To turn the optical joystick on or off 1 Tap > Settings > the System tab > Optical Joystick. 2 Mark or unmark the Enable Optical Joystick check box. To scroll instead of highlight 1 Tap > Settings > the System tab > Optical Joystick. 2 Mark the Enable the scroll function in Internet Explorer, Messaging and Contacts check box. Closing an application If you press application. To change the X button functionality 1 Tap > Settings > the System tab > Task Manager > the Button tab.

2 Mark the check box if you want to End programs by tapping and holding "X". in any application window it closes the Illuminations Your phone has four lights that you can set to illuminate and notify you of events. Status icons You can tap an icon in the status bar to get more information or to start an application. Getting started This is an Internet version of this publication. © Print only for private use.

5 Instant message MMS received SMS received E-mail received Panel (panel selected) Panel (button pressed) Alarm/Calendar Low battery Voice mail Missed call Charging/Charge pending To set illuminations · Tap > Settings > the System tab > Illumination. To preview an illumination 1 Tap > Settings > the System tab > Illumination. 2 Select an event. 3 Tap Preview On. Do not charge the phone when previewing an illumination.

When the charge illumination is on, the preview function does not work. To change the illumination time 1 Tap > Settings > the Personal tab > Sounds & Notifications > the Notifications tab. 2 In the Event box, select an event, for example Phone: Missed call. 3 Select Flash light for. 4 In the Flash light for box, select how long you want the light to flash for. Default illumination times are set to 5 minutes for the following events: · Instant Messaging · Messaging: New MMS · Messaging: New SMS · Phone: Missed call · Phone: Voice mail · Reminders Illumination pattern All the illumination lights flash at the same time, except when the panel button is pressed and only the bottom left light flashes. Event Charging Low battery Panel (button pressed) Panel (panel selected) Missed call Voicemail Alarm/Calendar E-mail received SMS received Instant message Incoming call MMS received Boot up Color Red Pattern One short flash, repeated Mixed One long flash, repeated Programs The following programs can be found in your phone: Mixed One long flash, once Mixed One long flash, once Mixed Two short flashes, repeated Mixed Three short flashes, repeated Violet Violet Blue Blue Green Blue Three short flashes, repeated One short flash, repeated One short flash, repeated One short flash, repeated Three short flashes, repeated One short flash, repeated Programs in the Start Menu Icon Description Office Mobile Use the complete suite of Microsoft® Office applications for your phone. Excel® Mobile Create new workbooks or view and edit Excel workbooks. OneNote® Mobile - Make notes and gather information, all in one place. PowerPoint® Mobile View PowerPoint slides and presentations.

Word Mobile Create, view, and edit Word documents. Mixed One long flash, once Illumination priority A higher priority event overrides a lower priority event. For example, incoming call illumination appears when receiving an incoming call (higher priority), even if the battery is being charged (lower priority). After the higher priority event expires, an illumination for a lower priority event may appear again. For example, charging illumination appears after the incoming call is answered, if charging is still going on and no other priority event (for example e-mail received), has occurred. Events in illumination priority Start (boot up) Incoming call Calendar Keep track of your appointments and create meeting requests. Contacts Keep track of your friends and colleagues. Internet Explorer Mobile Browse Web and WAP sites as well as download new programs and files from the Internet. Messaging Send and receive e-mails, text messages and picture message Set the phone clock to the date and time of your locale or to a visiting time zone when you're traveling. Alarms can also be set at specified days and times of a week.

Customer feedback Make Windows® Mobile better by participating in the Customer Experience Improvement Program. Device Information See information about the firmware version, hardware, identity and the Customer Info. Encryption Allow files on your memory card to be encrypted. Encrypted files are readable only in your phone. Error Reporting Enable or disable the phone error reporting function.

When this function is enabled and a program error occurs, technical data about the state of the program and your phone is logged in a text file and delivered to Microsoft technical support if you choose to send it. External GPS Set the appropriate GPS communication ports, if required. You may need to do this when there are programs in your phone that access GPS data or you have connected a GPS receiver to your phone. See Help for details. Illumination Enable or disable illumination for events such as Charging, Low Battery, Missed call, Voicemail, Alarm/Calendar, E-mail Received, Incoming Call and more.

