Manual abstract:

Before using your SHARP refrigerator, please read this operation manual to ensure that you gain the maximum benefit from it. Do not store these materials in the refrigerator. Dust deposited on the power plug may cause fire. Wipe it off carefully. Do not attempt to change or modify this refrigerator. This may result in fire, electric shock or injury. Ensure that the refrigerator presents no danger to children while being stored for disposal. Do not install the refrigerator in a damp or wet location as this may cause damage to the insulation and a leak. Condensation may also build on the outer cabinet and cause rust. The figure shows the minimum required space for installing the refrigerator.

• If using the refrigerator in the space below dimension of the figure, it may cause the temperatures in the unit to rise, loud noise, and failure. Do not touch the compressor unit or its peripheral parts, as they become extremely hot during operation and the metal edges may cause injury. Do not touch foods or metal containers in the freezer compartment with your wet hands. • If the power plug or cord is loose, do not insert the power plug. There is a risk of electric shock or fire.

Disconnect from the mains electricity supply by removing the mains plug from the electricity supply socket. The refrigeration system behind and inside the refrigerator contains refrigerant. Do not allow any sharp objects to come into contact with the refrigeration system. • In case of gas leak, ventilate the area by opening a window, etc. Do not touch the refrigerator or the power outlet.

Adjustable foot Foot cover Keep your refrigerator out of direct sunlight. • Do not place next to heat generating appliance. Using the casters, it is possible to move back and forth. • Carry the refrigerator by holding the handles located on the rear and bottom. Before using your refrigerator Clean the inside parts with a cloth soaked in warm water. If soapy water is used, wipe it off thoroughly with water. Ice cube box 6. Adjustable feet & cover 15. Refrigerator pocket & cover 19. NOTE (Only for SJ-3265) Do not replace the right and left position of the utility pocket and the utility pocket (large).

Hints when making ice In this way, food is refrigerated gently, without exposing it to cold air flow. Do not over fill the Ice cube trays; otherwise the ice cubes will be joined together when frozen. Ice cubes are made, turn 2 When the clockwise to empty the ice the lever into the Ice cube box. • • • • • You can make two levels, enabling you to store food separately. If used upside down, you can keep foods neatly within this shelf. Stick-type food products can also be stored inside. • However, if needed, adjust the temperature as follows. • Compartment will turn off when there is no operation for 1 minute. (When either of buttons is pressed, it lights again. • • • • • The following is a general guide to help promote longer food storage.

• If undiluted detergent is used or soapy water is not wiped off thoroughly, cracking of plastic parts can result. shelves and from the cabinet and 1 Remove them in warm pockets dishwashing water; door. Wash soapy rinse in clean water and dry. Most dairy products have a use by date on the outer packaging which informs the recommended temperature and shelf life of the product. • • • • • Then, use cold soapy water.

Hot foods should be cooled before storing. • • • • • 3 Wipe the exterior with a soft cloth each time it is soiled. • • • • • 5 Wipe the control panel with the dry cloth. • • • • • If the power supply is disconnected, please wait for at least 5 minutes before re-connecting power. Hold firmly when removing from the cabinet or carrying.

• When dropped the juice and the like near the control panel, wipe off directly. Do not drop objects inside the refrigerator or strike the inner wall. Freeze small quantities of food at a time to freeze them quickly. • Food should be properly stored or covered and the air should be removed to seal tightly. When the compartment light is blown contact the service agent approved by SHARP to request a replacement compartment light. • • • • • Before you call for service, check the following points. The outside of a cabinet is hot when touched. • • • • • Loud noise produced once a day by the compressor --- Operating sound produced immediately after automatic defrost operation. • Sound of flowing fluid (gurgling sound, fizzing sound) --- Sound of refrigerant flowing in pipes (sound may become louder from time to time). • Cracking or crunching sound, squeaking sound --- Sound produced by expansion and contraction of inner walls and internal parts during cooling.

This may occur in one of the following cases. Use a wet cloth for wiping frost and a dry cloth for wiping dew. When the door is frequently opened and closed. • When foods containing plenty of moisture are stored. Low ambient temperature may cause placed foods to freeze even if refrigerator temp. Frosting or dew generation occurs inside or outside the refrigerator. .
