..... Nano SIM/Memory card slot cover Assembly Your device only supports nano SIM cards. The nano SIM card and the memory card have separate slots in the same holder.

Make sure you don't confuse the two. The combined SIM/Memory card slot allows you to use either a memory card or an additional SIM card. To prevent data loss, make sure you turn off your device or unmount the memory card before you drag out the holder to remove the nano SIM card (or cards) or memory card from the device. To insert one or two nano SIM cards If you drag out the SIM/Memory card holder while the device is powered on, the device restarts automatically. 1 2 3 4 5 1 2 3 With the screen facing down, drag out the SIM/Memory card holder using your fingernail. Firmly place a single SIM card in the correct orientation into the SIM card tray as shown in the illustration. Firmly place the additional SIM card in the correct orientation into the Memory card/secondary SIM card tray as shown in the illustration. Make sure both SIM cards are placed horizontally in the holder. Gently push the holder into the slot until it fits into place. To insert a memory card With the screen facing down, open the nano SIM/Memory card slot cover.

Place the memory card in the memory card slot in the correct orientation, as shown in the illustration. Gently push the holder into the slot until it fits into place. To remove the nano SIM card 8 This is an Internet version of this publication. © Print only for private use. 1 2 3 With the screen facing down, open the nano SIM/Memory card slot cover.

Drag out the nano SIM/Memory card holder using your fingernail. Remove the nano SIM card, then gently push the holder into the slot until it fits into place. To remove the memory card 1 2 3 4 Either turn off the device, or unmount the memory card under Settings > Storage & memory > > Advanced settings > Storage > next to SD card. With the screen facing down, open the nano SIM/Memory card slot cover. Drag out the nano SIM/Memory card holder using your fingernail.

Remove the memory card, then gently push the holder into the slot until it fits into place. Screen protection Before using your device, remove the protection film by pulling up on the protruding tab. It is recommended to protect your device with a Sony branded screen cover or a protector intended for your Xperia™ model. The use of third party screen protection accessories may prevent your device from working correctly by covering sensors, lenses, speakers, or microphones and can invalidate the warranty. Starting your device for the first time The first time you start your device, a setup guide helps you to configure basic settings, personalise your device and sign in to your accounts (for example a Google™ account). To turn on the device 1 2 3 Press and hold down the power key until the device vibrates. Enter your SIM card PIN when requested, then tap . Wait a while for the device to start. 9 This is an Internet version of this publication. © Print only for private use.

1 2 To turn off the device Press and hold down the power key In the options menu, tap Power off.

[You're reading an excerpt. Click here to read official SONY XPERIA X user guide](#)

<http://yourpdfguides.com/dref/5897209>

until the options menu opens. It may take a while for the device to shut down. Why do I need a Google™ account? Your Xperia™ device from Sony runs on the Android™ platform developed by Google™. A range of Google™ applications and services is available on your device when you purchase it, for example, Gmail™, Google Maps™, YouTube™ and the Play Store™ application, which gives you access to the Google Play™ online store for downloading Android™ applications. To get the most out of these services, you need a Google™ account. For example, a Google™ account enables you to do all of the following: ••

- Download and install applications from Google Play™. Synchronise your email, contacts and calendar using Gmail™. Chat with friends using the Hangouts™ application. Synchronise your browsing history and bookmarks using the Google Chrome™ web browser.

Identify yourself as the authorised user after a software repair using Xperia™ Companion. Remotely find, lock or clear a lost or stolen device using the my Xperia™ or Android™ Device Manager services. For more information about Android™ and Google™, go to <http://support.google.com>.

It is crucial that you remember your Google™ account username and password. In some situations, you may need to identify yourself for security reasons using your Google™ account. If you fail to give your Google™ username and password in such situations, your device is locked. Also, if you have more than one Google™ account, make sure to enter the details for the relevant account. 1 2 3 To set up a Google™ account on your device From your Home screen, tap .

