Manual abstract:

Logo Function Useful Functions for Presentation The Logo function allows you to customize the screen logo (pp.4849). You can capture an image for the screen logo and use it for the starting-up display or between presentations. Digital zoom function allows you to focus on the crucial information during a presentation (pp.14, 39). Motor-driven Lens Shift Security Function The Security function helps you to ensure security of the projector. With the Key lock function, you can lock the operation on the side control or remote control (p.53). PIN code lock functions prevents unauthorized use of the projector (pp.52-53).

Projection lens can be moved up, down, right and left with the motor-driven lens shift function. This function makes it easy to provide projected image where you want. Zoom and focus can also be adjusted with a motor-driven operation. (p.27) Multi Versatile Platform Lamp Control Brightness of the projection lamp can be selected (p.

50). This projector applies various input/output terminals and 4 terminal slots for expansion to tune to diversity of signals from computers and video equipment (p.19). For Terminal Boards, contact sales dealer where you purchased a projector. Power Management Network board (Optional) The Power management function reduces power consumption and maintains lamp life (p.

51). Network board is an optional product to control and set up a projector via the network cables with the web browser on your computer. It can be controlled and set up the projector remotely. Contact the sales dealer where you purchased this projector for optional parts. Note: The On-Screen Menu and figures in this manual may differ slightly from the product. ... Trademarks Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation. To The Owner Before installing and operating the projector, read this manual thoroughly.

The projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in good condition for many years to come. Improper operation may result in not only shortening the product life, but also malfunctions, fire hazard, or other accidents. If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section in the back of this booklet. If the problem still persists, contact the dealer where you purchased the projector or the service center.

Safety Precaution **WARNING: TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE.**

This projector produces intense light from the projection lens. Do not stare directly into the lens, otherwise eye damage could result. Be especially careful that children do not stare directly into the beam. Install the projector in a proper position. Otherwise it may result in a fire hazard. Allowing the proper amount of space on the top, sides, and rear of the projector cabinet is critical for proper air circulation and cooling of the unit. The diagrams shown here indicates the minimum space required. If the projector is to be built into a compartment or similarly enclosed, these minimum distances must be maintained.

Do not cover the ventilation slots on the projector.

Heat build-up can reduce the service life of your projector, and can also be dangerous. **SIDE and TOP 3.3' (1m) CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN CAUTION: TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK) . NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT . REFER SERVICING TO QUALIFIED SERVICE PERSONNEL . THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT. THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT. REAR 3.3' (1m) 3.3' (1m) 3.3' (1m)** If the projector is unused for an extended time, unplug the projector from the power outlet. **CAUTION ON HANGING FROM THE CEILING** When hanging the projector from the ceiling, clean the air intake vents and top of the projector periodically with a vacuum cleaner. If you leave the projector unclean for a long time, the cooling fans can be clogged with dust, and it may cause a breakdown or a disaster. **DO NOT SET THE PROJECTOR IN GREASY, WET, OR SMOKY CONDITIONS SUCH AS IN A KITCHEN TO PREVENT A BREAKDOWN OR A DISASTER .**

IF THE PROJECTOR COMES IN CONTACT WITH OIL OR CHEMICALS, IT MAY BECOME DETERIORATED .

NOTE: This symbol and recycle system are applied only to EU countries and not applied to the countries in the other area of the world. Your SANYO product is designed and manufactured with high quality materials and components which can be recycled and reused. This symbol means that electrical and electronic equipment, at their end-of-life, should be disposed of separately from your household waste. Please dispose of this equipment at your local community waste collection/recycling centre. In the European Union there are separate collection systems for used electrical and electronic products. Please help us to conserve the environment we live in! CAUTION Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75. Ne peut être utilisé dans une salle d'ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment. READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE . 4 Safety Instructions All the safety and operating instructions should be read before the product is operated. Read all of the instructions given here and retain them for later use. Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning. Follow all warnings and instructions marked on the projector. For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet.

This will prevent damage due to lightning and power line surges. Do not expose this unit to rain or use near water... for example, in a wet basement, near a swimming pool, etc... Do not use attachments not recommended by the manufacturer as they may cause hazards. Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector.

Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn. This projector should be operated only from the type of power source indicated on the marking label.

If you are not sure of the type of power supplied, consult your authorized dealer or local power company. Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it. Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel. Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions: a. When the power cord or plug is damaged or frayed. b. If liquid has been spilled into the projector. c. If the projector has been exposed to rain or water. d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation.

e. If the projector has been dropped or the cabinet has been damaged. f. When the projector exhibits a distinct change in performance-this indicates a need for service. When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons. Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition. Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating.

