Manual abstract:

Use only a damp cloth; do not use liquid or aerosol cleaners. Place your product on a firm, solid surface. If you put it on something unsteady, it may fall and be damaged. Protect your product from overheating. Make sure no obstructions block the openings of the product. Do not put the product on or near a heat source (such as a radiator or heat register). Keep the product out of direct sunlight. Always use this product in a well ventilated area. Allow enough room around the product for adequate ventilation and easy access to the paper trays. If you put the product in any kind of enclosure, make sure the enclosure is well ventilated.

Do not use your product near water. Do not spill liquid of any kind into it. Be certain that your power source matches the rating listed on the back of the product. If you are not sure, check with your dealer or with your local power company. Do not connect this product to an uninterruptible power supply (UPS).

This plug only fits into a grounded outlet. If the plug does not fit, the outlet may be an older, non-grounded type. Contact an electrician to have the outlet replaced. Do not use an adapter to defeat the grounding. Install the product near an easily accessed power outlet.

Avoid damaging the power cord. Do not put anything on it or place it where it will be walked on. If the cord becomes damaged or frayed, replace it immediately. If you are using an extension cord or power strip with the product, make sure that the total of the amperes required by all the equipment on the extension is less than the extension's rating. The total ratings of all equipment plugged into the outlet should not exceed 15 amperes. Do not poke anything into the ventilation slots of the product. You could get an electrical shock or cause hazardous electrical arcing, which could cause a fire. Aside from the routine maintenance described in the documentation, do not try to service the product yourself. Removing the cover may expose you to shocks or other hazards. Do not make any adjustments other than those outlined in the documentation.

You may cause damage that will require extensive repair work. Here are some of the things to look for. The power cord or plug is frayed or damaged. The product does not function normally when you are following the operating instructions. 2 - English Safety Information, 220/240-Volt Models This product has been carefully designed to give years of safe, reliable performance. As with all electrical equipment, however, there are a few basic precautions that should be taken to avoid injury or damage: Ensure this and all other documentation is both read carefully and retained for future reference. Ensure all warning and instruction labels on the product are read, understood and followed in order to prevent any risk of injury. This product may be heavy. Please check the weight of the product and take all necessary precautions to prevent the risk of personal injury. The product must be placed on a flat solid surface strong enough to support its weight to prevent any risk of injury.

Ensure that there is adequate ventilation all around the product to prevent overheating and any risk of fire. Keep the product away from direct heat sources such as radiators and out of direct sunlight to prevent any risk of overheating. The power supply required for this product is 220-240 VAC, 50/60 Hz. (For any DC powered product, the figures are 9.) Refer to your product's rating label on the machine for full power rating details.

Ensure that you have a suitable power supply before connecting the product. If in doubt contact your dealer or check with your local power provider. Ensure both the product and mains power switches are in the OFF position before connecting the AC power cable. Do not connect or disconnect the power plug with a wet hand as this may cause electric shock. Always hold the power plug to connect/disconnect the power cable to/from the mains socket.

Unplugging by pulling on the cable can cause fraying and may lead to fire or electric shock. This product has an earthed plug as a safety feature and will only connect to an earthed socket. Otherwise, fire or shock may occur. Use only the power cable supplied. When the product cover is open, do not touch the fuser unit or print head as you may receive burns. Allow it to cool before touching. If the product casing gets extremely hot or smoke, unusual smells or abnormal noises are emitted from the product, there is a risk of fire. Unplug the mains connector and contact your dealer. If the product has been knocked over or damaged, there is a risk of electric shock, fire and/or injury. Unplug the mains connector and contact your dealer.

If any liquid (for example water) is allowed to enter the product, there is a risk of fire. Unplug the mains connector and contact your dealer. Do not place containers containing liquid on the product as electric shock, fire and/or injuries may occur. If any foreign objects (for example clips) are allowed to enter the product, there is a risk of electric shock, fire and/or injury. Unplug the mains connector before removing the object. Do not introduce foreign objects into the ventilation holes or operate this product with any covers open or doors removed as electric shock, fire and/or injuries may occur. Do not use an extremely flammable spray near the product as the product contains high temperature parts that may cause a fire. Switch the product off before cleaning to prevent any risk of injury. Ensure loose clothing and hair is kept clear of moving parts when the product is in operation to prevent possible risk of injury. Do not carry out any operations on the product that are not specified in the User's Guide.

this may result in electric shock, fire and/or injury. Do not touch the battery if one is fitted to the product. There is a risk of explosion if the battery is replaced by an incorrect type. The product battery should not require replacement during the life of the product. Do not throw toner cartridges or image drum cartridges into a fire as you may receive burns from a dust explosion.

After installing additional memory, hard disk drive, or any other internally fitted option, any covers removed or doors opened must be closed or replaced and secured to prevent risk of fire. The acoustic noise of this product is less than 70 dB (A) as measured in accordance with EN ISO 7779. The operating condition range for your product is: 10 to 32°C and 20 to 80% RH. Operation of the product outside this range could result in damage to the product. if a scanner, finisher etc.

Is fitted, exercise care when moving these items so as to avoid risk of entrapment or personal injury. If the product is installed on a cabinet or high capacity feeder, ensure wheel locks are applied once placed in final position for use, to prevent risk of movement or injury.