Find and tap Settings > Accounts & sync > Add account > Google. Follow the registration wizard to create a Google™ account, or sign in if you already have an account. You can also sign in to or create a Google™ account from the setup guide the first time you start your device. Alternatively, you can go online and create an account at www.google.com/accounts. 1 2 3 4 5 To remove a Google™ account From your Home screen, tap . Tap Settings > Accounts & sync > Google. Select the Google™ account that you want to remove. Tap > Remove account.

Tap Remove account again to confirm. If you remove your Google™ account, any security features that are linked to your Google™ account will no longer be available. If you are lending your device to someone to use for an extended period, it is recommended that you create a guest user account for the other user, and set up a screen lock to protect your own user account. 10 This is an Internet version of this publication. © Print only for private use. Charging your device Your device has an embedded, rechargeable battery that can only be replaced by an authorised Sony repair centre. You should never try to open or take apart the device yourself. Doing so can cause damage and void your warranty. It is recommended that you charge the battery for at least 30 minutes before starting up your device for the first time. You can still use your device while it is charging.

To read more about how to improve battery performance, see Battery and power management on page 29 . To charge your device 1 2 3 4 Plug the charger into a power outlet. Plug one end of the USB cable into the charger (or into the USB port of a computer). Plug the other end of the cable into the micro USB port on your device, with the USB symbol facing up. The notification light illuminates when charging begins.

When the device is fully charged, disconnect the cable from your device by pulling it straight outwards. Make sure not to bend the connector. Only use the charger provided with your device or another Sony charger intended for charging your device. If the battery is completely depleted, it may take a few minutes before the notification light illuminates and the charging icon appears. Battery notification light status Green Orange Red The battery is charging and the battery charge level is greater than 90% The battery is charging and the battery charge level is less than 90% The battery is charging and the battery charge level is less than 15% 11 This is an Internet version of this publication.

© Print only for private use. Device security Making sure your device is protected Your device includes several security options, strongly recommended in case of loss or theft. These options are as follows: ••• Set a secure screen lock on your device using a PIN, password, or pattern or fingerprint to prevent anyone from accessing or resetting your device. For more information, see Screen lock on page 12 . Add a Google™ account to prevent others from using your device if it gets stolen or wiped. For more information, see Why do I need a Google™ account? on page 10 . Activate either the “Protection by my Xperia” or the Android™ Device Manager web service. Using one of these services, you can remotely locate, lock or format a lost device. For more information, see Finding a lost device on page 20 . Verifying the ownership of your device Certain protection features require you to either unlock your screen with your PIN, password, pattern, or enter your Google™ account information.

Below are examples of protection features and some of the required credentials: Factory Data You must unlock your screen before you are allowed to perform a Factory Data Reset. Reset protection Protection by my Xperia If you remotely reset your device using this service, you must enter the username and password for a Google™ account associated with the service. The device must be connected to the Internet before the setup process can be completed.

Otherwise, you will not be able to use your device after the reset. If you remotely reset your device using this service, you must enter the username and password for a Google™ account. The device must be connected to the Internet before the setup process can be completed. Otherwise, you will not be able to use your device after the reset. If you use the Xperia™ Companion software to perform a software repair, you're asked to enter your Google™ account username and password when you start the device after the repair is complete. Android™ Device Manager Software repair For Android™ Device Manager, it is necessary to enter information from a Google™ account. This can be any Google™ account which you have set up on the device.

If you cannot provide the relevant account information during a setup process, you won't be able to use the device at all. Screen lock There are several screen lock options available. The security level of each lock type is listed below in order of weakest to strongest: ••••• Swipe – no protection, but you have quick access to the Home screen.

[You're reading an excerpt. Click here to read official SONY XPERIA](http://yourpdfguides.com/dref/5897209)

[X user guide](http://yourpdfguides.com/dref/5897209)

<http://yourpdfguides.com/dref/5897209>

Pattern – draw a simple pattern with your finger to unlock your device. PIN – enter a numeric PIN of at least four digits to unlock your device. Password – enter an alpha-numeric password to unlock your device. Fingerprint – place your registered finger on the power key to unlock your device. It is very important that you remember your screen unlock pattern, PIN or password. If you forget this information, it may not be possible to restore important data such as contacts and messages. If you have set up a Microsoft® Exchange ActiveSync® (EAS) account on your Xperia™ device, the EAS security settings may limit the lock screen type to only a PIN or password. This occurs when your network administrator specifies a specific lock screen type for all EAS 12 This is an Internet version of this publication.

