Manual abstract:

You can assign various ring tones to the entries. You can assign short dial numbers to frequently dialled telephone numbers. You can load these numbers quickly with the short dial button and the number buttons. You can send fax messages in various resolutions to one or more recipients or a group. You can also poll faxes and offer documents for polling. Five fax templates, which you can use, are stored in your device. With these templates you can quickly create, for example, a short fax note or an invitation. Select the resolution for text and photo in order to copy documents with your machine. You can also create multiple copies. If you want, your device can print Sudoku puzzles in four different difficulty levels with solution.

We hope you enjoy your machine and its many functions! Telephone Book Short Dial Fax Templates About this User Manual With the installation guide on the following pages, you can start using your machine quickly and easily. Detailed descriptions can be found in the following sections of this user manual.

If you have saved, for example, the telephone number prefix of an inexpensive telephone service provider (call-by-call) as a telephone book entry, select this entry and manually enter the subsequent telephone number or select another saved entry.

Press i and 3 to print an overview of the telephone book functions. Connecting Additional Telephones How to connect additional telephones and what functions are available to you can be found in the section on telephone lines and additional devices, page 20. Inserting a Dialling Pause It can be necessary to insert a dialling pause into the telephone number, for instance for the outside line access code, for an extension or sub-address or in a long distance number.

Press R. The second part of the number is only dialled once the connection with the main number has been established.

Making Telephone Calls on the Machine Dial the desired telephone number. There are multiple ways to do this. Then lift up the handset. Dialling Directly You can also lift up the receiver first, then dial a number. The dialling process starts immediately.

Special Settings Silent Fax Reception If you would like to accept a fax without preceding rings, set the number of rings of the fax switch to 0. Switching Off All Rings All Rings Off Configuring the Fax Switch Fax Switch The built-in fax switch of your machine distinguishes between fax messages and telephone calls.

Faxes are automatically received, telephone calls can be received--even on additionally connected devices. While the machine is checking the call, it continues to ring. You can set how often the machine should ring before picking up separately for the modes TM (day) and (night). This makes it possible to receive faxes silently at night, so as not to disturb you. Press $\frac{1}{4}$ to switch between day and night mode. With the activated timer >, the machine switches between the modes TM (day) and (night) at the configured times. Day and Night Mode If you don't want to be disturbed, e.g.

in the night, by any incoming calls, you can set the number of rings to 0. The device switches immediately to silent fax reception. Manually Receiving Faxes

Select manual reception under number of rings of the fax switch. The device will not receive faxes on its own. You can start fax reception manually, by pressing START. This setting is useful, when you want to receive faxes via a modem connected to a computer. Printing Lists and Help Pages Printing Numbers and Entries List of Numbers Configuring Day Mode 1 Press OK, 51 and OK. 2 Use [to select the total number of rings. After this number of rings, the machine stops playing rings and picks up a call or a silent fax transmission. 3 Confirm with OK.

2 The machine prints out a help page and starts the initial installation process. Checking the Firmware Version 1 Press OK, 47 and OK. 2 The model designation and the configured country appear on the display. 3 Confirm with OK. 19 6 Telephone Lines and Additional Devices Configuring Telephone Lines and Services Private Branch Exchanges Private Branch Exchanges Voice Mailbox You cannot simultaneously use the answering machine facility of your telephone service provider (= voice-mail box) and receive faxes on your devices. Get the mail-box function for your telephone connection deactivated or set the number of rings for the fax switch to lower than 5 on your device (also see Chapter Setting the Fax Switch, Page 18). When the fax switch accepts the call, the mail-box of the service provider does not step in. Enquire with your telephone company. Connecting Additional Devices Additional Devices Private branch exchanges (PABX) are typical in many offices and private households. You must dial an outside line access code in order to establish a connection with the public telephone network (PSTN) from an extension.

External Device Not Extension You can operate additional devices on a telephone line, such as cordless telephones, answering machines, modems or charge counters. An additional telephone connected to the machine on a telephone socket is not considered an extension. 1 Press OK, 96 and OK. 2 In many countries, you can set either pulse dialling or tone dialling (DTMF tones). Use [to select the desired dialling method. Only use pulse dialling if tone dialling is not yet activated for your telephone line. 3 Confirm with OK. 4 Use [to set whether you operate your machine on an extension. 5 Confirm with OK. 6

Configuring an extension: Enter the outside line access code with which you reach the public telephone network.

This is usually 0. 7 When finished, the machine tests the telephone line. Confirm with OK. 8 Your machine checks whether it can establish a connection with the public telephone network. If it cannot establish the connection, you are once again asked for input.

Outside Line Access Code Error Connection to the Machine Connection to the Machine You can connect additional devices directly to your machine. Plug the telephone cable of the additional device into the EXT socket (RJ-11 connection) of your machine. Connecting Additional Devices Connecting in Serial We recommend direct connection to the machine because this allows the fax switch to function optimally and to control the additional devices. Connection to the Telephone Line Order of Connections In rare cases, the outside line access code may be a different number or a two-digit number. For older telephone systems, the outside line access code can be R (= Flash).

Press R to enter this outside line access code. Should a connection to the public telephone network not be possible, contact the provider of your telephone system. In order for the fax switch to function, the machine must be first in the series if multiple devices are connected to the same telephone socket. Follow the correct order. Multiple Telephone Sockets If you have multiple telephone sockets for the same telephone line, the machine must be connected to the first telephone socket. DSL Connection In the event that you use a DSL modem: Connect the machine after the modem. For additional information, please consult the operating manual of your DSL system. Using Additional Telephones (Easylink) Easylink ISDN Connection Details for ISDN connections can be found in the instructions provided with the terminal adapter or the dial-up router. With the Easylink function, you can control your machine with additional telephones. To use this function, additional telephones must be set to tone dialling (DTMF tones); see here the user manual of your additional telephone.

