**Manual abstract:**

Getting started The instructions in this User guide, unless otherwise stated, are written on the basis that you access your phone's functions from the default Home screen. If you set Timescape™ or another application as your home screen, the instruction path may differ. Important information Please read the Important information leaflet before you use your mobile phone. Some of the services and features described in this User guide are not supported in all countries/ regions or by all networks and/or service providers in all areas. Without limitation, this applies to the GSM International Emergency Number 112. Please contact your network operator or service provider to determine availability of any specific service or feature and whether additional access or usage fees apply. User guide in the phone An extended User guide is available in your phone when the supplied memory card is inserted into your phone. The extended User guide and more information is also available at [www.sonyericsson.com/supprmat](http://www.sonyericsson.com/supprmat) between your phone, a computer or the Internet.

You can, for example: · · · Use a USB cable to connect your phone to a computer. You can then transfer content between the phone and the computer. See Connecting your phone to a computer on page 56 for more information. Use the Media Go™ application to transfer and handle music, pictures and videos on your phone and PC. See the Media Go™ section on page 57 for more information.

Use the Sony Ericsson sync application to synchronise contacts and bookmarks between your phone and the web. This way, you can access the content from any computer, wherever you are. See Sony Ericsson Sync on page 45 for more information. 8 This is an Internet version of this publication. © Print only for private use.

· Use the Google Sync™ application to synchronise your Gmail™, calendar and contacts with your phone. See Google Sync™ syncing service on page 46 for more information. 9 This is an Internet version of this publication. © Print only for private use. Getting to know your phone Phone overview 1 2 3 4 5 6 7 8 9 10 11 Connector for charger/USB cable 3.5 mm headset connector Power key/screen lock Light sensor Ear speaker Proximity sensor Notification LED Touch screen Back key Home key Menu key 9 10 11 1 2 3 4 5 6 7 8 12 13 14 15 16 Camera lens Volume key/zoom key Camera light Camera key Strap hole 12 13 14 15 16 Charging the battery The phone battery is partly charged when you buy the phone. 10 This is an Internet version of this publication. © Print only for private use. · · To charge the phone using the power adapter Connect the phone to a power outlet using the USB cable and the power adapter. To charge the phone using a computer Connect the phone to a USB port on a computer using the USB cable included in the phone kit.

Maximising battery performance You can use the following methods to improve your battery performance: · · · · Decrease the brightness of the screen.

Charge your phone often. The battery lasts longer if you charge it frequently. If you are in an area with no coverage, your phone repeatedly scans for available networks. This consumes power. If you cannot move to an area with better coverage, turn off your phone temporarily. Turn off 3G, Bluetooth™ wireless technology and the Wi-Fi™ connection when you do not need these functions. Do not cover the phone antenna when you are engaged in a call or when transferring data. The antenna is located at the back of phone Go to [www.sonyericsson.com/support](http://www.sonyericsson.com/support) to learn more about how to maximise the battery performance. Using the hardware keys 11 This is an Internet version of this publication. ©

Print only for private use. Menu Open a list of options available in the current screen or application Home · · Back · · Go to the Home screen from any application or screen Open the recently used applications window Go back to the previous screen Close the onscreen keyboard, a dialog box, an options menu, or the Notifications panel Home screen The Home screen is the starting point of your phone. You can personalise the Home screen by adding widgets, or by changing the wallpaper and the applications in the corners.

When you add more than one widget, the Home screen extends beyond the screen width. The corners on the Home screen are used to access applications or bookmarks quickly. You can add any application or bookmark to the corners. When you go to the Home screen, some applications may continue to run in the background. If you do not want applications to run in the background, you should exit each application you have opened before going to the Home screen. Widget is a part of an application on the Home screen. It displays important information from that application, for example the Sony Ericsson Timescape™ widget displays incoming messages and the Media widget allows you to start the music directly. · 1 2 1 2 3 1 2 3 To view the extended Home screen Drag your finger to the sides to view the entire Home screen. To add a Home screen item From the Home screen, press and tap Add. In the Add to Home screen menu, select the item you want to add. To move an item to an area of the extended Home screen Touch and hold an item on the Home screen until it magnifies and the phone vibrates. Drag the item to the left or right. Release the item. To delete a Home screen item appears at the bottom of the screen. Touch and hold the item until Drag the item to and hold until the bottom of the screen lights up.

Release the item. 12 This is an Internet version of this publication. © Print only for private use. 1 2 3 1 2 1 2 3 1 2 3 1 2 1 2 3 4 To add a folder to the Home screen From the Home screen, press . Tap Add > Folder. Select the folder type you want to add. To add items to a folder Touch and hold an application icon until it magnifies and the phone vibrates. Drag the application icon over to the folder. To rename a folder Tap the folder to open it. Touch and hold the folder's title bar to open the Rename folder dialog box.

