HEALTH/SAFETY-RELATED IMPORTANT SAFETY INFORMATION CONCERNING 3D VIEWING • If you or any viewer experiences the following symptoms or any other discomfort from viewing 3D video images, stop viewing and contact your health care provider: Convulsions Eye or muscle twitching Loss of awareness Altered vision Involuntary movements Disorientation Eye Strain Nausea/Vomiting Dizziness Headaches Fatigue.

• Some viewers may experience a seizure or blackout when exposed to certain flashing images or lights contained in certain 3D television pictures or video games. Anyone who has had a seizure, loss of awareness, or other symptom linked to an epileptic condition, or has a family history of epilepsy, should contact a health care provider before using the 3D function. • If you feel eye fatigue or other discomfort from viewing 3D video images, stop viewing and take a rest until the condition is eliminated. • Due to the possible impact on vision development, viewers of 3D video images should be age 6 or above. Children and teenagers may be more susceptible to health issues associated with viewing in 3D and should be closely supervised to avoid prolonged viewing without rest. • Avoid use of the 3D function when under the influence of alcohol. • Watching the screen while sitting too close for an extended period of time may cause eye strain. Consult your display manual to determine the ideal viewing distance. • Viewing in 3D may cause dizziness and/or disorientation for some viewers. Therefore, to avoid injury do not place your player or display near open stairwells, balconies, or wires, and do not sit near objects that could be broken if accidentally hit.

• CAREFULLY READ INSTRUCTIONS PROVIDED WITH YOUR DISPLAY AND/OR 3D GLASSES BEFORE 3D VIEWING.

II. PERFORMANCE RELATED • This product is designed to playback Blu-ray™ discs that comply with the 3D specifications of Blu-ray Disc Association. It is not compatible with other 3D specifications. • 3D capable display, 3D eyewear and High Speed HDMI cable (all sold separately) required for playback and viewing 3D content. • If you route your signal through an AV receiver or other video distribution device they must be 3D capable to support 3D viewing. Viewing HD content and up-converting DVD content may require an HDCP capable input on your display device. • While up-converting DVD video content may result in a picture that appears to be near HD quality, results may vary depending on content, display and settings. □ English 4 • 1080p capable display required for viewing content in 1080p. • 1080p/24 fps encoded content and an HD display capable of accepting a 1080p/24Hz signal required for viewing 1080p/24 fps content.

• Performance of interactive and/or network features may vary due to disc design or content, and may also require an always-on broadband internet connection. Firmware update may be required for some interactive and/or network features. Some features may require additional bandwidth. • BD-Live™ may require a USB flash drive with available storage capacity of at least 1GB (sold separately). • For Dolby® TrueHD and DTS-HD Master Audio \ Essential™ playback, content encoded in Dolby® TrueHD and DTS-HD Master Audio \ Essential™ format required.

Supported file types: JPEG, MP3, and AVCHD. Some recordable media, cards or files may not be supported. Deep Color feature as specified in HDMI specification requires compatible Deep Color capable HD display and/or device. Use of HDMI-CEC requires an HDMI-CEC compatible display device.

Depending on the specifications of your display device, some or all HDMI-CEC functions may not work even if your display device is HDMICEC compatible.

• Pd with progressive scan output. UHD (2160p) This player supports the high definition 1080/24p upconverting to UHD (3840x2160p) video signal output. If you connect a UHD (3840x2160p) compatible TV to the HDMI jack on your player via the High Speed HDMI cable, you can enjoy the 1080/24p upconverting to UHD (3840x2160p) video images. BD-Live™ Connect this player to the movie studios website via the LAN jack to access a variety of up-to-date content (e.g. refreshed previews and exclusive special features). Blu-ray Disc™ Java Blu-ray Disc™ Java (BD-J) Application the BD-ROM format supports Java for interactive functions. An HDMI cable carries both video and audio signals. If you wish to use TV speakers, you do not need to make an additional audio connection. hub or broadband router LAN cable (not supplied) HDMI cable (not supplied) (Sample Illustration) Connecting Connecting via a wired router Notes: • Do not connect a modular phone cable to the LAN jack. D • Follow the connection configurations instructions F from your telecommunication carrier or Internet service provider.

