Manual abstract:

fm / 8/29/11 Congratulations By purchasing a Gigaset, you have chosen a brand that is fully committed to sustainability. This product's packaging is eco-friendly! To learn more, visit www.gigaset.com. Gigaset A510 IP / IM-MEA + ZAF en / A31008-M2230-A601-1-UZ43 / title.fm / 8/29/11 Version 5, 23.09.2008 Gigaset A510 IP / IM-MEA + ZAF en / A31008-M2230-A601-1-UZ43 / security.fm / 8/29/11 Safety precautions Warning: Be sure to read this user guide and the safety precautions on the CD before using your telephone. Explain their content and the potential hazards associated with using the telephone to your children.

> Use only the supplied power adapters, as specified on the back of the base or charger. Use only the cables supplied for fixed line and LAN connection and connect these to the intended port only. > Use only the recommended, rechargeable batteries, as this could otherwise result in significant health risks and personal injury. For example, the outer casing of the batteries could be damaged or the batteries could explode. The phone could also malfunction or be damaged as a result of using batteries that are not of the recommended type.

Insert rechargeable batteries with the correct polarity and use them in accordance with the user guide (polarity symbols are displayed in or on the handset battery compartment). Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority or the dealer you purchased the product from. Using your telephone may affect nearby medical equipment. Be aware of the technical conditions in your particular environment, e.

g., doctor's surgery. Do not hold the rear of the handset to your ear when it is ringing or when handsfree mode is activated. Otherwise you risk serious and permanent damage to your hearing. Your Gigaset is compatible with the majority of digital hearing aids on the market. However, perfect function with all hearing aids cannot be guaranteed. @@If you require assistance, please contact the hearing aid supplier. Do not install the base and charger in bathrooms or shower rooms. The handset, base and charger are not splashproof. @@@@@@Protect your Gigaset from moisture, dust, corrosive liquids and fumes.

If you give your Gigaset to a third party, make sure that you also give them the user guide. Remove faulty bases from use or have them repaired by our Service team, as they could interfere with other wireless services. @@@@@@They are a prerequisite for the re-use and recycling of used electrical and electronic equipment. For further information on disposing of your used equipment, please contact your local authority, your refuse collection service or the dealer you purchased the product from. Please note that only terminals that are operated in-house (inside buildings) may be connected to the analogue TAE connection. >>>>>>>>>>>>>>> Warning: The device cannot be used in the event of a power failure. It is also not possible to transmit emergency calls. Furthermore, emergency numbers cannot be dialled, if the keypad lock is activated! Version 5, 23.09.2008 1 Gigaset A510 IP / IM-MEA + ZAF en / A31008-M2230-A601-1-UZ43 / Pack_Content.

Inserting the supplied batteries and closing the battery cover > Check the polarity when inserting the batteries (see symbols in or on the battery compartment). > Use only the rechargeable batteries recommended. Once the batteries have been inserted, the handset switches on automatically. > First insert the tabs on the top of the battery cover in the recess on the housing A . A > Then press the cover until it clicks into place B . B > The display is protected by a plastic film.

Please remove the protective film! 2 Connecting the charger and charging the batteries > Observe the sequence (A, B)! > Place the handset in the charger and wait until the batteries are fully charged (approx. 6.5 hours). @@@@@@You must enter this IP address on the handset before carrying out the following steps. Further information can be found in the user guide on the enclosed CD. The following handset menu can be used to make the entry: w (press right on the control key) ç Ī ç System ç Local Network ç (enter system PIN if required) Version 5, 23.09.2008 8 Gigaset A510 IP / IM-MEA + ZAF en / A31008-M2230-A601-1-UZ43 / configuration.fm / 8/29/11 Configuring the VoIP connection Instead of using the following procedure, you can also enter the VoIP access data and the assignment of the VoIP connection as send and receive connection using your PC (steps 7 to 12): > Launch the Web browser on your PC.

[You're reading an excerpt. Click here to read official SIEMENS
GIGASET A510 IP user guide
http://yourpdfguides.com/dref/4569558](http://yourpdfguides.com/dref/4569558)

> Enter the URL www.gigaset-config.com.

in the address field of the web browser and press the return key. You are connected to your base's Web configurator. To register with the Web configurator, you will need the system PIN for the phone (default setting: 0000). A description of the Web configurator can be found in the user guide on the enclosed CD and in the Web configurator online help document.

Prerequisite for the following steps: Before you can use VoIP to phone any other subscribers on the Internet, the fixed line network or the mobile phone network, you need a VoIP account. > Set up a VoIP account with a VoIP provider. > Have your VoIP account data you received from your VoIP provider to hand. You will need: > Your registration name (login ID), your password and, if applicable (provider-dependent), a user name (often this is your VoIP phone number). Or > Your personal auto-configuration code (activation code), if your provider supports "automatic configuration".

Version 5, 23.09.2008 9 Gigaset A510 IP / IM-MEA + ZAF en / A31008-M2230-A601-1-UZ43 / configuration.fm / 8/29/11 Configuring the VoIP connection 7

Starting the configuration process When your handset is sufficiently charged (approx. 20 minutes after you have placed it in the charger), the message key f on the handset flashes. > Press the message key f on the handset. > Press the message key f to start configuration. If "New firmware available" is shown in the display, updated firmware is already available for your phone. Press the right-hand display key \$Yes\$. Enter the authentication name (user identification) that you received from your VoIP provider.

This entry is case-sensitive. > Using the number keys, enter the authentication password that you received from your provider. This entry is case-sensitive. > Press the right display key \$OK\$. > Press the right display key \$OK\$. Depending on your provider, y.