© Print only for private use. accounts for enterprise security reasons. Contact the network administrator of your company or organisation to check what network security policies are implemented for mobile devices. Fingerprint functionality is not available in the US market. 1 2 3 To create a screen lock pattern From your Home screen, tap . Find and tap Settings > Lock screen & security > Screen lock > Pattern. Follow the instructions on your device. If you enter an incorrect lock pattern five times in a row, you must wait 30 seconds before trying again. 1 2 3 1 2 3 4 1 2 3 4 1 2 3 4 1 2 3 4 To change screen lock type From your Home screen, tap . Find and tap Settings > Lock screen & security > Screen lock.

Follow the instructions on your device. To change the screen lock pattern From your Home screen, tap . Find and tap Settings> Lock screen & security > Screen lock. Draw your screen unlock pattern. Tap Pattern and follow the instructions on your device. To create a screen lock PIN From your Home screen, tap . Find and tap Settings > Lock screen & security > Screen lock > PIN. Enter a numeric PIN, then tap Continue. Re-enter and confirm your PIN, then tap OK. To create a screen lock password From your Home screen, tap .

Find and tap Settings > Lock screen & security > Screen lock > Password. Enter a password, then tap Continue. Re-enter and confirm your password, then tap OK. To activate the Swipe unlock function From your Home screen, tap . Find and tap Settings > Lock screen & security > Screen lock.

Draw your screen unlock pattern, or enter your PIN or password depending on which of these screen lock types is enabled. Tap Swipe. Fingerprint unlock The PIN or password screen lock you set up serves as a backup unlock method if you enable the Fingerprint unlock option. Selecting other screen lock types will clear all fingerprint settings. You can use your fingerprint to quickly unlock your device.

To use this feature, you need to register a fingerprint and enable this feature in the Fingerprint Manager first. For details on registering fingerprints, see Fingerprint Manager on page 14 . Fingerprint functionality is not available in the US market. 1 2 3 4 To enable Fingerprint unlock From your Home screen, tap . Find and tap Settings > Lock screen & security > Fingerprint Manager. Confirm your pattern, PIN or password if needed. Follow the instructions on your device to register a fingerprint unlock. 13 This is an Internet version of this publication. © Print only for private use. • To unlock the device using your fingerprint With the lock screen active, place your finger on the power key so that the device can scan your fingerprint and unlock the screen.

Make sure that you use a finger that you have registered in Fingerprint Manager. If you fail to unlock the screen using your fingerprint after five attempts, you can use your backup PIN or password instead. Resetting a forgotten screen lock If you've forgotten your screen lock PIN, password or pattern, you may be able to reset it using the Protection by my Xperia service. No content on your device is lost after you have performed a screen lock reset using this service.

To activate the Protection by my Xperia service, see Finding a lost device on page 20 . 1 2 3 4 5 6 To reset the screen lock using Protection by my Xperia Make sure you know your Google™ account username and password and that you have enabled the Protection by my Xperia service on your device. Go to myxperia.sonymobile.com using any Internet-connected device. Sign in using the same Google™ account that you have set up on your device.

Click the picture of your device under Your devices. Select Lock or Change PIN2 to replace the current screen lock with a new PIN code. Follow the on-screen instructions provided by Protection by my Xperia. Depending on your security settings, your device may lock after a screen lock reset. You then need to enter your Google™ account username and password in order to use the device.

Fingerprint Manager Before using the Fingerprint sensor, make sure the sensor is clean and without any visible moisture. Fingerprint Manager registers fingerprint information that can be used as an additional security method for unlocking your device or authenticating purchases. You are allowed to register a maximum of 5 fingerprints on your device. Fingerprint functionality is not available in the US market. 1 2 3 To register a fingerprint for the first time From your Home screen, tap .

