Manual abstract:

fm Page 1 Lundi, 25. @@@@@@@@Your telephone must be operated at temperatures ranging from 5°C to 45°C. Only use the supplied power adapter, connect it to the base socket according to the installation instructions provided in this booklet and the indications on the identification label affixed to it (voltage, current, electric network frequency). As a safety measure, you can use the power adaptors to cut off the 230V current in case of danger. They must be located near to the device, and must be easily accessible. This telephone was designed for use on the public switched telephone network (PSTN). In case of a problem you must first contact your reseller. Only use the supplied telephone cord. For your personal safety, never place your handset on the base without the batteries, or without the battery cover, you could get an electric shock. To avoid damaging your handset, only use certified rechargeable AAA batteries NiMH 1.

2 V 550 mAH, never use non rechargeable batteries. Insert the batteries in the handset battery compartment respecting polarity. At the end of their useful life, batteries must be disposed of according to the recycling instructions presented in this booklet. Your DECT telephone has an inside radio range of about 50 metres and up to 300 metres in open space. The immediate presence of metal parts (of a television for example), or of any electric appliance may result in range reduction.

Some sensitive medical equipment and safety equipment may be affected by the radio-frequency transmissions of your telephone. In all cases, we ask that you respect the safety recommendations. In areas where storms are frequent, we recommend that you protect your telephone line using a surge protection device. This equipment does not function in the case of an electric network shutdown: For the emergency calls, use a self-contained cord telephone. The CE marking certifies that the product meets the essential requirements of Directive 1999/5/CE of the European Parliament and of the Council pertaining to microwave radio equipment and telecommunication terminal equipment, for the safety and health of users, for electromagnetic interference.

Furthermore, it efficiently uses the frequency spectrum attributed to ground and spatial communication to prevent damaging interference. The declaration of compliance may be looked up on the www.sagem.com site, section "support" or can be obtained from the following address: SAGEM AUSTRALASIA PTY LTD ABN: 43 003 099 812 Unit 1, 7-9 Orion Road Lane cove NSW 2066 P.O. Emptying an SMS folder This function is used to delete all the messages contained in a folder.

To delete the messages one by one refer to paragaph Managing read messages, page 24. When you empty an SMS folder, all messages linked to a personal box will not be erased. 25 LU 252973993 D30 T V H Australie.book Page 26 Mercredi, 20. juin 2007 9:47 09 SMS SETTINGS SMS SETTINGS You can access the SETTINGS menu via the SMS menu or the ADVANCED SET. submenu in the SETTINGS menu. Carry out this operation again for all other SMS centres. Then define the SMS centre to be used for sending. Modifying the SMS centre numbers This function is used to modify the SMS centre numbers (depending on the operator). You can enter up to 4 SMS centre numbers to receive and one to send.
By default, the send number is programmed in SMS 2 centre and the reception number in SMS 1 centre. Choose the SMS transmission centre Select SEND CENTRE using keys or . Press Valid. . ·To change the send SMS centre, press Edit ·.
Select the required centre using and press Valid. . keys To keep the current SMS centre, press Confirm . To exit the menu, press the red key On the navigator key , press or . until the SMS screen is displayed, press OK to confirm.
Select SETTINGS using Valid. . or . Press or . Press Modifying the terminal number If you have several SMS-type devices connected to the same telephone line, you must assign a different number ranging from 0 to 9 to each device. Remember to give your contacts the terminal number on which you would like to receive your messages. Telephone line 0123456789 Terminal number 1 MOTHER Select SMS CENTRES using Valid. . Select the SMS centre you want to enter or modify the number using keys or . Press Valid.

. An information screen gives the number of the SMS centre. ·To change the number, press Edit . Enter the new number in the input screen and press Valid. ·. . To keep the number, press Confirm 2 FATHER 3 SISTER 4 COLLECTIVE 26 LU 252973993 D30 T V H Australie.book Page 27 Mercredi, 20. juin 2007 9:47 09 SMS SETTINGS For example, in the case of an SMS message addressed to the device FATHER your contact will send his SMS to: 0123456789 2 (Telephone number followed by the terminal number) If your contact forgets to include the terminal number, the SMS message will be sent to terminal 0 by default. If no device is parameterised with the terminal number 0, the message will be sent to you in the form of a voice message.
SMS boxes "Personal boxes" allow you to receive personal SMS. These SMS will arrive in the New folder, the box owner will be able to view them by entering the user code that he will have defined when creating his SMS box. You can create up to 9 "personal boxes" which allow the different users to manage their private SMS (transmission, reception, archive). Each box is protected by a code and identified by a number representing the corresponding sub-address. If you do not assign a different number to each SMS-type device connected on the same line, you will not be able to receive SMS.
Sub-Addressing You have 10 sub-addresses (9 personal and 1 collective) assigned to your telephone line (telephone number).

You can assign each one of these sub-addresses: · to a terminal (the SMS for this subaddress arrive in the DECT base collective box) · or to a personal box (the SMS received for this sub-address arrive in the private pass-word protected SMS box) The sub-address is a number that must be added at the end of your telephone number (11th digit) by those who wish to send you SMS. If you use the same sub-address twice for the same telephone line, your units may not receive the SMS for this sub-address. If you do not give a terminal number to each SMS capable device that is connected to the same telephone line , you cannot receive SMS. On the navigator key , press or until the SMS screen is displayed, press OK to confirm.
Select SETTINGS using Valid. . or . Press or . Press Select SUB-ADDRESS using Valid. . An information screen shows the current number of the telephone SMS terminal. · To change the number, press Edit . Then select the number using or keys. Press Valid.
