This unit must create an index in order to facilitate Artists, Albums, Songs, and Genres searches. Typically, it will take approximately 70 seconds to create an index for 1 000 songs, and we recommend that up to 3 000 songs be used. Please note that certain types of file may take longer to index than others. !

Depending on the number of files in the USB storage device, there may be a delay when displaying a list.

! Keys may not have any effect during the creation of an index or list. ! Lists are recreated each time the unit is turned on. After selecting, perform the following procedures to set the function. For details, refer to Selecting a repeat play range on this page. To turn random play on or off.

Sound Retriever (sound retriever) Automatically enhances compressed audio and restores rich sound. For details, refer to Enhancing compressed audio and restoring rich sound (sound retriever) on this page.