Find and tap Settings > Lock screen & security > Fingerprint Manager. Follow the on-screen instructions to complete fingerprint registration. If you have not set up a PIN or password as a Screen lock, Fingerprint Manager assists you with setting up a PIN or password as a security backup for your fingerprint.

For more information on setting up a Screen lock, see Screen lock on page 12 . The fingerprint sensor is on the power key and not on the screen of your device. Before using the Fingerprint sensor, make sure the sensor is clean and without any visible moisture. 1 2 3 4 To register additional fingerprints From your Home screen, tap . Find and tap Settings > Lock screen & security > Fingerprint Manager. Tap and then place your finger on the power key so that the device can scan your fingerprint and verify your identity. Make sure that you use a finger that you have previously registered in Fingerprint Manager.

Follow the on-screen instructions to register an additional fingerprint. 14 This is an Internet version of this publication. © Print only for private use. 1 2 3 1 2 3 4 To delete a registered fingerprint From your Home screen, tap . Find and tap Settings > Lock screen & security > Fingerprint Manager. Tap the registered fingerprint, then tap Delete > Delete. To rename a registered fingerprint From your Home screen, tap . Find and tap Settings > Lock screen & security > Fingerprint Manager. Tap a registered fingerprint on the list and then enter a fingerprint name. Tap OK.

Unlocking your device automatically The Smart Lock feature makes unlocking your device easier by letting you set it to unlock automatically in certain situations.

[You're reading an excerpt. Click here to read official SONY XPERIA X user guide](http://yourpdfguides.com/dref/5897209)

<http://yourpdfguides.com/dref/5897209>

You can keep your device unlocked, for example, when it's connected to a Bluetooth® device or when you're carrying it with you. To prepare your device to unlock automatically, you first need to perform the following steps in the order given: Make sure you have an active Internet connection, preferably a Wi-Fi® connection to limit data traffic charges. Make sure that all your apps are updated using the Play Store™ application in order to ensure that the Google Play™ services app is updated. Having an up-to-date Google Play™ services app ensures that you can use the latest Smart Lock features.

Enable Smart Lock. Set when you want your device to unlock automatically. ••The Smart Lock feature is developed by Google™ and the exact functionality may change over time due to updates from Google™. The Smart Lock feature may not be available in every market, country or region. •••••1 2 3 4 5 6 7 8

To enable Smart Lock Make sure that you've set a pattern, PIN or password for your screen lock.

From your Home screen, tap . Find and tap Settings > Lock screen & security > Trust agents. Drag the slider beside Smart Lock (Google) to the right. Tap the back arrow next to Trust agents. Find and tap Smart Lock. Enter your pattern, PIN or password. You need to enter this screen lock any time you want to change your Smart Lock settings. Select a Smart Lock type. Setting when to keep the device automatically unlocked •••••You can set Smart Lock to keep your device unlocked using the following settings: Trusted devices — Keep your device unlocked when a trusted Bluetooth® or NFC device is connected.

Trusted places — Keep your device unlocked when you're in a trusted location.

On-body detection — Keep your device unlocked when you're carrying your device with you. Trusted face —Unlock your phone by looking at it. Trusted voice — Set up voice recognition to search in any screen. You have to manually unlock your device when you don't use it for 4 hours and after you restart it.

Connecting to trusted Bluetooth® devices You can designate a connected Bluetooth® device as a trusted device and keep your Xperia™ device unlocked while it's connected to it. So if you have Bluetooth® devices that you connect to regularly, for example, a car speaker or home entertainment system, a Bluetooth® watch or a fitness tracker, you can add them as 15 This is an Internet version of this publication. © Print only for private use. trusted devices and bypass the added security of the lockscreen to save time. This feature is suitable if you're normally in a relatively secure place when you use these devices. In some cases, you may still need to manually unlock your device before a trusted device can be connected.