The openings should never be covered with cloth caused by use of any non-recommended ceiling mount kit or installation of the ceiling mount kit in an improper location. 7 Safety Instructions Moving the Projector For safety, be sure to hold Carrying Handles on both sides by 2 or more people when moving a projector.

Moving it improperly may result in damage of cabinet or person's injury. Replace lens cap and retract feet to prevent damage to lens and cabinet. CARRYING HANDLE 1 2 3 Pull up lock buttons on each side of carrying handles to release locks. Pull carrying handles out fully until the handles click. Move a projector by holding two handles by 2 or more people.

To retract carrying handles, pull up lock buttons to release lock of handles and press handles fully in until the handles are locked. LOCK BUTTONS Pull up lock buttons to release lock. CAUTION IN CARRYING OR TRANSPORTING THE PROJECTOR Do not drop or bump the projector, otherwise damages or malfunctions may result. When carrying the projector, use a suitable carrying case. Do not transport the projector by courier or any other transport service in an unsuitable transport case.

This may cause damage to the projector. For information about transporting the projector by courier or any other transport service, consult your dealer. Do not put the projector in a case before it is cooled enough. Compliance Federal Communications Commission Notice This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. Do not make any changes or modifications to the equipment unless otherwise specified in the instructions. If such changes or modifications should be made, you could be required to stop operation of the equipment. Canadian Radio Interference Regulations This Class A digital apparatus meets all requirements of the Canadian ICES-003.

WARNING This is a Class A product.

[You're reading an excerpt. Click here to read official SANYO PLC-XF47 user guide](http://yourpdfguides.com/dref/3241914)
<http://yourpdfguides.com/dref/3241914>

In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures. AC Power Cord Requirement The AC Power Cord supplied with this projector meets the requirement for use in the country you purchased it. AC Power Cord for the United States and Canada: AC Power Cord used in the United States and Canada is listed by the Underwriters Laboratories (UL) and certified by the Canadian Standard Association (CSA). AC Power Cord has a grounding-type AC line plug. This is a safety feature to be sure that the plug will fit into the power outlet.

Do not try to defeat this safety feature. Should you be unable to insert the plug into the outlet, contact your electrician. GROUND AC Power Cord for the United Kingdom: This cord is already fitted with a moulded plug incorporating a fuse, the value of which is indicated on the pin face of the plug. Should the fuse need to be replaced, an ASTA approved BS 1362 fuse must be used of the same rating, marked thus .

If the fuse cover is detachable, never use the plug with the cover omitted. If a replacement fuse cover is required, ensure it is of the same colour as that visible on the pin face of the plug (i.e. red or orange). Fuse covers are available from the Parts Department indicated in your User Instructions.

If the plug supplied is not suitable for your socket outlet, it should be cut off and destroyed. The end of the flexible cord should be suitably prepared and the correct plug fitted. **ASA WARNING: A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET .** The Wires in this mains lead are coloured in accordance with the following code: Green-and-yellow Earth Blue Neutral Brown Live As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows: The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol or coloured green or green-and-yellow. The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black.

The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red. **WARNING: THIS APPARATUS MUST BE EARTHED . THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE .** 9 Part Names and Functions Front i q Infrared Remote Receiver (Front) w Lens Cap (Option) e Projection Lens (Option) r Level and Pitch Adjust Handle t Carrying Handle y Side Control u Main On/Off Switch i Power Cord Connector o Indicator (Rear) w e r t y u o Back !1 !2 CAUTION Hot air is exhausted from the exhaust vent. Note: To ensure safe operation, observe the following precautions: · onot bend, drop, or expose the remote D control to moisture or heat.

· or cleaning, use a soft dry cloth. Donot F apply benzene, thinner, spray, or any other chemical materials. 14 Part Names and Functions Remote Control Battery Installation 1 Open the battery compartment lid. Pull up the lid and remove it. 2 Install new batteries into the compartment.

Two AA size batteries For correct polarity (+ and -), be sure battery terminals are in contact with pins in the compartment. 3 Replace the compartment lid. To ensure safe operation, please observe the following precautions : Use two (2) AA or LR6 type alkaline batteries. Always replace batteries in sets. Do not use a new battery with a used battery. Avoid contact with water or liquid. Do not expose the remote control to moisture or heat. Do not drop the remote control. If the battery has leaked on the remote control, carefully wipe the case clean and install new batteries. Risk of an explosion if battery is replaced by an incorrect type.

Dispose of used batteries according to the instructions. Remote Control Receivers and Operating Range Point the remote control toward the projector (to Infrared Remote Receivers) when pressing the buttons. Maximum operating range for the remote control is about 16.4' (5 m) and 60 degrees in front and rear of the projector. Infrared Remote Receivers are provided both in front and back of the projector. You can conveniently use both of the receivers (pp. 10, 51)

16.4' (5 m) 16.4' (5 m) Wired Remote Control The remote control can be used as a wired remote control. Wired remote control helps you use the remote control outside of the operating range (16.

