Using the still camera 1 2 3 4 5 To take a photo by tapping the screen Activate the camera. If the still camera is not selected, tap .

Tap . Tap a spot in the viewfinder where you want the focus to be. The photo is taken as soon as focus is set. The photo is automatically saved. To return to the viewfinder and to take another photo, press . To take a photo using the shutter key Activate the camera. If the still camera is not selected, tap . Tap . Press halfway down to use auto focus. When the dot and focus frame are green, press fully down to take a photo.

The photo is saved automatically. To return to the viewfinder and to take another photo, press . To use zoom Press the volume key. To select still camera settings Activate the camera. If the still camera is not selected, tap Tap .

Tap to display the settings bar. 1 2 3 4 5 · 1 2 3 4 . Face detection You can use face detection to bring an off-center face into focus. The camera automatically detects up to three faces, indicated by white frames. A green frame shows which face has been selected for focus.

Focus is set to the face closest to the camera. 1 2 3 4 5 6 7 To use Face detection Activate the camera. If the still camera is not selected, tap . Tap . Tap to display the settings bar. Tap and then . Tap the screen to take the photo. The photo is taken as soon as focus is set. The photo is saved automatically. To return to the viewfinder and to take another photo, press .

Photo fix You can use *Photo fix* to improve a photo you have taken. In a one-tap operation, brightness, light and contrast are adjusted to give you the best possible photo. The improvements are saved as a copy of the photo. The original photo is not affected. 25 This is an Internet version of this publication. ©

Print only for private use. 1 2 3 4 5 6 To improve a photo with *Photo fix* Take a photo. During review, tap the screen to display the toolbar. Tap . Tap . Review the improvement and tap to save. If you do not want to save the improvement select . You can apply *Photo fix* on a photo several times. Still camera settings Setting Icon Description Use *Scenes* to quickly set up the camera for common situations using pre-programd scenes. The camera has determined a number of settings for you to fit the selected scene, ensuring the best possible photo.

Scenes Auto Portrait Twilight portrait Sports Snow & beach Landscape Twilight landscape Document Focus Auto Face detection The camera automatically adjusts settings for a photo. Use for portrait photos. Face detection is turned on. Settings are optimized to give slightly softer skin tones. Use for portrait photos at night or in poorly lit environments (with or without the flash).

Due to long exposure time, the camera must be held still or placed on a stable surface. Use for photos of fast-moving objects. Short exposure time minimizes motion blurring. Use in bright environments to avoid underexposed photos. Use for landscape photos. The camera focuses on distant objects. The flash is turned off. Use when taking landscape photos at night or in poorly lit environments (without the flash). Due to long exposure time, the camera must be held still or placed on a stable surface. Use for photos of text or drawings.

It gives the photo increased and sharper contrast. Focus controls which part of a photo should be sharp. The camera automatically focuses on the selected subject. The white focus frame turns green when focus is set. The camera automatically detects up to three human faces, indicated by white frames. A green frame shows which face has been selected when auto focus is used. Focus is set on the face closest to the camera. Face detection cannot be used for all scene types. Auto focus for extreme close-up photos. Use when taking photos at a distance.

Focus is set on subjects far away. Subjects close to the camera may be blurred. Use the flash to take photos when lighting conditions are poor. Macro Infinite Flash Auto Off The flash will automatically fire when lighting conditions are poor. The flash never goes off, regardless of lighting conditions.

Sometimes photo quality can be better without a flash, even if lighting conditions are poor. Taking a good photo without using the flash requires a steady hand. You can use the self-timer to avoid a blurred photo. With the self-timer you can take a photo without holding the phone. Use it to take self-portraits, or group photos where everyone can be in the photo.

You can also use the self-timer to avoid shaking the camera when taking photos. Self-timer 26 This is an Internet version of this publication. © Print only for private use. On, 10s On, 2s Off Picture size 8MP 7MP 6MP Sets a 10-second delay from when the shutter key is pressed until the photo is taken. It can be hard to hold the phone perfectly still when pressing the shutter key, which may result in a blurred photo. Use the 2-second delay to solve this problem. The photo is taken as soon as you press the shutter key. You can select between several picture sizes and aspect ratios before taking a photo. Note that a photo with a higher resolution requires more memory. 8 megapixel picture size with 4:3 aspect ratio.

Suitable for photos you want to view on non-widescreen displays or print in high resolution. 7 megapixel picture size with 3:2 aspect ratio. This is the ratio used for traditional photos. Printed photos will fit most frames and photo albums. 6 megapixel picture size with 16:9 aspect ratio. A high resolution widescreen format. Has a higher resolution than full HD. Suitable for photos you want to view on widescreen displays. 3 megapixel picture size with 4:3 aspect ratio. Suitable for photos you want to view on non-widescreen displays.

