Make sure it is at least 1 metre away from other electrical appliances to avoid interference. Your Telstra V1600 works by sending radio signals between the handset and base. The strength of the signals depends on where you site the base. Putting it as high as possible can help provide the best signal. WARNING Do not place your Telstra V1600 in the bathroom or other humid areas Handset range The handset reception range from the base is up to 300m outdoors and up to 50m indoors. Thick walls can severely affect the range. Range indicator The symbol on your handset display indicates when you are in range of the base. If the symbol flashes and you hear a warning beep, you are out of range and will need to move closer to the base. IMPORTANT Do not connect the telephone line until the handset(s) is fully charged. The base must be plugged into the mains power at all times. Which socket? Power socket Telephone line socket 1. Plug the mains power cable into the base.

Then plug the power adaptor into the mains wall socket and switch the power on. The power indicator on the base lights up. Setting up Getting started 2. Remove the battery compartment cover and insert the 2 x AAA NiMH batteries supplied into the handset. Slide the battery compartment cover back into place. 6 3. Charge the handset for at least 16 hours by placing it on the base. The red Charging indicator on the base comes on. The screen will show the standby display and a scrolling battery icon to show that the handset is charging. The backlit screen will turn off after approximately 30 sec.

Press any key to turn on the screen again. Battery low warning When the battery charge is low the handset battery icon will be empty and flashing. Place the handset back on the base to recharge. 4. After16 hours, plug the telephone line cord into your Telstra V1600 base unit and the other end into the wall socket. Talk/Standby time Under ideal conditions, fully charged handset batteries should give up to 10 hours talk time or 100 hours standby on a single charge. See 'battery performance' on the following page. 7 Getting started Setting the day and time If you have subscribed to Telstra's Calling Number Display* service, the time and date will be set automatically when you receive your first call. You can also set the time manually. 1. On the handset, press Menu. Press to scroll down to Time settings then press OK. Scroll to Set Date & Time then press OK. 2. Enter the date, e. g. 02 05 for 2nd May. Press OK. 3. Enter the time, e. g. 10 45 for 10:45am. Press OK. This overwrites the current setting. If you make a mistake press Clear to delete. Press OK. 4. Press and hold Back to return to standby. Your Telstra V1600 is now ready to use. *Excludes blocked calls.

Monthly charges apply. Available in most areas. Battery performance To keep your batteries in the best conditions, leave the handset off the base for a few hours at a time (after the initial 16 hour charge). Please note however, that new NiMH batteries do not reach full capacity until they have been in normal use for several days. Running the batteries right down a least once a week will help them last as long as possible. The charge capacity of rechargeable batteries will reduce with time as they wear out, so reducing the talk/standby time of the handset. Eventually, they will need to be replaced. New batteries can be obtained from your nearest electrical retailer. Helpline If you have any difficulties setting up your Telstra V1600, please call Product Information on 1300 302 699. IMPORTANT 3G SIM cards are not compatible with this product. * You need to subscribe to Telstra Calling Number Display in order to receive the number of your callers. Excludes blocked calls. Monthly charges apply. Available in most areas. For more iPress and hold Back to return to standby. Dial a number from the phonebook. 1. Press Names 2. Scroll or to the name you want or use the keypad to enter the first letter of the name.

3. Press to dial. If you subscribed to Telstra's Calling Number Display service and want names in your phonebook displayed instead of the phone numbers, you must store the full telephone number including the area code. Entering names Use the keypad letters to enter names. For example press 8 for the letter t, or 6 for the letter o.

Keep pressing the same button to scroll through the characters shown on the screen. Press for letters in upper case. This Shift Lock icon will be displayed If the next character you want to enter is on the same button as the last, wait a moment for the cursor to move right. Press 1 to insert a space. Press 1, * or # for special characters.

If you make a mistake, press Clear to delete the last character. Phonebook Edit an entry 1. Press Names. Scroll or to the entry you want then press Options. 2. Scroll to Edit Entry then press OK. The name is displayed. 3. Press Clear to delete characters then enter the new name then press OK. The number is displayed.

4. Press Clear to delete digits then enter the new number then press OK to save. 5. Press and hold Back to return to standby. View Details 18 1. Press Names. Scroll or to the entry you want then press Options. 2. Scroll to Show Details then press OK. The number is displayed.

You can edit the entry or press and hold Back to return to standby. Delete an entry 1. Press Names. Scroll or to the entry you want then press Options. 2. Scroll to Delete Entry then press OK. 3. Press Yes to confirm or No to cancel. 4. Press and hold Back to return to standby.

