**Manual abstract:**

Extended User guide (this document) an up-to-date User guide with step-by-step instructions and additional information on features available in your phone. You can access this document at [www.sonyericsson.com/support](http://www.sonyericsson.com/support). Please read the Important information before you use your phone. 4 This is an Internet version of this publication. © Print only for private use. Getting started Assembly Before you start using your phone, you need to insert a SIM (Subscriber Identity Module) card and the battery. To insert the SIM card 1 2 3 4 Remove the battery cover. Pull out the SIM card holder.

Put the SIM card into its holder with the gold-colored contacts facing down. Push the holder back into place. @@@@© Print only for private use. 1 2 3 Press and hold down . Enter your SIM card PIN, if requested, and select OK.

@@Your PIN is supplied by your network operator. @@You can see and call an emergency number without entering a PIN. If you enter the wrong PIN three times in a row, the SIM card is blocked. See SIM card lock on page 73. SIM card The SIM (Subscriber Identity Module) card, which you get from your network operator, contains information about your subscription.

Always turn off your phone and detach the charger before you insert or remove the SIM card. You can save contacts on the SIM card before you remove it from your phone. See To copy contacts between the memory card and SIM card on page 23. Help You can find Help on most applications in Organizer or you can access Help from within a specific application by selecting Options. · · To access the general Help in your phone Select Menu > Organizer > Help. To view Help when you are in an application Select Options > Help. 6 This is an Internet version of this publication. © Print only for private use. Phone overview 1 On/off key 2 Loud speaker 3 Charging/message indicator 4 Proximity sensor 5 Ear speaker 6 Video call camera 7 Brightness sensor 8 Key lock key 9 Screen 10 Connector for charger, handsfree and USB cable 11 Memory card cover 12 Call key 13 Main menu key 14 End key 15 Main camera 16 Xenon flash 17 Volume, digital zoom keys 18 LED light/AF assisting light 19 Video recording indicator 20 Camera brightness sensor 21 Camera view key 22 Camera mode key 23 Camera lens cover 24 Camera key 25 Strap holder 24 15 16 17 18 19 20 21 22 23 11 12 13 14 1 2 3 4 5 6 7 8 9 10 25 7 This is an

For marks. You need the correct Internet settings to visit websites. For cost information, contact your service provider. 1 2 3 1 2 3 4 To add a bookmark Tap . Tap and select the bookmark you wish to add. To add more bookmarks, repeat step 2. To remove a bookmark Tap .

Tap . Tap the bookmark you wish to remove and select Yes. To remove more bookmarks, repeat step 3. Photos view The Photos view provides quick access to your 200 most recently taken photos. The most recently taken photo is displayed in the center of the screen.

All photos are reduced and then cropped to 360x360 pixels. With each photo in this view, you can choose to set it as wallpaper, send it as a multimedia message or view it in Media. 1 2 1 2 3 1 2 To set a photo as wallpaper Tap . Tap a photo and select Set as wallpaper. To send a photo Tap .

Tap a photo and select Send as. Select a sending method. To view a full-size photo in Media Tap . Tap a photo and select View in Media. Shortcuts view The Shortcuts view provides a list of shortcuts to different applications and bookmarks. You can personalize the shortcuts you wish to show. 11 This is an Internet version of this publication. © Print only for private use. 1 2 3 4 5 6 To change shortcut settings Tap . Tap .

Select a shortcut and tap Options > Change. When Shortcut type: appears, select Application or Bookmark. Double-tap an item. To save your settings, select Back. Charging the battery The phone battery is partly charged when you buy it. Memory You can save content on a memory card, in the phone memory and on your SIM card. Photos and music are saved on the memory card, if a memory card is inserted. If not, or if the memory card is full, photos and music are saved to the phone memory. Messages and contacts are saved in the phone memory by default, but you can choose to save them on the SIM card. · To view available memory Select Menu > Organizer > File manager.

Memory card You may have to purchase a memory card separately. Your phone supports memory cards, adding more storage space to your phone. The memory card can also be used with other compatible devices. You can move content between the memory card and the phone memory. To insert or remove a memory card 1 2 3 Open the memory card cover.

Insert the memory card with the gold-colored contacts facing down. To remove the memory card, press and select Remove memory card, and then press the edge of the memory card to release and remove it. Using other networks Making and receiving calls, using messaging and data transfer, for example, Internet-based services, outside your home network (roaming) may incur additional costs. Contact your operator for more information. 12 This is an Internet version of this publication.

Calls Making and receiving calls You need to turn on your phone and be within range of a network. The touch screen is disabled automatically during calls when you place your phone next to your ear. 1 2 To make a call to open the dialler and enter a phone number (with international country Select code and area code, if applicable). Press . You can call numbers from your contacts and call lists.