(Sample Illustration) Connecting to a TV - HDMI cable Connecting to the digital amplifier/ receiver Route the sound from this player to other device to enhance audio output. Connect a coaxial cable from the COAXIAL jack on this product to the COAXIAL jack on the device. Option 2: Connecting via the built-in Wi-Fi® device and a wireless access point or router Your Blu-ray Disc™ player has an integrated Wi-Fi® device and antenna. No physical connection to the wireless router is necessary. Wireless access point Digital audio coaxial cable (not supplied) Digital AV receiver/amplifier (Sample Illustration) Connecting to a digital AV receiver/amplifier Connecting to your Home network Your Blu-ray Disc™ player can be connected to your home network: Option 1: Connecting via wired router Option 2: Connecting via the built-in Wi-Fi® device and a wireless access point or router Note: • Signal a wireless network provides the best U performance because the attached device and player are connected directly to the network and are not subject to radio frequency interference. (Sample Illustration) Connecting to a wireless access point or router • Configure your player to access the wireless access point or router. • The network configuration and connection method may vary depending on the equipment in use and the network environment. Your Blu-ray Disc™ player is equipped with an IEEE 802.11n wireless module, which also supports the 802.11a/b/g/n standards.

For the best wireless performance, we recommend using an IEEE 802.11n Wi-Fi CERTIFIED™ network (access point or wireless router). Notes: • Do not use a wireless IP sharer that supports IEEE 802.11a/b/g/n. (n is recommended for stable operation of the wireless network.) • Wireless LAN, in its nature, may cause interference, depending on the use condition (AP performance, distance, obstacle, interference by other radio devices, etc.). • Do not set the wireless IP sharer to Infrastructure mode. S Adhoc mode is not supported. • When applying the security key for the AP (wireless WIP sharer), only the following is supported.

1. Authentication Mode: WPA2PSK, WPA2PSK 2. Encryption Type: WEP, TKIP, AES 11 English Connecting to a TV Connecting USB device Connect the USB device to the rear side of the player. The USB input supports USB flash drives (some Flash drives may not be compatible). USB flash drives can be used to enjoy playback of Photo/Video/Music files (shown in compatible file formats table), and software upgrades (if available). English USB device (Sample Illustration) Connecting a USB device Notes: • Do not enjoy BD-Live™ bonus content, as your local T storage, use a 1 GB or larger USB flash drive. • For some Blu-ray™ discs with BD-Live™ feature, you may need to plug in the USB flash drive before leading the disc. Otherwise, the disc may not playback. • TOSHIBA does not guarantee 100% compatibility with all USB flash drives. • The manufacturer will not be responsible for any damage or data loss on USB flash drives.

Using AC adapter The supplied AC adapter operates on AC 100-240V. Using an adapter other than the one supplied with the unit may damage the unit. to AC outlet to DC IN 12V jack (Sample Illustration) Using AC adapter Notes: • Do not use if you are not going to use the unit for an extended period of time, disconnect the adapter from the wall outlet. • Do not handle the adapter power cord with wet hands. 12 4 Preparation Always follow the instructions in this chapter in sequence. Note: - Do not use of controls or adjustments or performance U of procedures other than herein may result in hazardous radiation exposure or other unsafe operation. Setting up the player Find the correct viewing input Prepare the remote control 1. Open the battery cover down. Initial Setting

When you turn on this unit for the first time, or restore all settings to factory defaults, the system will prompt you to perform Easy Setup. 1. Follow the on-screen instructions to customize the F following settings to your preference: OSD Language Resolution Aspect ratio Network Interface Portal Auto Start 2. After setting, press OK to confirm and exit. (Sample Illustration) Remote control - Opening the battery cover 2. Insert two AAA batteries with correct polarity (+ / -) I as indicated. 3.