4' 5 m). Connect the remote control and the projector with the remote control cable (sold separately). Connected with the remote control cable, the remote control does not emit wireless signal. 15 Part Names and Functions Remote Control Code The eight different remote control codes (Code 1 Code 8) are assigned to this projector. Switching the remote control codes prevents interference from other remote controls when several projectors or video equipment next to each other are operated at the same time.

Change the remote control code for the projector first before changing that for the remote control. See "Remote control" in the Setting Menu on page 50. 1 2 Check the Reset Switch to "Use position" in the compartment lid on the back of the remote control. During holding down the MENU button, press the IMAGE ADJ. button corresponding times to the number of the remote control code for the projector.

Use position Reset position Reset switch Remote Control Code Code 1 Code Code Code 4 Code 5 Code 6 Code 7 Code Number of Times Pressing IMAGE ADJ . button 1 4 5 6 7 MENU button IMAGE Adj . button 16 Installation Lens Installation Before setting up a projector, install Projection Lens on a Projector. 1. Before installation, check where a projector is used and prepare a suitable lens. For the specifications of Projection Lens, refer to the manual attached separately or contact sales dealer where you purchased the projector. 2. For installation, refer to the installation manual accompanying a Projector. When setting a projector after lens installation, be sure to replace a Lens Cap to protect a surface. And when carrying or holding up the projector, be careful not to put your hands on lens part.

It may damage lens, cabinet, or mechanical parts. Positioning Projector This projector is designed to project on a flat projection surface. Note: SCREEN · Brightness in room has a great influence on picture quality. It is recommended to limit ambient lighting in order to provide the best image. 17 Installation Lens Shift Adjustment Projection lens can be moved from side to side and up and down with the motor-driven lens shift function. This function makes the positioning of images easy on the screen. (See page 27) The display position can be shifted upward up to 50% elevation of the display. The display position can be shifted downward up to 50% low level of the display. When the lens is shifted to top . When the lens is shifted to bottom .

The display position can be shifted to the left in up to 10% width of the display. The display position can be shifted to the right in up to 10% width of the display. When the lens is shifted to leftmost . When the lens is shifted to rightmost . Picture Level and Pitch Adjustment Picture tilt and projection angle can be adjusted with handles on both sides of a projector.

Projection angle can be adjusted to 5.7 degrees upward. REAR ADJUSTABLE FEET. (Refer to p.10).

LEVEL AND PITCH ADJUST HANDLE 1 2 Press the knob on the handle. The handle pops out. Turn handles (right and left) until picture is projected on proper position. Rotate rear adjustable feet to stabilize the projector on a table.

[You're reading an excerpt. Click here to read official SANYO PLC-XF47 user guide](http://yourpdfguides.com/dref/3241914)
<http://yourpdfguides.com/dref/3241914>

Press the knob and retract the handle. ADJUSTABLE FEET Height of front feet can be adjusted by turning handles. 3 1 Installation Terminals of Projector This projector applies various input/output terminals and 4 terminal slots for expansion to tune to diversity of signals from computers and video equipment. 4-built-in Terminal Slots enable you to arrange desired combinations of input sources just by changing Terminal Boards. For Terminal Boards, contact sales dealer where you purchased a projector. 4 TERMINAL SLOTS (Factory set) SERIAL PORT IN INPUT 2 SERIAL PORT OUT G B R H/HV V S-VIDEO INPUT 1 DIGITAL (DVI-D) ANALOG DVI / D-sub 15 Terminal 5-BNC / VideoTerminal VIDEO/Y Pb/Cb Pr/Cr L INPUT/OUTPUT TERMINALS RESET Replacement of Terminal Note: ·nthereplacementofterminalboard,theMAIN I ON/OFF switchshouldbeOFFposition.

INPUT 4 INPUT 3 1 Installation Connecting the AC Power Cord This projector uses nominal input voltages of 200/240 V AC. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce the risk of electrical shock, do not plug into any other type of power system. If you are not sure of the type of power being supplied, consult your authorized dealer or service station. Connect the projector with all peripheral equipment before turning on the projector. CAUTION The AC outlet must be near this equipment and must be easily accessible. Note: ·Unplug the AC power cord when the projector is not in use. When the projector is connected to an outlet with AC power cord, it is in stand-by mode and consumes a little electric power. Connect the AC power cord (supplied) to the projector. NOTE ON THE POWER CORD AC power cord must meet the requirements of the country where you use the projector. Confirm the AC plug type with the chart below and proper AC power cord must be used. If the supplied AC power cord does not match your AC outlet, contact your sales dealer. Projector side For the U .

