Manual abstract:

) *Compatibility* The projector widely accepts various video and computer input signals including; Computers, 6 Color systems, Component video, S-video and RGB scart. *Blackboard Function* Blackboard can be used as a projection screen. The board color is limited to Green. (See page 29 and 35.) *Simple Computer System Setting* The projector has the Multi-scan system to conform to almost all computer output signals quickly. (See page 26.) *Film Function* The Film function reproduces pictures faithful to the original film quality from 3:2 pull-down video contents. (See page 37.) *Digital Zoom (for Computer)* The digital zoom function expands (to approx. 16 times of screen size) or compress the image size, allowing you to focus on crucial information at a presentation.

(See page 31.) *PIN Code Lock Function* The PIN code lock function prevents others except users from using the projector. (See page 18 and 43.) *Multilanguage Menu Display Operation* menu is available in 12 languages; English, German, French, Italian, Spanish, Portuguese, Dutch, Swedish, Russian, Chinese, Korean, or Japanese. (See page 39.

) *Keystone Adjustment* The keystone correction function is provided to correct distortion of the projected image allowing you to use the projector without locational constraints. (See page 22 and 39.) *Switchable Interface Terminal* The projector provides a switchable interface terminal. You can use the terminal as computer input or monitor output conveniently. (See page 41.

) *Power Management* The Power management function reduces power consumption and maintain the lamp life. (See page 41.) *User's Logo* A projected image can be captured and used for the starting display of the projector with the Capture function. You can also display the captured image in an interval during your presentation instead of blackout image with the No show function. (See page 23 and 40.) 2 Table of Contents Features and Design

50 Troubleshooting Indicators and Projector Condition Menu Tree Compatible Computer Specifications Technical Specifications Configurations of Terminals Optional Parts PIN Code Number Memo 50 52 53 55 56 58 58 59 Trademarks Each name of corporations or products in this book is either a registered trademark or a trademark of its respective corporation. 3 To the Owner Before operating this projector, read this manual thoroughly and operate the projector properly. This projector provides many convenient features and functions. Operating the projector properly enables you to manage those features and maintains it in better condition for a considerable time. Improper operation may result in not only shortening the product-life, but also malfunctions, fire hazard, or other accidents.

If your projector seems to operate improperly, read this manual again, check operations and cable connections and try the solutions in the "Troubleshooting" section in the end of this booklet. If the problem still persists, contact the dealer where you purchased the projector or the service center. Safety Precaution WARNING : TO REDUCE THE RISK OF FIRE OR ELECTRIC SHOCK, DO NOT EXPOSE THIS APPLIANCE TO RAIN OR MOISTURE. This projector produces intense light from the projection lens. Do not stare directly into the lens as possible. Eye damage could result. Be especially careful that children do not stare directly into the beam. Install the projector in a proper position. If not, it may result in a fire hazard. Provide appropriate space on the top, sides and rear of the projector cabinet for allowing air circulation and cooling the projector.

Minimum clearance must be maintained. If the projector is to be built into a compartment or similarly enclosed, the minimum distances must be maintained. Do not cover the ventilation slot on the projector. Heat buildup can reduce the service life of your projector, and can also be dangerous. SIDE and TOP 20cm CAUTION RISK OF ELECTRIC SHOCK DO NOT OPEN CAUTION : TO REDUCE THE RISK OF ELECTRIC SHOCK, DO NOT REMOVE COVER (OR BACK). NO USER-SERVICEABLE PARTS INSIDE EXCEPT LAMP REPLACEMENT. REFER SERVICING TO QUALIFIED SERVICE PERSONNEL. REAR 50cm 50cm 50cm THIS SYMBOL INDICATES THAT DANGEROUS VOLTAGE CONSTITUTING A RISK OF ELECTRIC SHOCK IS PRESENT WITHIN THIS UNIT. Do not put any flammable object or spray can near the projector, hot air is exhausted from the ventilation holes. If the projector is not to be used for an extended time, unplug the projector from the power outlet.

