Manual abstract:

@@@ 149 How Does it Work? @@ this TV has a built-in user guide. To read it, use one of the following methods: **Open the Support menu and choose e-Manual (Troubleshooting).** **Press the E-MANUAL button on the standard remote control.** **Press the MORE button on the Smart Touch Control to display control buttons on the screen. Flick the Touch Pad until e-Manual appears and select it.** "" Words in blue refer to screen menu options and words in light blue refer to remote control buttons. Scrolling a Page To scroll a page, use of one of the following methods: **Press the or button on the scroll bar at the right edge of the screen.** **Drag or flick up or down the line on either the left or right edge of the touchpad. This method is not available for LED 4500 - 6300 Series.** **Place the focus on the or button at the right edge of the screen, drag or flick up or down on the touchpad.**

For LED 4500 - 6300 Series **Place the focus on the or arrow button on the remote. Button at the right edge of the screen, press the up or down Using the Top Icons Use the icons on the top left of the screen to navigate through pages. These icons are available when two or more pages are passed. Returning to the Home Page To return to the home page, press the a button or select on the top right of the screen. Searching the Index Press the b button or select on the top right of the screen to display the index.**

Select a term to display the page containing the term. Searching Pages Press the { button or select on the top of the screen to acART TV has a wide range of connectors for audio input from devices such as amplifiers, Blu-ray players and DVD players. For better audio quality, it is a good idea to use an AV receiver. **Digital Audio (Optical)** **ARC (Audio Return Channel)** The number of connectors and their names and locations may vary depending on the model. When connecting an external device, refer to the device's operating manual.

The number of external device connectors and their names and locations may vary depending on the manufacturer. **Digital Audio (Optical) Connection Refer to the diagram and connect the optical cable to the TV's digital audio output connector and the device's digital audio input connector. Connecting the device using an optical cable does not automatically turn off the TV speakers. To turn off the TV speakers, open the Speaker Select (Screen Menu > Sound > Speaker Settings > Speaker Select) menu, then set External Speaker. Adjust the audio device's volume using its remote control. An unusual noise coming from the audio device while it is being used may indicate a problem with the audio device itself. If this is the case, ask for assistance from the audio device manufacturer. 5. 1-channel audio for digital channels is only available with broadcasts that support 5. ARC enables digital sound to be output using just an HDMI cable.**

However, ARC is only available through the HDMI (ARC) port and only when the TV is connected to an ARC-enabled AV receiver. Connect the HDMI cable to the TV's HDMI (ARC) connector and the device's HDMI output connector. **Headphone Connection Refer to the diagram and connect the headphones to the headphone output connector. Only use headphones with a 3-conductor TRS type jack. The headphone volume and the TV volume are adjusted independently of each other. While the headphones are connected, the TV speakers are muted and certain Sound options are deactivated.** "" This option is only available for LED TVs. **Computer Connection This TV has the following computer connection ports: HDMI HDMI-to-DVI For the highest picture quality, connect the computer to the HDMI/DVI port. Not all computers are HDMI-enabled. In this case, use an HDMI-to-DVI cable to connect the computer to the TV.**

Refer to the "Display Resolution" for information on the resolution settings supported by the TV. **HDMI Connection Refer to the diagram and connect the HDMI cable to the TV's HDMI input port and the computer's HDMI output port. HDMI-to-DVI Connection Refer to the diagram and connect the HDMI-to-DVI cable to the TV's HDMI (DVI) port and the computer's DVI output port. The HDMI-to-DVI connection is available through the HDMI (DVI) port only. DVI cannot carry audio.**

To listen to the computer sound, connect the external speaker to the computer's audio output connector. **Switching Between Video Sources Press SOURCE button to switch between devices connected to the TV. For example, to switch to a game console connected to the second HDMI connector, press SOURCE button. from the Source list , select HDMI2. The connector names may vary depending on the product.**

Select **TOOLS** at the upper-right corner of the Source screen to access the following functions. **Information View detailed information about the connected devices.** **Edit Name You can edit name of devices connected to the TV to more easily identify external sources. With a computer connected to the TV's HDMI (DVI) port via an HDMI cable, for example, you can change Edit Name to PC. With a computer connected to the TV's HDMI (DVI) port via an HDMI-to-DVI cable, for example, you can change Edit Name to DVI PC. With an AV device connected to the TV's HDMI (DVI) port via an HDMI-to-DVI cable, for example, you can change Edit Name to DVI Devices.** **Refresh Select this if a connected device does not appear in the list. If the list does not show the device after selecting Refresh, check the status of the TV-to-device connection.** **Disconnect USB Device Remove the USB device from the list safely. This function is only available when the USB device selected.**

Universal remote setup To add a new external device to control it with the Touch Remote Control, press the SOURCE button and select Universal remote setup on the top right of the screen. Using the universal remote control, users can control external devices connected to the TV, such as a settop box, Blu-ray player, and AV receiver. programming Scan and index available channels. You can also remove channels from the index, and designate favourites channels for a more convenient TV viewing experience. Programming is not necessary if you are connected to a cable or satellite receiver. Auto Tuning Screen Menu > Broadcasting > Auto Tuning Try Now Broadcasting Auto Tuning Aerial Channel List Guide Schedule Manager Edit Channel Edit Favourites Air "" The displayed image may differ depending on the model. Automatically scans and indexes all channels received through the TV's aerial input connector. 111 222 To start , navigate to Broadcasting and select Auto Tuning. Select Start when prompted with a message.