It is not recommended to add devices that are constantly connected to your device as trusted devices, for example, Bluetooth® keyboards or cases. As soon as a trusted Bluetooth® device is switched off or moves out of range, your screen locks and you need your PIN, pattern or password to unlock it. 1 2 3 4 5 To add a trusted Bluetooth® device Make sure your device is paired and connected to the Bluetooth® device that you want to add as a trusted device. In the Smart Lock menu, tap Trusted devices. Tap Add trusted device > Bluetooth.

Tap a device name to select it from the list of connected devices. Only paired devices appear in this list. Depending on the security of your connection, you may need to manually unlock your device before the trusted device can keep it unlocked. To remove a trusted Bluetooth® device From your Home screen, tap . Find and tap Settings > Lock screen & security > Smart Lock > Trusted devices.

Tap the device that you want to remove. Tap Remove trusted device. 1 2 3 4 Making sure you're secure when using trusted devices Different Bluetooth® devices support different Bluetooth® standards and security capabilities. There's a possibility that someone could keep your Xperia™ device unlocked by imitating your Bluetooth® connection, even if your trusted device is no longer nearby. Your device is not always able to determine whether your connection is secure from someone trying to imitate it. When your device can't determine whether you're using a secure connection, you'll get a notification on your Xperia™ device and may need to manually unlock it before the trusted device can keep it unlocked. Bluetooth® connectivity range can vary depending on factors like the model of your device, the connected Bluetooth® device, and your environment. Depending on these factors, Bluetooth® connections can work over distances up to 100 metres. Connecting to trusted places When the Trusted places feature is set up, the lock screen security on your Xperia™ device gets disabled when you are in a designated trusted location. For this feature to work, you must have an Internet connection (preferably over Wi-Fi®) and allow your device to use your current location.

To set up trusted places, first make sure that high accuracy location mode or battery-saving location mode is enabled on your device before you add home or custom locations. The exact dimensions of a trusted location are an estimate and may extend beyond the physical walls of your home or other areas that you have added as a trusted locations. This feature can keep your device unlocked within a radius of up to 80 metres. Also be aware that location signals can be replicated or manipulated. Someone with access to specialised equipment could unlock your device. 16 This is an Internet version of this publication. © Print only for private use. 1 2 3 4 1 2 3 4 5 6 To add your home location Make sure location is turned on and that you are using either the High accuracy or Battery saving Location mode setting. From your Home screen, tap . Find and tap Settings > Lock screen & security > Smart Lock > Trusted places > Home.

Tap Turn on this location. To edit your home location Make sure location mode is turned on and that you are using either the High accuracy or Battery saving setting. From your Home screen, tap . Find and tap Settings > Lock screen & security > Smart Lock > Trusted places. Select your home location.

Tap Edit. In the search bar, enter the location that you want to use as your home location. If other residences share your street address, you can add the actual location of your home within the building complex as a custom place. 1 2 3 4 To remove your home location Make sure location mode is turned on and that you are using either the High accuracy or Battery saving setting. From your Home screen, tap .

Find and tap Settings > Lock screen & security > Smart Lock > Trusted places > Home. Tap Turn off this location. Using custom locations You can add any location as a trusted, custom place where your device can remain unlocked.

[X user guide](http://yourpdfguides.com/dref/5897209)

<http://yourpdfguides.com/dref/5897209>

1 2 3 4 5 6 7 To add a custom place Make sure location mode is turned on and that you are using either the High accuracy or Battery saving setting. From your Home screen, tap . Find and tap Settings > Lock screen & security > Smart Lock > Trusted places. Tap Add trusted place. To use your current location as a trusted, custom place, tap Select this location. Alternatively, to enter another location, tap the magnification glass icon and type the address. Your device searches for the entered location.

To use the suggested address, tap the address. To fine-tune the location, tap the back arrow next to the address, drag the location pin to the desired location, then tap Select this location. To edit a custom place Make sure location mode is turned on and that you are using either the High accuracy or Battery saving setting. From your Home screen, tap . Find and tap Settings > Lock screen & security > Smart Lock > Trusted places. Select the place that you want to edit. Tap Edit address. To enter another location, tap the magnification glass icon and type the address. Your device searches for the entered location. To use the suggested address, tap the address.

