Manual abstract:

11/2014. Samsung is not liable for performance issues caused by apps supplied by providers other than Samsung. Samsung is not liable for performance issues or incompatibilities caused by edited registry settings or modified operating system software. Attempting to customise the operating system may cause the device or apps to work improperly. Users are entirely responsible for illegal use of media. For large data transfers, it is recommended to use the Wi-Fi feature. If you have questions about an app provided with the device, contact a Samsung Service Centre. For user-installed apps, contact service providers. Modifying the device's operating system or installing softwares from unofficial sources may result in device malfunctions and data corruption or loss.

These actions are violations of your Samsung licence agreement and will void your warranty. Read me first Instructional icons Warning: situations that could cause injury to yourself or others Caution: situations that could cause damage to your device or other equipment Note: notes, usage tips, or additional information Getting started Package contents Check the product box for the following items: Device Battery Quick start guide Other items supplied with the device and any available accessories may vary depending on the region or service provider. The supplied items are designed only for this device and may not be compatible with other devices. Appearances and specifications are subject to change without prior notice. You can purchase additional accessories from your local Samsung retailer.

Make sure they are compatible with the device before purchase. Use only Samsung-approved accessories. Using unapproved accessories may cause the performance problems and malfunctions that are not covered by the warranty. Availability of all accessories is subject to change depending entirely on the manufacturing companies. For more information about available accessories, refer to the Samsung website.

6 Getting started Device layout Proximity sensor Earpiece Front camera Touch screen Power button Home button Back button Recent apps button Microphone Multipurpose jack Headset jack Flash GPS antenna Rear camera Back cover Volume button Speaker NFC antenna (on the battery) Main antenna Getting started Do not cover the antenna area with your hands or other objects. This may cause connectivity problems or drain the battery. Using a Samsung-approved screen protector is recommended. Unapproved screen protectors may cause the sensors to malfunction. Do not allow water to contact the touch screen. The touch screen may malfunction in humid conditions or when exposed to water. Buttons Button Power Function Press and hold to turn the device on or off. Press to turn on or lock the screen. Press to open the list of recent apps. Recent apps Press and hold to access additional options for the current screen.

Press to turn on the screen while the screen is locked. Press to return to the Home screen. Press and hold to launch Google. Back Volume Press to return to the previous screen. Press to adjust the device volume. Home 8 Getting started Using the SIM or USIM card and battery Installing the SIM or USIM card and battery Insert the SIM or USIM card provided by the mobile telephone service provider, and the included battery. Only microSIM cards work with the device. Some LTE services may not be available depending on the service provider. For more information about service availability, contact your service provider. 1 Remove the back cover.

Be careful not to damage your fingernails when you remove the back cover. Do not bend or twist the back cover excessively. Doing so may damage the cover.

9 Getting started 2 Insert the SIM or USIM card with the gold-coloured contacts facing downwards. Do not insert a memory card into the SIM card slot. If a memory card happens to be lodged in the SIM card slot, take the device to a Samsung Service Centre to remove the memory card. Use caution not to lose or let others use the SIM or USIM card. Samsung is not responsible for any damages or inconveniences caused by lost or stolen cards. 3 Insert the battery with the battery's gold-coloured contacts properly aligned with the device's contacts. 2 10 Getting started 4 Replace the back cover. Ensure that the back cover is closed tightly. Use only Samsung-approved back covers and accessories with the device. Removing the SIM or USIM card and battery 1 Remove the back cover. 2 Pull out the battery. 3 Press the SIM or USIM card with your finger, and then pull it out. 11 Getting started Charging the battery Use the charger to charge the battery before using it for the first time. A computer can be also used to charge the battery by connecting them via the USB cable. Use only Samsung-approved chargers, batteries, and cables. Unapproved chargers or cables can cause the battery to explode or damage the device. When the battery power is low, the battery icon appears empty.