Close the battery cover. Notes: - Do not use if you are not going to use the remote control for a long time, remove the batteries. - Do not use old and new or different types of D batteries in combination. - Risk of explosion! Keep battery away from heat, R sunshine or fire. Never discard battery in fire. Use the SETTING menu 1. Press to display the setup screen in stop mode or no disc playback. T The maximum operable ranges from the unit are as follows. - Line of sight: approx. 10 m (original state) L - Other side of the centre: approx. 7 m within 30° E (original state) - Above: approx. 7 m within 30° (original state) A - Below: approx. 7 m within 30° (original state) B 7m 7m 10m 10m 7m 7m 13 English 1. Press 1 to turn on this product. 2.

Turn on the TV and switch to the correct video-in T input (refer to the TV user manual on how to select the correct input). 5 Playback Playback Functions 3. Press the B/X button to resume normal playback. Instant Search and Instant Replay 1. During playback, press and hold the M button, D you can search 30 seconds forward. 2. During playback, press and hold the m button, D you can instant replay the content from 10 seconds before. English Basic Playback 1.

Press 1 button on the front panel or the remote control, your Blu-ray Disc™ player will turn on. The unit will take around 20 seconds to warm up. When the power supply is first switched on, the setting of the Power Down Mode is in Normal mode. 2. Turn on the TV, and then select the input setting T on the TV that matches the connection method you used to connect your player. 3. Insert a disc label-side up into the disc slot.

4. The disc will load automatically and begin to play. The disc loading time depends on the types of disc you are loading, and loading a Blu-ray Disc™ will take longer time. 5. If the disc does not start playing automatically, please I press B/X to start playback.

6. If a Blu-ray Disc™ or DVD menu displays, use cursor I buttons to select PLAY. Then, press OK button to confirm. 7. To eject the disc, press Z. Previous and Next 1. During playback, press the button . to skip back D to the beginning of the current chapter or track or the previous chapter or track.

Use NUMBER keys to enter four digit old password. U The default password is “0000”. 2. Enter the new password. 3. Enter the new password again to confirm. 4. If you forget the password, you can erase your current password by entering the default password. [Parental Control] Restricts access to discs that are unsuitable for children. These discs must be recorded with rating. 1.

Use NUMBER keys to enter the password. 2. Select a rating level, then press OK. 3. Items 1 2 3 4 5 6 7 [Kid safe] [G] [PG] [PG-13] [PG-R] [R] [NC-17] Description Safe for kids All children and general guidance Parental guidance Parental guidance for children under 13 Parental guidance recommended Restricted viewing No one 17 and under allowed Adult only 8 [Adult] Display 1. In Setting menu, use v/V to select Display and Press OK.

2. Press v/V to select an option and press OK. Notes: - Rated discs above the level you set in [Parental R 19 English 3. Use v/V to select the desired option, and press OK to confirm. 4.

Press b or the BACK button to return to the previous menu. [TV Screen] Select the screen format according to how you want the picture to appear on the TV. {16:9 Full} - For a disc with the aspect ratio of 4:3, the output video is stretched into 16:9 full screen.

[You're reading an excerpt. Click here to read official TOSHIBA](http://yourpdfguides.com/dref/5772599)

[BDX5500 user guide](http://yourpdfguides.com/dref/5772599)

<http://yourpdfguides.com/dref/5772599>

{16:9 Normal} - For a disc with the aspect ratio of 4:3, the output video is resized vertically to match what will be seen on the display. {4:3 Pan&Scan} - For standard TV, it displays a wide picture on the entire screen and cuts off the redundant portions. {4:3 Letterbox} - For standard TV, it displays a wide picture with two black borders on the top and bottom of 4:3 screen. [Resolution] Select a video output resolution that is compatible with your TV display capability. {Auto} - Select the most suitable resolution according to the TV. {480i/576i, 480p/576p, 720p, 1080i, 1080p, UHD(2160p)} - Select a video resolution setting that is best supported by the TV. See TV manual for details.

