585(i) v6 - Residential Wireless ADSL2+ Gateway

THOMSON

Telecom

With the SpeedTouch 585(i), users can experience wireless freedom at lightning-fast speeds. The SpeedTouch 585(i) is an 802.11a/g wireless LAN access point with integrated ADSL. Featuring an integrated 10/100Mb/s 4-port switch, the SpeedTouch 585(i) offers seamless connection of wired and wireless worlds from anywhere in the home.

The SpeedTouch 585(i) lets you share files, printers, and a single broadband ADSL internet connection with unmatched performance and security, whilst preserving the flexibility and features of a fully fledged professional routing engine. The integrated modem supports ADSL, ADSL2, and ADSL2+. With a simultaneous operation of 802.11a and 802.11g, speed, security and performance is guaranteed. When using 802.11g components, you can transfer data at up to 54Mb/s (five times the speed of older 802.11b wireless networks), and still connect to existing 802.11b products.

The SpeedTouch 585(i) also supports powerful security mechanisms such as Wi-Fi Protected Access™ (WPA), Wired Equivalent Privacy (WEP) encryption, and a physical user registration button, which allow users to communicate and access data with efficient link quality and the highest level of network security.

Easy to install

The SpeedTouch Wireless Home Install Wizard makes setting up a home wireless network as easy as Ethernet, thereby drastically reducing helpdesk calls. This unique and robust mechanism configures and secures your SpeedTouch ADSL access point and wireless network clients from a single CD. The wizard performs comprehensive system checks before and during the installation process, and validates all user inputs, in order to guarantee the end-user a secured wireless connection (using WEP or WPA) to the Internet.
