Manual abstract:

@@@@@@@@Digital Camera 2. Lithium Battery 3. USB Cable 4. Polaroid Instant Memories Software Installation CD 5. Wrist Strap 6. AC Charger Note: SD Memory Card not included. 2 1. Power Button 2. Shutter Button 3. LCD Screen 4.
LED (Charge/Flash Indicator) 5. Zoom Out Button 6. Zoom In Button 7. Up/Flash/Slide Show Button 8. Right / Delete Button 9.
Down / Insta-Share Button 10. SET (Menu/OK) Button 11. Left / Scene Button 12. MODE Button 13. Microphone 14.
Flash 15. USB Slot 16. Tripod Mount 17. Optical Lens 18. Battery / SD Memory Card Slot 19. Wrist Strap Connector 20. Speaker 21. Self-Timer LED Indicator 3 □ 1. 2. 3.

To Charge the Battery: Insert the battery (as shown above). Power off the camera. Connect one end to the supplied USB cable to the camera and the other end to the computer's USB port or to the AC Charger (which is then connected to a standard wall socket). 4. Allow the battery to charge for at least 3 hours before using the first time. 5. The charge light will turn off when the battery is fully charged. □ SD Memory card (up to 32GB) needed for normal use. 4 When powering the camera ON for the first time the camera will take you through the initial camera setup. 1) Installing and Charging the Battery First make sure that the battery is correctly inserted.
The lithium battery should be inserted all the way into the battery compartment. @@@@@@- Connect one end of the USB cable into the USB port on your camera. @@The battery is fully charged when the LED light turns off. Battery Power: □ □ Some features, will not work if the battery power level is low. When the battery power is low the battery icon turns red and the camera will automatically turn off a few seconds later.
□ The energy status of the power is displayed on LCD as shown below: Full battery power Medium battery power Low battery power 2) SD Card Make sure an SD card has been properly inserted into your camera. (SD card not included.) To properly insert the SD Card: □ Push the SD card into the slot in the direction shown on the camera (see SD icon by the SD card slot). □ Push the SD card until you hear a slight clicking sound. This indicates the SD card has been inserted correctly.
6 NOTE: □ After the camera is powered on, an SD icon will appear on the LCD display. If you do not see the SD icon on the display, please check if the card was inserted properly. □ Make sure the SD card is not locked (check the lock switch on the side of the SD card). If the SD card is locked this will prevent the camera from saving captured photos to the SD card. 3) Power On Press the POWER button to turn on the camera. After powering on your camera for the first time, you will be prompted to select a language for the camera. The Language selection menu appears. Select the language of your choice by pressing the UP and DOWN direction control buttons. Then press the SET button to confirm the selection. Once a language has been selected, you will be asked if you would like to continue with the initial camera setup.

A message will appear: "Continue with Camera Setup?" Select "Yes" to continue or "No" to exit the setup. Note: If you select "No" and decide to leave the camera setup, the camera will be set to its default settings. These settings can be adjusted at any time manually through the menus in the camera. 7 The next step in the initial camera setup is to set the date and time on the camera. Set the Date and Time as desired by pressing the RIGHT and LEFT direction control buttons to choose the specific setting and the UP and DOWN buttons to change each setting. Once you have completed setting the time and date, press the SET button to confirm the selection and finish the camera setup. Next you will be asked to set the default Insta-Share destination for photos and videos taken with your camera. The Insta-Share technology allows you to quickly and easily upload your camera's photos and videos to social networks with the accompanying software application. 1) First you will be asked to choose the default Insta-Share social network for Photos. Highlight the desired default social network and press the SET button to confirm the selection.
2) Next you will be asked to choose the default Insta-Share social network for Videos. Highlight the desired default social network and press the SET button to confirm the selection. Congratulations! Your camera is now ready to use. 8 Your camera has different modes for the various camera functions. You can switch modes by pressing the MODE button on your camera after the camera has been powered ON.
Use this mode to capture pictures with your camera. This is the default mode when the camera is powered ON. To take a picture, aim your camera as desired and press the Shutter button. The picture will be automatically saved to your camera's memory card. To access the various menus for the Photo Capture mode, press the SET button while in the Photo Capture mode.
Use this mode to capture videos with your digital camera. After turning on your camera, press the MODE button once to open the Video Capture mode. To take a video, aim your camera as desired and press the Shutter button to start the record. A red record indicator will appear on the LCD screen while record is in progress. To stop the record, press the Shutter button again. The video will be automatically saved to your camera's memory card. To access the various menus for the Video Capture mode, press the SET button while in the Video Capture mode. Use this mode to view and manage the photos and videos on your camera. After turning on your camera, press the MODE button twice to open the Playback mode for photos and videos. You can scroll through the photos and videos that you've previously taken to view, edit or delete them as desired.