Key Lock Lock the keys on your phone except for the POWER key when the phone is in Sleep mode. This Getting started 7 Settings You can adjust the phone settings to suit the way you want. This is an Internet version of this publication. © Print only for private use. ensures you do not switch the phone on by accident and consume unnecessary power. Managed Programs See the installation history for programs managed in your phone. Memory Check the phone memory allocation status and memory card information. You can also stop currently running programs. Microphone AGC Adjust the volume of your voice automatically when you are recording. Optical Joystick Enable or disable the optical joystick, enable cursor function on Internet Explorer, Messaging and Contacts.

Also set the sensitivity of the screen. Power Check the remaining battery power. You can also set the timeout for turning off the display (switching phone to Sleep mode) to conserve battery power. Regional Settings Set the regional configuration to use, including the format for displaying numbers, currency, date, and time in your phone.

15 Setting up your phone Basic settings Owner information Having owner information displayed on the Today screen makes it easier for someone to return your phone to you if it is lost.

To enter owner information 1 Tap >Settings > the Personal tab > Owner Information. 2 On the Identification tab, enter your personal information. If you don't see owner information on the Today screen, tap > Settings > the Personal tab > Today. On the Items tab, mark the Owner Info check box and select ok. To set options for displaying appointments on the Today screen 1 Tap > Settings > the Personal tab > Today. 2 Tap the Items tab. 3 Select Calendar and tap Options....

4 Do any of the following: · Select Next appointment to show only the next appointment in your schedule, or Upcoming appointments to show multiple appointments. · Unmark the Display all day events check box if you do not want to display all-day events. To set options for displaying tasks on the Today screen 1 Tap > Settings > the Personal tab > Today. 2 Tap the Items tab. 3 Select Tasks and tap Options.
... 4 Do any of the following: · Under Display number of, mark check boxes for the type of tasks you want to appear on the Today screen. · In the Category list, select whether to display only tasks assigned to a specific category or to display all tasks.

To display owner information when the phone is turned on 1 Tap >Settings > the Personal tab > Owner Information. 2 On the Options tab, mark the Identification information check box. 3 If you want additional text displayed, tap the Notes tab and enter the text, for example, Reward if found. 4 On the Options tab, mark the Notes check box then tap ok. Customize the Start menu You can choose which items appear in the Start menu. To customize the Start menu 1 Tap > Settings > the Personal tab > Menus. 2 Mark the check boxes of the items you want to appear in the Start menu. You can select up to seven items. Time and date To set time and date · Tap > Settings > the System tab > Clock & Alarms > the Time tab. To set time and date for a different location 1 Tap > Settings > System tab > Clock & Alarms > Time tab.

2 Tap Visiting. 3 Select the correct time zone and change the time or date. Customizing phone settings and services You can customize phone settings, such as the ring type and ring tone to be used for incoming calls, and the keypad tone to be used when entering phone numbers. You can also set up your phone to use phone services such as Call Waiting, Call Forwarding and more. To access phone settings and services · Tap > Settings > the Personal tab > Phone.

Regional settings The style in which numbers, currency, dates, and times are displayed is specified in regional settings. To change regional settings 1 Tap >Settings > the System tab > Regional Settings. 2 On the Region tab, select your region from the list. 3 To customize settings further, tap the appropriate tabs and select the desired options. Changing region does not change the Operating System language of your phone.

The region you select determines which options will be available on the other tabs. Ringer settings To change ring type and ring tone for an incoming call 1 Tap > Settings > the Personal tab > Sounds & Notifications > the Notifications tab. 2 Select Ring type. 3 Select Ring tone. Keyboard tone You can change the tone you hear when entering a phone number on the keyboard.

If set to Long tones, the tone is heard continuously for as long as the number on the keyboard is pressed. Use this setting if you are having trouble accomplishing tasks that rely on tones from your phone such as accessing messages from an answering machine. If set to Short tones, the tone is heard only for one or two seconds. If set to Off, no tone is heard. To set keyboard tone 1 Tap > Settings > the Personal tab > the Phone > Phone tab.

2 In the Keypad list, tap the option you want. Personalizing Personalizing the Today Screen The Today screen shows your upcoming appointments, active tasks, and information about incoming messages. You can customize what to display on the Today screen. To customize the Today screen 1 Tap > Settings > the Personal tab > Today. 2 On the Appearance tab, select the desired theme for the background of the Today screen. 3 On the Items tab, select the items you want to appear on the Today screen. To change the order of items displayed on the Today screen, tap the item, and tap Move Up or Move Down. Phone services Your phone can directly link to the mobile phone network, and allow you to access and change the settings of various phone services.. Phone services may include Call Forwarding, Call Waiting, Voicemail and more.

