Your Xperia smartphone from Sony runs on the Android platform.

Android phones can perform many of the same functions as a computer and you can customise them to your own needs. For example, you can add and delete applications, or enhance existing applications to improve functionality. At Android MarketTM you can download a range of applications and games from a constantly growing collection. @@@@ androidTM phones are constantly evolving. @@Your AndroidTM phone is pre-loaded with GoogleTM services. @@You also need to have Internet access to use many of the features in AndroidTM. New software releases may not be compatible with all phones. Applications An application is a phone program that helps you perform a task. For example, there are applications to make calls, take photos and download more applications. Getting started Assembly To remove the back cover · Using your thumbs, press down on the back cover, then slide it upwards. To insert the memory card and the SIM card Do not insert an incompatible SIM card in the SIM card slot. Doing so could permanently damage your SIM card or your phone. microSD · Turn off your phone and remove the back cover, then insert the memory card and the SIM card into the relevant slots. The memory card may not be included at purchase in all markets. To remove the SIM card microSD 1 2 3 Turn off your phone.

remove the back cover. Place the tip of your finger on the SIM card and slide it out of its slot. To remove the memory card microSD 1 2 Turn off the phone, or unmount the memory card from Settings > Storage > Unmount SD card. Remove the back cover, then draw the memory card outwards to remove it. To attach the back cover 1 2 1 2 Place the back cover over the back of the phone, then fit it into the slots. Slide the cover towards the bottom end of the phone. You hear a sound when the back cover locks into place. Turning the phone on and off To turn on the phone Make sure that the battery is charged for at least 30 minutes before you turn on the phone for the first time. 1 2 3 4 5 on the left side of the phone until the Press and hold down the power key phone vibrates. If your screen goes dark, briefly press the power key to activate the screen.

To the right across the screen. To unlock the screen, drag Enter your SIM card PIN when requested, and select OK. Wait a while for the phone to start. Your SIM card PIN is initially supplied by your network operator, but you can change it later from the Settings menu. To correct a mistake made while entering your SIM card PIN, tap .

1 2 3 To turn off the phone Press and hold down the power key until the options menu opens. It may take a while for the phone to shut down. Setup guide The first time you start your phone, a setup guide opens to explain basic phone functions and help you enter essential settings. This is a good time to configure the phone to your specific needs. You can also skip some steps and access the setup guide manually at a later stage.

1 2 To access the setup guide manually From the Home screen, tap . find and tap Setup guide. Screen lock When your phone is on and left idle for a set period of time, the screen darkens to save battery power, and locks automatically. This lock prevents unwanted actions on the touchscreen when you are not using it. On the lockscreen, you can still view notifications, for example, notifications of missed calls and messages that arrived since the phone was last locked. You can also control the playback of audio tracks without unlocking the screen. To activate the screen Briefly press the power key . 1 2 To view missed calls from the lockscreen To activate the screen, briefly press the power key Drag to the right across the screen. . 1 2 To view new text messages from the lockscreen To activate the screen, briefly press the power key .

Drag to the right across the screen. 1 2 3 To play an audio track from the lockscreen To activate the screen, briefly press the power key . To display music player controls, place a finger on the time and date area and flick to the left. tap . To pause an audio track from the lockscreen To activate the screen, briefly press the power key When the music player controls appear, tap . 1 2 . 1 2 To change the currently playing audio track from the lockscreen To activate the screen, briefly press the power key . or . When the music player controls appear, tap To unlock the screen · Drag to the right across the screen. To lock the screen manually When the screen is active, briefly press the power key .

Accounts and services Sign in to your online service accounts from your phone and benefit from a range of services. Combine services and get even more out of them. For example, collect contacts from your GoogleTM and FacebookTM accounts and integrate them into your phonebook, so you have everything in one place. You can sign up to online services from your phone as well as from a computer. When you sign up for the first time, an account is created with your user name, password, settings and personal information.

The next time you sign in, you get a personalised view. GoogleTM account Having a Google account is key to using a range of applications and services with your Android phone. You need a GoogleTM account, for example, to use the GmailTM application in your phone, to chat to friends using Google TalkTM, to synchronise your phone calendar with your Google CalendarTM, and to download applications and games from Android MarketTM. Microsoft® Exchange ActiveSync® account Synchronise your phone with your corporate Microsoft® Exchange ActiveSync® account. This way, you keep your work email, contacts and calendar events with you at all times.