Names are stored alphabetically. 19 Phonebook Select ringtone You can choose a different ringer melody to play when you receive a call from a particular number in the phonebook. For example, you may wish to assign a different ring tone to friends and family phone numbers. 1. Press Names. Scroll or to the entry you want then press Options. 2. Scroll to Ringtone then press OK. or to the melody you want 3. Scroll then press OK.

4. Press and hold Back to return to standby. Phonebook Copy SIM card You can copy phonebook information stored on a mobile phone SIM card to your Telstra V1600 phonebook. (Note: CDMA mobile handsets do not have a SIM card, and so are not compatible with this feature.) If there is enough space, you can copy the contents of more than one SIM card (see Handset memory full' below) 20 NOTE When you copy the contents of your mobile phone SIM card you will need to enter the SIM card PIN code. DO NOT ATTEMPT TO DOWNLOAD THE PHONEBOOK FROM 3G SIM CARDS.

The SIM card reader in the Telstra V1600 base is not compatible with 1.8V SIM cards (only available with 3G phones, at the time of writing). WARNING Keep SIM cards away from small children, as they are a possible choking hazard. Handset memory full If the handset memory becomes full during copying, not all the entries will be transferred.

The maximum number of entries is 150. If your handset phonebook already contains 140 entries, only the first 10 entries on the SIM card will be copied. 1. Slide the SIM card reader out of the base, insert 2. Press Names then Options to scroll the SIM card into the reader and slide it back in. to Copy from SIM. Press OK. 3. The phonebook entries stored on your SIM card will be copied in the order of their location. Your Telstra V1600 handset will then store the entries in alphabetical order.

4. Press and hold Back to return to standby. 21 Telstra phone features Text Messaging Service * Telstra customers can use this phone to send and receive text messages. The phone will also display the telephone number of the person who sent you the message, as well as the time and date of the message. *For most Telstra and Telstra reseller customers for messages between compatible services. Charges apply. Text messaging Telstra V1600 can store up to 50 messages in the Inbox and Outbox, dynamically allocated. Each message can have up to the 160 characters. Shortcut to SMS menu You can also press on the key to access the SMS menu directly. Service centres Telstra's text messaging service centre numbers are already setup in your Telstra V1600.

If you change or delete the Telstra text messaging service centre numbers your Telstra text messaging service will not work. Telstra's service centre number for SEND and RECEIVE is 01983391. You can change the service centre numbers as follows: 1. Press Menu and OK to open the SMS menu. 2. Scroll to select Settings then press OK. 3. Service Centres is highlighted then press OK. 4. Receive Centres is highlighted then press OK. Enter the telephone number of the SMS receiving centre and then press OK. 5. Scroll to select the Sending Centres then press OK. Enter the telephone number of the SMS sending centre and then press OK. Telstra phone features Terminal Number If you have more than one text messaging capable phone on the same line you may not be able to receive text messages.

To prevent this you can change the terminal number of one or more of the phones to prevent interference. You can also use this feature to create personal text message mailboxes. Your Telstra V1600 is set-up with Terminal number ‘0' by default. To change the terminal number: 22 1. Press to open the SMS menu. 2. Scroll to select Settings then press OK. 3. Scroll to select Terminal then press OK. 4. Enter the terminal number (0-9) and then press OK. SMS Alert This is to enable your Telstra V1600 to alert you when there is a text message being received by the phone. 1. Press 2. Scroll 3.

Scroll 4. Scroll to open the SMS menu. to select Settings then press OK. to select SMS Alert then press OK. or to select On or Off for incoming messages alert. Press OK to confirm. 5. On SMS Alert menu, select Set Alert then press OK to select the alert tone. There are 3 tones selection: Recipient Terminal When sending a message to a personal mailbox, be sure that you enter the personal terminal ID number at the end of the recipient's telephone number, e.g. xx-xxxx-xxxx1, xx-xxxx-xxxx = the telephone numbers, and 1 = recipient personal terminal ID. If no terminal ID is entered, your message will be sent to the default terminal ID ‘0', which is the public mailbox. - Morse - Discreet - Polyphonic Select your choice then press OK to confirm. 23 Telstra phone features Users setting This is to enable you and other users to setup your personal mailboxes. Mailboxes There are 4 personal mailboxes with password protection available.

A Terminal Number will be automatically assigned to your mailbox. You can check and change your Terminal Number (see Terminal Number, page22) while you are in your personal mailbox. Insert symbol While typing or editing your message, you can insert symbols by pressing Options, and then select the Insert Symbol. Writing/sending messages 1. Press to open the SMS menu. 2. Scroll to select Settings then press OK. 3. Scroll to select Users then press OK. 4. Add User is highlighted then press OK. 5. Enter the new user name then press OK. 6. Enter your password then press OK.