You can contact your wireless service provider to find out about the availability of phone services for your phone. To use a custom background image 1 Tap > Settings > the Personal tab > Today. 2 Mark the Use this picture as the background check box, and tap Browse to view a list of your picture files. 3 Tap the file name of the picture you want to use. 4 Tap ok. 16 Setting up your phone This is an Internet version of this publication. © Print only for private use. To access and change settings of phone services 1 Tap > Settings > the Personal tab > Phone > the Services tab. 2 Select the service you want to use, then tap Get Settings..

.. 3 Choose your desired options, then tap ok. If Encrypt files placed on storage cards is or was enabled before, then backup all files from the storage card before using Clear Storage, hard reset or updating the ROM system software. Otherwise you will no longer be able to access the encrypted files on the storage card.

Use ActiveSync or Windows Mobile Device Center to transfer files between your storage card and computer. After the procedure, copy your files back to the storage card. Networks You can view which mobile phone networks are available and arrange them in the order that you want your phone to access them. For example, if your first preferred network is unavailable, your phone will try to access your second preferred network. To view available networks 1 Tap > Settings > the Personal tab > Phone > the Network tab.

2 Under Network selection, select Manual. The list of available networks is then displayed. To set preferred networks 1 Tap > Settings > the Personal tab > Phone > the Network tab. 2 Tap Set Networks and follow the instructions on the screen to arrange the networks according to your preference. 3 After arranging the networks in the preferred order, tap ok to return to the Network tab. 4 In the Network selection list, select Automatic. 5 Tap ok. Other settings Phone name The phone name is used to identify your phone in the following situations: · Synchronizing with a computer · Connecting to a network · Restoring information from a backup If you synchronize multiple phones with the same computer, each phone must have a unique name.

[ERICSSON XPERIA X1 user guide](http://yourpdfguides.com/dref/959869)

<http://yourpdfguides.com/dref/959869>

To change the phone name 1 Tap > Settings > the System tab > About. 2 Tap the Device ID tab.

3 Enter a name. The phone name must begin with a letter, consist of letters from A to Z, numbers from 0 to 9, and cannot contain spaces. Use the underscore character to separate words. Protecting the phone You can protect the phone from unauthorized or accidental use by activating locks. To activate the SIM card lock 1 Tap > Settings > the Personal tab > Phone > the PIN/ PIN2 tab. 2 Mark the Require PIN when phone is used check box. 3 Tap ok. Your PIN is supplied by your network operator. Display settings To increase or decrease the size of text on the screen 1 Tap > Settings > the System tab > Screen > the Text Size tab. 2 Move the slider to increase or decrease the text size.

Button settings Your phone might come with programs already assigned to hardware buttons. You can customize these buttons to open the programs you use most, or to perform certain shortcuts. To reassign programs or shortcuts to program buttons 1 Tap > Settings > the Personal tab > Buttons. 2 A list of buttons and their current assignments are displayed on the Program Buttons tab. 3 Tap the button you want to reassign.

To help you identify the buttons, there are numbers and icons representing the original function of the button. 4 In the Assign a program box, tap the program or shortcut you want to assign. 5 Tap ok. To reassign a program button for switching between Portrait and Landscape modes 1 Tap > Settings > the Personal tab > Buttons. 2 On the Program Buttons tab, in the Select a button box, tap the button you want to reassign, for example, Left key.

3 In the Assign a program box, select Rotate Screen. 4 Tap ok. You can now use your left program button (hardware button) to switch between Landscape and Portrait modes. Note that you cannot use it to control corresponding software keys any more. To activate the phone lock 1 Tap > Settings > the Personal tab > Lock. 2 Mark the Prompt if device is unused for check box, and tap a time. 3 Select Password type, confirm the password and tap ok. To use the key lock 1 Press the power button to turn off the screen temporarily and switch the phone to sleep mode. 2 To wake up the phone, press the power button. The phone is also awakened by opening the keyboard, or by receiving a call or a message.

Alternatively, you can lock the keys by pressing and holding . To unlock the keys, tap Unlock. IMEI number Keep a copy of your IMEI (International Mobile Equipment Identity) number in case your phone is stolen. To view your IMEI number 1 Press . 2 Tap . Word completion options Word completion helps you enter text faster by suggesting words as you enter letters using the hardware keyboard or input methods. You can set the number of suggested words to display, when to show the word list and more. To set Word completion on 1 Tap > Settings > the Personal tab > Input > the Word Completion tab. 2 Make sure the Suggest words when entering text check box is marked. To encrypt data on your storage card 1 On the Today screen, tap > Settings > the System tab > Encryption.

