Gigaset AS200/AS200A

The handset at a glance

- 1 Charge status of the batteries
- 2 Answer machine icon (AS200A only)
- 3 Display keys
- 4 Message key
Flashes: new messages received
- 5 Directory key
- 6 Control key (☰)
- 7 Talk key
- 8 End call and On/Off key
- 9 Ringer on/off (press and hold in idle status)
- 10 Keypad lock on/off (press and hold)
- 11 Recall key
- Consultation call (flash)
- Dialling pause (press and hold)
- 12 Microphone
- 13 "Microphone off" key

Display keys on handset:

Pressing a key launches the function that appears above that key in the display.

Display icon	Function when pressed
INT	Call other registered handsets → page 10.
MENU	Open main/submenu (see Menu tree → page 16).
☰	Go back one menu level.
↕	Scroll up/down or adjust volume with [↑/↓].
↔	Move cursor to left/right with [←/→].
⌫	Backspace deletes one character at a time from right to left.
OK	Confirm menu function or save entry.

The base station at a glance

AS200A base station

- 1 Registration/paging key:
Search for handsets (press briefly, "Paging" → page 10)
Register handsets (press and hold → page 10).
 - 2 On/Off key: activate and deactivate answer machine.
Lights up: answer machine is activated.
Flashes: there is at least one new message or message is in the process of being recorded.
Flashes very quickly for about four seconds: memory is full.
 - 3 Volume keys: (- = quieter; + = louder)
During message playback: adjust the speaking volume.
While phone is ringing: adjust ringer volume.
 - 4 Play/Stop key:
Play back messages from the answer machine, or cancel playback.
- During message playback:**
- 5 Delete current message.
 - 6 Skip to the start of the current message (press once) or go to the previous message (press twice).
 - 7 Skip to next message.

Manual abstract:

Go back one menu level. Scroll up/down or adjust volume with u. Move cursor to left/right with u. Backspace deletes one character at a time from right to left. @ @2 On/Off key: activate and deactivate answer machine. Lights up: answer machine is activated. @@Flashes very quickly for about four seconds: memory is full. 3 Volume keys: (= quieter; + = louder) During message playback: adjust the speaking volume. While phone is ringing: adjust ringer volume. 4 Play/Stop key: Play back messages from the answer machine, or cancel playback.

During message playback: 5 Delete current message. 6 Skip to the start of the current message (press once) or go to the previous message (press twice). 7 Skip to next message. ¢ ¢ 2 Safety precautions Read this user guide and the safety precautions carefully before use. Explain their content and the potential hazards associated with using the telephone to your children.

Care Wipe down the base station and handset with a damp cloth (no solvents) or an antistatic cloth. Never use a dry cloth. This can cause static. \$ Only use the mains adapter supplied. Contact with liquid ! Fit only the recommended, rechargeable batteries (¢ page 13), i.

e. never use any other battery type or non-rechargeable batteries as this could result in significant health risks and personal injury. The operation of medical appliances may be affected. Be aware of the technical conditions in your particular environment, e.g. doctor's surgery. Do not hold the rear of the handset to your ear when it is ringing. Otherwise you risk serious and permanent damage to your hearing. The handset may cause an unpleasant humming noise in hearing aids. Do not install the phone in a bathroom or shower room.

The handset and base station are not splashproof. Do not use your phone in environments with a potential explosion hazard, e.g. paint shops. If the handset should come into contact with liquid: Switch the handset off and remove the batteries immediately. Allow the liquid to drain from the handset. Pat all parts dry, then place the handset with the battery compartment open and the keypad facing down in a dry, warm place for at least 72 hours (not in a microwave, oven etc.). Do not switch on the handset again until it is completely dry. When it has fully dried out, you will normally be able to use it again.

ECO DECT You are helping to protect the environment with your Gigaset AS200/AS200A. If you give your Gigaset to someone else, make sure you also give them the user guide. Please remove faulty base stations from use or have them repaired by our service, as they could interfere with other wireless services.

Disposal Batteries should not be disposed of in general household waste. Observe the local waste disposal regulations, details of which can be obtained from your local authority or the dealer you purchased the product from.

All electrical and electronic equipment must be disposed of separately from general household waste using the sites designated by local authorities. If a product displays this symbol of a crossed-out rubbish bin, the product is subject to European Directive 2002/96/EC. The appropriate disposal and separate collection of used equipment serve to prevent potential harm to the environment and to health. They are a precondition for the re-use and recycling of used electrical and electronic equipment. For further information on disposing of your used equipment, please contact your local authority, your refuse collection service or the dealer you purchased the product from.

Reduced energy consumption Your telephone has a power-saving adapter plug and uses less power. Reduced transmission power The transmission power of your telephone is reduced automatically: The handset's transmission power is reduced depending on the distance to the base station. The transmission power on the base station is reduced to virtually zero when only one handset is registered and the handset is in the base station. You can reduce the transmission power of the handset and base station even more by using Eco Mode/Eco Mode+ (see Menu tree page 17): Eco Mode: 80% transmission power reduction in standby mode and during a call (the range of the base station is reduced). Eco Mode+: 100% transmission power deactivation in standby mode (top left display icon ½). Press and hold the talk key c to check that the base station can be reached. You will hear the ringing tone if the base station can be reached. Registering handsets that do not support Eco Mode+ causes the mode to be deactivated on the base and all other handsets. ¢ Emergency numbers cannot be dialled if the keypad lock (¢ page 1) is activated! Not all of the functions described in this user guide are available in all countries. 3 First steps Check the pack contents one Gigaset AS200/AS200A base station, one mains adapter, one Gigaset AS200 handset, one phone cord, two batteries, one battery cover, one user guide.

