<http://yourpdfguides.com/dref/4936459>

□□ Teletext Digital text service Digital text services (MHEG) differ greatly from analogue teletext.

When you switch to a digital text service, the images you see can contain graphics and text, laid out and controlled in a manner decided by the broadcaster. 1. Select DVB with TV □□ DVB programmes may have digital text services (MHEG). 2. Switch to a digital text service with TEXT □□ How to operate services In all cases, it is possible to navigate the pages using buttons on the remote control, but because the commands available must apply to all manufacturers of digital equipment, some on-screen commands may not correspond exactly to the remote control buttons. □□ To exit a digital text service TEXT = Note = □□

As soon as you switch to a digital channel with links to a digital text service, software is downloaded in the background over air to enable the teletext function. This means that when switching to a digital channel, you should wait for approximately 5 seconds before pressing TEXT - this will allow the software to be downloaded. If you press TEXT before download is complete, it will be ignored and you will have to press TEXT again when the download is complete. While navigating digital text service, you will find there is a short delay when moving between pages while the page downloads. There is often a prompt shown on the page (for example "Loading") to let you know that this is happening.

- 38 - □□ Viewing Teletext 1. Switch to teletext with TEXT □□ Displays the index page (content varies depending on the broadcasters). Current / sub page numbers are displayed on the top left of the screen. Time / date is displayed on the top right of the screen. Colour bar is displayed on the bottom of the screen. / or □□ □□ □□ 2. Select the page with numeric buttons, (Coloured buttons) □□ To adjust contrast 1) Press MENU three times to display Contrast 2) Adjust with / and press OK to set □□ To exit teletext EXIT □□ Reveal hidden data 1. Press MENU 2. Reveal with □□ (red) Press again to rehide. □□ To view a favourite page stored Press STTL to view a favourite page.

□□ □□ Call up the page stored on (blue) (List mode). (blue) (List mode). Factory setting is "P888" (subtitle service) on □□ FULL / TOP / BOTTOM 1. Press MENU 2. Press (green) to change the layout □□ Watch TV and teletext in two windows at once 1.

Press TEXT to view in multi window □□ Operations can be made only in teletext screen. - 39 - 2. Press TEXT repeatedly to return to TV or teletext □□ Store frequently viewed pages in the colour bar (List mode) 1. Press 2. Press and hold OK □□ □□ □□ (Coloured buttons) while the page is displayed The stored page number changes to white.

If you use Subtitles, do not change number on To change stored pages 1) Press (Coloured buttons) to change 2) Enter a new page number with numeric buttons (blue). 3) Press and hold OK □□ View sub page The number of sub pages is displayed on the top of the screen. Press to view sub page. (Only when teletext has more than one page.) □□ / The number of sub pages varies depending on the broadcasters (up to 79 pages). Searching may take time while you are watching TV. To view a specific sub page 1) Press MENU 2) Press (blue) ) 3) Enter the 4-digit number (e.g. P6, press □□ □□ Teletext mode Teletext services are the text information provided by the broadcasters. □□ □□ The features may vary depending on the broadcasters.

The availability of teletext services for a programme is indicated by TEXT in the information banner. Display Settings / Teletext with / and press OK to 1. Display the menu with MENU 2. Select Setup access settings S 3. Select FASTEXT / List with Setup and press OK to set Display Settings - 40 - □□ FASTEXT mode In FASTEXT mode, four differently coloured subjects are situated on the bottom of the screen. To access more information about one of these subjects, press the appropriate coloured button. This facility enables fast access to information on the subjects shown. □□ List mode In List mode, four differently coloured page numbers are situated on the bottom of the screen. Each of these numbers can be changed and stored in the TV's memory. atching W Teletext

Viewing Teletext Tuning and editing channels Setting menu You can retune channels, create your favourite channel lists, skip unwanted channels, etc. 1. Select DVB or Analogue with TV 2. [TX-L32E6B user guide](http://yourpdfguides.com/dref/4936459)

<http://yourpdfguides.com/dref/4936459>

Auto Setup Automatically retunes the channels received in the area.   This function is available if channel tuning is already performed. Only the selected mode is returned. All the previous tuning settings are erased. If Child Lock PIN number has been set, the PIN number is required. **Functions** F Child Lock PIN number   If tuning has not been done completely, set Manual Tuning. **atching W Tuning and editing channels Manual Tuning**  DVB, Analogue channels 1. Select Auto Setup with / and press OK to access 2.

The confirmation screen is displayed and press OK to start Auto Setup (Settings are made automatically)   When the operation is completed, the channel at the lowest position will be displayed.   Auto Setup using the buttons on the TV 1. Press and hold INPUT/OK/HOLD for MENU button for 3 seconds to display the menu 2. Set Auto Setup with following control panel buttons   Move the cursor / select from a range of options / select the menu item (up and down only)   Access the menu / store settings after adjustments have been made or options have been set with INPUT/OK/HOLD for MENU button. Channel Sorting by Region You can sort DVB channels so that those with the best signal quality, or those for your preferred region, appear nearer the top of your Channel List.

(UK only) 1. Select the region with / and press OK to access - 44 - 2. Select repeatedly until you reach the available region   Normally, you should select Best signal quality (All Regions). If you choose to select your preferred region, you could find channels with a weaker signal appear nearer the top of your Channel List. If you have any image or sound problems, select Best signal quality (All Regions) instead.

Manual Tuning   Normally use Auto Setup or Update Channel List to retune DVB channels. If tuning has not been done completely or for adjusting the direction of the aerial, use this function. (DVB) All DVB channels found will be added to Channel List.   DVB (UK) 1. Select Frequency with 2. Press OK to search  / All channels found will be added to the Channel List.   DVB (Ireland) 1. Select a channel with channel  / and adjust frequency with / for each Set where the level of Signal Quality becomes the maximum. 2. Press OK to search   Analogue Set Analogue channel manually after Auto Setup.

1. Select the channel position with numeric buttons 2. Select the channel with Channel Up / Down button 3. Search with  / and press OK to set 4. Select Store with Use Fine Tuning to make small adjustments to the tuning of an individual programme (affected by weather conditions, etc.). - 45 - - Ireland only   If a VCR is connected only with the RF cable, select channel position 0. Update Channel List By updating the DVB channel list, you can add new channels, delete removed channels or change channel names and positions automatically.   The channel list is updated while keeping your settings in Favourites Edit, Channel List, Child Lock, etc. Depending on the signal condition, the update may not work properly.

New Channel Message Selects whether to give a notification message when a new DVB channel is found or not.   When a notification message appears, you can perform Update Channel List pressing OK. Signal Condition Selects a channel and checks the signal condition. A good Signal Strength is not an indication of suitable signal for DVB reception.   Use the Signal Quality indicator as follows.

- Green bar: Good - Yellow bar: Poor - Red bar: Bad (Check the terrestrial aerial)   Vertical lines show the maximum signal value of the selected channel. To change the channel   For DVB mode - 46 - Internet service Internet content Information You can access some specific websites supported by Panasonic, and enjoy internet contents such as videos, games, communication tools, etc. from APPS list. (Example)   To enable this function, you need a broadband network environment. Ensure the network connections and network settings are completed.