S . A . and Canada Ground AC Outlet side For Continental Europe For the U . K . To POWER CORD CONNECTOR on your projector. To the AC Outlet. (40 V AC) To the AC Outlet. (0040 V AC) To the AC Outlet. (0040 V AC) Basic Operation Turning On the Projector 1 2 3 4 Complete peripheral connections (with a computer, VCR, etc.) before turning on the projector.

Connect the projector's AC power cord into an AC outlet and turn the MAIN ON/OFF Switch to ON. The LAMP indicator lights red and the READY indicator lights green. Press the ON/STAND-BY button on the side control or on the remote control. The LAMP indicator dims red and the cooling fans start to operate. The preparation display appears on the screen and the countdown starts.

After the countdown, the input source that was selected the last time and the Lamp mode icon (see page 56) appear on the screen. If the projector is locked with a PIN code, PIN code Input Dialog Box will appear. Enter the PIN code as instructed below. 16 The preparation display will disappear after 20 seconds. Selected Input Source and Lamp control Lamp mode See page 56 for the Lamp control status Note: ·TheLampreplacementiconandtheFilter warningiconmayappearonthescreendependingontheusagestateoftheprojector.

Enter a PIN code Use the Point ed buttons on the side control or on the remote control to enter a number. Press the Point 8 button to fix the number and move the red frame pointer to the next box. The number changes to ". Repeat " this step to complete entering a four-digit number. After entering the four-digit number, move the pointer to "Set. " Press the SELECT button so that you can start to operate the projector. If you fixed an incorrect number, use the Point 7 button to move the pointer to the number you want to correct, and then enter the correct number. If you entered an incorrect PIN code, "PIN code" and the number () will turn red for a moment. Enter the correct PIN code all over again. PIN code Input Dialog Box After the OK icon disappears, you can operate the projector.

What is PIN code? PIN (Personal Identification Number) code is a security code that allows the person who knows it to operate the projector. Setting a PIN code prevents unauthorized use of the projector. A PIN code consists of a four-digit number.

Refer to the PIN code lock function in the Setting Menu on page 5253 for locking operation of the projector with your PIN code. CAUTION ON HANDLING PIN CODE If you forget your PIN code, the projector can no longer be started. Take special care in setting a new PIN code; write down the number in a column on page 75 of this manual and keep it at hand. Should the PIN code be missing or forgotten, consult your dealer or service center. Basic Operation Turning Off the Projector 1 2 Press the ON/STAND-BY button on the side control or on the remote control, and "Power off?" appears on the screen.

Press the ON/STAND-BY button on the side control or on the remote control again to turn off the projector. The LAMP indicator lights bright and the READY indicator turns off. After the projector is turned off, the cooling fans operate for 90 seconds. You cannot turn on the projector during this cooling down period. When the projector has cooled down enough, the READY indicator lights green and then you can turn on the projector.

To unplug the AC power cord, wait until the projector is completely cooled down. TO MAINTAIN THE LIFE OF THE LAMP ONCE YOU , TURN THE PROJECTOR ON, WAIT AT LEAST FIVE MINUTES BEFORE TURNING IT OFF . DO NOT UNPLUG THE AC POWER CORD WHILE COOLING FANS ARE RUNNING OR BEFORE THE READY INDICATOR LIGHTS GREEN AGAIN. OTHERWISE IT WILL RESULT IN SHORTENING OF THE LAMP LIFE. DO NOT OPERATE THE PROJECTOR CONTINUOUSLY WITHOUT REST. CONTINUOUS USE MAY RESULT IN SHORTENING THE LAMP LIFE. TURN OFF THE PROJECTOR AND LET STAND FOR ABOUT AN HOUR IN EVERY 24 HOURS. "Power off?" disappears after 4 seconds. 3 Note: ·When the On start function is set to "On, the projector will be " turned on automatically by connecting the AC power cord to an AC outlet (p.51).

·The running speed of cooling fans is changed according to the temperature inside the projector. ·Do not put the projector in a case before the projector is cooled enough.

·If the WARNING TEMP .indicator blinks red, see "Warning Indicators" on page 69. ·The projector cannot be returned on during the cooling period with the READY indicator turned off. You can turn it on again after the READY indicator becomes green again. 4 Basic Operation How to Operate the On-Screen Menu The projector can be adjusted or set via the On-Screen Menu. For each adjustment and setting procedure, refer to the respective sections in this manual.

ZOOM FOCUS ON/STAND-BY Side Control MENU LENS SHIFT INPUT 1/2 MENU button 1 2 3 Press the MENU button on the side control or the remote control to display the On-Screen Menu. Use the Point 7 8 buttons to select a Menu icon.
