Manual abstract:

@@Library: Tap to display the tracks copied from your computer (P12). 3. @@Balanced: Compared to the normal single-ended operation, this mode enables you to get a larger output and as the high voltage is not grounded together with the small signal, you can anticipate superior music quality. @@ACG: The basic operating method is the same as Balanced (mode), but uses technology to even more forcefully fix grounding standards, so you can enjoy a sound quality with improved clarity and stability than Balanced (mode). @@ 4. Line Out: You can switch the headphone output to the line output mode to connect external equipment. "Line Out" is displayed on the status bar when this is on. 5. Turn on or off the Wi-Fi feature. " " is displayed on the status bar when this is on.

Connection settings are necessary to use Wi-Fi features. Turn on or off the BLUETOOTH feature. " " is displayed on the status bar when this is on. Shows the name of the track being played. Volume dial: Turn the dial to adjust the volume.

You can set to your preferred sound quality (P21). 11. You can make various settings for the unit, such as Wi-Fi and BLUETOOTH settings (P18). 12. Artwork: Displays the album art of the track being played.

Skip ( ) button: Skip to the beginning of the track or to the previous track. Micro SD card slot 2 0 When inserting the micro SD card into the card slot, insert with the contacts facing up and push in completely so the card clicks into place. displayed. You can turn the power off by tapping "Yes". To turn the display on or off, just press the button. 0 If operation becomes unstable, you can shutdown the unit by pressing and holding the power button for 10 or more seconds. Micro USB port: To charge the unit (P6) or transfer music files (P8, P11), connect the supplied micro USB cable. 23. HOLD switch: You can lock operations on this unit by sliding the switch up. When the "Operations while Holding" (P19) setting is "Enable", the volume dial and side buttons for play, etc.

, can still be used. 0 To remove the micro SD card, first unmount it (P29). After unmounting, push the micro SD card in until you hear a click and then pull straight out. The micro SD card may spring out so take care not to lose it. 5 mm/3-conductor) @@Using both jacks at the same time may result in damage. 20. Charging lamp: This lights white when charging starts. It turns off when recharging finishes. If the unit is in a state that prevents charging, it flashes white. Try charging again after waiting a while.

21. Power button (Í): Press and hold the power button to turn the power on. To turn the power off, press and hold the power button so the "Power Off? " screen is En 5 > Before Start > Part Names > Initial Setup > Playback Advanced Setup | Supplementary Information | Others Turning the power on and initial settings Initial Setup 1 Initial Setup starts automatically 1. The battery is not charged at the time of purchase. Charge the unit with the supplied micro USB cable before use.

Connect so the wider side of the plug is down when inserting into this unit's micro USB port. The recharging mark is displayed at the top right of the screen when recharging. 0 You can also recharge while the unit is on. The time for recharging may increase in this case. 2. The power comes on automatically when recharging starts, and the initial settings start. 3. Select the language you want to use first. Flick the list of languages up or down, then tap the language you want to use. When you select the language, a confirmation for the initial settings is displayed. tap "Yes". If you tap "No", you will ext the initial settings and the home screen is displayed. Passcode Set the pass code used to protect this unit. When you set a pass code, the pass code screen is displayed when the power is turned on or when restoring from display off. You should create a pass code to protect your account if you are going to use a network service.

2nd Step : Wi-Fi the connections are complete. Using the push button: 0 The access point needs to have an automatic setting button. 1. Tap "Push Button" on the screen and press the automatic setting button on the access point. 0 The operation of the automatic setting button depends on your device. Refer to the instruction manual of your device for instructions. 2. " " is displayed on the status bar on the screen when the connections are complete. do you wish to setup Wi-Fi? 1st Step : Passcode No Do you wish to use passcode lock? If you made a mistake with an entry, tap " ". 2. Enter the pass code again to confirm. 0 If you enter the wrong pass code three times, a message appears asking if you want to initialize the unit's settings. Note that even if the settings are initialized, the copied music files are not deleted. Wi-Fi Set to use network services such as TuneIn Radio on this unit. Wi-Fi can be connected in the following two ways.

selecting SSID: 1. Tap the SSID of the access point you want to connect from the SSID displayed. 0 If the SSID of the access point is not displayed, tap "Other. " in the SSID list and follow the on screen instructions to configure. 2. After tapping the field for entering the password, enter the password of the access point, then tap "Connect". For details on how to enter text, refer to "Entering text" (P27). 3. " " is displayed on the status bar on the screen when En 7 > Before Start > Part Names > Initial Setup > Playback Advanced Setup | Supplementary Information | Others Copying music with "X-DAP Link" Playback 1 You can copy music files stored on your computer to the built-in storage on this unit or to a micro SD card in this unit, then listen to the music through the "Library" (P12). You can copy either using the data copying software "X-DAP Link" or by dragging and dropping (P11). 0 To copy to a micro SD card, insert a micro SD card into the card slot (P5). 0 When removing the micro SD card, unmount the micro SD card before removing it (P29). 0 NTFS format micro SD cards are not supported on this unit. Install [X-DAP Link] on your computer 2 3 This unit supports X-DAP Link versions 1. 0 or earlier, install the latest version before continuing.

