1 Important

Safety and important notice

· Warning: Risk of overheating! Never install the product in a confined space. Always leave a space of at least 10cm around the product for ventilation. Ensure curtains or other objects never cover the ventilation slots on the product. Never place the product, remote control or batteries near naked flames or other heat sources, including direct sunlight.

Only use this product indoors. Keep this product away from water, moisture and liquid-filled objects. Never place this product on other electrical equipment. Keep away from this product during lightning storms. Where the mains plug or an appliance coupler is used as the disconnect device, the disconnect device shall remain readily operable. LASER CAUTION: USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE. CAUTION: VISIBLE AND INVISIBLE LASER RADIATION WHEN OPEN AND INTERLOCKS DEFEATED. DO NOT STARE INTO BEAM. LOCATION: INSIDE, NEAR THE DECK MECHANISM. Following information is only valid for EUmember States: Disposal of products The crossed out wheeled dust bin symbol indicates that products must be collected and disposed of separately from household waste.

Integrated batteries and accumulators can be disposed of with the product. They will be separated at the recycling centres. The black bar indicates that the product was placed on the market after August 13, 2005. By participating in separate collection of products and batteries, you will help to assure the proper disposal of products and batteries and thus help to prevent potential negative consequences for the environment and human health. For more detailed information about the collection and recycling programmes available in your country, please visit our website (http://www.recycle-more.co.uk/) or alternatively please contact your retailer where the product was purchased. Disposal of batteries and/or accumulators The crossed out wheeled dust bin

symbol indicates that batteries and/or accumulators must be collected and disposed of separately from household waste. If the battery or accumulator contains more than the specified values of lead (Pb), mercury (Hg), and/or cadmium (Cd) defined in the Battery Directive (2006/66/EC), then the chemical symbols for lead (Pb), mercury (Hg) and/or cadmium (Cd) will appear below the crossed out wheeled dust bin symbol.

By participating in separate collection of batteries, you will help to assure the proper disposal of products and batteries and thus help to prevent potential negative consequences for the environment and human health. For more detailed information about the collection and recycling programmes available in your country, please visit our website (http://www.recycle-more.co.uk/) or alternatively please contact your retailer where the product was purchased.

· · · · · Pb,Hg,Cd EU Conformity Statement This product is marked with "CE" and complies therefore with the applicable harmonized European standards listed under the Low Voltage Directive 2006/95/EC and the EMC Directive 2004/108/EC. ErP Directive 2009/125/ EC Responsible for CE-marking is TOSHIBA INFORMATION SYSTEMS (U.K.) LTD, Toshiba Court, Weybridge Business Park, Addlestone Road, Weybridge,Surrey,KT15 2UL, United Kingdom General Information This appliance may be fitted with a nonrewireable plug. If it is necessary to change the fuse in a non-rewireable plug the fuse cover must be refitted.

If the fuse cover is lost or damaged, the plug must not be used until a replacement available from the appliance manufacturer is obtained. If the plug has to be changed because it is not suitable for your socket, or becomes damaged, it should be cut off and an appropriate plug fitted following the wiring instructions below. The plug removed must be disposed of safely as it is hazardous if inserted into a live socket. 3 English Disposal of your old product and batteries IMPORTANT The wires in this mains lead are coloured in accordance with the following code: BLUE: NEUTRAL BROWN: LIVE As the colours of the wires in the mains lead of this unit may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows: The wire that is coloured blue must be connected to the terminal in the plug which is marked with the letter N or coloured black. The wire that is coloured brown must be connected to the terminal which is marked with the letter L or coloured red. Do not connect either wire to the earth terminal which is marked by the letter E or by the safety earth symbol or coloured green or green-and-yellow. Use a 5A BS1362 fuse which is approved by ASTA or BSI. Always replace the fuse cover after changing the fuse. Reverse engineering or disassembly is prohibited. Disclaimers I. HEALTH/SAFETY-RELATED IMPORTANT SAFETY INFORMATION CONCERNING 3D VIEWING · If you or any viewer experiences the following symptoms or any other discomfort from viewing 3D video images, stop viewing and contact your health care provider: Convulsions Eye or muscle twitching Loss of awareness Altered vision Involuntary movements Disorientation Eye Strain Nausea/Vomiting Dizziness Headaches Fatigue · Some viewers may experience a seizure or blackout when exposed to certain flashing images or lights contained in certain 3D television pictures or video games. Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition, or has a family history of epilepsy, should contact a health care provider before using the 3D function. · If you feel eye fatigue or other discomfort from viewing 3D video images, stop viewing and take a rest until the condition is eliminated. · Due to the possible impact on vision development, viewers of 3D video images should be age 6 or above. Children and teenagers may be more susceptible to health issues associated with viewing in 3D and should be closely supervised to avoid prolonged viewing without rest. · Avoid use of the 3D function when under the influence of alcohol.