To fine-tune the location, tap the back arrow next to the address, then drag the location pin to the desired location, then tap Select this location. 1 2 3 4 5 6 7 17 This is an Internet version of this publication. © Print only for private use. 1 2 3 4 5 To remove a custom place Make sure location mode is turned on and that you are using either the High accuracy or Battery saving setting. From your Home screen, tap .

Find and tap Settings > Lock screen & security > Smart Lock > Trusted places. Select the place that you want to remove. Tap Delete. Keeping your device unlocked while you're carrying it Using the On-body detection feature, you can keep your device stay unlocked while you have it on you, for example, if you're carrying it in your hand, pocket or bag. The accelerometer in your device keeps your device unlocked when it senses that it's being carried.

The device locks when the accelerometer detects that the device has been put down. The On-body detection feature can't distinguish whose body is connected. If you give your device to someone else while it's unlocked using On-body detection, your device may stay unlocked for the other user. Keep in mind that On-body detection as a security feature is less secure than a pattern, PIN, or password. 1 2 3 To enable On-body detection From your Home screen, tap . Find and tap Settings > Lock screen & security > Smart Lock > On-body detection. Drag the slider beside Off to the right, then tap Continue. Using On-body detection ••••• When you use the On-body detection feature, you need to be aware of the following behaviours: When your device senses that it's on your body, it stays unlocked after you unlock it. Any time you put your device down and it senses that it's no longer on your body, your device locks automatically. After you put your device down, for example, if you place it on a table, your device can take up to one minute to lock.

After you get into a car, bus, train or other land vehicles, your device can take between 5 and 10 minutes to lock. Note that when you get on an airplane or a boat (or other non-land based vehicles), your device may not lock automatically, so make sure to lock it manually if needed. When you pick up your device again or get out of the vehicle, just unlock it once and your device then stays unlocked for as long as you have it on you. To turn off On-body detection From your Home screen, tap . Find and tap Settings > Lock screen & security > Smart Lock > On-body detection. Drag the slider beside On to the left. 1 2 3 SIM card protection You can lock and unlock each SIM card that you use in your device with a PIN (Personal Identification Number). When a SIM card is locked, the subscription linked to the card is protected against misuse, meaning that you have to enter a PIN every time you start your device. If you enter the PIN incorrectly too many times, your SIM card will get blocked. You then need to enter your PUK (Personal Unblocking Key) and a new PIN.

Your PIN and PUK are supplied by your network operator. 18 This is an Internet version of this publication. © Print only for private use. 1 2 3 4 5 To set up a SIM card lock From the Home screen, tap . Find and tap Settings > Lock screen & security > Set up SIM card lock.

Select a SIM card. Drag the slider beside Lock SIM card to the right. Enter the SIM card PIN and tap OK. The SIM card lock is now active and you will be prompted to enter this PIN every time you restart the device. To remove a SIM card lock From the Home screen, tap .

Find and tap Settings > Lock screen & security > Set up SIM card lock. Select a SIM card. Drag the slider beside Lock SIM card to the left. Enter the SIM card PIN and tap OK. To change the SIM card PIN From the Home screen, tap . Find and tap Settings > Lock screen & security > Set up SIM card lock. Select a SIM card. Tap Change SIM PIN. Enter the old SIM card PIN and tap OK. Enter the new SIM card PIN and tap OK.

Re-type the new SIM card PIN and tap OK. To unlock a blocked SIM card using the PUK code . Enter the PUK code and tap Enter a new PIN code and tap . Re-enter the new PIN code and tap . If you enter an incorrect PUK code too many times, you need to contact your network operator to get a new SIM card. 1

2 3 4 5 1 2 3 4 5 6 7 1 2 3 Using multiple SIM cards Your device works with either one or two SIM cards inserted. You get incoming communication to both SIM cards and you can select from which number you want to place outgoing communication. Before you can use both SIM cards, you need to enable them and select the SIM card that will handle data traffic. You can forward calls that come in on SIM card 1 to SIM card 2 when SIM card 1 is unreachable, and vice versa. This function is called Dual SIM reachability.