FacebookTM account FacebookTM connects you with friends, family and colleagues all over the world. Log in now to share your world with others. SyncMLTM account Synchronise your phone with an Internet server using SyncMLTM. View and manage contacts, calendar events and bookmarks from your phone just as easily as you would from a computer. Getting to know your phone Phone overview 1 2 3 4 12 5 11 6 7 10 9 8 13 14 15 16 17 19 18 1. Charging the battery Charge your phone for at least 30 minutes before you turn on the phone for the first time. When you connect the phone charger cable to a power source, such as a USB port or a phone charger, it may take a few minutes before the battery icon appears on the screen.

You can still use your phone while it is charging. Charging the phone over a long period of time, for example, overnight, does not damage the battery or the phone. The battery will start to discharge a little after it is fully charged and then charges again after a certain time when the phone charger is connected.

This is to extend battery life and may result in the charge status showing a level below 100 percent. To charge the phone 1 2 3 Plug the phone charger into a power outlet. Plug one end of the USB cable into the charger (or into the USB port of a computer). Plug the other end of the cable into the micro USB port on your phone, with the USB symbol facing up. The battery status LED lights up when charging starts. If the battery is completely discharged, it may take a few minutes before the LED lights up after you connect the phone charger cable to a power source. 4 When the battery status LED is green, the phone is fully charged. Disconnect the USB cable from your phone by pulling it straight outwards. Make sure not to bend the connector when removing the cable from the phone. Battery LED status Green Flashing red Orange The battery is fully charged The battery level is low The battery is charging.

The battery level is between low and full 1 2 To check the battery level From the Home screen, tap . find and tap Settings > About phone > Status. Improving battery performance The following tips can help you improve battery performance: 14 This is an Internet version of this publication. This will not affect the lifetime of the battery. Downloading data from the Internet is power consuming.

When you're not using the Internet, you can save power by disabling all data connections over mobile networks. This setting does not prevent your phone from transmitting data over other wireless networks. Turn off GPS, BluetoothTM and Wi-Fi® when you don't need these features. You can turn them on and off more easily by adding the Quick settings widget to your Home screen. You do not need to turn off 3G.

use the Power Saver feature to reduce battery consumption. You can select the power saving mode that best suits the way you use your phone. You can also customise the settings of each power saving mode. Set your synchronisation applications (used to synchronise your email, calendar and contacts) to synchronise manually. You can also synchronise automatically, but increase the synchronisation intervals. Check the battery usage menu in the phone to see which applications use the most power. Your battery consumes more power when you use video and music streaming applications, such as YouTubeTM. Some Android MarketTM applications also consume more power. Close and exit applications that you are not using. lower the screen display brightness level.

Turn off your phone or activate the Airplane mode setting if you are in an area with no network coverage. Otherwise, your phone repeatedly scans for available networks, and this consumes power. use a Sony original handsfree device to listen to music. Handsfree devices demand less battery power than the phone's loudspeakers. Keep your phone in standby whenever possible. Standby time refers to the time during which the phone is connected to the network and is not being used. Com to get the latest battery performance tips for your phone model. To access the battery usage menu From the Home screen, tap . Find and tap Settings > About phone > Battery use to see which installed applications consume the most battery power. To add the Data traffic widget to your Home screen .

from your Home screen , press Tap Add > Widgets > Tools. Flick left to find and select the Data traffic widget. You can now turn on and off your data connection more easily. To add the Quick settings widget to your Home screen From your Home screen, press . 1 2 1 2 3 1 2 3 Reducing battery consumption with Power Saver Use pre-set power saving modes to manage power consuming applications and reduce battery consumption.

With Power Saver, you can also customise the settings within each power saving mode to the way you use your phone. 1 2 3 1 2 3 To activate a power saving mode From your Home screen, tap . find and tap Power Saver. Tap the icon next to the power saving mode that you want to activate. To deactivate a power saving mode From your Home screen, tap .

find and tap Power Saver. Tap the illuminated icon next to the active power saving mode to turn it off. 1 2 3 4 5 1 2 3 4 To change the settings for a power saving mode From your Home screen, tap . find and tap Power Saver. To open the settings menu, tap the name of a power saving mode. Mark the features that you wanove items around, create folders, and add shortcuts to contacts. To open the options menu of your Home screen You can open the Home screen options menu in two ways: ·Touch and hold on any part of your Home screen. To add a shortcut to the Home screen From your Home screen, press . Add an application shortcut directly from the Application screen by touching and holding the application. 1 2 3 To add a folder to the H calendar notifications appear here.

