22 Lock or unlock the touch screen and the keys. 109 SD card and phone storage. 132 Contents 9 Assembling Unpack Check your product box for the following items: Mobile device Battery Quick start guide Use only Samsung-approved software. Pirated or illegal software may cause damage or malfunctions that are not covered by your manufacturer's warranty. The items supplied with your device and available accessories may vary depending on your region or service provider. You can buy additional accessories from your local Samsung retailer. The supplied items are designed only for your device and may not be compatible with other devices. Other accessories may not be compatible with your device. Assembling 10 Device layout Earpiece Volume key Touch screen Home key Option key Back key Microphone Headset jack GPS antenna 1 Speaker Back cover Multifunction jack Camera lens Power/Reset/Lock key Main antenna 1. Do not touch or cover the area around the antenna with your hands or other objects while using the GPS functions.

Assembling 11 Keys Key Power/ Reset/ Lock Function Turn on the device (press and hold); Access the device options (press and hold); Reset the device (press and hold for 8-10 seconds); Turn off and lock the touch screen or turn it on. On the Home screen, launch the Google search application (press and hold); Open the list of options available on the current screen; Open the search input window while using some applications (press and hold). Return to the Home screen; Open the list of recent applications (press and hold). Return to the previous screen. If your device experiences fatal errors, hanging, or freezing, you may need to reset the device to regain functionality.

Assembling 12 Insert the SIM or USIM card and the battery When you subscribe to a cellular service, you will receive a Subscriber Identity Module (SIM) card, with subscription details, such as your personal identification number (PIN) and optional services. To use UMTS or HSDPA services, you can purchase a Universal Subscriber Identity Module (USIM) card. 1 Remove the back cover. Be careful not to damage your fingernails when you remove the back cover. 2 Insert the SIM or USIM card with the gold-coloured contacts facing downwards.

Charge the battery Before using the device for the first time, you must charge the battery. You can charge the battery with a travel adapter or by connecting the device to a computer with a USB cable. use only Samsung-approved chargers and cables. Unapproved chargers or cables may cause batteries to explode or damage your device. Assembling 14 When your battery is low, the device will emit a warning tone and show a low battery message. Recharge your battery to continue using your device. If the battery is completely discharged, you cannot turn on the device, even with the travel adapter connected. Allow a depleted battery to charge for a while before you try to turn on the device. > Charge with a travel adapter 1 2 Open the cover of the multifunction jack. Plug the small end of the travel adapter into the multifunction jack.

Connecting the travel adapter improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty. Assembling 15 3 Plug the large end of the travel adapter into an electrical socket. If the device receives an unstable power supply while charging, the touch screen may not function. If this happens, unplug the travel adapter from the device.

[You're reading an excerpt. Click here to read official SAMSUNG GALAXY POCKET GT-S5300 user guide](http://yourpdfguides.com/dref/4312067)
<http://yourpdfguides.com/dref/4312067>

The device may heat up while charging. This is normal and should not affect your device's lifespan or performance. If your device is not charging properly, take your device and the charger to a Samsung Service Centre. When the battery is fully charged, first unplug the travel adapter from the device, and then from the electrical socket. Do not remove the battery while the device is connected to the travel adapter.

Doing so may damage the device. To save energy, unplug the travel adapter when not in use. The travel adapter does not have a power switch, so you must unplug the travel adapter from the electrical socket when not in use to avoid wasting power. The travel adapter should remain close to the electrical socket when in use. 4 > Charge with a USB cable 1 2 Before charging, ensure that your computer is turned on.

Open the cover of the multifunction jack. Plug the small end (micro-USB) of the USB cable into the multifunction jack. Assembling 16 3 Plug the large end of the USB cable into a USB port on a computer. Depending on the type of the USB cable you are using, it may take some time before charging begins. When the battery is fully charged, first unplug the USB cable from the device, and then from the computer.

4 > Reduce the battery consumption Your device provides options that help you save battery power. By customising these options and deactivating features in the background, you can use the device longer between charges: When you are not using your device, switch to Sleep mode by pressing the Power key. Close unnecessary applications with the task manager. Decrease the brightness of the display. Insert a memory card (optional) Your device accepts microSDTM or microSDHCTM memory cards with maximum capacities of 32 GB (depending on the memory card manufacturer and type). Samsung uses approved industry standards for memory cards, but some brands may not be fully compatible with your device. Using an incompatible memory card may damage your device or the memory card. It may also corrupt data saved on the memory card. Assembling 17 Your device supports only the FAT file structure for memory cards. If you insert a memory card formatted with a different file structure, your device will ask you to reformat the memory card.

