Configuring your Phone When you first turn on your phone, you will need to set up a few things. 1.

The Welcome screen displays. The default language for your phone is English. If you would like to select another language, tap English and select one of the listed languages. 2. Sweep your finger across the screen to unlock the phone. 2. Tap Start to begin. The Make it Google screen is displayed. 6 3. If you already have a Google account, tap Sign in, otherwise, tap Get an account and follow the onscreen instructions to create a Google account.

You can also tap Not now if you want to create an account later. 6. A blue checkmark also appears next to the text that explains that you allows your location to be used for Google search results and other Google services. If you disagree, tap the checkmark to remove it. Tap Next. Note: In order to utilize your device to the fullest extent, you will need to create a Google™ Account when you first use your device. With a Google Account, you will have access to more Google applications and applications will always be in sync between your phone and computer. 7. 8. 9.

In the provided fields, enter your First and Last name so that your phone can personalize some applications. Tap Next. Read the information on the Google services screen, then tap Next. At the Setup complete screen, tap Finish to complete your setup. 4.

At the Backup and restore screen, blue checkmarks appear next to the text that explains that you allow backup of your data to your Google account and restoration of the data to your phone. If you disagree, tap the checkmarks to remove them. 10. Read the informational tips and tap OK. The main Home screen is displayed.

5. At the Use Google location screen, a blue checkmark appears next to the text that explains that you allow Google's location service to collect anonymous location data from your phone. If you disagree, tap the checkmark to remove it. Creating a Samsung Account With a Samsung account, you will be able to use Samsung services such as AppCenter on your phone.

[You're reading an excerpt. Click here to read official SAMSUNG GALAXY S3/GALAXY SIII/GALAXY S III/SGH-I747M user guide http://yourpdfguides.com/dref/4443810](http://yourpdfguides.com/dref/4443810)

1. From the home screen, touch and hold the Notification Bar until the pull-down displays, then drag down vertically. For more information, refer to "Notification Bar" on page 35. 2. Tap Samsung account. Getting Started 7 3.

4. 5. 6. Tap Create account and follow the onscreen instructions to create a Samsung account. Tap Terms and conditions, read the content and tap OK, then tap the I accept all the terms above checkbox. Tap Agree. Enter the required information and tap Sign up. Note: Once you have created a Google account, you only need to sign in. Retrieving your Google Account Password A Google account password is required for Google applications. If you misplace or forget your Google Account password, follow these instructions to retrieve it: 1.

2. 3. 4. 5. From your computer, use an Internet browser to navigate to <http://google.com/accounts>. Click the Can't access your account? link. Click the I forgot my password radio button. Enter your Email address and click Continue. Follow the password recovery procedure.

From the Home screen, tap and record your name. , then tap and hold . Creating a New Google Account In order to utilize your device to the fullest extent, you will need to create a Google™ Account when you first use your device. With a Google Account, Google applications will always be in sync between your phone and computer. If you did not create a new account during the setup procedure when you first turned your phone on, follow these steps: 1. From the Home screen, tap Gmail . Setting Up Your Voice Mail 1. 2. The Add a Google Account screen displays. 2.

Follow the tutorial to create a password, record a greeting, Tap New to create a new Google account. – or – If you already have a Google account, tap Existing to sign in and add the account to your phone. 3. 8 Note: These steps may be different depending on your network. Accessing Your Voice Mail 1. Follow the on-screen instructions to add a Google Account. From the Home screen, tap , then tap . You may be prompted to enter a password. 2. 2. 3. Once the Samsung Galaxy S III logo appears, release the Power key while continuing to press the Volume Up key. Continue to press the Volume Up and Home keys for at least 8 seconds, until Recovery mode is launched and the Android System Recovery screen is displayed. When connected, follow the voice prompts from the voice mail center. Accessing Your Voice Mail From Another Phone 1.

2. 3. Dial your wireless phone number. When you hear your voicemail greeting, press the asterisk key on the phone you are using. Enter your password. 4. 5. Release the Volume Up and Home keys. The following options are available: • reboot system now: this option turns on your phone. • apply update from external storage: this option allows you to apply updates from your memory card to your phone. • wipe data/factory reset: deletes all data from the phone except pictures and videos. For more information, refer to "Factory Data Reset" on page 115. • wipe cache partition: allows you to delete all cache data such as log files. • apply update from cache: allows you to update your phone's software once it has been placed in the cache after you have performed a Software update from the Settings menu. Use the Volume Up/Down keys to scroll up or down, then use the Power key to make a selection.

Android System Recovery Android System Recovery is used for Google updates but the average user will never need to perform a system recovery. Note: If you entered this menu by mistake, use the Volume Up key to select reboot system now, then press the Power key. Your phone will then continue to boot up. To enter the Android System Recovery mode, follow these steps: 1. With the phone turned off, press the Power key, Volume Up key and Home key at the same time until the phone switches on. 6. Getting Started 9 Safe Mode You can boot your phone into Safe Mode if you wish to troubleshoot whether or not added applications are causing problems with the device. Safe mode will only load basic system software. 1. 2.

3. 4. Make sure your phone is turned off. Press and hold the power key (device. After the animation starts to display, continually tap the key until the backlight turns on behind the bottom keys. Press and hold the key. When the Home screen is displayed, Safe mode is displayed in the lower left corner of the screen.) to boot up your Troubleshooting If your device has fatal errors, hangs up, or freezes, you may need to reset the device to regain functionality. If your device is frozen and unresponsive, press and hold the Power/Lock Key for 8 to 10 seconds. For more information, refer to "Android System Recovery" on page 9.

10 Section 2: Understanding Your Phone This section outlines some key features of your phone and describes the screen and the icons that appear when the phone is in use. It also shows how to navigate through the phone and provides information on using a memory card. • 16GB/32GB built-in memory (on-board) • Up to 64 GB expandable memory slot • Corporate and Personal Email • Sync and update social network applications • Over 250,000 Apps available to download from the Play Store™ • Google Video Chat via Google Talk • Full Integration of Google Mobile™ Services (Gmail, YouTube, Google Features of Your Phone Your phone is lightweight, easy-to-use and offers many useful features. The following list outlines a few of the features included in your phone. • 4G LTE network with 1.5 gigahertz dual core processor • Android v 4.x, Ice Cream Sandwich Platform • Touch screen provides quick response to a variety of in-phone menus Maps, Google Voice Search) • Multiple Messaging Options: Text/Picture/Video Messaging, and Instant Messaging with Google Talk™ • HD Video Player 1080p • DivX Certified® to play DivX® video up to HD 1080p, including premium and options including applications and seven home screens • Virtual (on-screen) QWERTY keyboard • Ready access to the Internet • Built-in Bluetooth and advanced Wi-Fi® technology • USB Tethering-capable • Mobile Hotspot Capability • Brilliant 4.8" HD SuperAMOLED display • 8 Megapixel camera and camcorder with 2 Megapixel Front Facing content • AllShare™ to share your media content across DLNA certified devices camera • HSDPA 7.2 mbps high speed download capability Understanding Your Phone 11 Front View of Your Phone 13 1 2 12 11 10 9 3 8 4 7. 8.

9. 6. 5. 4. 2. 3. notification has arrived. External speaker: allows you to hear the caller. Application icons: you can place shortcuts to your favorite applications on the Home screen.