If the battery is completely discharged, the device cannot be turned on immediately when the charger is connected. Allow a depleted battery to charge for a few minutes before turning on the device. If you use multiple apps at once, network apps, or apps that need a connection to another device, the battery will drain quickly. To avoid disconnecting from the network or losing power during a data transfer, always use these apps after fully charging the battery. Plug the small end of the charger into the multipurpose jack of the device, and plug the large end of the charger into an electric socket. Connecting the charger improperly may cause serious damage to the device. Any damage caused by misuse is not covered by the warranty. 12 Getting started The device can be used while it is charging, but it may take longer to fully charge the battery. If the device receives an unstable power supply while charging, the touch screen may not function. If this happens, unplug the charger from the device.

While charging, the device may heat up. This is normal and should not affect the device's lifespan or performance. If the battery gets hotter than usual, the charger may stop charging. If the device is not charging properly, take the device and the charger to a Samsung Service Centre. After fully charging, disconnect the device from the charger.

First unplug the charger from the device, and then unplug it from the electric socket. Do not remove the battery before removing the charger. This may damage the device. To save energy, unplug the charger when not in use.

[You're reading an excerpt. Click here to read official SAMSUNG SM-G360G user guide](http://yourpdfguides.com/dref/5769109)

<http://yourpdfguides.com/dref/5769109>

The charger does not have a power switch, so you must unplug the charger from the electric socket when not in use to avoid wasting power. The charger should remain close to the electric socket and easily accessible while charging. Reducing the battery consumption Your device provides options that help you save the battery power. By customising these options and deactivating features in the background, you can use the device longer between charges: • When you are not using the device, switch to sleep mode by pressing the Power button. W • Lose unnecessary apps using the task manager. C • deactivate the Bluetooth feature. D • deactivate the Wi-Fi feature. D • deactivate auto-syncing of apps. D • decrease the backlight time. D • decrease the screen brightness. D 13 Getting started Using a memory card Installing a memory card Your device accepts memory cards with maximum capacities of 64 GB.

Depending on the memory card manufacturer and type, some memory cards may not be compatible with your device. • Some memory cards may not be fully compatible with the device. Using an S incompatible card may damage the device or the memory card, or corrupt the data stored in it. • Use caution to insert the memory card right-side up. U • The device supports the FAT and the exFAT file systems for memory cards. When T inserting a card formatted in a different file system, the device asks to reformat the memory card. • frequent writing and erasing of data shortens the lifespan of memory cards. F • When inserting a memory card into the device, the memory card's file directory W appears in the My Files → SD card folder. 1 Remove the back cover and battery. 2 Insert a memory card with the gold-coloured contacts facing downwards.

3 Replace the battery and back cover. 14 Getting started Removing the memory card Before removing the memory card, first unmount it for safe removal. On the Home screen, tap → Settings → Storage → Unmount SD card. 1 Remove the back cover and battery. 2 Pull out the memory card.

3 Replace the battery and back cover. Do not remove the memory card while the device is transferring or accessing information. Doing so can cause data to be lost or corrupted or can damage the memory card or device. Samsung is not responsible for losses that result from the misuse of damaged memory cards, including the loss of data. Formatting the memory card A memory card formatted on a computer may not be compatible with the device.

Format the memory card on the device. On the Home screen, tap → Erase everything. → Settings → Storage → Format SD card → Format SD card Before formatting the memory card, remember to make backup copies of all important data stored in the device. The manufacturer's warranty does not cover loss of data resulting from user actions. 15 Getting started Turning the device on and off Press and hold the Power button for a few seconds to turn on the device.

When you turn on your device for the first time or after performing a data reset, follow the onscreen instructions to set up your device. To turn off the device, press and hold the Power button, and then tap Power off. Follow all posted warnings and notifications, such as messages or missed calls, indicator icons appear on the status bar. To see more information about the icons, open the notifications panel and view the details. To open the notifications panel, drag the status bar downwards.