READ AND KEEP THIS OWNER'S MANUAL FOR LATER USE. THIS SYMBOL INDICATES THAT THERE ARE IMPORTANT OPERATING AND MAINTENANCE INSTRUCTIONS IN THE OWNER'S MANUAL WITH THIS UNIT. CAUTION Not for use in a computer room as defined in the Standard for the Protection of Electronic Computer/Data Processing Equipment, ANSI/NFPA 75. Ne puet être utilisé dans une salle d'ordinateurs telle que définie dans la norme ANSI/NFPA 75 Standard for Protection of Electronic Computer/Data Processing Equipment 4 Safety Instructions All the safety and operating instructions should be read before the product is operated. Read all of the instructions given here and retain them for later use.

<http://yourpdfguides.com/dref/3810191>

Unplug this projector from AC power supply before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning. Follow all warnings and instructions marked on the projector. For added protection to the projector during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet.

This will prevent damage due to lightning and power line surges. This projector should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied, consult your authorized dealer or local power company. Do not overload wall outlets and extension cords as this can result in fire or electric shock. Do not allow anything to rest on the power cord. Do not locate this projector where the cord may be damaged by persons walking on it. Do not attempt to service this projector yourself as opening or removing covers may expose you to dangerous voltage or other hazards. Refer all servicing to qualified service personnel. Unplug this projector from wall outlet and refer servicing to qualified service personnel under the following conditions: a. When the power cord or plug is damaged or frayed.

b. If liquid has been spilled into the projector. c. If the projector has been exposed to rain or water. d. If the projector does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions as improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the projector to normal operation. e. If the projector has been dropped or the cabinet has been damaged. f.

*When the projector exhibits a distinct change in performance-this indicates a need for service. When replacement parts are required, be sure the service technician has used replacement parts specified by the manufacturer that have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock, or injury to persons. Upon completion of any service or repairs to this projector, ask the service technician to perform routine safety checks to determine that the projector is in safe operating condition. Do not expose this unit to rain or use near water.
.. for example, in a wet basement, near a swimming pool, etc...*

Do not use attachments not recommended by the manufacturer as they may cause hazards. Do not place this projector on an unstable cart, stand, or table. The projector may fall, causing serious injury to a child or adult, and serious damage to the projector. Use only with a cart or stand recommended by the manufacturer, or sold with the projector. Wall or shelf mounting should follow the manufacturer's instructions, and should use a mounting kit approved by the manufacturers. An appliance and cart combination should be moved with care. Quick stops, excessive force, and uneven surfaces may cause the appliance and cart combination to overturn. Slots and openings in the back and bottom of the cabinet are provided for ventilation, to ensure reliable operation of the equipment and to protect it from overheating. The openings should never be covered with cloth or other materials, and the bottom opening should not be blocked by placing the projector on a bed, sofa, rug, or other similar surface. This projector should never be placed near or over a radiator or heat register.

This projector should not be placed in a built-in installation such as a book case unless proper ventilation is provided. Never push objects of any kind into this projector through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock. Never spill liquid of any kind on the projector. Do not install the projector near the ventilation duct of airconditioning equipment. Voor de klanten in Nederland Bij dit product zijn batterijen geleverd. Wanneer deze leeg zijn, moet u ze niet weggooien maar inleveren als KCA. NL 5 Safety Instructions Air Circulation Openings in the cabinet are provided for ventilation and to ensure reliable operation of the product and to protect it from overheating, and these openings must not be blocked or covered. Installing the Projector in Proper Position Install the projector properly. Improper Installation may reduce the lamp life and cause a fire hazard.

20° CAUTION 20° Do not tilt the projector more than 20 degrees above and below.

Hot air is exhausted from the exhaust vent. When using or installing the projector, the following precautions should be taken. Do not put any flammable objects near the vent. Keep the exhaust vent at least 3'(1m) away from any objects. Do not touch a peripheral part of the exhaust vent, especially screws and metallic part.

This area will become hot while the projector is being used. Do not put anything on the cabinet. The for your socket outlet, it should be cut off and destroyed. The end of the flexible cord should be suitably prepared and the correct plug fitted. (See Over) ASA WARNING : A PLUG WITH BARED FLEXIBLE CORD IS HAZARDOUS IF ENGAGED IN A LIVE SOCKET OUTLET.

