RZ-X750

RZ-X750

Built to meet the demands of virtually any hospitality, convenience or retail environment, the Sharp RZ-X750 open architecture point of sale system offers the flexibility to run management software that best fits your business. This design integrates seamlessly with a variety of third-party point of sale applications, so it's ready to dish out exceptional operational capabilities and greater customer service. With a standard Intel® Atom™ dual core processor (1.8GHz), the RZ-X750 is a powerful engine that can help steer your business towards growth. Other standard features include the Microsoft® Windows XP™ Professional operating system and 2 GB of memory, plus a powered USB that helps reduce the number of required outlets.

Key Features

- Intel Atom dual core processor D525 (1.8 GHz)
- Fanless design for near-silent operation
- 15" (diagonal) Touch Screen LVDS LCD interface for easy entry
- Standard magnetic card reader for versatile payment options
- Small footprint and unique design fits into any environment
- 2GB standard memory, expandable to 4GB
- RS-232 and USB ports allowing you to add a variety of peripherals
- Powered USB port
- IP rated for liquid and debris resistance
- VESA compliant for easy wall or post mounting

High Performance

The power to run the latest software is just as important as running the right application. The RZ-X750 utilizes an Intel Atom dual core processor model D525 to make sure your business is ready for technology you use today – and the technology you'll adopt in the future.

Right Software

With open POS architecture using Microsoft Windows XP Professional, Sharp provides virtually unlimited flexibility for your business. Now it's easy to get the latest Sharp technology and advanced features combined with the software that best fits your business. Choose from a variety of third-party applications or work with a POS software provider who has certified the system.

Right Features

Connectivity is important to any technology solution and your point of sale system is no exception. The powered USB port allows you to connect devices, such as a printer, and have the RZ-X750 supply the power to the devices. Powering one register with multiple outlets is now a thing of the past! Plus, four standard serial ports are ready to support additional devices you may want to connect to your POS system, which helps save time, saves money, and simplifies your POS setup!

Ideal For

- Retail**
- Hospitality**
- Quick Service**
- Table Service**
- Grocery**
- Gas Station**
- Convenience**
- Restaurant**
- Cafeteria**