To close the notifications panel, drag the bar from the bottom of the screen upwards. You can use the following functions on the notifications panel. Activate or deactivate options. Tap and hold a button to view more detailed settings. Launch Settings. Adjust the brightness. Tap a notification and perform various actions. Clear all notifications. 24 Basics Using the quick setting buttons You can activate or deactivate some features on the notifications panel. Tap the following options to activate or deactivate them.

You can view more detailed settings if you tap and hold a button. • Wi-Fi: Refer to Wi-Fi for more information. W • Location: Refer to Location for more information. L • Sound / Vibrate / Mute: Select a sound mode. S • Screen rotation: Allow or prevent the interface from rotating when you rotate the device. S Some apps do not allow screen rotation. • Bluetooth: Refer to Bluetooth for more information. B • Mobile data: Refer to Data usage or Mobile networks for more information. M • . power saving: Refer to Ultra power saving mode for more information.

U • Mobile hotspot: Refer to Tethering and Mobile hotspot for more information. M • NFC: Refer to NFC for more information. N • Sync: Activate or deactivate auto-syncing of apps, such as calendar or email. S Opening apps On the Home screen or the Apps screen, select an app icon to open it. To open the list of recently-used apps, tap and select an app icon to open. Closing an app Tap and drag an app icon to the left or right to close it. To close all running apps, tap .

25 Basics Installing or uninstalling apps Samsung GALAXY Apps Use this app to purchase and download apps. Tap GALAXY Apps on the Apps screen. 26 Basics Installing or uninstalling apps Samsung GALAXY Apps Use this app to purchase and download apps. Tap GALAXY Apps on the Apps screen. 30 Basics Power saving feature Ultra power saving mode Use this mode to extend the device's battery power.

In ultra power saving mode, the device performs the following: • Restricts the available apps to essential and selected apps only. R • Deactivates the mobile data connection when the screen turns off. D • Deactivates the Wi-Fi and Bluetooth features. D On the Apps screen, tap Settings → Ultra power saving mode, and tap the Ultra power saving mode switch to activate it. Alternatively, open the notifications panel and tap U. power saving to activate it. To add an app to the Home screen, tap and select an app. , and then To remove an app from the Home screen, tap → Remove, select an app with tap OK. To change the settings for ultra power saving mode, such as network connectivity or sound, tap → Settings. To deactivate ultra power saving mode, tap → Disable ultra power saving mode.

The estimated maximum standby time shows the time remaining before the battery power runs out if the device is not used. Standby time may vary depending on your device settings and operating conditions. Viewing help information To view help information for an app while you are using the app, tap → Help. Some apps may not include help information. 31 Network connectivity Mobile data Connect the device to a mobile network to use the Internet or share media files with other devices.

Refer to Data usage for additional options. On the Apps screen, tap Settings → Data usage , and then tick Mobile data. Alternatively, open the notifications panel and tap Mobile data to activate it. Wi-Fi Connect the device to a Wi-Fi network to use the Internet or share media files with other devices. Refer to Wi-Fi for additional options.

<http://yourpdfguides.com/dref/5769109>

Turn off Wi-Fi to save the battery when not in use. 1 On the Apps screen, tap Settings → Wi-Fi, and then tap the Wi-Fi switch to activate it. 2 Select a network from the Wi-Fi networks list. Networks that require a password appear with a lock icon. 3 Tap Connect. Once the device connects to a Wi-Fi network, the device will reconnect to that network each time it is available without requiring a password. To prevent the device connecting to the network automatically, select it from the list of networks and tap Forget. 32 Network connectivity Tethering and Mobile hotspot About tethering and mobile hotspots Use this feature to share the device's mobile data connection with computers and other devices if an Internet connection is unavailable. Connections can be made via Wi-Fi, USB, or Bluetooth. You may incur additional charges when using this feature.