· 1 2 3 To end a call . Press To make an international call Select , and tap \*+ twice for a "+" sign. Enter the country code, area code (without the first zero) and phone number.

[You're reading an excerpt. Click here to read official SONY ERICSSON SATIO user guide](http://yourpdfguides.com/dref/2712701)  
<http://yourpdfguides.com/dref/2712701>

Press . To set automatic redial Select Menu > Settings > Calling > Call > Automatic redial > On. To answer a call Press . To reject a call . Press To change the ear speaker volume during a call Press the volume key up or down. To mute the microphone during a call To mute the microphone, tap Mute. To reactivate the microphone, tap Unmute.

To turn on the loudspeaker during a call Tap . Do not hold the phone to your ear when using the loudspeaker. This could damage your hearing. . . . 1 2 . . . To view missed calls to open the call list. Press Networks Your phone switches automatically between GSM and 3G (UMTS) networks, depending on availability. Some network operators allow you to switch networks manually. 1 2 To switch networks manually Select Menu > Settings > Connectivity > Network > Network mode. Select an option. 14 This is an Internet version of this publication. © Print only for private use.

Emergency calls Your phone supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted, if you are within range of a network. In some countries, other emergency numbers may also be promoted. Your network operator may therefore have saved additional local emergency numbers on the SIM card. . To make an emergency call Select , enter 112 (the international emergency number) and press . Video calls You can share experiences with friends and family as they happen and save them to share later. You see the person you are talking to on your screen. The other person sees the video being shot by your camera. Before making video calls To engage in a video call, both parties to the call must have a 3G (UMTS) phone subscription that supports the 3G (UMTS) service and 3G (UMTS) coverage. 1 2 . To make a video call Select and enter a phone number (with international country code and area code, if applicable).

Select Video call. To answer a video call Press . To end a video call Press . To use the zoom when you are on an outgoing video call Select Options > Zoom. To view video call options During a video call, select Options. . . . Call list You can view information about recent calls. 1 2 To call a number from the call list and select a tab. Press Select a name or a number and press . Speed dial Speed dialing lets you select eight contacts you can dial quickly from standby. You must assign each speed dial contact a number between 2 and 9.

1 2 3 . To assign speed dial numbers to contacts SelectMenu > Settings > Calling > Speed dialing. Select a number from 2 to 9 on your keypad, and select Options > Assign. Select a contact. To speed dial an assigned number Select , enter a speed dial number and press . 15 This is an Internet version of this publication.

© Print only for private use. More calling features Voicemail If your subscription includes an answering service, callers can leave a voicemail message when you cannot answer a call. 1 2 . To enter your voicemail number Select Menu > Settings > Calling > Call voicemail> Voicemail inbox. Enter the number and select OK. To call your voicemail service Select .

Touch and hold 1 . Forwarding calls You can forward calls, for example, to an answering service. When Restrict calls is used, some forward call options are not available. 1 2 3 4 To forward calls Select Menu > Settings > Calling > Forward calls. Select a call type and a forward option. Select Activate. Enter the number you want to forward calls to, and select OK. More than one call You can handle more than one call at a time. For example, you can put an ongoing call on hold while you make or answer a second call. You can also switch between the two calls.

You cannot answer a third call without ending one of the first two calls. Call waiting You will hear a beep if you receive a second call while call waiting is active. . 1 2 To activate call waiting Select Menu > Settings > Calling > Call > Call waiting > Activate. To make a second call During a call, select Dialer. This puts the ongoing call on hold. Enter the number to call, and press . To answer a second call when you hear the beep for a second call. This puts the During a call, press ongoing call on hold. To reject a second call During a call, select Reject and continue with the active call. To end an active call and answer a second call During a call, select End active call and then select Answer.

. . . Handling two voice calls You can have calls ongoing and on hold at the same time. . To switch between two calls During a call, press . 16 This is an Internet version of this publication. © Print only for private use. . To end an active call and return to the call on hold Press and then press .

Conference calls The conference call function lets you hold a joint conversation with other people. 1 2 3 4 5 To make a conference call Make a call urator to the left Right tap to move the cursor to the right Backspace tap to delete a letter to the left of the cursor Symbol tap to open the symbol table Space tap to enter a space or 0 Shift tap to change the character case, turn on or off predictive text input mode, and switch between the alphabet modes and number mode 1 2 To activate the alphanumeric keypad Tap any text input field. Messaging Before you use Messaging Before you can send or receive messages other than text messages, you need to set up the necessary accounts.

