Manual abstract:

Warning symbols used . Congratulations on the purchase of your new appliance! You have clearly decided in favour of a modern and high-quality product. These operating instructions are a part of this product. They contain important information in regard to safety, use and disposal. Before using the product, familiarise yourself with all of these operating and safety instructions. Use the product only as described and only for the specified areas of application. In addition, pass these documents on, together with the product, to any future owner. All reproductions or duplications, also as extracts, as well as representations of the illustrations, even in an altered state, are only permitted with the written approval of the manufacturer. All technical information, data and instructions for installation, connection and operation contained in this operating manual correspond to the latest available at the time of printing and, to the best of our knowledge, take into account our previous experience and know-how. No claims can be derived from the details, illustrations and descriptions in these instructions.

The manufacturer assumes no responsibility for damage caused by failure to observe the instructions, improper use, incompetent repairs, making unauthorised modifications or for using unapproved replacement parts. @@@@Warning symbols used In these operating instructions the following warnings are used: DANGER A warning at this risk level indicates a threateningly dangerous situation. If the dangerous situation is not avoided, it could result in death or serious injury. @@@If the situation is not avoided it could lead to property damage. Follow the instructions in this warning to avoid property damage.

In this chapter you receive important safety information regarding the handling of the appliance. This appliance complies with the statutory safety regulations. Incorrect usage can lead to personal injury and property damage. For safe handling of the appliance observe the following safety information:

Before use check the appliance for visible external damage. Do not put into operation an appliance that is damaged.

There will be a risk of a fatal electrical shock. Repairs should only be carried out by authorised specialist companies or by the Customer Services department. To avoid risks, arrange for a defective power cable to be replaced by qualified technicians or our Customer Service Department. Otherwise there will be a risk of receiving an electric shock! NEVER use the appliance with a defective power cable. There will be a risk of a fatal electrical shock. Do not use extension cables or power socket strips that do not meet the required safety standards. risk of electric shock! The mains power socket must be easily accessible, so that the power cable can be easily disconnected in the event of an emergency. This appliance is not suitable for continuous use over long periods. Let the appliance cool down for minimum 80 seconds after each vacuum process. Do not leave the appliance unsupervised when it is ready for use.

@@@@ never open the appliance housing! There is a risk of receiving a potentially fatal electric shock! @@@@There is a risk of suffocation! @@The recirculation of packaging into the material circuit saves on raw material and reduces the amount of waste generated. dispose of packaging material that is no longer needed as per the regionally established regulations. NOTICE If possible preserve the appliance's original packaging during the warranty period so that in the case of a warranty claim you can package the appliance properly for return. For safe and flawless operation of the appliance, the installation site must comply with the following requirements: When setting it up, place the appliance on a firm, flat and horizontal surface. Do not operate the appliance in a hot, wet or very humid environment or close to combustible material. The mains power socket must be easily accessible, so that the power cable can be easily disconnected in the event of an emergency. @@This data must match in order to avoid any damage to the appliance. @@Ensure that the power cable is not taut or kinked. Do not let the power cable hang over edges (trip wire effect). Insert the plug into a mains power socket.

@@@To the rear and pull a piece and the appliance lid. @@@@The foil thickness must be between 30-50 (0. @@@@@@@You get a clean cut with straight-cut corners. @@For this you can lift them slightly. @@@@@@@Immediately remove the plug from the mains power socket.

This is now sealed at one end. NOTICE Check to ensure that the sealing seam is in order. @@ fill the bag. @@@@If you do not want to vacuum seal the bag you can now seal the open side. When sealing, you can at the same time extract the air from the bag (vacuuming): IMPORTANT Do NOT vacuum bags in which there are liquids.

They will permeate into the appliance and damage it. place the open end of the bag around the suction connectors . For this you can lift them slightly. The bag needs to extend up to the marking "Vacuum", which is marked on the appliance. NOTICE and The bag opening must lie smoothly against the suction connectors the sealing wire . If it does not, the vacuuming and sealing will not work properly. Close the appliance lid and then press it down firmly on both sides and with both hands. thereby , do NOT press the sealing button . The air is now being sucked from the bag. As soon as the air has been sucked from the bag, press and hold the sealing with both hands, as already described, and seal the bag.

@@@ iMPORTANT Possible damage to the appliance. @@@@If you do, the sealing wire or the isolation could be damaged. @@@@Clean the collection container , as soon as contamination is visible: Open the appliance lid and lift the suction connectors Carefully pull the collection container side handles to pull it. Out of the appliance by using the Clean it in lukewarm washing-up water and then allow it to dry well. The appliance has a built-in cable winder on the underside of the housing, on which you can wrap the power cable when it is not in use. This prevents the power cable from being pinched, damaged or soiled, and it cannot become a source of danger by hanging loosely down. Store the appliance in a clean, dry place away from direct sunlight. Do not dispose of this appliance with your normal household waste. This product is subject to the provisions of the European Directive 2002/96/EC-WEEE (Waste Electrical and Electronic Equipment). Dispose of the appliance through an approved disposal centre or at your community waste facility. observe the currently applicable regulations. In case of doubt, please contact your waste disposal centre. @@@@You receive a 3-year warranty for this appliance as of the purchase date. The appliance has been manufactured with care and meticulously examined before delivery. Please retain your receipt as proof of purchase.

@@@Only in this way can a post-free despatch for your goods be assured. @@@@Your statutory rights are not restricted in any way by this warranty.