Using the mobile hotspot Use your device as a mobile hotspot to share your device's mobile data connection with other devices. 1 On the Apps screen, tap Settings → Tethering and Mobile hotspot, and then tick Mobile hotspot. • appears on the status bar. Other devices can find your device in the Wi-Fi networks list. • o set a password for the mobile hotspot, tap Configure Mobile hotspot and select T the level of security. Then, enter a password and tap Save. 2 On the other device's screen, search for and select your device from the Wi-Fi networks list. 3 On the connected device, use the device's mobile data connection to access the Internet. 33 Network connectivity Using USB tethering Share the device's mobile data connection with other devices via a USB cable. 1 On the Apps screen, tap Settings → Tethering and Mobile hotspot.

2 Connect your device to the computer via the USB cable. 3 Tick USB tethering. appears on the status bar when the two devices are connected. 4 On the computer, use your device's mobile data connection. Using Bluetooth tethering Share the device's mobile data connection with other devices via Bluetooth. Ensure that the computer that you connect to supports the Bluetooth feature. 1 Pair your device with the other device via Bluetooth. Refer to Pairing with other Bluetooth devices for more information. 2 On the Apps screen of your device, tap Settings → Tethering and Mobile hotspot. 3 Tick Bluetooth tethering. 4 On the connected device, open the Bluetooth settings screen, tap → Internet access. appears on the status bar when the two devices are connected. 5 On the connected device, use the device's mobile data connection to access the Internet. The connection methods may vary depending on the connected devices. 34 Personalising Managing the Home and Apps screens Managing the Home screen Adding items Tap and hold an app from the Apps screen, and then drag it to the Home screen. To add widgets, open the Home screen, tap and hold an empty area, tap Widgets, tap and hold a widget, and then drag it to the Home screen. Moving and removing an item Tap and hold an item on the Home screen, and then drag it to a new location. To move the item to another panel, drag it to the side of the screen. You can also move frequently-used apps to the shortcuts area at the bottom of the Home screen. To remove an item, tap and hold the item.

Then, drag it to Remove that appears at the top of the screen. Creating a folder 1 On the Home screen, tap and hold an app, and then drag it to Create folder that appears at the top of the screen. 2 Enter a folder name. 3 Tap , select the apps to move to the folder, and then tap Done. 35 Personalising Managing panels On the Home screen, tap and hold an empty area to add, move, or remove a panel. To add a panel, scroll left to the last panel, and then tap . To move a panel, tap and hold a panel preview, and then drag it to a new location. To remove a panel, tap and hold a panel preview, and then drag it to Remove at the top of the screen. To set a panel as the main Home screen, tap . Managing the Apps screen Changing the sorting method On the Apps screen, tap → View as and select a sorting method.

Hiding apps Hide apps that you do not want to see on the Apps screen. On the Apps screen, tap → Hide apps, select apps, and then tap Done. To display hidden apps, tap → Show hidden apps, select apps, and then tap Done. Moving items On the Apps screen, tap → Edit. Tap and hold an item and drag it to a new location.

To move the item to another panel, drag it to the side of the screen. To move an item to a new panel, drag it to Create page that appears at the top of the screen. You can move folders only in the folder panel. 36 Personalising Setting wallpaper and ringtones Setting wallpaper Set an image or photo stored in the device as wallpaper for the Home screen or the locked screen. 1 On the Home screen, tap and hold an empty area, and then tap Wallpapers.

Alternatively, on the Apps screen, tap Settings → Display → Wallpaper. 2 Select a screen to change or apply wallpaper to. 3 Select an option and an image. 4 Tap Set wallpaper or Done. Changing ringtones Change ringtones for incoming calls and notifications. On the Apps screen, tap Settings → Sound. To set a ringtone for incoming calls, tap Ringtones, select a ringtone, and then tap OK. To use a song stored in the device or in your account as a ringtone, tap Add. To set a ringtone for notifications, tap Notifications, select a ringtone, and then tap OK. 37 Personalising Changing the screen lock method You can change the way that you lock the screen to prevent others from accessing your personal information.

