Manual abstract:

@@@ If the problem still persists, contact the sales dealer where you purchased the projector or the service center. Safety Precaution WARNING : TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE. This projector produces intense light from the projection lens. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam. Install the projector in a proper position. If not, it may result in a fire hazard. Take appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector. Minimum distance should be taken.

If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat buildup can reduce the service life of your projector, and can also be dangerous. SIDE and TOP 20cm CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN CAUTION : TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT.

REFER SERVICING TO QUALIFIED SERVICE PERSONNEL. REAR 50cm 50cm 50cm THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT. Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes. If the projector is not to be used for an extended time, unplug the projector from the power outlet. READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE.

THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT. 2 Safety Instructions All the safety and operating instructions should be read before the product is operated. Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning. Follow all warnings and instructions marked on the projector. For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet. This will prevent damage due to lightning and power line surges. This projector should be operated only from the type of power source indicated on the marking label.

If you are not sure of the type of power supplied, consult your authorized dealer or local power company. Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it. Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel. Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions: a. When the power cord or plug is damaged or frayed. b. If liquid has been spilled into the projector.

c. If the projector has been exposed to rain or water. d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.

e. If the projector has been dropped or the cabinet has been damaged. f. When the projector exhibits a distinct change in performance-this indicates a need for service. When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part.

Unauthorized substitutions may result in fire, electric shock, or injury to persons. Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition. Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc... Do not use attachments not recommended by the manufacturer as they may cause hazards. Do not place this projector on an unstable cart, stand, or table.

The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn. Slots and openings in the back and bottom of the cabinet are provided for ventilation, to insure reliable operation of the equipment and to protect it from overheating. The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register. This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided. Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock.

Never spill liquid of any kind on the projector. Do not install the projector near the ventilation duct of airconditioning equipment. Voor de klanten in Nederland Bij dit product zijn batterijen geleverd. Wanneer deze leeg zijn, moet u ze niet weggooien maar inleveren als KCA. 3 Safety Instruction Air Circulation Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered.

Installing the Projector in Proper Position Install the projector properly. Improper Installation may reduce the lamp lifetime and cause a fire hazard. 20° CAUTION Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken. Do not put any flammable objects near the vent.

Keep the exhaust vent at least 3'(1m) away from any objects. Do not touch a peripheral part of the exhaust vent, especially screws and metallic part. This area will become hot while the projector is being used. Do not put anything on the cabinet. The materials put on the cabinet will not only get damaged but also cause fire hazard by heat. Cooling fans are provided to cool down the projector. This projector monitors internal temperature and control the running speed of the cooling fans.

[You're reading an excerpt. Click here to read official SANYO PLC-SW30 user guide](http://yourpdfguides.com/dref/3810152)

<http://yourpdfguides.com/dref/3810152>

20° Do not tilt the projector more than 20 degrees to either side. Do not point the projector up to project an image. NO UPWARD Do not point the projector down to project an image.

NO DOWNWARD Do not put the projector on either side to project an image. NO SIDEWARD Moving the Projector Air Intake Vent When moving the projector, replace the Lens Cover and retract Adjustable Feet to prevent damage to the lens and cabinet. When the projector is not in use for an extended period, put it into the case (carrying bag) supplied with the projector. Exhaust Vent (Hot air exhaust) CAUTION Carrying Bag (supplied) is intended for protection from dust and scratches on the surface of a cabinet, and it is not designed to protect an appliance from external forces. Do not transport a projector through a courier or transport services with this bag, otherwise the projector can be damaged. When handling a projector, do not drop, bump, subject it to strong forces or put other things on the cabinet. CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR Do not drop or bump a projector, otherwise damages or malfunctions may result. When carrying a projector, use a suitable carrying case. Do not transport a projector by using a courier or transport service in an unsuitable transport case. This may cause damage to a projector.

To transport a projector through a courier or transport service, consult your dealer for best way. 4 Compliance Federal Communication Commission Notice Note : This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures : Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. Use of shielded cable is required to comply with class B limits in Subpart B of Part 15 of FCC Rules. Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment. Model Number Trade Name Responsible party Address Telephone No. : PLC-SW30 : Sanyo : SANYO FISHER COMPANY : 21605 Plummer Street, Chatsworth, California 91311 : (818)998-7322 Model Number Trade Name Responsible Party Address Telephone No. : TGX0043-011010 (1AV4U20B69000) IR Presentation Remote Receiver for Projector : HOSIDEN : Hosiden America Corp. : 120 East State Parkway, Schaumburg, IL, 60173 : (847)885-8870 AC Power Cord Requirement The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it. AC Power Cord for the United States and Canada : AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA). AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet. Do not try to defeat this safety feature.

Should you be unable to insert the plug into the outlet, contact your electrician. GROUND AC Power Cord for the United Kingdom : This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus . If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions. If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed. The end of the flexible cord should be suitably prepared and the correct plug fitted.