The Wires in this mains lead are coloured in accordance with the following code: Green-and-yellow Earth Blue Neutral Brown Live As the colours of the wires in the mains lead of this apparatus may not correspond with the coloured markings identifying the terminals in your plug proceed as follows: The wire which is coloured green-and-yellow must be connected to the terminal in the plug which is marked by the letter E or by the safety earth symbol or coloured green or green-and-yellow. The wire which is coloured blue must be connected to the terminal which is marked with the letter N or coloured black. The wire which is coloured brown must be connected to the terminal which is marked with the letter L or coloured red. WARNING : THIS APPARATUS MUST BE EARTHED. THE SOCKET-OUTLET SHOULD BE INSTALLED NEAR THE EQUIPMENT AND EASILY ACCESSIBLE. 7 Part Names and Functions Front q Power Cord Connector w Infrared Remote Receiver e Projection Lens r Lens Cover (See page 46 for attaching.) t Air Intake Vent y Top Controls and Indicators u Focus Ring i Zoom Ring o Air Intake Vent !0 Terminals and Connectors !1 Speaker q w e r t !2 Lamp Cover !3 Air Intake Vent (back and bottom) !4 Air Filter !5 Adjustable Feet Back !6 y u i o !0 !6 Exhaust Vent CAUTION Hot air is exhausted from the exhaust vent.

the remote control or expose Remote Control to moisture or heat. For cleaning, use soft dry cloth. Do not apply benzene, thinner, splay or any chemical
material. Operating Range Point the remote control toward the projector (Infrared Remote Receiver) when pressing any button. Maximum operating range
for the remote control is about 16.4' (5m) and 60° in front of the projector. 16.4' (5 m) 30° 30° 11 Part Names and Functions Remote Control Battery
Installation Remove the battery compartment lid. Pull up and remove the lid.

1 2 Slide the batteries into the compartment. Two AAA size batteries For correct polarity (+ and -), be sure battery terminals are in contact with pins in
compartment. 3 Replace the compartment lid. To ensure safe operation, please observe the following precautions : Use (2) AAA, SUM-4 or R03 type alkaline
batteries. Replace two batteries at the same time. Do not use a new battery with a used battery. Avoid contact with water or liquid. Do not expose the
remote control to moisture, or heat. Do not drop the remote control. If a battery has leaked on remote control, carefully wipe case clean and install new
batteries.

Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions. 12 Installation Positioning the Projector
This projector is designed to project on a flat projection surface and can be focused from 4.3'(1.3m) - 32.

8'(10.0m). Refer to the figure and the table below for the screen size and the distance between the projector and the screen. A:B = 9:1 32.8' (10.
0m) Installation 300" 22.0' (6.7m) 16.4' (5.0m) Max. Zoom (Inch Diagonal) 200" 10.8' (3.3m) 4.3' (1.3m) 247" Min.

Zoom (min) Zoom (max) Note: · The brightness in a room has a great influence on picture quality. It is recommended to limit ambient lighting in order to obtain the best image. · The values shown above are approximate and may vary from the actual size. Adjustable Feet Projection angle can be adjusted up to 11.8 degrees with the adjustable feet. 1 2 3 Lift the front of the projector and pull upward the feet lock latches on both sides of the projector. Release the feet lock latches to lock the adjustable feet and rotate the adjustable feet to adjust the position and tilt. To retract the adjustable feet, lift the front of the projector and pull and undo the feet lock latches. Keystone distortion of the projected image can be adjusted by menu operation. (p22, 39) Feet Lock Latches Adjustable Feet 13 Installation Connecting the AC Power Cord This projector uses nominal input voltages of 100-120 V or 200-240 V AC.

This projector automatically selects the correct input voltage. It is designed to work with single-phase power systems having a grounded neutral conductor. To reduce risk of electrical shock, do not plug into any other type of power system. Consult your authorized dealer or service station if you are not sure of the type of power being supplied. Connect the projector with all peripheral equipment before turning the projector on. (See page 15-17 for connection.) CAUTION For safety, unplug AC power cord when the projector is not in use. When this projector is connected to an outlet with AC power cord, it is in Stand-by mode and consumes a little electric power. Connect AC power cord (supplied) to the projector. The AC outlet must be near this equipment and must be easily accessible.

NOTE ON THE POWER CORD AC power cord must meet requirement of the country where you use a projector. Confirm an AC plug type with the chart below and proper AC power cord must be used. If supplied AC power cord does not match your AC outlet, contact your sales dealer. Projector side For the U.S.