The right side shows the signal strength, battery status, and other information. A notification light also gives you battery status information and some notifications. For example, a flashing blue light means there is a new message or a missed call. The notification light may not work when the battery level is low. Checking notifications and ongoing activities You can drag down the status bar to open the Notification panel and get more information. For example, you can use the panel to open a new message or view a 22 This is an Internet version of this publication. You can also open some applications that run in the background, such as the music player. Drag the tab at the bottom of the Notification panel upwards. To open a running application from the Notification panel From the Notification panel, tap the icon for the running application to open it. To clear the Notification panel From the Notification panel, tap Clear. Phone settings menu View and change your phone settings from the Settings menu. 1 2 To access the phone settings From the Home screen, tap . Typing text On-screen keyboard Tap the keys of the on-screen QWERTY keyboard to enter text conveniently. Some applications open the on-screen keyboard automatically. You can also open this keyboard by touching a text field.

Enter a carriage return or confirm text input. Delete a character before the cursor. 7 4 56 All illustrations are for illustration purposes only and may not accurately depict the actual phone. To display the on-screen keyboard to enter text Tap a text entry field. To hide the on-screen keyboard When the on-screen keyboard is open, press .

To use the on-screen keyboard in landscape orientation When you enter text, turn the phone sideways. For the keyboard to support this feature, landscape mode must be supported by the application you are using, and your screen orientation settings must be set to automatic. 1 2 To enter text using the on-screen keyboard To enter a character visible on the keyboard, tap the character.

To enter a character variant, touch and hold a regular keyboard character to get a list of available options, then select from the list. For example, to enter "é", touch and hold "e" until other options appear, then, while keeping your finger pressed on the keyboard, drag to and select "é". To shift between upper-case and lower-case letters to switch to upper-case Before you enter a letter, tap · To turn on the caps lock Before you type a word, tap or until appears. When you enter text, tap Tap to view more options. To enter common punctuation marks When you finish entering a word, tap the space bar. select a punctuation mark from the candidate bar. The selected mark is inserted before the space.

To quickly enter a full stop, tap the space bar twice when you finish entering a word. To delete characters Tap to place the cursor after the character you want to delete, then tap To enter a carriage return to enter a carriage return. When you enter text, tap To edit text When you enter text, touch and hold the text field until the Edit text menu appears. 1 2 Using the Gesture input function to write words You can input text by sliding your finger from letter to letter on the on-screen keyboard. You can lift your finger between words so that the phone recognises them. Gesture input is only available when you use the on-screen keyboard. 1 2 3 4 To change the Gesture input settings When you enter text using the on-screen keyboard, tap . If you have selected more than one writing language, touch and hold the input language key instead. For example, touch and hold . If you want to automatically add a space between gestures without having to tap the space bar each time, mark the Space between gestures checkbox.

To enter text using the Gesture input function When you enter text using the on-screen keyboard, slide your finger from letter to letter to spell the word you want to write. Lift up your finger when you've finished entering a word. The phone suggests a word based on the letters you have traced. If necessary, select the correct word in the candidate bar. To view more options, scroll right or left in the word candidate bar.

If you cannot find the desired word, tap once to delete the entire word. Then you can try again or tap each letter to enter the word. If the Space between gestures setting is activated, slide on the keyboard to enter the next word. Otherwise, enter a space and then slide to enter the next word. To enter joined compound words when the Space between gestures setting is activated, you may need to slide to enter the first part of the word, then tap each letter to enter the rest of the word.

You can activate the Phonepad text input method via the keyboard settings. The Phonepad is only available in portrait orientation. Using the 12-Key Phonepad 1 2 3 1 2 3 4 5 6 7 8 9 Enter separator Display numbers and symbols Display smileys Enter a space Select input methods Switch between Chinese and English input Enter a carriage return Delete a character before the cursor Close the on-screen keyboard view 7 4 56 All illustrations are for illustration purposes only and may not accurately depict the actual phone. 1 2 To switch between the on-screen keyboard and the Phonepad When you enter text, tap . If you have selected more than one writing language, touch and hold the input language key instead, for example, . tap Keyboard settings > Keyboard layout , then select an option. The Phonepad is only available in portrait orientation. To enter text using the Phonepad When appears in the Phonepad, tap each character key only once, even if the letter you want is not the first letter on the key. Tap the word that appears or tap to view more word suggestions and select a word from the list. Appears in the Phonepad, tap the on-screen key for the character you When want to enter.