Full high-definition format with 1920×1080 pixels. Suitable for photos you want to view on a widescreen HD TV. You can tag photos with details of where you took them. Show friends and family where you were on a map, or use geotags to find your way back to the location another time. 3MP Full HD Add geotags Off On When turned off, you are not able to view the location of where you took a photo on a map.

When turned on, the approximate geographical location is added to photos when you take them. This information can later be used to identify the location where the photo was taken. You can view your photos on a map in *Media* > *Photo*. Tips on using the camera Rule of thirds Don't place your subject in the middle of the frame. By placing it a third of the way in, you achieve a better result.

Hold it steady Avoid blurry photos by holding the camera steady.

[You're reading an excerpt. Click here to read official SONY ERICSSON AINO user guide](http://yourpdfguides.com/dref/2712644)
<http://yourpdfguides.com/dref/2712644>

Try to steady your hand by leaning it against a solid object. You can also use the self-timer to make sure that the phone is steady when the photo is taken. Get closer By getting as close as possible to your subject, you can avoid relying on the zoom. Try to fill the viewfinder with your subject. Stay within the flash range Photos taken beyond the maximum flash range will be too dark. The maximum flash range is about four steps from the subject. Consider variety Think about different angles, and move towards the object. Take some vertical photos. Try different positions.

Use a plain background A plain background helps highlight your subject. 27 This is an Internet version of this publication. © Print only for private use. Keep your lens clean Phones are used in all kinds of weather and places, and carried in pockets and bags. This results in the camera lens becoming dirty and covered with fingerprints. Use a soft cloth to clean the lens. Using the video camera 1 2 3 4 5 6 7 To record a video by tapping the screen Activate the camera. If the video camera is not selected, tap . Tap . To start recording, tap the screen.

To pause the recording, tap . To continue recording, tap . To stop recording, tap . The video is saved automatically. To return to the viewfinder and to record another video, tap .

To record a video using the shutter key Activate the camera. If the video camera is not selected, tap . Tap . to start recording. Press To stop recording, press . The video is saved automatically. To return to the viewfinder and to record another video, press To select video camera settings Activate the camera. If the video camera is not selected, tap Tap . Tap to display the settings bar. 1 2 3 4 5 6 . 1 2 3 4 . Video camera settings Setting Icon Description Select the size and aspect ratio of a video before you record it. Video format nHD VGA Message Night mode On Off Light On Off 640x352 pixels video size with 16:9 aspect ratio. A widescreen format suitable for videos you want to view on widescreen displays. 640x480 pixels video size.

Standard video format for video cameras and computer screens. Record videos suitable for sending in multimedia messages. The recording time of this video format is limited to fit in a multimedia message. Use when lighting conditions are poor. When turned on, light sensitivity is increased. Use in poorly lit environments. Videos of fast-moving objects may get blurred. Hold your hand steady, or use a support. Turn off night mode when lighting conditions are good, to improve the video quality. Select whether you want to use the light when you record a video.

Turn on the light to improve close-up videos in poorly lit environments. The light is always turned off regardless of lighting conditions. Note: Sometimes a video gets better without the light, even if lighting conditions are poor. To record a good-quality video without using the light requires a steady hand. You can also use a support and the selftimer to avoid a blurred video.

Select whether to pick up the surrounding sound when recording videos. Microphone 28 This is an Internet version of this publication. © Print only for private use. Off On Self-timer When turned off, no sound is recorded with the video. When turned on, sound is recorded with the video.

With the self-timer you can record a video without holding the phone. Use it to record a video where everyone can be in it. You can also use the self-timer to make sure that the phone is steady when the video is recorded. On, 10s On, 2s Off Image stabilizer On Off Sets a 10-second delay from when the shutter key is pressed until the video recording starts. It can be hard to hold the phone perfectly still when pressing the shutter key, which may result in a blurred video. Use the 2-second delay to solve this problem. When the self-timer is off, the video recording starts as soon as you press the shutter key. When recording a video, it can be difficult to hold the phone steady. The stabilizer helps you by compensating for small movements of the hand. It is recommended to have the stabilizer turned on.

When the stabilizer is turned off, the video you record might look jumpy. Working with photos You can view, enhance and organize photos and videos on your computer by installing the Adobe™ Photoshop™ Album Starter Edition. It is available for download at www.sonyericsson.com/support. Use Media Go™ to transfer content to and from your phone. Editing photos 1 2 3 4 5 To delete a photo Tap . Tap the status bar at the bottom of the screen. Clear stereo and clear bass Clear stereo and clear bass are turned on when you set the equalizer manually. 1 2 3 4

5 6 7 8 1 2 3 4 5 6 7 To set the equalizer manually Select Menu > Media > Music. Browse by category using the navigation key.