2 Mark the Encrypt files placed on a storage card check box. . Encrypted files can be read only on the phone that encrypted them. Encrypted files are opened just like other files, provided you are using the phone that encrypted them. There is no separate step for you to take to read these files. Setting up your phone This is an Internet version of this publication.

© Print only for private use. 17 3 By default, the suggested word list appears whenever you enter a space. To make the word list appear after letters are entered, select the number of letters that you want to be entered before displaying the word list. 4 The suggested word list shows up to four words by default. You can change the number of words to display in the suggested list.

5 Make sure the Enable Auto Correct check box is marked if you want mistyped words to be corrected automatically. The word database learns and adds more words as you enter new words during text entry. To delete the added words and reset the database back to the default, tap Clear Stored Entries. Synchronizing Synchronizing your data is a way to always have your information up to date and carry it with you in your phone, wherever you go. You can synchronize the following types of information between a computer and your phone: · Microsoft® Outlook® information, such as Outlook e-mail, contacts, calendar, tasks and notes · Media, such as photos, videos and music · Favorites, which is Web page bookmarks under Mobile Favorites · Files, such as Microsoft® Office documents, pdf files and more Alarms and notifications To set an alarm 1 Tap > Settings > the System tab > Clock & Alarms > the Alarms tab. 2 Tap <Description> and enter a name for the alarm. 3 Tap the day of the week for the alarm. You can select multiple days by tapping each desired day. 4 Tap the time to open a clock and set the time for the alarm. 5 Tap the alarm icon to specify the type of alarm you want.

You can choose a flashing light, a single sound, a repeating sound, or vibration. 6 If you choose to play a sound, tap the list next to the Play sound check box and tap the sound you want. To choose how to be notified about events or actions 1 Tap > Settings > the Personal tab > Sounds & Notifications. 2 On the Sounds tab, choose how you want to be notified by marking the appropriate check boxes. 3 On the Notifications tab, in Event, tap an event name and choose how you want to be notified by marking the appropriate check boxes. You can choose from several options, such as a special sound, a message, or a flashing light. Before you can synchronize Before you can synchronize, you need to install and set up synchronization software on your computer. If you are using Windows XP you should first install ActiveSync, see To install ActiveSync before you can set up synchronization. If you are using Windows Vista you may not need to install any software but you need to set up synchronization. For more information on setting up synchronization, see To set up synchronization on Windows XP and To set up synchronization on Windows Vista.

To install ActiveSync 1 Insert the software CD into the disc drive on the computer. 2 ActiveSync is available in English and several other languages. Select the desired language and click Next. 3 Click Setup and Installation. 4 Select the ActiveSync check box and click Install.

5 Read the license terms and click Accept. 6 When installation is complete, click Done. 7 Finish the installation by clicking Close. Ways to synchronize After you have installed the synchronization software in a computer, you can synchronize your phone with your computer using one of the following methods: · USB connection - When you connect the USB cable between your phone and a computer, the synchronization process starts automatically.

<http://yourpdfguides.com/dref/959869>

· Bluetooth connection - You must first set up a Bluetooth partnership between your phone and the computer before you can synchronize information between them.

For more information about setting up a Bluetooth partnership, see Bluetooth™ partnership. For information about synchronizing through Bluetooth, see To synchronize using a Bluetooth link. · Wireless connection - Synchronize with an Exchange Server using ActiveSync or Windows Mobile Device Center. Try to synchronize frequently in order to keep information up-to-date in both your phone and the computer. Setting up synchronization · If the computer uses Windows XP® or other compatible Windows operating system, you should use Microsoft ActiveSync® 4.5 or later. You can find Microsoft ActiveSync® on the CD that comes with the phone. · If the computer uses Windows Vista®, you should use Windows® Mobile Device Center, which is part of Windows Vista. To set up synchronization on Windows XP 1 Install Microsoft ActiveSync® on the computer from the CD that comes with the phone. 2 Connect the phone to the computer using the USB cable that comes with the phone.

The Synchronization Setup Wizard automatically starts and guides you to create a synchronization partnership. 3 Click Next on the computer. 4 To synchronize your phone with the computer, mark the Synchronize directly with a server running Microsoft Exchange check box and click Next. 5 Select the information types that you want to synchronize, then click Next. 6 Click Finish. 18 Synchronizing This is an Internet version of this publication. © Print only for private use. To set up synchronization on Windows Vista 1 Connect the phone to the computer using the USB cable that comes with the phone. 2 The Windows® Mobile Device Center automatically starts. Click Set up your device.