If you have purchased a model with multiple handsets, the package should contain two batteries, a battery cover and a charging cradle with mains adapter for each additional handset. Setting up the base station and charging cradle (if included) The base station and charging cradle are designed for use in enclosed dry rooms with a temperature range of +5°C to +45°C. Set up the base station at a central location on a flat, non-slip surface in your house or apartment. ✕ Please note Pay attention to the range of the base station. This is up to 300 m in unobstructed outdoor areas and up to 50 m inside buildings. The range is reduced when Eco Mode (¢ page 17) is activated. The phone's feet do not usually leave any marks on surfaces. However, due to the multitude of different varnishes and polishes used on today's furnishings, the occurrence of marks on the surfaces cannot be completely ruled out. You can also mount the base station and charging cradle on the wall. Please note: Never expose the telephone to the influence of heat sources, direct sunlight or other electrical devices. Protect your Gigaset from moisture, dust, corrosive liquids and vapours. Connecting the base station ✕ First connect the mains adapter 1. ✕ Then connect the telephone jack 2 and insert the cables into the cable ducts. Please note: The mains adapter must always be connected, as the phone will not operate without mains connection. Only use the mains adapter and phone cord supplied.

Pin connections on telephone cables can vary. 2 1 1 4 Connecting the charging cradle (if included) 2 1 ✕ Connect the flat plug from the power supply 1. ✕ Plug the mains adapter into the plug socket 2. 2 If you need to disconnect the plug from the charging cradle, press the release button 1 and disconnect the plug 2. 1 Setting up the handset for use The display is protected by a plastic film.

Please remove the protective film! Inserting the batteries and closing the battery cover Warning Use only the rechargeable batteries (¢ page 13) recommended by Gigaset Communications GmbH.

[GIGASET AS200 user guide](#)

<http://yourpdfguides.com/dref/3954313>

Never use conventional (non-rechargeable) batteries, as this could result in significant health risks and damage to property. For example, the outer casing of the batteries could be destroyed or the batteries could explode. The phone could also malfunction or be damaged as a result of using batteries that are not of the recommended type. ✕ Insert the batteries the right way round. The polarity is indicated in/on the battery compartment. + ✕ Slide the battery cover back into the main casing until it clicks into place. If you need to open the battery cover, for instance to replace the batteries, place your fingertip in the grooved area on the top of the cover and slide down. 5 Placing the handset in the base station and registering V Put into base MENU Before you can use the phone, you must first register the handset to the base station. ✕ Place the handset with the display facing up in the base station.

V Registering The handset registers automatically. Registration can take up to 5 minutes. Do not remove the handset from the base station during this time. V INT MENU After successful registration, the idle screen is displayed. Charge status of the batteries: = e V U (flat to full) = flashes: batteries almost flat e V U flashes: charging If you have purchased a model with multiple handsets, repeat the registration process for each individual handset. Handsets are assigned the lowest available internal number (14). If more than one handset is registered to the base station, the internal handset number appears in the top left of the display, e.g. 2. If the internal numbers 14 are already assigned to other devices, number 4 will be overwritten.

Please note Each key press interrupts the automatic registration. If automatic registration does not work, the handset will have to be registered manually (€ page 10). Only place the handset in the base station or charging cradle that is intended for it. Initial charging and discharging of the batteries The correct charge level can only be displayed if the batteries are first fully charged and discharged. ✕ Place the handset in the base station or charging cradle for eight hours.

✕ Then remove the handset from the base station or charging cradle and do not replace it until the batteries are fully discharged. 8h 6 Please note After the first battery charge and discharge you may replace your handset in the base station or charging cradle after every call. Always repeat the charging and discharging procedure if you remove the batteries from the handset and reinsert them. The batteries may warm up during charging. This is not dangerous. After a while, the charge capacity of the batteries will decrease for technical reasons. Setting the date and time Set the date and time so that the correct date and time can be assigned to incoming calls, and so that the alarm can be used. MENU Settings OK Date/Time OK Date: ~ (enter the day, month and year in 6-digit format) OK Time: ~ (enter hours and minutes in 4-digit format) OK (display message: Saved) a (press and hold to return to idle status) € € € € € € € € € € € € Please note When entering the time and date, you can move the position of an entry to the left or right by pressing the control button up or down.

Display in idle status Once the phone is registered and the time set, the idle display is shown as in this example. If the answer machine is activated (AS200A), the answer machine icon × will be displayed in the header. Your answer machine is set with a pre-recorded announcement. ± V 11:56 MENU 11.12. INT the handset. If you place a deactivated handset in the base station or charging cradle, it will automatically activate.

Activating/deactivating the handset Press and hold the end call key a to activate or deactivate Your phone is now ready for use! If you have any questions about using your phone, please read the tips on troubleshooting ("Questions and answers" page 13) or contact our Customer Care team page 14. € € 7

Making calls Making external calls and ending calls External calls are calls using the public telephone network. ~ (Enter the phone number) The phone number is dialled.