Scroll to a title and select Play. Select Options > Settings > Equaliser. Make sure you are in Manual view. If you are not, select Manual. To scroll between the frequency bands, press the navigation key right or left. To change the value for a selected frequency band, press the navigation key upwards or downwards.

To go back to the player view, select Done. To turn on clear stereo and clear bass using equalizer presets Select Menu > Media > Music. Browse by category using the navigation key. Scroll to a title and select Play.

Select Options > Settings > Equaliser. Make sure you are in Preset view. If you are not, select Preset. To scroll between the presets, press the navigation key right or left. Select any of the presets, except Normal.

Playlists You can create playlists to organize your music. You can add tracks and folders to a playlist. It may take a few minutes for the phone to create a playlist. 36 This is an Internet version of this publication. © Print only for private use.

1 2 3 4 5 1 2 3 4 5 To create a playlist Select Menu > Media > Music > Playlists. Scroll to New playlist and select Add. Enter a name and select OK. For each track you want to add, scroll to the track and select Mark. Select Add to add the marked tracks to the playlist. To add tracks to a playlist Select Menu > Media

> Music > Playlists. Select a playlist. Scroll to Add music and select Add. For each track you want to add, scroll to the track and select Mark. Select Add to add the marked tracks to the playlist.

SensMeTM With SensMeTM you can create playlists in two ways, by mood or from all the tracks in your phone. By mood, you first use Media GoTM to transfer tracks to your phone. Information such as mood, tempo and chords is then added. The tracks are displayed as dots on a map with two axes. In the All view, all the tracks in your phone are placed randomly on the map. 1 2 3 4 5 6 7 8 9 1 2 3 4 5 6 7 8 9 To create a playlist by mood Select Menu > Media >

Music. Scroll to SensMeTM and select Open. Press the navigation key upwards, downwards, right or left. Make sure you are in Mood view. If you are not, select Mood.

To preview different tracks, press the navigation key upwards, downwards, right or left. To choose an area of tracks, select Add and press the navigation key upwards or downwards. To create the playlist and play it in the music player, select Create. Select Options > Save playlist. Enter a name and select OK.

To create a playlist from All view Select Menu > Media > Music. Scroll to SensMeTM and select Open. Press the navigation key upwards, downwards, right or left. Make sure you are in All view. If you are not, select All.

To preview different tracks, press the navigation key upwards, downwards, right or left. To choose an area of tracks, select Add and press the navigation key upwards or downwards. To create the playlist for playing in the music player, select Create. Select Options > Save playlist. Enter a name and select OK. 37

This is an Internet version of this publication. © Print only for private use. Audio books If you use Media GoTM to transfer audio books to your phone from a computer, you can listen to the audio books in your phone. It may take a few minutes before a transferred audio book appears in the list of available audio books. · To access audio books Select Menu > Media > Music > Audio books.

You can find audio books in formats other than M4B and those that do not have ID3v2 chapter tags in the Tracks folder. Buy Now If you subscribe to a music service allowing limited, non-permanent use with your phone, you can mark a track you are interested in buying later. The next time you synchronize your music with Windows Media® Player on a computer with enabled Internet access, you should be asked if you want to buy the track you marked earlier. If you accept, the track is downloaded to your computer and your selected music service account is charged. This service requires a subscription and account with a

downloadable music service, a computer with Microsoft® Windows Media® Player 11 or subsequent compatible version of Windows Media® Player, and a USB computer connection. You cannot see that a track is marked. You cannot unmark tracks you have already marked. · To mark a track When the track you want to mark is playing, press and hold down . PlayNowTM When you select PlayNowTM you enter PlayNowTM arena, where you can download music,

games, ringtones, themes and wallpapers. You can preview or listen to content before you purchase and download it to your phone.

If you cannot use PlayNowTM and PlayNowTM arena, see I cannot use Internet-based services on page 73. This service is not available in all countries. For extended functionality, you can also access the PlayNowTM arena Web shop on a computer from www.playnow-arena.com.

For more information, go to www.sonyericsson.com/support to read the PlayNowTM arena Feature guide. 1 2 To use PlayNowTM Select Menu >

PlayNowTM. Scroll through PlayNowTM arena and follow the instructions to preview and purchase content.

TrackIDTM TrackIDTM is a music recognition service. You can search for title, artist and album name for a track you hear playing through a loudspeaker or on the radio in your phone. If you cannot use TrackIDTM, see I cannot use Internet-based services on page 73. · · To search for track information When you hear a track through a loudspeaker, select Menu > Entertainment > TrackIDTM > Start. When the radio in your phone is playing select Options >

TrackIDTM. For best results, use TrackIDTM in a quiet area. 38 This is an Internet version of this publication.