7. Re-type your password then press OK to confirm. 1. Press to open the SMS menu. 2. Write Message is highlighted then press OK. 3. Type your message using the keypad. If you make a mistake press Clear to delete character on the left side of the cursor. 4. When complete, press Options then Send to then press OK to send message. 5. Enter the phone number of the recipient. Then press Send to deliver the message. 6. Press and hold Back to return to standby. Telstra phone features View received messages When there is a new message received, the handset display will show to indicate that there is a new / unread message in the Inbox, and the SMS message indicator on the base will light up. 24 1. Press to open the SMS menu. 2. Scroll or to select Inbox then press OK. 3. The phone will list all the received messages. The new / unread messages will be denoted with icon on the side of the message. 4. Select the new / unread message then press Read to read message. 5. To Reply, Forward or Delete message, press Options to perform your selection. 6. Press and hold Back to return to standby.

Saving message You can write a message and save the unsent / draft message into Outbox to be sent later. 1. Press to open the SMS menu. 2. Write Message is highlighted then press OK. 3. When complete, press Options to select Save 4. Press and hold Back to return to standby. then press OK to save message. 25 Telstra phone features Edit saved message 1. Press 2. Scroll 3. Scroll to open the SMS menu. or to select Outbox then press OK. or to select the message to be edited then press READ. 4. Press Option and Edit is highlighted. Press OK to go into editing mode. 5. This is a standard sign of wear and the batteries will need replacing. For spare AAA rechargeable NiMH batteries, please contact your nearest electrical retailers. Slide off the battery compartment cover and remove existing batteries. Insert new batteries and replace the compartment cover. General information IMPORTANT This equipment is not designed for making emergency telephone calls when the power fails. Alternative arrangements should be made for access to emergency services. 50 · It is recommended that advice from a qualified expert be sought before using this product in the vicinity of medical equipment. Your product may interfere with other electrical equipment, e.g. TV and radio sets, clock/alarms and computers if placed too close.

It is recommended that you place your product at least one metre away from such appliances to minimised any risk of interference. Never dispose of batteries in a fire. There is a serious risk of explosion and/or the release of highly toxic chemicals. · Safety General ·Only use the power supply included with the product. Using an unauthorised power supply will invalidate your guarantee and may damage the telephone. · Use only the approved rechargeable batteries supplied. Spare rechargeable batteries are available from your nearest electrical retailer. ·Do not open the handset (except to replace the handset batteries) or the base. This could expose you to high voltages or other risks. · Contact Product Information on 1300 302 699 for all repairs.

·Radio signal transmitted between the handset and base may cause interference to hearing aids. ·Cleaning Simply clean the handset and base with a damp (not wet) cloth, or an anti-static wipe. Never use household polish as this will damage the product. Never use a dry cloth as this may cause a static shock. 51 General information Telstra Accessories and replacement items For a full range of accessories and replacement items for the Telstra V1600, please call Product Information on 1300 302 699.

Environmental Do not expose to direct sunlight. The produce may heat up when the batteries are being recharged or during prolonged periods of use. This is normal, however, we recommend that to avoid damage you do not place the product on antique/veneered wood. Do not stand your product on carpets or other surfaces, which generate fibres, or place it in locations preventing the free flow or air over its surface. Do not submerge any part of your product in water and do not use it in damp or humid conditions, such as bathrooms.

Do not expose your product to fire, explosive or other hazardous conditions. There is a slight chance that your phone could be damaged by an electrical storm. We recommended that you unplug the power and telephone line cord from the base for the duration of the storm. Technical information How many telephones can you have? All items of telephone equipment have a Ringer Equivalence Number (REN), which is used to calculate the number of items, which may be connected to any other telephone line. Your Telstra V1600 has a REN of 0.1. A total REN of 4 is allowed. If the total REN of 4 is exceeded, the telephone may not ring. @@Only use the approved power adaptor and charger. Only use the approved AAA NiMH rechargeable batteries.

@@@@@@9) to get an outside line. To allow the PABX time to pick up an outside line before the rest of the number is dialled, you may need to add a pause in the dialling sequence.

9 PABX code for an outside line P Pause inserted in dialling sequence. 9Pxxx xxx Rest of the phone number When storing a number in the phonebook, at the point you want to insert a pause, press and hold down until P is displayed. 53 Technical information Recall The button is used when connected to certain PABX's and with some Telstra phone features.