Perform the following procedure when the unit is on. 1. Start your computer and download the installer for XDAP Link from the following site. A shortcut is created on the desktop after installation. 2. Connect this unit to a computer with the supplied micro USB cable. Connect so the wider side of the plug is down when inserting into this unit's micro USB port. You may damage the plug or jack if you try to insert it the wrong way. Do not tap "Unmount", displayed on this unit's screen, until copying is complete. If you do tap it, unplug the micro USB cable, then connect it again. The following types of screens are displayed when you start it.

For details, see the operating instructions for iTunes. 2. A list of music files is displayed in the center of the screen when you select it. x-DAP Folder onkyo music iTunes Media Title Title Artist Artist Artist B Artist B Artist B Artist B Artist B Artist B Artist B Best Mix Select Used: Free: Select Used: Free: Select Used: Free: Best Mix_01 Best Mix_02 Best Mix_03 Best Mix_04 Best Mix_05 4.

In the "Select a Short cut button" screen, tap the feature you want to display in the home screen. Features that are already displayed in the home screen will be displayed in gray and you will be unable to select them. Select "None" if you do not want to place a button. Library Line Out Online Shuffle Settings Wi-Fi Bluetooth Balanced En 23 > Before Start > Part Names > Initial Setup > Playback Advanced Setup | Supplementary Information | Others Software Update The updating function on this unit This unit has functionality to update the software over a network or a micro SD card. This enables us to make improvements to a variety of operations and to add features.

How to update There are two methods for updating the firmware: via network and via micro SD card. Use the one that best suits your environment. The update may take about 3 minutes to complete for either method: via network or micro SD card. Furthermore, existing settings are guaranteed regardless of the method used for update. 0 For the latest information on updates, visit our website.

There is no need to update the software on this unit if there is no update available. 0 During an update, do not - Disconnect and reconnect any cable or micro SD card, headphones, or perform any operation on the component such as turn off its power - Accessing this unit from your computer Disclaimers: The program and accompanying online documentation are furnished to you for use at your own risk. We will not be liable and you will have no remedy for damages for any claim of any kind whatsoever concerning your use of the program or the accompanying online documentation, regardless of legal theory, and whether arising in tort or contract. In no event will we be liable to you or any third party for any special, indirect, incidental, or consequential damages of any kind, including, but not limited to, compensation, reimbursement or damages on account of the loss of present or prospective profits, loss of data, or for any other reason whatsoever. Updating the Firmware via Network First make sure the unit is connected by Wi-Fi.

0 Make sure the unit is charged sufficiently before updating. After tapping "Update Now", the software update starts when you tap "via Network". 0 You will not be able to select "via Network" if there is no software update. Updating via micro SD card 0 Refer to (P5) for how to insert the micro SD card. 0 When removing the micro SD card, unmount the micro SD card before removing it (P29).

0 NTFS format micro SD cards are not supported on this unit. 0 Make sure the unit is charged sufficiently before updating. 1. Insert a micro SD card into your computer. 2. Download the software file from the our website to your 24 > Before Start > Part Names > Initial Setup > Playback Advanced Setup | Supplementary Information | Others PC and unzip. 3. Copy all unzipped files and folders to the root folder of a micro SD card. 0 Make sure to copy the unzipped files. 4.

Insert the micro SD card into a card slot (either 1 or 2) on this unit. After tapping "Update Now", the software update starts when you tap "via SD Card". 0 You will not be able to select "via SD Card" if there is no software update. En 25 > Before Start > Part Names > Initial Setup > Playback Advanced Setup | Supplementary Information | Others Supplementary Information Supplementary Information Due to software updates after you make your purchase or software changes during production of the product, there may be additions or changes to the settings and operation available compared to what is in the instruction manual. For information about the settings and operations that have been added or changed, see the following references.

Removes a character on the left of the cursor. Confirm the text you entered. 7. Switch between upper and lower case by tapping while entering text. 0 This unit enables input of the alphabet, symbols, and numbers only.
