Manual abstract:

You can assign various ring tones to the entries. The built-in answering machine (model-specific) saves up to 30 minutes of messages. You can record internal and external voice messages (= memos). You can listen to new messages from any telephone using the remote control function. With the VIP code, you can reach callers even while the answering machine is switched on. You can send fax messages in various resolutions to one or more recipients or a group. You can also poll faxes and offer documents for polling. Five fax templates, which you can use, are stored in your device. @@Select the resolution for text and photo in order to copy documents with your machine. You can also create multiple copies.

You can send SMS messages from your machine if this service is activated for your telephone line (this function is not supported in all countries and networks, model-specific). Received SMS messages can be managed with the extensive functions of the SMS menu. Activate notification by SMS to receive an SMS message, for instance on your mobile phone, when calls, fax transmissions or other messages arrive in your absence (this function is not supported in all countries and networks, model-specific). If you want, your device can print Sudoku puzzles in four different difficulty levels with solution. We hope you enjoy your machine and its many functions! Telephone Book Fax Templates About this User Manual With the installation guide on the following pages, you can start using your machine quickly and easily.

Detailed descriptions can be found in the following sections of this user manual. Read the entire user manual carefully. Follow all safety instructions in order to ensure proper operation of your machine. The manufacturer accepts no liability if these instructions are not followed. Multiple models of this machine series are described in this user manual.

Please note that many functions are only available with specific models. Symbols Used Dangers Warns about dangers for people, damage to the machine or other objects as well as possible loss of data. Injuries or damage can result from improper handling. ..... Supply Check whether the power type of your machine (indicated on the type plate) matches the power type available at the setup location. Use only the power and telephones cables supplied. Set up your machine so that the power socket is easily accessible.

The machine does not have an on/off button. In an emergency, disconnect your machine from the power supply by pulling the power plug. Never touch the power or telephone cable if the insulation is damaged. Disconnect your machine from the power and telephone networks during an electrical storm. If this is not possible, do not use the machine during an electrical storm. Before cleaning the surface of your machine, disconnect it from the power and telephone networks. Never use liquid, gaseous or easily flammable cleansers (sprays, abrasives, polishes, alcohol). Only clean the display with a dry, soft cloth. If the display breaks, a mildly corrosive liquid may escape. Avoid all contact with your skin and eyes.

In the event of a power failure, your machine will not function; saved data is retained. Setting Up the Machine The machine should rest securely on a stable, flat surface. If the machine should fall, it can be damaged or cause injury to people, especially small children. The distance between the machine and other devices or objects must be at least 15 centimetres; this also applies to the use of additional cordless telephones. Do not place the machine in the vicinity of radios or televisions.

Position all cables in such a way that no one will stumble on them, thus avoiding possible injuries to persons or damage to the machine itself. Lock the cover of the machine completely into place when opening the machine. You could be injured if the cover falls while you are working on the machine. Protect the machine against direct sunlight, heat, large temperature fluctuations and moisture. Do not place the machine in the vicinity of heaters or air conditioners. Observe the information on temperature and humidity in the technical data. The machine must have sufficient ventilation and may not be covered. Do not put your machine in closed cabinets or boxes. Do not place the machine on soft surfaces such as tablecloths or carpets and do not cover the ventilation slits. Otherwise, the machine can overheat and catch on fire. In the event that the machine becomes too hot, or if you see smoke coming from the device, you must immediately pull the power cable out of the power socket. Have your machine examined by trained professionals at a technical service location. To prevent the spread of fire, open flames should be kept away from the machine. Do not plug in the machine in moist rooms. Never touch the power plug, power connection or the telephone socket with wet hands.

Do not allow liquids to enter into the machine. Disconnect the machine from the power socket if liquids or foreign objects have entered the machine and have your machine examined by trained professionals at a technical service location. Do not allow children to handle the machine without supervision. The packing materials should be kept out of the hands of children. Caution, metallic objects may be retained if placed near or on the handset receiver. Repairs Should disruptions occur, follow the instructions on the display and on the error report. Do not make any repairs to the machine yourself. Improper maintenance can result in injuries or damage to the machine. Only have your device repaired by an authorised service centre. Do not remove the type plate from your machine; this would void the warranty.