3 Select the information types that you want to synchronize. 4 Type a name for the phone, and click Set Up. 5 Mark the Send/receive when I click Send. 6 Tap Adjust peak times to fit your schedule to set the days and hours that make up your peak and off-peak times. To disable all scheduled synchronization, set the values in the Peak times box and the Off-peak times box to Manually.

Changing which information is synchronized You can change the information types and the amount of information to synchronize for each type either on your phone or a computer. Follow the steps below to change synchronization settings on your phone. Before changing synchronization settings on your phone it must be disconnected from the computer. Starting synchronization To start synchronization from ActiveSync® on your computer using a USB cable · Connect the phone to the computer using the USB cable that comes with the phone. ActiveSync® automatically opens and the synchronization starts.

To start synchronization from the phone 1 Connect the phone to the computer using the USB cable that comes with the phone. 2 Phone: Tap > Programs > ActiveSync. 3 Phone: Tap Sync. To start synchronization from Windows® Mobile Device Center on a computer 1 Connect the phone to the computer using the USB cable that comes with the phone. 2 Computer: Click Start > All Programs > Windows Mobile Device Center. 3 Computer: Click at the lower left part of the Windows® Mobile Device Center window. 1 2 3 4 To change which information is synchronized Tap Start > Programs > ActiveSync. Tap Menu > Options. Select the check box for any items you want to synchronize. To change synchronization settings for an information type, select it and tap Settings.

This allows you to set the download size limit, specify the time period of information to download and more. Use Windows Mobile Device Center In Windows Mobile Device Center you can do the following: · Access synchronization settings to view and change them · Tag and transfer photos from your phone to the Photo Gallery on your Windows Vista PC · Synchronize music and video files using Windows Media® Player. For more information, see Windows Media® Player Mobile · View documents and other files in your phone See Windows Mobile Device Center Help for more information. Synchronizing using a Bluetooth connection You can connect and synchronize your phone with a computer using a Bluetooth connection. The computer must have a built-in Bluetooth functionality or else you must use a Bluetooth adapter or dongle together with the computer. To synchronize using a Bluetooth link 1 Set up Windows® Mobile Device Center or ActiveSync on the computer. See Help in the phone for instructions. 2 In your phone, tap > Programs > ActiveSync. 3 Make sure the Bluetooth function in both your phone and the computer is turned on and set to visible. For more information, see To turn on Bluetooth™ functionality and make your phone visible.

4 Tap Menu > Connect via Bluetooth. 5 If this is the first time you connect to this computer using a Bluetooth link, you must first complete the Bluetooth wizard in your phone and set up a Bluetooth partnership between your phone and the computer. For more information, see Bluetooth™ partnership. To conserve battery power, turn off the Bluetooth function when not in use. To access synchronization settings using Windows Vista 1 Click Start > All programs > Windows Mobile Device Center on your Windows Vista computer.

2 Click Mobile Device Settings. To tag and transfer photos from your phone 1 Click Start > All Programs > Windows Mobile Device Center on your Windows Vista computer. 2 Click Pictures, Music and Video > _new pictures/video clips are available for import. A wizard will guide you through the process. To synchronize music and video files using Windows Media Player 1 Click Start > All Programs > Windows Mobile Device Center on your Windows Vista computer.

2 Click Pictures, Music and Video > Add media to your device from Windows Media Player. For more information, see Windows Media® Player Mobile. To view documents and files in your phone 1 Click Start > All Programs > Windows Mobile Device Center on your Windows Vista computer. 2 Click File Management > Browse the content of your device. Scheduled synchronization Scheduled synchronization allows you to set specific times for when your phone should connect and synchronize with the Exchange Server. This is an alternative to Direct Push, where all changes and new items are immediately pushed from your phone to a computer and from a computer to your phone. With scheduled synchronization you can set a regular schedule for synchronizing Outlook e-mails and other information. You can set how often to synchronize during peak times (which usually refer to your working hours) when e-mail volume is high, as well as off-peak times when e-mail volume is low. To set up scheduled synchronization 1 Tap > Programs > ActiveSync. 2 Tap Menu > Schedule.

3 Select a time interval in the Peak times box for how frequently you want to receive e-mail.