On the Apps screen, tap Settings → Lock screen → Screen lock, and then select a screen lock method. The device requires an unlock code whenever unlocking it. If the unlock code is forgotten, take the device to a Samsung Service Centre to reset it. Pattern Draw a pattern by connecting four dots or more, and then draw the pattern again to verify it. Set a backup PIN to unlock the screen when you forget the pattern. PIN A PIN consists of numbers only. Enter at least four numbers, and then enter the password again to verify it. Password A password consists of characters and numbers. Enter at least four characters including numbers and symbols, and then enter the password again to verify it. Transferring data from your previous device Using backup accounts You can transfer backup data from your previous device to your new device using your Google account.

Refer to Backing up and restoring data for more information. 38 Personalising Using Samsung Smart Switch You can transfer data of the previous device to a new device via Smart Switch. Visit www.samsung.com/smarts witch for more information.

Samsung Smart Switch is not supported on some devices or computers. Using Smart Switch Mobile Use this app to transfer data from your previous iPhone or Android device to your new device. You can download the app from GALAXY Apps or Play Store. 1 On your device, tap Smart Switch Mobile.

[You're reading an excerpt. Click here to read official SAMSUNG SM-G360G user guide](http://yourpdfguides.com/dref/5769109)

<http://yourpdfguides.com/dref/5769109>

2 On your device, select an option depending on the previous device type and follow the on-screen instructions.

If the previous device is an Android device, ensure that the Smart Switch Mobile app is installed on the device. Refer to the help for more information. Using Smart Switch with computers Use this feature to import a backup of your data (from selected manufacturer's mobile devices) from a computer to your device. You can download the app from www.samsung.com/smartswitch. 1 Back up data from a previous device to the computer. For more information, contact the device's manufacturer. 2 On the computer, launch Smart Switch. 3 Connect your current device to the computer using the USB cable.

4 On the computer, click the manufacturer of the previous device and follow the on-screen instructions to transfer data to your device. 39 Personalising Using Samsung Kies Import a backup of your data from your computer via Samsung Kies to restore data on your device. You can also back up data to the computer via Samsung Kies. Refer to Connecting with Samsung Kies for more information. Setting up accounts Adding accounts Some apps used on your device require a registered account. Create accounts to have the best experience with your device. On the Apps screen, tap Settings → Add account and select an account service. Then, follow the on-screen instructions to complete the account setup. To sync content with your accounts, select an account and tick items to sync.

Removing accounts On the Apps screen, tap Settings, select an account name under PERSONAL, select the account to remove, and then tap → Remove account.

40 Phone Making calls Tap Phone on the Apps screen. Tap Keypad, enter a phone number, and then tap to make a voice call, or tap to make a video call. You can also make calls to phone numbers listed in Logs, Favourites, and Contacts. View call and message logs. Enter the number using the keypad.

Add the number to the contacts list. View favourite contacts. View the contacts list. Access additional options. Preview the phone number.

Delete a preceding character. Making calls from call logs or contacts list Tap Logs or Contacts, and then drag a contact or a phone number to the right to make a call. Making an international call Tap Keypad. Tap and hold 0 until the + sign appears. Enter the country code, area code, and phone number, and then tap . To block outgoing international calls, tap → Settings → Call → Additional settings → Call barring. Then, select a call type and tick International calls. 41 Phone Receiving calls Answering a call When a call comes in, drag outside the large circle. Rejecting a call When a call comes in, drag outside the large circle. To send a message when rejecting an incoming call, drag the reject message bar upwards.

To create various rejection messages, open the Apps screen and tap Phone → → Settings → Call → Set up call reject messages → . Missed calls If a call is missed, appears on the status bar. Open the notifications panel to view the list of missed calls. Alternatively, on the Apps screen, tap Phone → Logs to view missed calls. Options during calls During a voice call During a voice call, the device automatically locks the screen to prevent unwanted touch inputs. To unlock the screen, double-tap . The following actions are available: •dd call: Dial a second call. A •eypad: Open the keypad. K •nd call: End the current call. E •peaker: Activate or deactivate the speakerphone.