Frequent writing and erasing of data will shorten the lifespan of your memory cards. When you insert a memory card into your device, the memory card's file directory will appear in the /sdcard/sd folder. 1 2 Remove the back cover. Insert a memory card with the gold-coloured contacts facing downwards. 3 4 Push the memory card into the memory card slot until it locks in place. replace the back cover. Assembling 18 > Remove a memory card 1 2 3 4 5 6 Ensure that the device is not currently accessing the memory card. In the application list, select Settings SD card and phone storage Unmount SD card. Push the memory card gently until it disengages from the device. Do not remove a memory card while the device is transferring or accessing information, as this could result in loss of data or damage to the memory card or device.

> Format a memory card 1 Formatting your memory card on a computer may cause incompatibilities with your device. Format the memory card only on the device. In the application list, select Settings SD card and phone storage Unmount SD card. select OK (if necessary). Select Format SD card Format SD card Erase everything.

Before formatting the memory card, remember to make backup copies of all important data. The manufacturer's warranty does not cover loss of data resulting from user actions. Assembling 20 Getting started Turn on or off your device 1 Press and hold the Power key. 2 Enter the PIN supplied with your SIM or USIM card and select OK (if necessary). If you are turning on your device for the first time, follow the on-screen instructions to set up your device.

You must sign in to Google or create a Google account to use applications that interact with the Google server. To turn off your device, press and hold the Power key, and then select Power off OK. Follow all posted warnings and directions from approved personnel in areas where the use of wireless devices is restricted, such as aeroplanes and hospitals. To use only your device's non-network features, switch to Flight mode. p. 103 Getting started 21 Use the touch screen Your device's touch screen lets you easily select items or perform functions. Learn basic actions for using the touch screen. To avoid scratching the touch screen, do not tap it with anything sharp. Do not allow the touch screen to come into contact with other electrical devices. Electrostatic discharges can cause the touch screen to malfunction.

Do not allow the touch screen to come into contact with liquids. The touch screen may malfunction in humid conditions or when exposed to liquids. For Home screen, press the Option key and select Edit. You can also place two fingers on the screen and pinch them together to switch to Edit mode. Add, remove, or reorganise panels: To remove a panel, tap and hold the panel's thumbnail image, and then drag it to the rubbish bin. to add a new panel, select . To change the order of panels, tap and hold the panel's thumbnail image, it on or unlock the touch screen. If you forget your password, take your device to a Samsung Service Centre to reset it. Samsung is not responsible for the loss of passwords or private information, or other damages caused by illegal software. Set an unlock pattern 1 2 3 4 In the application list, select Settings Location and security Set screen lock Pattern.

View the on-screen instructions and the example pattern, and then select Next. Draw a pattern to connect at least 4 dots and select Continue. Draw the pattern again to confirm and select Confirm. Getting started 33 Set an unlock PIN 1 2 3 1 2 3 In the application list, select Settings Location and security Set screen lock PIN. Enter a new PIN and select Continue.

Enter the PIN again and select OK. In the application list, select Settings Location and security Set screen lock Password. Enter a new password (alphanumeric) and select Continue. Enter the password again and select OK. Set an unlock password > Lock your SIM or USIM card You can lock your device with the PIN that is supplied with your SIM or USIM card.

Once the SIM or USIM lock is enabled, you must enter the PIN each time you turn on the device or access applications that require the PIN. 1 2 In the application list, select Settings Location and security Set up SIM card lock Lock SIM card. enter your PIN and select OK. If you enter an incorrect PIN too many times, your SIM or USIM card will be blocked. You must enter a PIN unlock key (PUK) to unblock the SIM or USIM card. If you block your SIM or USIM card by entering an incorrect PUK, take the SIM or USIM card to your service provider to unblock it. Getting started 34 > Activate the Find my mobile feature When someone inserts a new SIM or USIM card into your lost or stolen device, the Find my mobile feature will send the contact number to your specified recipients automatically, so that you can locate and recover your device.