Enter the Folder name and tap OK. To add widgets to the Home screen Touch and hold on the Home screen until the Add to Home screen menu appears. Tap Widgets. Select an option. To create a shortcut from the applications screen From the Home screen, tap the applications bar.

Touch and hold an application until it appears on the Home screen. To change the Home screen wallpaper From the Home screen, press . Tap Wallpaper. Tap Pictures or Wallpaper gallery. Tap Save or Set wallpaper.

Creatouch™ application Mix different backgrounds, colors and shapes to create your own unique wallpapers. You can also create free-hand drawings, and add text or photos. Share your self-designed wallpapers with friends by uploading them to Facebook™ and Picasa™. · To open Creatouch™ From the Home screen, tap the applications bar, then tap Creatouch™.

[ERICSSON XPERIA X10 user guide](http://yourpdfguides.com/dref/2738376)

<http://yourpdfguides.com/dref/2738376>

Tap Settings > Sound & display > Notification ringtone.

Select a ringtone and tap OK. To set the vibrating alert From the Home screen, tap the applications bar. Tap Settings > Sound & display. Mark the Phone vibrate check box. Adjusting the volume You can adjust the ringtone volume for phone calls and notifications as well as for music and video playback. · · 1 2 To adjust the ringer volume with the volume key Press the volume key up or down. To adjust the media playing volume with the volume key When playing music or watching video, press the volume key up or down. To set the phone to silent mode Press and hold on the top of the phone. Tap Silent mode. Screen settings 1 2 3 4 To adjust the screen brightness From the Home screen, tap the applications bar.

Tap Settings > Sound & display > Brightness. To decrease the screen brightness, drag the slider to the left. To increase the screen brightness, drag the slider to the right. Tap OK. 23 This is an Internet version of this publication.

© Print only for private use. 1 2 3 To adjust the idle time before the screen turns off From the Home screen, tap the applications bar. Tap Settings > Sound & display > Screen timeout. Select an option. To turn off the screen quickly, press .

1 2 3 To keep the screen on while charging the phone From the Home screen, tap the applications bar. Tap Settings > Applications > Development. Mark the Stay awake check box. Phone language You can select a language to use in your phone. 1 2 3 To change the phone language From the Home screen, tap the applications bar. Tap Settings > Locale & text > Select locale. Select an option. If you choose the wrong language and cannot read the menu texts, go to [www.sonyericsson.com/support](http://www.sonyericsson.com/support) for help.

Airplane mode In Airplane mode, no radio transmissions are made by the phone. 1 2 3 To turn on Airplane mode From the Home screen, tap the applications bar. Tap Settings > Wireless controls. Mark the Airplane mode check box. SIM card The SIM (Subscriber Identity Module) card, which you get from your network operator, contains information about your subscription. Always turn off your phone and detach the charger before you insert or remove the SIM card. You can save contacts on the SIM card before you remove it from your phone. PIN You may need a PIN (Personal Identification Number) to activate the services and functions in your phone. Each PIN digit appears as \*, unless it starts with emergency number digits, for example, 112 or 911. You can call an emergency number without entering a PIN.

Memory You can save content on a memory card, in the phone memory and on the SIM card. Music, video clips and photos are saved on the memory card while applications, contacts and messages are saved in the phone memory. You can export and import contacts and messages to the memory card for backup purposes. Contacts can also be saved on the SIM card. Memory card You may have to purchase a memory card separately.

24 This is an Internet version of this publication. © Print only for private use. Your phone supports a microSDTM memory card, which is used for media content. This type of card can also be used as a portable memory card with other compatible devices. Without a memory card you cannot use the camera, nor can you play or download music files and video clips.

Internet and messaging settings For most mobile phone networks and operators, settings for messaging and Internet will be preinstalled in your phone when you buy it. In some cases you will get to download the settings to your phone. This is done in one step the first time you turn on the phone with a SIM card inserted, by simply accepting the download of the settings when the phone starts up. It is also possible to automatically download or manually add and change Internet and network settings in your phone at any time. If you have accidentally removed the default access point name (APN), you can reset it any time.

Please contact your network operator for any other information on your subscription settings. 1 2 3 1 2 3 4 To download Internet and messaging settings From the Home screen, tap the applications bar. Tap Settings > Wireless controls > Mobile networks. Tap Auto Internet settings. To reset the default Internet settings From the Home screen, tap the applications bar.