When using the speakerphone, speak S into the microphone at the top of the device and keep the device away from your ears. •ute: Turn off the microphone so that the other party cannot hear you. 2 Tap . Alternatively, select a date with no events or tasks in it and tap the date again. If the date already has saved events or tasks in it, tap the date and tap .
3 Select either event or task and enter details. • dd event: Set a start and end date for an event. You can set an optional repeat A setting. • dd task: Add a task to do on a specific date. You can set an optional priority setting.

A Select an item. Select a calendar to use or sync with. Enter a title. Set a start and end date for the event. Add more details.

4 Tap Save to save the event or task. 55 Useful apps and features Syncing events and tasks with your accounts Tap S Planner on the Apps screen. To sync events and tasks with your accounts, tap → Sync. To add accounts to sync with, tap → Calendars → Add account. Then, select an account to sync with and sign in. When an account is added, a green circle is displayed next to the account name. To change an account's syncing option, open the Apps screen, tap Settings, and then select an account service under PERSONAL. Internet 1 Tap Internet on the Apps screen. 2 Tap the address field. To change the search engine, tap the search engine icon next to the web address field.

3 Enter the web address or a keyword, and then tap Go. To search the web by voice, tap To view the toolbars, drag your finger downwards slightly on the screen. Open the webpage window manager. Access additional options. Bookmark the current webpage. Refresh the current webpage. Read an article in reading mode. . Open the homepage. Move to the previously-visited page.

View your bookmarks and recent Internet history. 56 Useful apps and features Video Playing videos Tap Video on the Apps screen. Select a video to play. Change screen ratio. Adjust the volume.

Access additional options. Move forwards or backwards by dragging the bar. Pause and resume playback. Rotate the screen's orientation. Skip to the previous video.

Tap and hold to move backwards quickly. Skip to the next video. Tap and hold to move forwards quickly. 57 Useful apps and features Clock Alarm On the Apps screen, tap Clock → Alarm. Setting alarms Tap in the alarms list, set an alarm time, select the days on which the alarm will repeat, set other various alarm options, and then tap Save. To activate or deactivate alarms, tap next to the alarm in the alarms list. • nooze: Set an interval and the number of times for the alarm to repeat after the preset S time. • mart alarm: Set a time and tone for the smart alarm. A smart alarm starts at a low S volume a few minutes before a preset alarm is scheduled to sound. The volume of the smart alarm increases gradually until you turn it off or the preset alarm sounds.

Stopping alarms Drag outside the large circle to stop an alarm. If you have previously enabled the snooze outside the large circle to repeat the alarm after a specified length of time. option, drag Deleting alarms Tap → Select, select alarms, and then tap . World clock On the Apps screen, tap Clock → World clock.

Creating clocks Tap and enter a city name or select a city from the cities list. 58 Useful apps and features Deleting clocks Tap → Select, select clocks, and then tap . Stopwatch On the Apps screen, tap Clock → Stopwatch. Tap Start to time an event. Tap Lap to record lap times. Tap Stop to stop timing. To clear lap times, tap Reset. Timer On the Apps screen, tap Clock → Timer. Set the duration, and then tap Start. Drag outside the large circle when the timer goes off. Calculator Use this app for simple or complex calculations.

Tap Calculator on the Apps screen. Rotate the device to landscape orientation to display the scientific calculator. If Screen rotation is disabled, tap → Scientific calculator. 59 Useful apps and features Memo Use this app to create memos and organise them by category. Tap Memo on the Apps screen.

Composing memos Tap on the memos list and enter a memo. @@: Insert images. •: Make a voice recording to insert. To save the memo, tap Save. @@@@Adjust the volume. Access additional options. Enter radio station frequency manually. @@View the list of available stations. Search for an available radio station. @@Tap → Scan, and then select a scan option.

The FM radio scans and saves available stations automatically. @@@@Tap to start recording. Speak into the microphone. Tap recording, tap . Tap to finish recording. to pause recording. @@@@Tap •/•/ and select a voice memo to play. : Pause or resume playback. @@You may require a Google account to access some apps. Refer to Setting up accounts for more information.