Keep pressing this key until the desired character is selected. Then do the same for the next character you want to enter, and so on. To enter numbers using the Phonepad When the Phonepad is open, tap . a Phonepad with numbers appears. To insert symbols and smileys using the Phonepad When the Phonepad is open, tap . a grid with symbols and smileys appears. Scroll up or down to view more options. If you have selected more than one writing language, touch and hold the input language key instead, for example, .
tap Keyboard settings. To add a writing language to the on-screen keyboard or the Phonepad When you enter text using the on-screen keyboard or Phonepad, tap . If you have selected more than one writing language, touch and hold the input language . Key instead, for example, Tap Writing languages and mark the checkbox for the languages you want to to confirm. use for writing.

When you have finished, press To switch between languages, tap the input language key, for example, . Text input settings When entering text using the on-screen keyboard or the Phonepad, you can access a text input settings menu that helps you set options for text prediction. For example, you can decide how you want the phone to present word alternatives and correct words as you type, or enable the text input application to remember new words you write. 1 2 3 To change the text input settings When you enter text using the on-screen keyboard or the Phonepad, tap . If you have selected more than one writing language, touch and hold the input . Language key instead, for example, Tap Keyboard settings > Text input settings. select the desired settings. Entering text using voice input When you enter text, you can use the voice input function instead of typing the words. Just speak the words that you want to enter. Voice input is an experimental technology from GoogleTM, and is available for a number of languages and regions. You must have a data connection on a mobile or Wi-Fi® network to use this service. additional charges may apply. 1 2 3 4 5 6 To enable voice input When you enter text, tap . If you have selected more than one writing language, touch and hold the input language key instead, for example, . Mark the Google voice typing key checkbox, read the information carefully, then tap OK to confirm.

To set a language for voice input, tap Language, then select the language you want to use. To automatically insert the most likely word suggestion, mark the Use best choice checkbox. 1 2 3 4 To enter text using voice input When you enter text, make sure that the voice input function is enabled and that you have a working data connection. When appears on your on-screen keyboard or Phonepad, tap it. When the appears, touch and hold it. An arrow input language key, for example, appears. Move the arrow until it points to the microphone, then release your finger.

When Speak now appears on your screen, speak to enter text. When the Use best choice function is activated, the most likely word suggestion appears underlined. If the word is not correct, tap once to delete it, then start again.

When the Use best choice function is not activated, the search results appear in a list. Select the word you want. To access XperiaTM keyboard settings when voice input is enabled When appears on your on-screen keyboard or Phonepad, touch and hold it, then select Keyboard settings. When the input language key, for example, appears on your on-screen keyboard or Phonepad, touch and hold it. an arrow appears.

Move the arrow until it points to , then release your finger. Stroke input Pinyin input Input methods may be different when you select Simplified Chinese as the phone language. General instructions Your phone has a function to speed up the entry of Chinese characters. Whenever you enter a stroke or a Pinyin letter, a candidate row of the most frequently used characters containing that stroke or relating to that letter appears at the bottom of the screen. Stroke input A Chinese character is built up of strokes.

There are more than 30 basic strokes, which are grouped into 5 stroke categories. Components The basic building units of Chinese characters are components that are made up of strokes. After entering the first two strokes of the desired character, the component and character candidates that started with that stroke are displayed in the candidate row. Using components is a fast method for entering complex characters. Pinyin input Select the required Pinyin letters, and the phone will make various proposals on the screen, according to the pronunciation rules of Mandarin. Customising your phone Adapt the phone to your needs by adjusting, for example, your personal ringtone, phone language and your Privacy settings. Adjusting the volume You can adjust the ringtone volume for phone calls and notifications as well as for music and video playback. To adjust the ring volume with the volume key Press the volume key up or down. To adjust the media playing volume with the volume key When playing music or watching video, press the volume key up or down. 1 2 3 4 1 2 3 To set the phone to silent and vibrate mode From the Home screen, tap .