Notes about UHD(2160p): If you want the UHD(3840x2160p) output, it should fulfill below 3 conditions: 1. TV supports the UHD(3840x2160p) display; 2. Player choose the "UHD(2160p)" option in the setting menu; 3. Media must be the 1080/24p video. {On} - Enable 1080/24p video resolution setting. {Off} - Disable 1080/24p video resolution setting. Notes about HDMI 1080/24p: If you want the 1080/24p output, it should fulfill below 3 conditions: 1. TV supports the 1080/24p display; 2. Player choose the 1080/24p option in the setting P menu; 3. Media must be the 1080/24p video.

M Note: - This resolution becomes effective only when the T playing Blu-ray Disc™ contents are Film source. [Blu-ray 3D Mode] Select whether to play a Blu-ray Disc™ with 3D contents in 3D Mode. {Auto} - The 3D Blu-ray Disc™ is played in 3D mode if your product detects a TV that supports it. It is played in 2D mode if your product detects a TV which can not support it. {Off} - The 3D Blu-ray Disc™ is played in 2D mode at all times.

Select this option to view a picture without 3D effect or when a TV cannot support 3D Blu-ray™ discs. English Note: - This resolution becomes effective only when the playing Blu-ray Disc™ contents are Film source. [Color Space] Select a predefined Color Space of picture. {RGB} - Select RGB Color Space. {YCbCr} - Select YCbCr Color Space.

{YCbCr422} - Select YCbCr422 Color Space. {Full RGB} - Select Full RGB Color Space. [HDMI Deep Color] This feature is available only when the display device is connected by a HDMI cable, and when it supports Deep Color feature. {On} - Enable HDMI Deep Color. {Off} - Disable HDMI Deep Color.

[HDMI 1080/24p] Movies are recorded on film at a rate of 24 pictures (frames) per second. Many of the movies on Blu-ray™ discs are placed on the discs at this frame rate. However, not all TVs can display 24 progressive frames/second of video. If the TV cannot display this frame rate, you need to turn off HDMI 1080/24p. 20 7 Network Functional description N Media Server Search With this player connected to network, you can play video, music and photo files from the media server.

1. Connect this player to server network and set the C Media Server Search to Enable. See Network on page 18 for details. 2. Press to enter the setup screen and use v/V to select Video, Music, or Photo, then press OK. The Media Center menu appears on the screen. 3. Press v/V to select Media Server list, and then press OK. 4. Press v/V to a kind of media (Photo, Music, Video) and press OK.

It should match the selection on the setup screen. (If you selected Video on the setup screen, you also should select Video here.) 5. Press v/V to select a file (or folder) and press OK or B/X to start playback. Navigating the ePortal Menu A ePortal page is easy to navigate and provides graphical access to a variety of services such as Apps, Internet, Videos, Music, Photos, Portal Settings and others.

When you first entered to the ePortal menu, you will be prompted by the setup wizard for account set up under Toshiba Cloud Service. Follow the on-screen setup instructions and customize your preferences. Note: - You need to configure a home network before using Y this feature. 1. Press the button on the remote control or select Portal in the setup screen to display the Home screen.

2. Press the b/B/v/V (arrow) buttons to select the desired icon and press the OK button. 3. To close a menu, press the EXIT button. ePortal Home Page • Player Settings - customizes your player's options. • Internet - access the Internet for searching, browsing, and bookmarking your favorite content. • Disc - plays the disc that is loaded into the disc tray. • Videos - view your video content. • Music - play and listen to your music. • Photos - view your personal photos.