· Watching the screen while sitting too close for an extended period of time may cause eye strain. Consult your display manual to determine the ideal viewing distance.

· Viewing in 3D may cause dizziness and/ or disorientation for some viewers. Therefore, to avoid injury do not place your player or display near open stairwells, balconies, or wires, and do not sit near objects that could be broken if accidentally hit. · CAREFULLY READ INSTRUCTIONS PROVIDED WITH YOUR DISPLAY AND/OR 3D GLASSES BEFORE 3D VIEWING.

II. PERFORMANCE RELATED · This product is designed to playback Blu-rayTM discs that comply with the 3D specifications of Blu-ray Disc Association. It is not compatible with other 3D specifications. · 3D capable display, 3D eyewear and High Speed HDMI cable (all sold separately) required for playback and English 4 viewing 3D content. · If you route your signal through an AV receiver or other video distribution device they must be 3D capable to support 3D viewing.

Viewing HD content and upconverting DVD content may require an HDCP capable input on your display device. · While up-converting DVD video content may result in a picture that appears to be near HD quality, results may vary depending on content, display and settings. · 1080p capable display required for viewing content in 1080p. · 1080p/24 fps encoded content and an HD display capable of accepting a 1080p/24Hz signal required for viewing 1080p/24 fps content. · Performance of interactive and/or network features may vary due to disc design or content, and may also require an always-on broadband internet connection. Firmware update may be required for some interactive and/or network features. Some features may require additional bandwidth. · BD-LiveTM may require a USB flash drive with available storage capacity of at least 1GB (sold separately). · For Dolby® TrueHD and DTS-HD Master Audio | Essential TM playback, content encoded in Dolby® TrueHD and DTS-HD Master Audio | Essential TM format required. Supported file types: JPEG, MP3, and AVCHD.

Some recordable media, cards or files may not be supported. Deep Color feature as specified in HDMI specification requires compatible Deep Color capable HD display and/or device. Use of HDMI-CEC requires an HDMI-CEC compatible display device. Depending on the specifications of your display device, some or all HDMI-CEC functions may not work even if your display device is HDMICEC compatible. · Products do not play HD DVD discs. · Some features subject to delayed availability. · Because the Blu-rayTM format and 3D specifications use new technologies, certain disc, content, connection and other compatibility and/or performance issues are possible. If you experience such issues, please refer The indicators will go off briefly after power on (except Power icon). To turn on the indicators again, simply touch the sensor field, the indicators will be evolved and light up. 3.

The sensor field is within the rectangular area. 1 2 3 4 NO a b c d Control AC power cord COAXIAL jack HDMI OUTPUT jack LAN jack Function Connect to a standard AC outlet. Output digital audio signals when connecting the coaxial digital cable. Output video/audio signals to a connected TV, monitor or AV amplifier. Connect to a TV, monitor or AV amplifier equipped with HDMI input.

When not using Wifi, use this to connect to a network with an always-on broadband connection. It is reserved for e, we recommend using an IEEE 802.11n certified Wi-Fi® network (access point or wireless router). Notes: - USB Wi-Fi® adapter is required for a wireless connection (not supplied). - This unit is compatible with TOSHIBA's USB Wi-Fi® adapter only (Model name: WLM-12EB1).

- For detailed information, please refer to the device's User's Guide for WLM-12EB1. Connect USB device The USB jack supports USB flash drive, TOSHIBA's USB Wi-Fi® adapter (Model name: WLM-12EB1) and 4 ports USB HUB. A USB flash drive provides an additional memory to software upgrade and enjoy BD-LiveTM bonus content. You can also enjoy playing back MP3/ JPEG/MPEG4 files stored in the USB flash drive. 4 Preparation Always follow the instructions in this chapter in sequence. Note: - Use of controls or adjustments or performance of procedures other than herein may result in hazardous radiation exposure or other unsafe operation. Prepare the remote control 1. Open the USB cover. 2. Connect the USB flash drive or TOSHIBA's USB Wi-Fi® adapter to the USB jack on this product.

