicator light is displayed.

Unplug the charger from the electrical plug and the device when not in use. Do not leave a fully charged battery connected to a charger, since overcharging may shorten its lifetime. If left unused, a fully charged battery will lose its charge over time. Always try to keep the battery between 15°C and 25°C (59°F and 77°F). Extreme temperatures reduce the capacity and lifetime of the battery. A device with a hot or cold battery may not work temporarily. Battery performance is particularly limited in temperatures well below freezing.

[You're reading an excerpt. Click here to read official NOKIA SPEAKERPHONE HF-510 user guide](http://yourpdfguides.com/dref/2737740)
<http://yourpdfguides.com/dref/2737740>

Do not dispose of batteries in a fire as they may explode. Batteries may also explode if damaged. Never use any charger that is damaged.

•••••••••• Keep the device dry. Precipitation, humidity, and all types of liquids or moisture can contain minerals that will corrode electronic circuits. If your device does get wet, allow it to dry completely. • Do not use or store the device in dusty, dirty areas. Its moving parts and electronic components can be damaged. • Do not store the device in hot areas. High temperatures can shorten the life of electronic devices, damage batteries, and warp or melt certain plastics. • Do not store the device in cold areas. When the device returns to its normal temperature, moisture can form inside the device and damage electronic circuit boards. • Do not attempt to open the device.

• Do not drop, knock, or shake the device. Rough handling can break internal circuit boards and fine mechanics. • Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the device. • Do not paint the device. Paint can clog the moving parts, microphone, or speaker and prevent proper operation.

These suggestions apply equally to your device, charger, or any accessory. If any device is not working properly, take it to the nearest authorised service facility for service. Recycle The crossed-out wheeled-bin symbol on your product, battery, literature, or packaging reminds you that all electrical and electronic products, batteries, and accumulators must be taken to separate collection at the end of their working life. This requirement applies in the European Union. Do not dispose of these products as unsorted municipal waste.

For more environmental information, see the product Eco-Declarations at www.nokia.com/environment. Always return your used electronic products, batteries, and packaging materials to a dedicated collection point. This way you help prevent uncontrolled waste disposal and promote the recycling of materials. More detailed information is available from the product retailer, local waste authorities, national producer 19 Care and maintenance responsibility organisations, or your local Nokia representative. Check how to recycle your Nokia products at www.nokia.com/werecycle, or if browsing on a mobile device, www.nokia.com/werecycle.

Additional safety information Additional safety information Vehicles RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles such as electronic fuel injection systems, electronic antiskid (antilock) braking systems, electronic speed control systems, and air bag systems. For more information, check with the manufacturer, or its representative, of your vehicle or any equipment that has been added. Faulty installation or service may be dangerous and may invalidate any warranty that may apply to the device. Check regularly that all wireless device equipment in your vehicle is mounted and operating properly. Do not store or carry flammable liquids, gases, or explosive materials in the same compartment as the device, its parts, or enhancements. For vehicles equipped with an air bag, remember that air bags inflate with great force. Do not place objects, including installed or portable wireless equipment in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result. 21 .