Consumable Materials Use only original consumable materials. These are available from a specialised retailer or through our order service. Other consumable materials could damage the machine or shorten its service life. Dispose of old consumable materials according to the waste regulations of your country. 8 Table of Contents Dear Customer, .

..... 19 9 1 Telephone Functions Help 3 · Telephone Functions Chain Dialling You can combine and edit manually entered digits and saved entries, before the dialling process starts. If you have saved, for example, the telephone number prefix of an inexpensive telephone service provider (call-by-call) as a telephone book entry, select this entry and manually enter the subsequent telephone number or select another saved entry. Press \hat{I} and 3 to print an overview of the telephone book functions. Connecting Additional Telephones How to connect additional telephones and what functions are available to you can be found in the section on telephone lines and additional devices, page 26.

Inserting a Dialling Pause It can be necessary to insert a dialling pause into the telephone number, for instance for the outside line access code, for an extension or sub-address or in a long distance number. Press R. The second part of the number is only dialled once the connection with the main number has been established. Making Telephone Calls on the Machine Dial the desired telephone number. There are multiple ways to do this.

Then lift up the handset. Dialling Directly You can also lift up the receiver first, then dial a number. The dialling process starts immediately. Manual dialling: Dial the desired telephone number with the number pad. Telephone book: 1 Press m You can also load telephone book entries by pressing OK, 11 and OK.

2 Use [to select an entry. Enter the initial letters with the number buttons to navigate more quickly in the telephone book. You can save an entry multiple times with the same name but in a different category. In the telephone book, the first letter of the category appears after the entry. Short dial: Press \check{Y} . Select the desired entry with [or the number button. Loading a Short Dial Entry Hands-Free Voice (Voice) 1 Press \check{I} to dial without lifting up the handset. You will hear a dial tone from the loudspeaker. 2 Enter the desired number using the numeric keypad or dial a saved entry. The dialling process begins immediately.

Any incorrectly entered numbers can no longer be changed now. Handset near the device Put the handset near the device with the microphone facing up in order to achieve an optimum communication. Secret Mode Switch the telephone handset into secret mode if you would like to speak with someone without the person on the line being able to hear. 1 Press C during a call. The microphone on the handset is deactivated and the person on the line can no longer hear you. However, the speaker remains active, meaning that you can still hear the person on the line. 2 Press C to reactivate the microphone of your telephone handset and continue the conversation. You can also load short dial entries by holding the respective number button pressed (for at least two seconds). Speed dialling: Press the desired speed dial button (\check{e}). Redial list: Press @.

Use [to select an entry from the list of dialled numbers. Outgoing Calls You can also load the redial list by pressing OK, 22 and OK. Caller list: Hold @ pressed (for at least two seconds). Get the mail-box function for your telephone connection deactivated or set the number of rings for the fax switch to lower than 5 on your device (also see Chapter Setting the Fax Switch, Page 24).

When the fax switch accepts the call, the mail-box of the service provider does not step in. Enquire with your telephone company. Connecting Additional Devices Additional Devices Private branch exchanges (PABX) are typical in many offices and private households. You must dial an outside line access code in order to establish a connection with the public telephone network (PSTN) from an extension. External Device Not Extension You can operate additional devices on a telephone line, such as cordless telephones, answering machines, modems or charge counters.

Additional Telephone and SMS An additional telephone connected to the machine on a telephone socket is not considered an extension. 1 Press OK, 96 and OK. 2 In many countries, you can set either pulse dialling or tone dialling (DTMF tones). Use [to select the desired dialling method. Only use pulse dialling if tone dialling is not yet activated for your telephone line. 3 Confirm with OK. 4 Use [to set whether you operate your machine on an extension. 5 Confirm with OK. 6 Configuring an extension: Enter the outside line access code with which you reach the public telephone network. This is usually 0.

7 When finished, the machine tests the telephone line. Confirm with OK. 8 Your machine checks whether it can establish a connection with the public telephone network. If it cannot establish the connection, you are once again asked for input. Outside Line Access Code Error If you are using a cordless telephone with SMS function on the same line, then the specific device at which you will receive an SMS message will depend on the specific manufacturer. Only one of the devices will receive the SMS message. Try to turn off the SMS reception on your cordless telephone. Connection to the device Connection to the Machine You can connect additional devices directly to your machine.