Notes: - To enjoy BD-LiveTM bonus content, as your local storage, use a 1 GB or larger USB flash drive. - For some Blu-rayTM discs with BD-LiveTM feature, you may need to plug in the USB flash drive before loading the disc. Otherwise, the disc may not playback. - TOSHIBA does not guarantee 100% compatibility with all USB flash drives. - USB-HUB is used when using USB flash drive and TOSHIBA's USB Wi-Fi® adapter together. 1. Open the battery compartment. 2. Insert one R03 battery with correct polarity (+/-) as indicated. 3.

Close the battery compartment. Notes: - If you are not going to use the remote control for a long time, remove the battery. - Risk of explosion! Keep battery away from heat, sunshine or fire. Never discard battery in fire. · The maximum operable ranges from the unit are as follows.

Connect Power 1. Connect the AC power cable to: - the wall socket. · The product is ready to be set up for use. Notes: Before connecting the AC power cord, ensure you have completed all other connections. Risk of product damage! Ensure that the power supply voltage corresponds to the voltage printed on the back of the unit.

The type plate is located on the back of the unit. - Line of sight: approx. 10 m - Either side of the centre: approx. 7 m within 30° - Above: approx. 7 m within 30° - Below: approx. 7 m within 30° 7m 10 m 7m 11 English Setting up the player English 12 Find the correct viewing input 1. Press 1 to turn on this product. 2. Turn on the TV and switch to the correct video-in input (refer to the TV user manual on how to select the correct input). Initial Setting When you turn on this unit for the first time, you need to follow these steps.

1. A welcome page will be displayed when this product is powered on. 2. Press OK to enter language setting. 3. Select your desired language, resolution and aspect ratio using /, then press OK. 4. Press SETUP to exit the Setup menu. Use the SETUP menu 1. Press SETUP to display the Setup menu when the Blu-ray DiscTM Player is playing or no disc.

And press SETUP to exit the Setup menu. Tip: - When playing high-definition sources, you must press STOP button to enter SETUP interface. 5 Playback Playback Functions Basic Playback 1. Problem No reaction to the remote control. Tip Connect the product to the power outlet. Point the remote control at the product. Insert the battery correctly. Insert new battery in the remote control.

No video signal on the display device. Turn on the TV. Set the TV to the correct external input. Select the correct video resolution. Set TV System of TV correctly.

Incorrect or no audio / video signal on the amplifier/display device via HDMI cable. No high-definition video signal on the TV. If the unit is connected to the unauthorized display device with an HDMI cable, the audio/video signal may not be output.

Ensure the amplifier/display devices setting match the Blu-ray DiscTM player. Does the disc contain high-definition video? High-definition video is not available when the disc does not contain it. Does the TV support high-definition video? High-definition video is not available when the TV does not support it. No audio signal from the loudspeakers of the audio system. No 3D effectiveness Turn on the audio system. Set the audio system to the correct external input. Increase the volume level of the audio system.

Set HDMI 3D to Auto. Connecting by HDMI cable. Connecting to a 3D TV. Playback a 3D disc. Wear 3D glasses. Cannot play back a disc. Make sure that the Blu-ray DiscTM player supports the disc. Make sure that the Blu-ray DiscTM player supports the region code of the DVD or Blu-ray DiscTM. For DVD+RW/+R or DVD-RW/-R, make sure that the disc is finalized. Clean the disc.

English 26 Cannot play back JPEG files from a disc. Cannot play MP3 files from a disc. Make sure that the disc was recorded in the JPEG/ISO format. Make sure that the disc was recorded in the ISO format. Make sure that the bitrate of the MP3 files is between 8 and 320 kbps.

Make sure that the sample rate of the MP3 files is 32kHz, 44.1kHz or 48kHz. Cannot find a JPEG file. Make sure that the selected group (folder) does not contain more than 9,999 files for DVD and 999 files for CD. Make sure that the file extension is .

jpg, .JPG, .jpeg or .JPEG. Make sure that the selected folder does not contain more than 9,999 files for DVD and 999 files for CD. Make sure that the file extension is .mp3 or .MP3. When you upgrade the system with USB flash drive, you should make a new folder named UPG_ALL, and copy the upgrade file into this folder. When you upgrade the system by network, please make sure the player is connected to the internet when upgrading the SW.