To access the various menus for the Playback mode for photos and videos, press the SET button while in the Playback mode. 9 Image Sensor CMOS Sensor 4608x3456 (16M), 4416x3312 (14M), 4000x3000 (12M), 3648x2736 (10M), 3456x2592 (9M), 3264x2448 (8M), 3648x2048 (7M-HD), 2592x1944 (5M), 2048x1536 (3M), 1920x1080 (2M-HD), 640x480 (VGA) 1280x720 (720P), 640x480 (VGA), 320x240 (QVGA) JPEG (Photo) /AVI (Video) SD MMC SDHC (up to 32G)– SD Card not included 2.7 Inch TFT LCD Screen f=6.0-18mm , F3.0-5.5 5X Optical Zoom ; 4X Digital Zoom -3.0EV ~ +3.0EV Auto, Daylight, Cloudy, Fluorescent, Incandescent Auto, 100, 200, 400 Auto, Scenery, Portrait, Night Scenery, Night Portrait, High Sensitivity, Beach No Flash, Forced On, Auto, Red Eye Reduction 2 seconds, 5 seconds, 10 seconds, Off Yes Yes Yes Yes 1, 3 or 5 minutes; Disable English, French, Spanish, Portuguese, German, Italian, Russian Polish, Greek Yes Yes USB 2.0 (HS) Windows XP (SP 3), Vista (SP1) and 7 ; Mac OSX v10.5.

5.x or later 1 GB RAM, 250 MB free hard disk space Display: 1024 x 768 or higher-resolution monitor QuickTime® 6 or higher CD-ROM Drive Internet connection required to access social networks and software features 11 ☐ ☐ Make sure the built-in lithium battery has been fully charged before the first use. Make sure an SD card has been inserted into your camera. (SD card up to 32GB - SD Card not included) Please see Initial Camera Setup for more information.

Press the ☐ ☐ Power button to turn your camera ON. After powering on, the camera emits a sound and the LED light turns on briefly. The LCD screen turns on with your camera in Photo Capture mode to start. While the camera is on, you can press the camera OFF. Power button again at any point to turn your Note: Your digital camera also has an Auto Power Off feature that automatically turns off your camera after a specific period of time that your camera is left idle.

The Auto Power Off settings can be set from the Auto Power Off settings menu (in either Photo Capture Mode or Video Capture Mode). 12 Your camera has three main modes: 1) 2) 3) Photo Capture Mode - Use this mode to capture photos with your camera. Video Capture Mode - Use this mode to capture videos with your camera. Playback Mode (for photos and videos) - Use this mode to view the photos and videos you have already taken with your camera. ☐ ☐ When the camera is first powered ON, the Photo Capture Mode will be active. The icons that appear on the LCD screen are the best default settings so that you can begin to capture and enjoy clear quality photos and videos. To change the active camera mode, make sure the camera is powered ON and press the MODE button. When in Photo Capture Mode, this icon will display on the top-left corner of the LCD display When in Video Capture Mode, this icon will display on the top-left corner of the LCD display When in Playback Mode, this icon will display on the top-left corner of the LCD display 13 Each camera mode has a set of menus specific to that mode. 1) 2) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll between the various menus for the current mode.

3) 4) 5) Press the UP or DOWN direction control button to highlight the desired menu selection. Press the SET button to confirm and save the highlighted menu option. If the selection can be remembered by the camera, a selection icon will appear to the right of the selected menu option. Changes made to these options will remain as is until you decide to change them again at a later time. 6) Some menu options are single-use functions that are not remembered by the camera and do not display this icon when selected. 7) At any time you can press the MODE button to exit the menus and return to the previous screen. 14 The Photo Capture mode allows you to capture pictures with your digital camera. When the camera is first powered ON, the camera will be in Photo Capture Mode by default. 1) While in Photo Capture mode, use the LCD display on the back of the camera to direct the camera at the scene you would like to capture. 2) Press the T/Zoom In and W/Zoom Out buttons to zoom in/out if desired.

Note: The actual shape of these buttons may vary per camera model. Optical and Digital Zoom: Digital Zoom ☐ As you press the Zoom buttons, a bar indicator moves up and down the rectangular box on the right side of the LCD screen according to the zoom used. The bottom section of the box shows the Optical Zoom and the top section displays thee menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the Scene menu. @@Press the SET button to select the desired option.

@@@@An icon reflecting your selection will display on the LCD screen. Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings. The Image Resolution meff" option in the Macro menu. The mountain ☐ icon will appear on the LCD. Anti-Shake On - Ensure that the Anti-Shake option is set to 'On'.