(See Over) ASA WARNING : A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET. The Wires in this mains lead are coloured in accordance with the following code: Green-and-yellow Earth Blue&miPC Adjustment

6 Features and Design PLC-SW30 is designed with the most advanced technology for portability, durability, and ease of use. This projector utilizes built-in multimedia features, a palette of 16.77 million colors, and matrix liquid crystal display (LCD) technology.

Greater Mobility Extremely compact in size and weight. It is designed to be carried and work anywhere you wish to use. **Outstanding Compatibility** This projector widely accepts various video and computer input signals including; Computers IBM-compatible or Macintosh computer up to 1280 x 1024 resolution. 6 Color Systems NTSC, PAL, SECAM, NTSC 4.43, PAL-M or PAL-N color system can be connected. Component Video Component video signal, such as a DVD player output, high definition TV signals including 480i, 480p, 575i, 575p, 720p, 1035i or 1080i, can be connected. S-Video S-Video signal, such as a S-VHS VCR output signal, can be connected. RGB Scart RGB Scart signal can be connected. Digital Zoom (for Computer) Digital Zoom function expands (to approx. 16 times of screen size) or compress the image size, allowing you to focus on crucial information at a presentation.

(P29) Digital Keystone Adjustment Positioning height of the projector may result in distorted image being displayed in a trapezoid shape. Keystone Adjustment solves this problem by digitally altering projection to produce undistorted images. (P20, P36) Interlace Progressive Conversion HIGH-quality picture is available with this technology which converts interlace signal into progressive signal. (P35) Multi-language Menu Display Operation menu is displayed in; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean or Japanese. (P36) User Logo A projected image can be captured and used for the starting display of the projector.

(" Capture function" P36) You can also display the captured image in an interval during your presentation instead of blackout image. (" No Show function " P21) Power Management Provided to reduce power consumption and maintain the lamp life. (P37) Key Lock Function Provided to lock the operation of the projector. This function protects the projector from being tampered with by third persons. (P38) Presentation Remote Control The provided Presentation Remote Control can be used as a wireless mouse to control the mouse cursor on the computer screen.

This is extremely useful while giving presentations. (P39) Superb Image Quality Supports 800 x 600 dots resolution for computer input. Resolution from a computer between SVGA (800 x 600) and SXGA (1280 x 1024) is precisely compressed into 800 x 600 dots. Multi-Scan System This projector has Multi-Scan System to conform to almost all computer output signals quickly. No need for troublesome manual adjustment of frequency and other settings. (P23) Auto PC Adjustment Incoming computer signals are recognized and the best adjustment is automatically set by Auto PC Adjustment. No complicated setup is necessary and projection is always precise. (Point Left/Right buttons)(P21) !5 Select button Executes the selected item. (P17) Expands / compresses the image in Digital Zoom mode. (P29) To insure safe operation, please observe the following precautions : Do not bend, drop the remote control or expose Remote Control to moisture or heat. For cleaning, use soft dry cloth. Do not apply benzene, thinner, splay or any chemical material. i o !0 Operating Range Point the remote control toward the projector (Receiver Window) when pressing any button. Maximum operating range for the remote control is about 16.4' (5m) and 60° in front of the projector. 16.4' (5m) 30° 30° 11 Preparation Connecting the AC Power Cord This projector uses nominal input voltages of 100-120 V or 200-240 V AC.

This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure of the type of power supply being in use. Connect a projector with a peripheral equipment before turning a projector on. (Refer to page 15 16 for connection.)

CAUTION For safety, unplug the AC Power Cord when an appliance is not used. When this projector is connected to the outlet with the AC Power Cord, an appliance is in Stand-by Mode and consumes a little electric power. Connect AC Power Cord (supplied) to the projector. The AC outlet must be near this equipment and must be easily accessible.

Note: AC Power Cord must meet requirement of the country where you use the projector. Confirm an AC plug type with the chart below and proper AC Power Cord must be used. If supplied AC Power Cord does not match your AC outlet, contact your sales dealer. Projector side For the U.S.

A. and Canada Ground AC Outlet side For Continental Europe For the U.K. To POWER CORD CONNECTOR on your projector. To the AC Outlet. To the AC Outlet. To the AC Outlet. (120 V AC) (200 - 240 V AC) (200 - 240 V AC) 12 Preparation Positioning the Projector This projector is designed to project on a flat projection surface. The projector can be focused from 4.3'(1.3m) to 21.3'(6.5m). Refer to the figure below to adjust a screen size. A:B = 9:1

Note: The brightness in a room has a great influence on picture quality.