Cannot find a MP3 file. Cannot upgrade SW. Sometimes the options of setup menu cannot be selected. When playing a DVD disc or Blu-ray DiscTM, press STOP button once, the player will go into stop resume mode, meanwhile you cannot change some settings in setup menu such as language subitem menu, audio, subtitle etc. If you want to change that, press STOP button twice, the player will go into full stop mode, then you can do it. 27 English 9 Glossary English 28 Aspect ratio Aspect ratio refers to the length to height ratio of TV screens. The ratio of a standard TV is 4:3, while the ratio of a high definition or wide TV is 16:9. The letterbox allows you to enjoy a picture with a wider perspective on a standard 4:3 screen. AVCHDTM AVCHDTM is a new format for high definition video camcorders which can record and play high-resolution HD images. AVI Audio Video Interleave, known by its acronym AVI, is a multimedia container ormat.

AVI files can contain both audio and video data in a file container that allows synchronous audio-with-video playback. BD-JavaTM With some Blu-ray DiscTM which support JavaTM applications, you can enjoy the interactive functions such as games or interactive menus. BD-LiveTM BD-LiveTM is a BD-video (BD-ROM version 2 Profile 2.0/Profile 1.1) which contains new functions (e.

g. Internet connection), in addition to the BONUSVIEWTM function. Blu-ray 3DTM Blu-ray 3DTM is a BD-video (BD-ROM version 3 Profile 5.0) which contains 3D view function, in addition to the BD-Live/ BONUSVIEW function. Blu-ray DiscTM Blu-ray DiscTM is a next generation optical video disc capable of storing five times more data than a conventional DVD.

The large capacity makes it possible to benefit from the features such as high-definition videos, multichannel surround sound, interactive menus and so on. BONUSVIEWTM This is a Blu-ray DiscTM-Video (Final Standard Profile or Profile 1.1) that supports interactive content encoded on the disc, such as picture-in-picture. This means you can play the primary video and secondary video simultaneously. Chapter Just as a book is split up into several chapters, a title on a Blu-ray DiscTM-video or DVD-video is usually divided into chapters. Digital Audio Digital Audio is a sound signal that has been converted into numerical values. Digital sound can be transmitted through multiple channels. Analogue sound can only be transmitted through two channels. Dolby® Digital The system to compress digital sound developed by Dolby Laboratories. It offers you sound of stereo (2ch) or multichannel audio.

Dolby® Digital Plus Dolby Digital Plus is the next generation digital audio compression technology developed as an extension to Dolby Digital. Blu-ray DiscTM supports 7.1 multi-channel surround sound output. Dolby® TrueHD Dolby TrueHD is a lossless coding technology developed for next generation optical discs. Blu-ray DiscTM supports 7.1 multi-channel surround sound output. DTS® DTS is a multi-channel surround sound system. By connecting to DTS decoder, you can enjoy movie dynamic and realistic sound like movie theater. DTS surround sound technologies were developed by DTS, Inc. DTS-HD® DTS-HD is a lossless coding technology developed as an extension of the original DTS Coherent Acoustics format.

Blu-ray DiscTM supports 7.1 multi-channel surround sound output. DTS-HD Master AudioTM A disc encoded with DTS-HD Master Audio delivers ALL of the information from the original master recording -- bit-for-bit, it's identical to what the sound engineers laid down. Audio doesn't get any better than this. HDCP High-bandwidth Digital Content Protection.

This is a specification that provides a secure transmission of digital contents between different devices (to prevent unauthorized copyright.) HDMI® High-Definition Multimedia Interface (HDMI) is a high-speed digital interface that can transmit uncompressed high definition video and digital multichannel audio. It delivers high quality picture and sound quality. HDMI is fully backward compatible with DVI. As required by the HDMI standard, connecting to HDMI or DVI products without HDCP (High bandwidth Digital Content Protection) will result in no Video or Audio output.

IP Address A set of numbers which are assigned to devices participating in a computer network. JPEG A very common digital still picture format. A still-picture data compression system proposed by the Joint Photographic Expert Group, which features small decrease in image quality in spite of its high compression ratio. Files are recognized by their file extension `.jpg' or `.jpeg'. LAN (Local Area Network) A group of linked devices in a company, school or home. Indicates the boundaries of a particular network. Local storage This storage area is used as destination for storing additional contents from BD-LiveTM enabled Blu-ray DiscTM-Video. MKV The Matroska Multimedia Container is an open standard free container format, a file format that can hold an unlimited number of video, audio, picture or subtitle tracks inside a single file.

It is intended to serve as a universal format for storing common multimedia content, like movies or TV shows. MP3 A file format with a sound data compression system.