@@@@@@Use Bluetooth to exchange data or media files with other devices. @@@@@@@@@@@@@@The detected devices are listed.

@@@@@@@2 Select an image. @@@@@@@@@@@@@@@@@@2 Select an image. @@@4 Accept the Wi-Fi Direct authorisation request on the other device.

Receiving an image When another device sends you an image, accept the Wi-Fi Direct authorisation request. The received image is saved in the Gallery → Download folder. Ending the device connection 1 On the Apps screen, tap Settings → Wi-Fi. 2 Tap → Wi-Fi Direct. The device displays the connected devices on the list.

3 Tap End connection → OK to disconnect the devices. 68 Connecting with other devices NFC About NFC Your device allows you to read near field communication (NFC) tags that contain information about products. You can also use this feature to make payments and buy tickets for transportation or events after downloading the required apps. The battery contains a built-in NFC antenna. Handle the battery carefully to avoid damaging the NFC antenna. Using the NFC feature Use the NFC feature to send images or contacts to other devices, and read product information from NFC tags. If you insert a SIM or USIM card that has a payment feature, you can use the device to make payments conveniently. On the Apps screen, tap Settings → NFC, and then tap the NFC switch to activate it. Alternatively, open the notifications panel and tap NFC to activate it. Place the NFC antenna area on the back of your device near an NFC tag.

The information from the tag appears. Ensure that the device's screen is unlocked. Otherwise, the device will not read NFC tags or receive data. 69 Connecting with other devices Making a purchase with the NFC feature Before you can use the NFC feature to make payments, you must register for the mobile payment service. To register or get more information about the service, contact your service provider. On the Apps screen, tap Settings → NFC, and then tap the NFC switch to activate it. Alternatively, open the notifications panel and tap NFC to activate it. Touch the NFC antenna area on the back of your device to the NFC card reader. To set the default payment app, tap Tap and pay and select an app. The payment services list may not include all available payment apps.

Sending data Use the Android Beam feature to send data, such as webpages and contacts, to NFC-enabled devices.

<http://yourpdfguides.com/dref/5769109>

1 On the Apps screen, tap Settings → NFC, and then tap the NFC switch to activate it. Alternatively, open the notifications panel and tap NFC to activate it.
2 Tap Android Beam and tap the Android Beam switch to activate it. 3 Select an item and touch the other device's NFC antenna to your device's NFC antenna.

4 When Touch to beam appears on the screen, tap your device's screen to send the item. 70 Connecting with other devices Mobile printing Connect the device to a printer via Wi-Fi or Wi-Fi Direct, and print images or documents. Some printers may not be compatible with the device. Adding printer plug-ins Add printer plug-ins for printers you want to connect the device to. On the Apps screen, tap Settings → Printing → Add printer, and search for a printer plug-in in Play Store.

Select a printer plug-in and install it. Connecting to a printer On the Apps screen, tap Settings → Printing, select a printer plug-in, and then tap the switch at the top right of the screen to activate it. The device searches for printers that are connected to the same Wi-Fi network as your device. Select a printer to use as the default printer. @@@@Launch Samsung Kies and connect the device to the computer. @@Click the Update button in the dialogue box to start upgrading. @@@@Doing so may cause data loss or device damage. @@@@•he devices may not connect properly if they are connected via a USB hub. Directly T connect the device to the computer's USB port. Connecting as a media device 1 Connect the device to the computer using the USB cable.

2 Open the notifications panel, and then tap Connected as a media device → Media device (MTP). Tap Camera (PTP) if your computer does not support Media Transfer Protocol (MTP) or not have any appropriate driver installed. 3 Transfer files between your device and the computer. 73 Device & data manager Connecting with Samsung Kies Samsung Kies is a computer app that manages media contents and personal information with Samsung devices. Download the latest Samsung Kies from the Samsung website. 1 Connect the device to the computer using the USB cable. Samsung Kies launches on the computer automatically. If Samsung Kies does not launch, double-click the Samsung Kies icon on the computer. 2 Transfer files between your device and the computer. Refer to the Samsung Kies help for more information.