Starting Fax Reception If you pick up on an additional device and hear that you are receiving a fax message (whistle or silence), you can start the fax reception by pressing *5 on the additional telephone or the START button on the machine. 20 Taking Over the Line If you pick up on an additional telephone and the machine continues to ring or attempts to receive a fax, you can disconnect the machine from the line. Press ** on the additional telephone. Changing Codes Easylink Codes 1 2 3 4 5 Only change the codes if it is absolutely necessary. The codes must begin with * or # and must be different. Press OK, 54 and OK. Enter the new code for starting fax reception. Confirm with OK. Enter the new code for taking over the line on an additional device. Confirm with OK.

Using an External Answering Machine For the best operation, the answering machine must be connected to the EXT socket of the device. The numbers of rings set for the external answering machine should be less than the one set under FAX RINGS by at least two. Other consumable materials can cause damage to the machine. Instructions on the Packaging Follow the instructions on the packaging of the consumable materials. Introduction to plug'n'print card For receiving or copying documents, an ink film must be inserted in your device.

Your device is delivered with an already inserted free ink film for a few test pages. For this film, you do not require any Plug'n'Print card (= chip card with information regarding ink film capacity). For every next film that you insert, you must load the capacity memory with the included Plug'n'Print card. 1 Remove the paper from the paper feeder and take the paper tray out of the device. 2 Open the device by lifting the panel using grip in the centre and folding it down. The messages and copies you have printed out can be read from used ink films. Consider data protection issues when disposing of used ink films. 5 Pull the used Plug'n'Print card out of the plug socket on the left hand side next to the ink film tray. The Plug'n'Print card cannot be reused. 6 Carefully remove the rubber bands from the new ink film.

Make sure that the film is not damaged! Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine. 3 Grip the rear ink film roll at both the sides and place it next to the front ink film roll. 7 Place the larger roll with the ink film in the rear ink film tray. The blue gear wheel must be on the right hand side.

22 8 Place the smaller roll without film in the front tray. The blue gear wheel must be on the right hand side and the pin must be inserted in the depression on the left hand side. Fixing a Paper Jam 1 Remove the paper from the paper feeder and take the paper tray out of the device. 2 Open the device by lifting the panel using grip in the centre and folding it down. 9 Break the chip card from the Plug'n'Print card.

Insert the chip card in the plug socket on the left hand side next to the ink film tray. Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine. 3 Carefully pull the paper out. 10 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases. 4 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases. 11 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder.

Insert paper again. Checking the Ink Film Reserve 1 Press OK, 46 and OK. 2 The number of pages that can still be printed with the ink film is shown on the display. 3 Press STOP to return to the starting mode. If the ink film used up or if there is no ink film in the machine, a message appears on the display. 5 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again. 23 Fixing a Document Jam 1 Remove the paper from the paper feeder and take the paper tray out of the device. 2 Open the device by lifting the panel using grip in the centre and folding it down.

6 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases. Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine. 3 Open the scanner cover and the cover of the automatic document cover by first pushing the support (A) and then the support (B) inside.

The cover (C) folds below. 7 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again. Cleaning

Cleaning Unplug the machine from the power socket before cleaning it.

Use a soft, lint-free cloth. Never use liquid or easily flammable cleansers (sprays, abrasives, polishes, alcohol, etc.). Do not allow any moisture to reach the interior of the machine. Fax Cleaning Sheets Special fax cleaning sheets are available as accessories from our call centre. Insert a sheet into the document feeder. Press STOP; the page is ejected. Repeat this process at a few times. 1 Remove the paper from the paper feeder and take the paper tray out of the device. 2 Open the device by lifting the panel using grip in the centre and folding it down.

4 Carefully pull the document to the front or to the back out of the device. Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine. 5 Close the scanner cover and the cover of the automatic document feeder. Both the supports must securely snap into place. 24 3 Open the scanner cover and the cover of the automatic document cover by first pushing the support (A) and then the support (B) inside. The cover (C) folds below. 7 Turn the blue gear wheel forward to tension the ink film. The ink film must not have any creases. 4 Lightly wipe the upper side of the scanner glass (A) and the lower side of the document feeder/scanner film (= white plastic plate) (B) with a cloth.

8 Close the device. Insert the paper tray in the opening provided for it behind the paper feeder. Insert paper again. Using Service Codes The service codes delete all the changed settings and your device is reset to factory settings. It may be possible that the device with the changed settings reacts differently than expected.

Using the Service Code 5 Clean the feed roller (A) and the underside of the support pad of the feeder roller (B) with a soft, lint-free cloth moistened with cleaning alcohol (96 percent). Rotate the feed roller; You must clean the entire roller. Only use the service code if this is absolutely necessary. Many service codes also delete saved messages and telephone book entries. 1 Press OK, 45 and OK.

2 Enter a service code: 7117--Deletes all changed settings and saved data. The device is reset to factory settings and the initial installation process is started. 7140--Deletes all changed settings. Saved data and telephone book entries remain intact. 7227--Deletes saved faxes, when there are problems with printing. 3 Confirm using OK. 4 Dial using [SURE: YES. 5 Confirm using OK. If you have entered the incorrect code, you can cancel the entry with SURE: NO. Power Cycling 6 Close the scanner cover and the cover of the automatic document feeder.

Both the supports must securely snap into place. If a problem occurs that cannot be corrected with the instructions in this user manual (see also the help below), follow the steps given here. 1 Pull out the power plug. 2 Wait at least ten seconds, then plug the power plug back into the socket. 3 If the error occurs again, please contact our technical customer service or your retailer. Follow the instructions on the display and on the error report. 25 General information The time and date flash on the display. You must check the time and date after a short power failure.