16 Connect the projector's AC power cord into an AC outlet. The POWER indicator blinks red in a moment and lights red. Press the POWER ON-OFF button on the top control or on the remote control. The POWER indicator turns green lighting and the cooling fans start to operate. The preparation display appears on the screen and the count down starts.

After the count-down, the input source that was selected last and the Lamp mode status icon (see page 42) appear on the screen.

[You're reading an excerpt. Click here to read official SANYO PLC-XU41 user guide](#)

<http://yourpdfguides.com/dref/3810191>

If the projector is locked with a PIN code, PIN code Input Dialog Box will appear. Enter the PIN code as instructed below. The preparation display disappears after 20 seconds. Selected Input Source and Lamp Mode 4 Lamp mode (See page 42 for Lamp mode.)

) Enter a PIN code Select a number by pressing the Point 7 8 button and fix the number with the SELECT button. The number will change to "". If you fixed a wrong number, move the pointer to "Set" or "Clear" once by pressing the Point d button, then return to "PIN code". Enter the correct number again. Repeat this step to complete entering a four-digit number. When the four-digit number is fixed, the pointer will automatically move to "Set". Press the SELECT button so that you can start to operate the projector. If you entered a wrong PIN code, "PIN code" and the number () will turn red and disappear. Enter a correct PIN code all over again. PIN code Input Dialog Box Pointer After the OK icon disappears, you can operate the projector.

What is PIN code? PIN code is a security code using Personal Identification Number that allows the person who knows it to operate the projector. Setting PIN code prevents others except the specific users from operating the projector. A PIN code consists of a four-digit number. Refer to PIN Code Lock function in

Setting on page 43 for locking operation of the projector with your PIN code. CAUTION ON HANDLING PIN CODE If you forget your PIN code, the projector can no longer be started. Set a new PIN code with special care, write it down in column on page 59 of this manual, and keep it at hand. Should the PIN code be missing or forgotten, consult your dealer or service center. 18 Basic Operation Turning Off the Projector 1 2 Press the POWER ON-OFF button on the top control or on the remote control, and a message "Power off?" appears on the screen. Press the POWER ON-OFF button again to turn off the projector. The POWER indicator starts to blink red, and it continues while the cooling fans are operating for about 90 seconds.

(About 120 seconds when the fan mode is L2. See page 44.) When the projector has cooled down enough to be turned on again, the POWER indicator lights red. Then you can disconnect the AC power cord. The message disappears after 4 seconds.

3 Basic Operation TO MAINTAIN THE LIFE OF LAMP, ONCE YOU TURN PROJECTOR ON, WAIT AT LEAST 5 MINUTES BEFORE TURNING IT OFF. DO NOT DISCONNECT AC POWER CORD WHILE COOLING FANS ARE RUNNING OR BEFORE POWER INDICATOR LIGHTS RED. OTHERWISE IT WILL RESULT IN SHORTENING LAMP LIFE. Note: · The projector cannot be turned on during the cooling period with the POWER indicator blinking red.

You can turn it on again after the POWER indicator lights red.

· When the On start function is on, this projector is turned on automatically by connecting the AC power cord to an AC outlet. (See page 41 for the On start function.) · Do not operate the projector continuously without rest. Continuous use may result in shortening the lamp life. Turn off the projector and give it a rest about an hour in every 24 hours. · This projector monitors internal temperature and automatically controls the running speed of the cooling fans. · If the WARNING indicator blinks or lights red, see "Warning Indicator" on page 45. 19 Basic Operation How to Operate the On-Screen Menu The projector can be adjusted or set via the On-Screen Menu. Refer to the following pages regarding each adjustment and setting procedure. On-Screen Menu Menu icon 1 2 3 Press the MENU button to display the On-Screen Menu.

Menu bar Pointer (red frame) Press the Point 7 8 buttons to select a Menu icon to adjust. Press the Point ed buttons to select an item to adjust. Press the SELECT button to show the item data. Press the Point 7 8 buttons to adjust the data. Refer to the following pages for respective adjustment. Pointer (red frame) Press the Point d button to move the pointer. Item SELECT button Note: The selected item is not in effective until the SELECT button is pressed. Item data Press the Point 7 8 buttons to adjust value. Quit to exit this menu.