[UE32F4500 user guide](http://yourpdfguides.com/dref/5477784)

<http://yourpdfguides.com/dref/5477784>

Without this connection, the TV cannot connect to the Internet wireless. Using the wireless LAN adapter may cause image retention or radio interference on some TV channels. In those cases, use one of the following methods. **1** Use a vertical-type wireless LAN adapter. **2** Connect the wireless LAN adapter to a USB extension cable, and insert the cable's USB plug into one of the TV's USB ports. Install the wireless LAN adapter on the top of the TV's back using an adhesive tape. Otherwise when you play video over a network connection, the video may not play smoothly. **3** To use a wireless network, the TV must be connected to a wireless router or modem.

If the wireless router supports DHCP, the TV can use a DHCP or static IP address to connect to the wireless network. **4** Select a channel that is not currently in use for the wireless router. If the channel set for the wireless router is currently being used by another device, the result is usually interference and/or a communications failure. **5** Most wireless networks have an optional security system. To enable a wireless network's security system, you need to create a security key using characters and numbers.

This security key is then needed to connect to the wireless network. When you play video over a network connection, the video may not play smoothly. **6** To use a wireless network, the TV must be connected to a wireless router or modem. If the wireless router supports DHCP, the TV can use a DHCP or static IP address to connect to the wireless network. **7** Select a channel that is not currently in use for the wireless router.

If the channel set for the wireless router is currently being used by another device, the result is usually interference and/or a communications failure. **8** Most wireless networks have an optional security system. To enable a wireless network's security system, you need to create a security key using characters and numbers. This security key is then needed to connect to the wireless network. Network Security Protocols The TV only supports the following wireless network security protocols and is unable to connect to non-certified wireless routers: **9** Authentication Modes: WEP, WPAPSK, WPA2PSK **10** Encryption Types: WEP, TKIP, AES If the wireless router has been set to Pure High-throughput (Greenfield) 802.11n mode and the Encryption Type to WEP or TKIP, Samsung SMART TVs will not support the connection in compliance with the new Wi-Fi certification specifications. If the wireless router supports WPS (Wi-Fi Protected Setup), it is possible to connect to the network using PBC (Push Button Configuration) or a PIN (Personal Identification Number). WPS automatically configures the SSID and WPA key settings. wired Network Setup Screen Menu > Network > Network Settings Try Now Network Network Status Network Settings Wi-Fi Direct AllShare Settings Device Name [TV]Samsung LE. "" The displayed image may differ depending on the model.

Automatic Wired Network Setup The TV's wired network connection is automatically configured when it is connected to a network that supports DHCP. **11** Set Network Type to Wired and then select Connect. The TV attempts to connect to the network. A confirmation message is then shown once a connection is established. select OK to proceed. If the attempt fails, try again or connect manually. Manual Wired Network Setup If the network requires a static IP address, enter the IP address, subnet mask, gateway and DNS values to connect to the network manually. To get the IP address, subnet mask, gateway and DNS values, contact your Internet Service Provider (ISP). Refer to the "Dynamic versus Static IP Addresses" for more information. Network Type Connect Plug a network cable into the back of your TV.

Wired **22** Select Stop when the TV attempts to connect to the network. Change Network IP Settings Retry Close **33** From the IP Settings screen, set IP setting to Enter manually, enter IP Address, Subnet Mask, Gateway, and the DNS Server values, and then select OK. **0** OK Cancel **44** The TV attempts to connect to the network again using the specified settings. A confirmation message is then shown once a connection is established. select OK to proceed. Failed Wired Connection No network cable found Try Now Try Now Make sure the network cable is plugged in. If it is connected, make sure the router is turned on. If it is on, try turning it off and on again. IP auto setting failed Try Now Perform the following or set the IP address manually from IP Settings. **11** **22** Ensure that the DHCP server is enabled on the router and reset the router.

If this does not work, contact your Internet Service Provider for more information. Unable to connect to the network Check the following: Try Now **11** **22** **33** Check the IP Settings. Ensure that the DHCP server is enabled on the router and unplug and then plug the router back in. If this does not work, contact your Internet Service Provider for more information. Connected to a local network, but not to the Internet Try Now **11** **22** **33** Make sure that the Internet LAN cable is connected to the router's external LAN port. check the DNS settings under IP Settings. If the problem persists, contact your Internet Service Provider. <http://yourpdfguides.com/dref/5477784>

Using the **Quick Access Panel** Quickly access the **INFO**, **MENU** and **e-Manual** buttons. However, the availability of buttons vary depending on the operating mode of the **Smart Touch Control** (with the TV only, as a universal remote, etc.).