The Anti-Shake option is 'On' by default when you start using your camera and assists you in properly focusing the image. ☐ Distance from the camera – The subject's face must be no further than 8 to 9 feet (3.5 meters) from the camera and the face must cover at least 20% (1 / 5th) of the picture as viewed on the LCD screen. ☐ Facing the camera - The face of the subject(s) you are photographing must be facing the camera and must hold the pose for at least 4 to 5 seconds until the green square(s) appears around the subject's face. Face Detect will not work with a side shot of the subject's head. 1) 2) 3) 4) 5) 6) 7) 8) 9) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the Face Detect menu. @@Press the SET button to select the desired option. @@@@An icon reflecting your selection will display on the LCD screen. Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings.

22 Your camera contains a Macro Menu that allows you to enable or disable the Macro mode on your camera. @@@@@@The mountain icon appears on the LCD display. When Macro mode is off, images can be captured from 1.5m - ∞ (infinity). Note: The Macro mode must be turned OFF when you want to use the following features of your camera: Flash and Face Detect. 1) 2) 3) 4) 5) 6) 7) 8) 9) Press the SET button to open the menus for the current mode. Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings.

The White Balance feature allows your camera to adjust the coloring of the captured images depending on the type of light source in the current environment. Properly adjusting the White Balance setting to match your current environment will allow the 23 camera to properly balance the colors in the images that are taken with your camera. 1) 2) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the White Balance menu. 3) 4) 5) 6) 7) 8) 9) Press the UP or DOWN direction control buttons to scroll through the menu options.

Press the SET button to select the desired option. @@@@An icon reflecting your selection will display on the LCD screen. Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings. You can choose to add a color effect to the images taken with your camera. 1) 2) 3) 4) 5) 6) 7) 8) Press the SET button to open the menus for the current mode.

Press the LEFT or RIGHT direction control button to scroll and select the Color Effect menu. @@Press the SET button to select the desired option. @@@@Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings. 24 When enabled, the Multi SnapShots feature allows you to take six rapid snapshots in a row with a single click of the Shutter button. This feature can be effective when trying to capture a particular moment in a sporting event or other scenes with quick movements. 1) 2) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the Multi SnapShots menu. 3) 4) 5) 6) 7) 8) 9) Press the UP or DOWN direction control buttons to scroll through the menu options. Press the SET button to select the desired option. @@@@An icon reflecting your selection will display on the LCD screen.

Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings. You can set the level of sharpness in the images taken with your camera. The sharpness level dictates if the edges of objects in the image are more or less distinct. 1) 2) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the Image Sharpness menu. 3) 4) 5) 6) 7) @@Press the SET button to select the desired option. @@ 25 8) 9) An icon reflecting your selection will display on the LCD screen. Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings. The Light Exposure setting helps you control the amount of light that enters your camera's lens. This setting should be adjusted when the environment is lighter or darker than normal.

When the environment has more light than is needed, reduce the exposure setting (by using the negative - count) to reduce the amount of light allowed into the lens by your camera. If the environment has less light (darker) than is needed, increase the exposure setting (by using the positive + count) to increase the amount of light allowed into the lens by your camera. 1) 2) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the Light Exposure menu. 3) 4) 5) 6) 7) 8) 9) Press the UP or DOWN direction control buttons to scroll through the menu options.

Press the SET button to select the desired option. @@@@An icon reflecting your selection will display on the LCD screen. Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings. The ISO menu allows you to set the level of sensitivity that your camera has to light in the surrounding environment. When the ISO level is increased, the image sensor in your camera will be more sensitive to light and allow you to capture images in lower-light situations.

The higher sensitivity to light however, may reduce the quality of the images that are taken. 26 When the ISO is reduced, the image sensor in your camera will be less sensitive to light and will optimize the image quality in environments with bright lighting. 1) 2) 3) 4) 5) 6) 7) 8) 9) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the ISO menu. @@Press the SET button to select the desired option. @@@@An icon reflecting your selection will display on the LCD screen. Remember that this setting will be saved by your camera until you manually change the setting or restore the camera's default factory settings. The Metering setting will affect how your camera focuses when capturing an image. Depending on your selection, the camera will be more sensitive to focusing on particular areas in the display and adjust the image color and lighting accordingly. Center – Averages the light metered from the entire frame, but giving greater weight to the subject in the center Multi – Used in standard conditions the camera divides and adjusts the settings of the image into several zones for light metering such as complex light conditions, position of subject, brightness, background, direct light and scenes Spot – Meters the area within the spot point frame at the center of the LCD to set the exposure on the subject in the center of the monitor.

1) 2) 3) 4) 5) Press the SET button to open the menus for the current mode. Press the LEFT or RIGHT direction control button to scroll and select the Metering menu. @@Press the SET button to select the desired option.