You must enable it manually. See Forwarding calls on page 64 . 1 2 3 1 2 3 4 1 2 3 To enable or disable the use of two SIM cards From the Home screen, tap . Find and tap Settings > Dual SIM. Drag the sliders beside SIM1 and SIM2 to the right or left.

To rename a SIM card From the Home screen, tap . Find and tap Settings > Dual SIM. Select a SIM card and enter a new name for it. Tap OK. To select the SIM card that handles data traffic From your Home screen, tap .

Find and tap Settings > Dual SIM > Mobile data. Select the SIM card you want to use for data traffic. For higher data speeds, select the SIM card that supports the fastest mobile network, for example, 3G. 19 This is an Internet version of this publication. © Print only for private use. Finding the identification number of your device Your device has a unique ID (identification) number. In your device, this number is referred to as the IMEI (International Mobile Equipment Identity).

[You're reading an excerpt. Click here to read official SONY XPERIA X user guide](http://yourpdfguides.com/dref/5897209)

<http://yourpdfguides.com/dref/5897209>

You should keep a copy of this number. You may require it, for example, when you access the Xperia™ Care support service and need to register your device. Also, if your device is stolen, some network providers can use this number to stop the device from accessing the network in your country.

For devices with two SIM cards, there are two IMEI numbers, one for each SIM card slot. To view your IMEI numbers on the label tray 1 2 Open the cover for the nano SIM and memory card slot. Place a fingernail or other object with a long, fine tip under the edge of the label tray, then drag the tray outwards. The IMEI numbers are displayed on the label tray. To view the IMEI numbers, you can also open the phone dialer and enter *#06#. 1 2 3 To view your IMEI number in the device From your Home screen, tap . Find and tap Settings > About phone > Status. Tap IMEI information. Finding a lost device If you have a Google™ account, the “Protection by my Xperia” web service can help you locate and secure your device if you ever lose it. If you have activated this service on your device, you can: •••• Locate your device on a map.

Sound an alert even if the device is in Do not disturb mode. Remotely lock the device and make the device display your contact details to anyone who finds it. Remotely clear the internal and external memory of the device as a last resort. The “Protection by my Xperia” service may not be available in all countries or regions. If you’ve cleared the internal memory of the device using the “Protection by my Xperia” web service, you must sign in to a Google™ account that was previously synced on this device the next time you turn on the device.

20 This is an Internet version of this publication. © Print only for private use. 1 2 3 4 5 To activate Protection by my Xperia Make sure you have an active data connection, and enable location services on your device. From your Home screen, tap . Find and tap Settings > Lock screen & security > Protection by my Xperia > Activate.

Mark the checkbox to agree to the terms and conditions of the service, then tap Accept. If prompted, sign in to your Google™ account, or create a new account if you don’t already have one. To verify that Protection by my Xperia can locate your device, go to myxperia.sonymobile.com and sign in using the Google™ account that you are using on your device. If you are sharing a device with multiple users, note that the Protection by my Xperia service is only available to the user who is logged in as the owner. Finding a lost device using Android™ Device Manager Google™ offers a location and security web service called Android™ Device Manager. You can use it in parallel with, or as an alternative to, the my Xperia service. If you lose your device, you can use Android™ Device Manager to: •• Find and show where your device is located. Ring or lock your device, erase everything on it, or add a phone number to the lock screen.

For additional information about Android™ Device Manager, go to www.support.google.com. Android™ Device Manager does not work if your device is turned off or if it does not have a connection to the Internet. The Android™ Device Manager service may not be available in all countries or regions. 1 2 3 4 5 6 7 To activate Android™ Device Manager If you are using a device with multiple users, make sure that you are logged in as the owner. Make sure that you have an active data connection and that location services are enabled. From your Home screen, tap . Find and tap Settings > Google > Security.

Drag the sliders beside Remotely locate this device and Allow remote lock and erase to the On position. If prompted, agree to the terms and conditions by tapping Activate. To verify that Android™ Device Manager can locate your device after you activate the service, go to www.android.com/devicemanager and sign in using your Google™ account.