You can use the Internet and email wizards provided in the phone to download settings or set up the accounts manually. Messaging overview The following icons appear in Messaging: New message Inbox Mailbox Sent Create a new message Received messages, excluding email and cell broadcast messages, are saved here Connect to your remote mailbox to download your new email messages, or view your previously downloaded email messages offline The last messages that have been sent, excluding messages sent using Bluetooth connectivity, are stored here. You can change the number of messages to be saved in this folder Draft messages that have not been sent are stored here Messages waiting to be sent, for example, when your device is outside network coverage, are temporarily saved here Drafts Outbox Delivery reports You can request your provider to send you a delivery report of the text messages and multimedia messages you have sent. The availability of this service depends on your network My folders Organize your messages into folders Text and multimedia messages Messages can contain text, pictures, sound effects, video clips and presentations. You can also create and use templates for your messages. When sending messages, the phone automatically selects the most suitable method to use (either a text or multimedia message) for sending the message. If you cannot send or receive multimedia messages, see I cannot use Internet-based services on page 76. 1 2 3 4 5 6 To create and send a message Select Menu > Messaging > New message. Tap the To field and select a contact name from Contacts. Tap OK.

Tap the text field and enter your text. Select Options > Add content and add a picture, video clip or sound. . To send the message, select When you enter the phone numbers of multiple recipients manually, use a semicolon to separate their numbers. · 1 2 3 To reply to a received message Select Options > Reply. To delete a read message Select a read message. Select . To delete the message, select Yes. 24 This is an Internet version of this publication. © Print only for private use.

1 2 3 4 5 To save a sender's contact details Select Menu > Messaging > Inbox.

[You're reading an excerpt. Click here to read official SONY ERICSSON SATIO user guide](#)  
<http://yourpdfguides.com/dref/2712701>

Tap the sender's message. Select **Options** > **Save to Contacts** > **Create new**. Enter the sender's phone number, name or email address. Select **Done**. Email Before you use email To use email, you need to enter a valid Internet access point (IAP) in the phone and enter your email settings correctly. You need to create an email account. Follow the instructions given by your remote mailbox and Internet service provider (ISP). If email settings are missing in your phone, see *Email settings* on page 70. Sending email messages You can create email messages from each email account.

1 2 3 4 5 6 7 8 9 To create and send a new email message Select **Menu** > **Messaging**. Select **Options** > **Create message** > **Email**. Select recipients from **Contacts** and tap the **To**, **Cc** or **Bcc** field. Enter the subject of your email in the **Subject** field. To attach files to your email message, select **Add** from the toolbar. Select the attachment type. Copyright protection may prevent some images, music and other content from being copied, modified or transferred. To view the attachments, tap **.** Write the message. To use a template or previously written note, select **Add** from the toolbar and select the desired template or note.

To send the message, select **Send**. Receiving email messages Email messages are downloaded from your email server via the Internet or at your office. You can download your email manually or set when your phone should check for new email. 1 2 1 2 3 4 1 2 3 To download email messages offline Select **Menu** > **Messaging** and select a mailbox. To open a connection to the remote mailbox, select **Options** > **Connect**.

To download email messages automatically Select **Menu** > **Messaging**. Select **Options** > **Settings** > **Email** > **Mailboxes**. Tap the email account. Select **Automatic download**. To delete email messages from the phone Select **Menu** > **Messaging** and select a mailbox.

Select an email message. Select **Options** > **Delete** > **Phone only**. The email messages remain in the remote mailbox. The phone mirrors the email headers in the remote mailbox. Although you delete the message content, the email header stays in your phone. If you want to remove the header as well, you can connect to the server when deleting the message from your phone and the remote mailbox. If there is no connection to the server, the header is deleted when you make a connection from your phone to the remote mailbox again to update the status. 25 This is an Internet version of this publication. © Print only for private use.

1 2 3 · 1 2 3 To delete an email message from the phone and from the remote mailbox Select **Menu** > **Messaging** and select a mailbox.

Select an email message. Select **Options** > **Delete** > **Phone and server**. To disconnect from the remote mailbox To end the data connection to the remote mailbox, select **Options** > **Disconnect**. To forward an email message Select **Menu** > **Messaging** and select a mailbox. Select the email message you want to forward. Select **Options** > **Forward**. Viewing messages You can choose not to receive large messages and to only receive a header. 1 2 3 4 5 To download headers Select **Menu** > **Messaging**. Select **Options** > **Settings** > **Email** > **Mailboxes**. Tap the email account.

Select **Download settings** > **Email download**. Select **Headers only**. More about **Messaging** Cell broadcast messages Cell broadcasts allow you to receive messages on various topics, such as weather or traffic conditions, from your service provider. For more information, please contact your service provider. Cell broadcast messages cannot be received in UMTS networks.