Adjusting the virtual remote control Screen Menu > System > Device Manager > Smart Touch Control Settings > Onscreen Remote Size Try Now You can resize the virtual remote control. If the virtual remote control buttons are too small, enlarge the remote control window before using the virtual remote control. **Universal Remote Setup** Screen Menu > System > Device Manager > Universal Remote Setup Try Now This TV has a universal remote control feature that lets you control cable boxes, Blu-ray players, home theatres, and other third-party external devices connected to the TV using the TV's remote control. You can also use the **Anynet+** (HDMI-CEC) function to operate Samsung external devices with your TV's remote control without any additional setup. For more information, Refer to the "**Anynet+ (HDMICEC)**" for more information. **Connecting the IR EXTENDER CABLE** Keep a distance of 5 cm at least between the **IR EXTENDER CABLE** and the external device, as the illustration shows. Face the **IR EXTENDER CABLE** toward the external device's remote control signal receiver. Note that it should be no obstacle between **IR Extender** and external device. The presence of an obstacle will interfere with the transmission of the remote control signal. "" The colour and design of the **IR extension cable** may vary depending on the model.

Add the External Device 111 222 333 Turn on the external device you wish to set up universal remote function for and then press **SOURCE** to bring up the **Source** screen. Select **Universal remote setup** from the top of the screen. This initiates the universal remote setup process. Follow the on-screen instructions for the **Universal Remote Setup**. If it does not respond properly, set up the remote control by entering the model number manually. Using the **Universal Remote Control** By configuring the universal remote control feature for a connector to which an external device is already connected, you can use the **Smart Touch Control** as a universal remote control simply by sending the input signals to the corresponding connector. **registered External Device Management** From the **Universal remote setup** screen , select a registered external device. The following options are available: **Source Setup** Change the TV's input connector that the external device is connected to. **Synced Power Off** Configure the external device to turn off when the TV is turned off. **Entering Text using the Onscreen Keypad** An onscreen keypad appears when you need to enter text (entering the network password, logging into your Samsung account, etc.

), allowing you to enter text using your remote control. **Entering Text using the QWERTY Keypad** Use the **QWERTY** keypad as you would a normal keyboard. Simply select the letters you want to enter them. **Additional Features** Select the icon from the keypad to access the following features: **Language** Select a language from the list. **Recommend text** Enable/disable the **Recommend Text** feature.

Enabling the Recommend Text feature displays word recommendations based on the entered characters. To enter the word "Internet", for example, all you have to do is enter "In" and select the word "Internet" from the list of recommend words. **Predict Next Letter** Enable/disable the **Text Prediction** feature. **Enabling the Text Prediction** feature eliminates the need to find and select individual character keys. However, this feature is limited to words that have previously been added to the dictionary.

To enter the word "Internet", for example, select "I". A predicted word will then appear next to the **I** key. Simply select the predicted word to enter "Internet".

SMART Interaction This TV features **SMART Interaction**, which recognises a user's voice, actions, and face to enable TV operations without the use of a remote control. The motion control and facial recognition features require a separately-sold TV camera installed on the TV. Make sure that the TV is connected to the Internet when installing the TV camera so that it can download the software required for motion control. **SMART Interaction** makes it possible to configure settings and access features with ease. It takes approximately 15 seconds for voice and motion recognition to come online after turning on the TV. **Motion Control and Facial Recognition** may not be available in all regions and territories. **Certain Samsung Smart Hub** features may not be available without express consent to the collection and use of personal information.

[[] When connecting the TV camera to 2013 Samsung TV models, make sure to connect it to the specified USB port of the TV. Other USB ports are not supported for this purpose. **Precautions Face Recognition** This product saves thumbnail images of users' faces for use during the **Face Login**. Logging into the **Smart Hub** via face recognition may be less secure than logging in using an ID and password. **TV Camera Use** Under some circumstances and under certain legal conditions, the use/misuse of the TV camera may result in legal liability. There may be obligations under local privacy laws regarding the protection of individuals concerning personal data and on the free movement of such data, and possibly other laws including criminal laws, regulating camera surveillance both in the workplace and elsewhere. By using the TV camera, users agree that it will not be used (i) in locations where cameras are generally prohibited (such as bathrooms, locker rooms or changing rooms), (ii) in any manner that will result in an invasion of a person's privacy or (iii) in violation of any applicable laws, regulations or statutes. If you are using a camera, first check the back for a sticker. Remove the sticker cover before adjusting the TV camera angle. When you are no longer using the camera, rotate the lens downward and secure it in place.

This prevents any inadvertent or unintentional camera operation. **Motion Control** **Motion Control** works by using the camera, so the user must be within the camera's recognition range. The camera's recognition range varies depending on the ambient light level and other factors. Run **Motion Control Environment Test** before using **Motion Control** to determine the camera's recognition range. User may experience physical fatigue when using **Motion Control** for extended periods.

Voice Recognition **Voice Recognition** is not available in all languages, dialects or regions. The performance varies depending on the language chosen, voice volume and ambient noise levels in the surrounding area. **Voice Text Input** requires the user's agreement with any third-party app's voice privacy policy and to provide Samsung with the user's MAC address and other private information.