Backing up and restoring data Keep your personal information, app data, and settings safe on your device. You can back up your sensitive information to a backup account and access it later. 1 Tap Settings on the Apps screen. 2 Tap Backup and reset and tick Back up my data. 3 Tap Backup account and select an account as the backup account.

To restore data, you must sign in to your Google account via the setup wizard. You can launch and open the setup wizard by performing a factory data reset on the device. If you do not sign in to your Google account via the setup wizard, you cannot restore the backup data. 74 Device & data manager Performing a data reset Delete all settings and data on the device. Before performing a factory data reset, ensure you back up all important data stored on the device. Refer to Backing up and restoring data for more information. On the Apps screen, tap Settings → Backup and reset → Factory data reset → Reset device → Erase everything. The device automatically restarts. 75 Settings About Settings Use this app to configure the device, set app options, and add accounts. Tap Settings on the Apps screen. CONNECTIONS Wi-Fi Activate the Wi-Fi feature to connect to a Wi-Fi network and access the Internet or other network devices. On the Settings screen, tap Wi-Fi, and then tap the Wi-Fi switch to activate it. To use options, tap . •can: Search for available networks. S •i-Fi Direct: Activate Wi-Fi Direct and connect devices directly via Wi-Fi to share files.

W •dvanced: Customise Wi-Fi settings. A •PS push button: Connect to a secured Wi-Fi network with a WPS button. W •PS PIN entry: Connect to a secured Wi-Fi network with a WPS PIN. W Setting Wi-Fi sleep policy Tap → Advanced → Keep Wi-Fi on during sleep. When the screen is turned off, the device automatically turns off Wi-Fi connections. When this happens, the device automatically accesses mobile networks if it is set to use them. This may incur data transfer fees. To avoid additional charges, set this option to Always. 76 Settings Bluetooth Activate the Bluetooth feature to exchange information over short distances. On the Settings screen, tap Bluetooth, and then tap the Bluetooth switch to activate it.

To use more options, tap . •isibility timeout: Set duration that the device is visible. V •eceived files: View received files via Bluetooth. R Tethering and Mobile hotspot Use the device as a mobile hotspot to share the device's mobile data connection with other devices. Refer to Tethering and Mobile hotspot for more information.

On the Settings screen, tap Tethering and Mobile hotspot. •obile hotspot: Use the mobile hotspot to share the device's mobile data connection M with computers or other devices through the Wi-Fi network. You can use this feature when the network connection is not available. •onfigure Mobile hotspot: Configure settings for mobile hotspot such as a password, C network SSID, and more. •SB tethering: Use USB tethering to share the device's mobile data connection with U a computer via USB.

When connected to a computer, the device is used as a wireless modem for the computer. •luetooth tethering: Use Bluetooth tethering to share the device's mobile data B connection with computers or other devices via Bluetooth. Flight mode This disables all wireless functions on your device. You can use only non-network services. On the Settings screen, tap Flight mode. 77 Settings Data usage Keep track of your data usage amount and customise the settings for the limitation. On the Settings screen, tap Data usage. •obile data: Set the device to use data connections on any mobile network. M •et mobile data limit: Set a limit for mobile data usage. S •ata usage cycle: Set a monthly reset date to monitor data usage between periods.

D To use more options, tap . •ata roaming: Set the device to use data connections when you are roaming. D •estric background data: Set the device to disable sync in the background while using R a mobile network. •uto sync data: Activate or deactivate auto-syncing of apps, such as calendar or email. A You can select what information to sync for each account in Settings → PERSONAL. •how Wi-Fi usage: Set the device to show your data usage via Wi-Fi. S •obile hotspots: Select mobile hotspots to prevent apps that are running in the M background from using them. Location Change settings for location information permissions. On the Settings screen, tap Location, and then tap the Location switch to activate it.
