For best performance and prolonged battery life, we recommend the use of AA lithium or rechargeable Ni-MH. Limit the following activities that reduces battery life: · Reviewing your pictures on the LCD screen. · Excessive use of the flash. WARNING! · Batteries should be replaced by an adult. · Use recommended or equivalent type of batteries only. · Insert the batteries in the correct orientation.

8 Using the SD (Secure Digital) Card · Using the SD Card Your camera comes with built-in flash memory for storing pictures and video clips. You can expand the memory using a Polaroid SD card (up to 2GB, when using SDHC up to 8GB). The camera senses whether a memory card is inserted, and automatically saves pictures and video clips accordingly. Note that you cannot save pictures or video clips to the built-in flash memory while a memory card is installed in the camera.

See pages 97 to 101 for storage capacities. Memory card precautions: 1. Use only a SD memory card with this camera. 2. Electrostatic charge, electrical noise, and other phenomena can cause data corruption or even loss.

Always make sure that you always back up important data on other media (MO disc, computer hard drive, etc.). 3. If a memory card starts to behave abnormally, you can restore normal operation by formatting it. However, we recommend that you always take along with more than one memory card whenever using the camera far away from your home or office. 4. We recommend that you format a memory card when using it for the first time, or whenever the card you are using seems to be the cause of abnormal pictures. Remember to format a memory card if it was used in another digital camera or other devices. Polaroid i830 Digital Camera User Guide www.polaroid.com

com 79 IMPORTANT! · Make sure you turn off the camera before inserting or removing a memory card. · Be sure to orient the card correctly when inserting it. Never try to force a memory card into the slot when you feel resistance. · SD memory cards have a write protection switch that you can use to protect files from accidental deletion. However, you must remove the write protection whenever you want to record new files onto it, format it, or delete its files. · Files contained in the SD card recorded by other cameras may conflict with the i830 camera, and valuable data in your existing SD card may be distorted or lost when the card is inserted in the i830 camera. We strongly recommend the user to use a NEW or formatted SD card for the i830 camera. The manufacturer is not liable for losing or corrupting any valuable data or files in your SD card due to improper operation.