A packet data connection may prevent cell broadcast reception. 1 2 To view a cell broadcast message Select **Menu** > **Messaging** > **Options** > **Cell broadcast**. Select the message to view. Service commands You can use service commands to enter and send service requests, such as activation commands for network services, to your service provider. Service requests are also known as USSD (Unstructured Supplementary Service Data) commands.

1 2 To edit service commands Select **Menu** > **Messaging**. Select **Options** > **Service message**. Sent Your last 20 sent messages are automatically saved in the **Sent** folder. 1 2 3 To change the number of sent messages saved automatically Select **Menu** > **Messaging**. Select **Options** > **Settings** > **Other**. Enter the number of messages you want to be saved automatically. Drafts You can view, edit and send messages you have created but not yet sent in **Drafts**. 26 This is an Internet version of this publication. © Print only for private use. 1 2 1 2 3 4 5 To view a message Select **Menu** > **Messaging** > **Drafts**.

Select the message. To send a message Select **Menu** > **Messaging** > **Drafts**. Select the message. Tap the **To** field and select a contact name from **Contacts**. Tap **OK**. To send the message, select **.** Delivery reports You can use **Delivery reports** to keep track of sent text messages and multimedia messages. Delivery reports are not provided for text messages and multimedia messages sent to email addresses. 1 2 1 2 To receive delivery reports for text messages Select **Menu** > **Messaging**. Select **Options** > **Settings** > **Text message** > **Receive report** > **Yes**.

To receive delivery reports for multimedia messages Select **Menu** > **Messaging**. Select **Options** > **Settings** > **Multimedia message** > **Receive report** > **Delivery and read or Delivery**. My folders You can view messages saved in your own folders or use message templates in **My folders**. 1 2 3 4 To create a new folder Select **Menu** > **Messaging** > **My folders**. Select **Options** > **New folder**.

Enter a name for the folder. Tap **OK**. Templates 1 2 1 2 1 2 3 4 To view a template Select **Menu** > **Messaging** > **My folders** > **Templates**. Select a template. To send a message template Select **Menu** > **Messaging** > **My folders** > **Templates**.

Tap a template and select **Options** > **Send**. To create a template Select **Menu** > **Messaging** > **My folders** > **Templates**. Select **Options** > **New template**. Enter the text. To save the template, select **Done**. 27 This is an Internet version of this publication. © Print only for private use. Media With the **Media** application you can manage media files, such as photos, music, other audio tracks and video clips. You can also manage photos in albums on the web. The main application features are: · · · Photo view, edit, send or blog your photos and video clips.

Music categorize and play your music files or other audio tracks. Video play and handle your video clips. You can change between portrait view and landscape view automatically when auto-rotate is on. See *Sensor settings* on page 68. Viewbar and touchbar You can use the viewbar and touchbar to navigate through different views and manage your media files. · · Viewbar a bar that appears at the top of the screen (in portrait view) after you select an application in **Media**. Using this bar, you can navigate to play view, to various list views within the same application, or to the main **Media** menu.

© Print only for private use. White balance The white balance function adjusts the photo or video clip color balance according to the lighting conditions. Normally our eyes compensate for lighting conditions of different color temperatures.

A digital camera needs to find a reference point which represents white. It will then calculate all the other colors based on this white point. For example, if a halogen light illuminates a white wall, the wall will appear yellow, when in fact it should be white. If the camera knows the wall is supposed to be white, it will compensate for all other colors in the scene accordingly. Most digital cameras feature automatic white balance.

This means the camera looks at the overall color of the image and calculates the best white balance. However, these systems may not work properly if the scene is dominated by one color or if there is no natural white. There are five settings for different lighting conditions: Auto\* adjusts the color balance automatically to the lighting conditions Incandescent adjusts the color balance for bright lighting conditions, such as overhead light bulbs, or when lighting conditions change quickly Fluorescent adjusts the color balance for fluorescent lighting Daylight adjusts the color balance for outdoor use Cloudy adjusts the color balance for a cloudy sky \* No icon appears when this function is activated. 1 2 3 To set the white balance in photo mode Activate the camera and tap . Select Photo > White balance. Select an option. Image stabilizer The image stabilizer compensates for small movements of the hand to ensure steady photos. When you turn on this function, appears in the viewfinder. To activate the image stabilizer Activate the camera. Tap .

Select Photo > Image stabilizer > On. The image stabilizer is only available when the flash is off. 1 2 3 Picture size Picture size determines the resolution for a photo. Large sizes give you sharper photos; small sizes allow you to save more photos in the memory. You can select a picture size that corresponds to the size of the planned printout of the photo. 1 2 3 4 To set picture size Activate the camera. Tap . Select Photo > Picture size. Select an option. Effects Before taking photos or recording video clips, you can set and view different effects.