Tap Settings > Wireless controls > Mobile networks > Access Point Names. Press . Tap Reset to default . To turn off the data connection From the Home screen, tap the applications bar. Tap Settings > Wireless controls > Mobile networks. Unmark the MMS & Data checkbox. To see the current network connection From the Home screen, tap the applications bar. Tap Settings > Wireless controls > Mobile networks. Tap Access Point Names. If you have several available connections, a marked radio button to the right indicates the active network connection.

1 2 3 1 2 3 1 2 3 4 5 6 7 8 To configure Internet settings manually From the Home screen, tap the applications bar. Tap Settings > Wireless controls > Mobile networks > Access Point Names. Press . Tap New APN. Tap Name and enter the name of the network profile you want to create.

Tap APN and enter the access point name. Tap and enter all other information required by your network operator. Press and tap Save. Contact your network operator for detailed information about your network settings. 25 This is an Internet version of this publication.

© Print only for private use. Data roaming Depending on your network operator, it might be possible to allow mobile data connections via 2G/3G outside of your home network (roaming). Please note that data transmission charges may apply. Contact your network operator for more information. Applications may sometimes use the Internet connection in your home network without any notification, for example, when sending search and synchronisation requests. 1 2 3

To activate data roaming From the Home screen, tap the applications bar. Tap Settings > Wireless controls > Mobile networks. Mark the Data roaming checkbox. Network settings Your phone automatically switches between networks depending on availability. Some network operators allow you to switch networks manually, for example, if you are travelling abroad and want to use a particular network.

To save battery, you can limit your phone to only use GSM networks. Data downloads and uploads will however be slower. If you are going to download or upload large amounts of data, we recommend that you change to another network mode or connect to the Internet through a Wi-Fi™ network. 1 2 3 4 1 2 3 4

To limit your phone to use GSM networks only From the Home screen, tap the applications bar. Tap Settings > Wireless controls > Mobile networks . Tap Network Mode. Select GSM only. To select another network manually From the Home screen, tap the applications bar. Tap Settings > Wireless controls > Mobile networks > Network operators.

[You're reading an excerpt. Click here to read official SONY ERICSSON XPERIA X10 user guide](http://yourpdfguides.com/dref/2738376)  
<http://yourpdfguides.com/dref/2738376>

Tap Select manually.

Tap a network name. If you select a network manually, your phone will not search for another network, even if you move out of range of the manually selected network. Some networks may not be allowed by your network operator. If so, this is indicated by a symbol next to the network name in the list of networks. 1 2 3 To activate automatic network selection From the Home screen, tap the applications bar.

Tap Settings > Wireless controls > Mobile networks > Network operators. Tap Select automatically. 26 This is an Internet version of this publication. © Print only for private use. Calling Emergency calls Your phone supports international emergency numbers, for example, 112 or 911.

You can normally use these numbers to make emergency calls in any country, with or without the SIM card inserted, if you are within range of a network. 1 2 To make an emergency call From the Home screen, tap Dialer. Enter the emergency number and tap Call. To delete a number, tap You can make an emergency call without a SIM card inserted. . 1 2 To make an emergency call while the SIM card is locked Tap Emergency call. Enter the emergency number and tap Call. To delete a number, tap . Call handling 1 2 To make a call From the Home screen, tap Dialer. Enter the number of the recipient and tap Call.

To delete a number, tap To end a call Tap End call. To make an international call From Home screen, tap Dialer. Touch and hold down 0 until a "+" sign appears. Enter the country code, area code (without the first 0) and phone number, then tap Call. To answer a call If the screen is unlocked, tap Answer to answer the call. If the screen is locked, unlock it to answer the call. If you are using regular headphones without a microphone, you have to remove the headphones from the headset connector to be able to answer the call. . 1 2 3 . . . 1 2 1 2 To decline a call Tap Decline. To change the ear speaker volume during a call Press the volume key up or down.

To turn on the loudspeaker during a call Press . Tap Speaker. To mute the microphone during a call Press . Tap Mute. 27 This is an Internet version of this publication.

© Print only for private use. . To activate the screen during a call Press . Do not press , it will end your call. 1 2 . To enter numbers during a call During a call, drag the icon (at the bottom of the screen) upwards. A keypad appears.

Enter numbers. To mute the ringtone for an incoming call When you receive the call, press the volume key. Recent calls In the call log, you can view recently missed To view missed calls When you have missed calls, downwards. Tap Missed call . , received and dialled calls. 1 2 1 2 appears in the status bar. Drag the status bar To call a number from the call log From the Home screen, tap Dialer > Call log. If you want to call a number directly, tap next to the number. If you want to edit a number before calling, touch and hold the desired number, then select the desired option. To add a number from the call log to your contacts From the Home screen, tap Dialer > Call log.