To enhance the speaker loudness From the Home screen, tap . Time and date You can change the time and date in your phone. 1 2 3 4 5 6 1 2 3 4 5 6 7 8 1 2 3 4 5 1 2 3 To set the date manually From the Home screen, tap . To set the time manually From your Home screen, tap . Scroll up or down to adjust the hour and minute. To set the time zone From the Home screen, tap . To set the date format From your Home screen, tap . Ringtone settings 1 2 3 4 1 2 3 To set a phone ringtone From your Home screen, tap . To enable touch tones From your Home screen, tap . find and tap Settings > Sound.

Mark the Audible touch tones and Audible selection checkboxes. Screen settings 1 2 3 4 To adjust the screen brightness From your Home screen, tap . find and tap Settings > Display > Brightness. Drag the slider to adjust the brightness. tap OK.

The brightness level affects your battery performance. For tips on how to improve battery performance, see Improving battery performance on page 14. 1 2 3 To set the screen to vibrate From your Home screen, tap . The screen now vibrates when you tap soft keys and certain applications. To adjust the idle time before the screen turns off From your Home screen, tap .

To turn off the screen quickly, briefly press the power key . 1 2 3 1 2 3 To keep the screen on while charging the phone From the Home screen, tap . find and tap Settings > Applications > Development. Mark the Stay awake check box. Phone language You can select a language to use in your phone. 1 2 3 4 To change the phone language From your Home screen, tap . If you choose the wrong language and cannot read the menu texts, find and tap the Settings icon . Then select the entry beside , and select the first entry in the following menu. You can then select the language you want. Airplane mode In Airplane mode, your phone's network and radio transceivers are turned off to prevent disturbance to sensitive equipment.

However, you can still play games, listen to music, 30 This is an Internet version of this publication. Print only for private use. Watch videos and other content, as long as all this content is saved on your memory card or internal storage. You can also be notified by alarms, if alarms are activated. turning on Airplane mode reduces battery consumption. 1 2 3 To turn on Airplane mode From your Home screen, tap . You can also select Airplane mode from the Phone options menu. To access the Phone options menu, press and hold the power key . Memory You can save content to a memory card, to your phone's internal storage and to the phone memory. Music, video clips and photos are saved to the internal storage or the memory card while applications, contacts and messages are saved to the phone memory.

You can move some applications from the phone memory to the internal storage. 1 2 3 4 To move an application to the phone's internal storage From your Home screen, tap . find and tap Settings > Applications > Manage applications. Select the application that you want to move to the internal storage. tap Move to internal storage.

It is not possible to move some applications from the phone memory to the internal storage. Memory card You may have to purchase a memory card separately. Your phone supports a microSDTM memory card, which is used for media content. This type of card can also be used as a portable memory card with other compatible devices. Safely removing the memory card You can safely remove the memory card from your phone any time when the phone is turned off.

If you want to remove the memory card when your phone is on, you must first unmount the memory card before you physically remove it from the phone. This can prevent damaging the memory card or losing data stored on the memory card. 1 2 To unmount the memory card From your Home screen, tap . find and tap Settings > Storage > Unmount SD card. Formatting the memory card You can format the memory card in your phone, for example, to free up memory. This means that you erase all data on the card. All content on the memory card gets erased when you format it. Make sure you make backups of everything you want to save before formatting the memory card. To back up your content, you can copy it to your computer. For more information, refer to the chapter Connecting your phone to a computer on page 121.

1 2 3 To format the memory card From your Home screen, tap . find and tap Settings > Storage > Unmount SD card. After you have unmounted the memory card, tap Erase SD card. Using a headset with your phone Use the accessories provided with your phone, or other compatible accessories, for optimal performance. 1 2 3 To use a headset Connect the headset to your phone. To answer a call, press the call handling key.

To end the call, press the call handling key. If a headset is not included with the phone, you may purchase one separately. If you are listening to music, the music stops when you receive a call and resumes when the call ends. Internet and messaging settings To send text and multimedia messages and to access the Internet, you must have a 2G/3G mobile data connection and the correct settings.

There are different ways to get these settings: · For most mobile phone networks and operators, Internet and messaging settings come preinstalled on your phone. You can then start using the Internet and send messages right away. In some cases you will get the option to download Internet and messaging settings the first time you turn on your phone. It is also possible to download these settings later from the Settings menu. You can manually add and change Internet and network settings in your phone at any time.