It is recommended to limit ambient lighting in order to provide the best image. 21.3' (6.5m) 16.1' (4.9m) 10.6' (3.2m) 4.3' (1.3m) 200" 150" 100" 127" Max. Zoom 169" Min. 6' (3.2m) 150" 3048 x 2286 19.0' (5.8m) 16.1' (4.9m) 200" 4064 x 3048 21.3' (6.5m) Zoom (min) Zoom (max) Adjustable Feet Picture tilt and projection angle can be adjusted by rotating the adjustable feet. Projection angle can be adjusted at 8.0 degrees.

1 2 3 Lift the front of the projector and pull the feet lock latches on the both sides of the projector. Release the feet lock latches to lock the adjustable feet and rotate them to adjust position and tilt. To retract the adjustable feet, lift the front of the projector and pull and undo the feet lock latches. Keystone distortion of the projected image can be adjusted by Menu Operation. (P20 and P36) **CAUTION** Tilt the projector within the adjustable angle not to shorten the lamp life. Proper angle should be taken. Adjustable Feet Feet Lock Latches 13 Preparation Remote Control Battery Installation 1 Remove the battery compartment lid. Pull up and remove the lid. 2 Slide the batteries into the compartment. Two AAA size batteries For correct polarity (+ and), be sure battery terminals are in contact with pins in compartment.

3 Replace the compartment lid. To insure safe operation, please observe the following precautions : Use (2) AAA, SUM-4 or R03 type alkaline batteries. Replace two batteries at the same time. Do not use a new battery with a used battery. Avoid contact with water or liquid.

Do not expose the remote control to moisture, or heat. Do not drop the remote control. If a battery has leaked on remote control, carefully wipe case clean and install new batteries. Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions.

Attaching the Lens Cover 1 Thread the string through the hole on the lens cover and then tie a knot in the string to secure it in place. 2 Thread the other end of the string through the hole at the bottom of the projector. Then pass the lens cover through the resulting loop of the string. Tie a knot in the string to secure it in place. 14 Installation Connecting to a Computer IBM-compatible computer or Macintosh computer (VGA / SVGA / XGA / SXGA) Monitor Output Audio

Output USB port VGA Cable Audio Cable (Stereo) USB Cable If you wish to use Page buttons on the remote control, connect USB port of your computer to the USB socket of the projector. Sharpness / Gamma / Auto grayscale / Progressive] (P34) Same function as menu for computer source. 18 Basic Operation Turning On the Projector 1 2 3 4
Complete peripheral connections (with a computer, VCR, etc.
) before turning on the projector. 26 Connect the projector's AC Power Cord into an AC outlet. The POWER indicator flashes in a moment and then turns red.
Press POWER ON-OFF button on the top control or the remote control. The POWER Indicator turns green, and the cooling fans start to operate.
The starting display appears on the screen and the count-down starts. After the count-down, the input source that was selected last and the Lamp mode status
appear on the screen. The starting display disappears after 30 seconds. The starting display can be changed. (" Capture " P36) Selected Input Source and
Lamp Mode Lamp mode (" Lamp mode " P37) Turning Off the Projector 1 2 3 Press the POWER ON-OFF button on the top control or the remote control,
and the message " Power off? " appears on the screen.
Press the POWER ON-OFF button again to turn off the projector. The POWER indicator starts to flash red and continues while the cooling fans are
operating. (for approx. 90 seconds) Power off? When the projector is cooled down enough to be turned on again, the Power indicator turns red again. Then
you can disconnect the AC power cord. TO MAINTAIN THE LIFE OF LAMP, ONCE YOU TURN PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE
TURNING IT OFF. DO NOT DISCONNECT THE AC POWER CORD WHILE COOLING FANS ARE RUNNING OR BEFORE POWER INDICATOR
LIGHTS RED. OTHERWISE IT WILL RESULT IN SHORTENING LAMP LIFE. Message disappears after 4 seconds. Note : When the Power Management
function is ON, the projector detects signal interruption and automatically turns off the projection lamp.
(P 37) The projector cannot be turned on during the cooling period with the POWER indicator flashing red. You can turn it on again after the POWER
indicator lights red. Do not use the projector for more than 24 hours continuously. Turn off the projector at least once in 24 hours and give it a rest.
Continuous use may result in shortening the lamp lifetime. This projector detects internal temperature and automatically controls the running speed of the
cooling fans. If the WARNING indicator flashes or lights red, see "Warning Indicator" on page 42 19 Basic Operation Adjusting the Screen Zoom Adjustment
Move the Zoom Lever upward / downward to zoom the image. Tele Wide Zoom Lever Focus Adjustment Rotate the Focus ring to adjust the projected picture
focus. Focus Ring Keystone Adjustment If a projected picture has keystone distortion, correct image with the keystone adjustment. 1 2 Press KEYSTONE
button on the remote control or select Keystone on the Setting menu (P36) to display the Keystone dialog box.
Correct keystone distortion by pressing Point ed buttons. Press Point e button to reduce the upper part of image, and press Point d button to reduce the lower
part.