Tap and hold the number, then tap Add to contacts. Tap the desired contact, or tap Create new contact. Edit the contact details and tap Save. 1 2 3 4

Voicemail If your subscription includes an answering service, callers can leave a voicemail message when you cannot answer a call. Usually, the voicemail number is saved on the SIM card. If not, contact your service provider to get your voicemail number. You can then enter the number manually. 1 2 3 1 2 To enter your voicemail number From the Home screen, tap Settings > Call settings > Voicemail. Enter your voicemail number. Tap OK.

To call your voicemail service From the Home screen, tap Dialer. Touch and hold down 1. More than one call You can handle multiple calls at the same time by switching between the calls. You can turn on a notification to sound if you receive another call during an ongoing call (call waiting). If you have activated call waiting, you will be notified by a beep if you receive another call.

1 2 3 To activate or deactivate call waiting From the Home screen, tap the applications bar. Tap Settings > Call settings > GSM call settings. To activate or deactivate call waiting, tap Call waiting. 28 This is an Internet version of this publication. © Print only for private use.

. . . 1 2 3 To reject a second call When you hear repeated beeps during a call, tap Busy. To answer a second call and end the ongoing call When you hear repeated beeps during a call, tap End call & answer. To answer a second call and put the ongoing call on hold When you hear repeated beeps during a call, tap Answer. To make a second call During an ongoing call, press , then tap . Enter the number of the recipient and tap Call. If the recipient answers, the first call is put on hold. The same procedure applies to subsequent calls. . . To switch between multiple calls To switch to the next call and put the current call on hold, tap Swap calls. To end the ongoing call and return to the next call on hold Tap End call. Conference calls With a conference or multiparty call, you can have a joint conversation with two or more persons.

1 2 1 2 3 To start a conference call From the Home screen, tap Dialer. Dial the number to the first participant and tap Call. To add another participant to a conference call During the call, press , then tap . Dial the number to the second participant and tap Call. When the second participant has answered, press , then tap To have a private conversation with a participant . During the call, press , then tap Tap next to the desired participant. To return to the conference call, press , then tap . To release a participant . During the call, press , then tap Tap next to the desired participant. To end a conference call During the call, tap End call.

. 1 2 3 1 2 . Call settings Forwarding calls You can forward calls, for example, to another phone number, or to an answering service. 29 This is an Internet version of this publication. © Print only for private use. 1 2 3 4 1 2 3 4 To forward calls From the Home screen, tap the applications bar, then tap Settings. Tap Call settings > GSM call settings > Call forwarding. Select an option. Enter the number you want to forward the calls to and tap Enable. To turn off call forwarding From the Home screen, tap the applications bar, then tap Settings. Tap Call settings > GSM call settings > Call forwarding.

Select an option. Tap Disable. Showing or hiding your phone number You can select to show or hide the phone number that is displayed on call recipients' devices when you call them. 1 2 3 To show or hide your phone number From the Home screen, tap the applications bar, then tap Settings. Tap Call settings > GSM call settings > Caller ID. Select an option. Fixed Dialing Numbers If you have received a PIN2 code from your service provider, you can use a list of Fixed Dialing Numbers (FDN) to restrict outgoing and incoming calls.

Appears if you have linked a Twitter account to the contact All Facebook status updates for the contact.

Appears if you have linked a Facebook account to the contact Backing up contacts You can use the memory card and SIM card for backing up contacts. This is useful, for example, when you want to transfer the contact information to another phone. You can also use a synchronisation service for backing up your contacts. For more information, see Synchronising and handling content on page 8. 1 2 3 1 2 3 4 1 2 3 4 5 To back up all contacts on the memory card From the Home screen, tap the applications bar, then tap Phonebook.

Press , then tap More > Back up contacts > Memory card. Tap OK. To import contacts from the memory card From the Home screen, tap the applications bar, then tap Phonebook. Press , then tap More > Import contacts > Memory card. A list appears showing different backup batches of all phone contacts, with the corresponding dates for when they were created.

Select the desired backup. Select Add contacts or Replace all contacts. To back up names and numbers on the SIM card From the Home screen, tap the applications bar, then tap Phonebook. Press , then tap More > Back up contacts > SIM card. Mark the contacts you want to copy, or tap Mark all. Tap Back up. Select Add contacts or Replace all contacts. If you select Replace all contacts, all existing SIM card information is replaced. When you copy a contact to the SIM card, only the contact name and one number is saved. This is due to limited memory on a SIM card.