Contact your network operator for detailed information on your Internet and messaging settings. To view the current Access Point Name (APN) From the Home screen, tap . If you have several available connections, the active network connection will be indicated by a marked button to the right. Tap Name and enter the name of the network profile you want to create. tap APN and enter the access point name.

Enter all other information required by your network operator. press and tap Save . Contact your network operator for detailed information about your network settings. 1 2 3 4 To reset the default Internet settings From the Home screen, tap . None of the information gathered includes personal data. By default, the usage info sending option is not activated. But you can choose to activate it if you like. Using Data monitor Use the Data monitor to keep track of the amount of data your phone sends and receives. This application tracks the approximate data traffic over 2G/3G networks from a predefined start day. The values are reset monthly.

For example, if the start day is set to 15, the data traffic counter is reset on the 15th day of every month. The first time you start the Data monitor, the start day is set to 1. Get the Data monitor to alert you when the amount of transferred data reaches a certain limit. You can set limits separately for sent data, received data and total data. You can also activate the Data monitor as a widget on the Home screen. Data sent or received over Wi-Fi® or BluetoothTM connections is not tracked. 1 2 3 4 5 1 2 3 4 5 To set the Data monitor start day From your Home screen, tap . Adjust the start day by scrolling up and down. Tap the bell icon next to Sent data, Received data or Total data, depending on which alert you want to set. 1 2 3 4 To clear a Data monitor alert From your Home screen, tap .

find and tap Data monitor. Tap the bell icon next to Sent data, Received data or Total data, depending on the alert you want to remove. tap Reset. The alert limit is reset to zero and the alert is deactivated. Turning off data traffic You can disable all data connections over 2G/3G networks with your phone to avoid any unwanted data downloads and synchronisations.

Contact your network operator if you need detailed information about your subscription plan and data traffic costs. When data traffic is turned off, you can still use Wi-Fi® and BluetoothTM connections. you can also send and receive multimedia messages. 1 2 3 To turn off all data traffic From your Home screen, tap . Data roaming Depending on your network operator, it might be possible to allow mobile data connections via 2G/3G outside of your home network (roaming).

Please note that data transmission charges may apply. Contact your network operator for more information. Applications may sometimes use the Internet connection in your home network without any notification, for example, when sending search and synchronisation requests. Additional charges may apply for data roaming. You can't activate data roaming when data connections have been deactivated Network settings Your phone automatically switches between networks depending on available networks over different locations. Initially, your phone is configured to use the fastest mobile network mode available for data. But you can configure your phone manually to use only a slower 2G network mode for data, to extend the life of your battery between charges. You can also configure your phone to access a different set of network modes entirely, or to behave in special ways when roaming. 1 2 3 4 5 To select another network manually From the Home screen, tap . When a popup window appears, tap Manual.

select a network. If you select a network manually, your phone will not search for other networks, even if you move out of range of the manually selected network. Calling Emergency calls Your phone supports international emergency numbers, for example, 112 or 911. You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted, if you are within range of a network. 1 2 3 To make an emergency call From your Home screen, tap . find and Tap Phone. Enter the emergency number and tap Call. to delete a number , tap . You can make emergency calls when no SIM card is inserted or when outgoing calls are barred. 1 2 To make an emergency call while the SIM card is locked Tap Emergency call.

Enter the emergency number and tap Call. to delete a number , tap . Call handling You can make a call by manually dialling a phone number, by tapping a number saved in your phone's contact list, or by tapping the phone number in your call log view. When you make a call, your phone's main microphone works together with the second microphone to suppress noise and background sound. Do not cover the second microphone while you make a call.

1 2 3 To make a call by dialling From your Home screen, tap . find and tap Phone. Enter the number of the recipient and tap Call. To delete a number, tap To end a call Tap End call. 1 2 3 4 To make an international call From your Home screen, tap .

find and tap Phone. Touch and hold 0 until a "+" sign appears. Enter the country code, area code (without the first 0) and phone number, then tap Call. to answer a call · Drag to the right across the screen. If you are using regular headphones without a microphone, you have to remove the headphones from the headset connector to be able to answer the call. To decline a call to the left across the screen. To change the ear speaker volume during a call Press the volume key up or down. To turn on the loudspeaker during a call Tap . To mute the microphone during a call Tap . To activate the screen during a call · To enter numbers during a call During a call, tap .

To mute the ringtone for an incoming call When you receive the call, press the volume key.