• Portal Settings - customizes the ePortal settings. • Apps - access the Network features, such as A Netflix® and others. Notes: - Some features require an always-on broadband Internet connection, firmware update and/or additional bandwidth dedicated to this product. Third party Internet services not provided by Toshiba, may change or be discontinued at any time and may be subject to Internet service provider restrictions. Toshiba makes no warranties, representations, or assurances about the content, availability or functionality of third-party content or services. Use of third party Internet services may require the creation of a separate account through a computer with Internet access and payment of one-time and/or recurring charges and membership. Not all services or content may be available on this product, in your country or with your language. In order to experience the full capabilities of this product, fully compatible devices may be required. For more information, visit <http://www.toshiba.eu/cloudtv-bluray>.

- This service may be forcibly blocked according to Note: - Not all media formats are supported. N Miracast™ This feature allows you to enjoy videos, music and photos on your Miracast™ compatible device (e.g. smartphone) by using a Wi-Fi Direct® connection without using an access point.

To use this feature: 1. Turn on your Miracast™ compatible device (e.g. T smartphone). 2.

Then configure the player: 1. Enter the Network menu and set the Wi-Fi Direct® to Enable. 2. Press the button to enter the setup screen and use the v/V button to select Miracast™, and then press OK to wait for the connection from your Miracast™ compatible device. 3. In your Miracast™ compatible device, set the O Miracast™ compatible function to On and search for the "TOSHIBA BDPL" from the list of discovered devices and select it. 4. In the player, the connection confirming screen is O displayed, then select OK to accept the connection. It may take a few seconds to connect. 5.

After connecting successfully, you can now enjoy A videos, music and photos on you Miracast™ compatible device from the unit. Notes: - This player is a Miracast™ certified Wi-Fi Alliance® T device; connection and/or compatibility issues with other Wi-Fi CERTIFIED Miracast™ devices are possible. Issues include, but not limited to: • Non-transfer of certain kind of data through the n mirroring function of this player.

mp3 or .MP3. 25 English Problem Tip Problem Cannot upgrade SW. Tip When you upgrade the system with USB flash drive, you should make a new folder named UPG_ALL, and copy the upgrade file into this folder. Sometimes the options of setup When playing a DVD disc or Blu-ray Disc™, press STOP button menu cannot be selected.

once, the player will go into stop resume mode, meanwhile you cannot change some settings in setup menu such as language subitem menu, audio, subtitle etc. If you want to change that, press STOP button twice, the player will go into full stop mode, then you can do it. Cannot connect to the network. Check that the LAN cable connection is properly made. Turn on the modem or broadband router. Check that the broadband router and/or modem is correctly connected.

Check the Network Connection Setting. English 26 10 Glossary Aspect ratio Aspect ratio refers to the length to height ratio of TV screens. The ratio of a standard TV is 4:3, while the ratio of a high definition or wide TV is 16:9. The letterbox allows you to enjoy a picture with a wider perspective on a standard 4:3 screen.

AVCHD™ AVCHD™ is a new format for high definition video camcorders which can record and play high resolution HD images. AVI Audio Video Interleave, known by its acronym AVI, is a multimedia container format. AVI files can contain both audio and video data in a file container that allows synchronous audio-with-video playback. BD-Java™ With some Blu-ray Disc™ which support Java™ applications, you can enjoy the interactive functions such as games or interactive menus. BD-Live™ BD-Live™ is a BD-video (BD-ROM version 2.5 Profile 2) which contains new functions (e.g. Internet connection), in addition to the BONUSVIEW™ function. Blu-ray 3D™ Blu-ray 3D™ is a BD-video (BD-ROM version 3 Profile 5.0) which contains 3D view function, in addition to the BD-Live/BONUSVIEW function.

Blu-ray Disc™ Blu-ray Disc™ is a next generation optical video disc capable of storing five times more data than a conventional DVD. The large capacity makes it possible to benefit from the features such as high definition videos, multichannel surround sound, interactive menus and so on. BONUSVIEW™ This is a Blu-ray Disc™-Video (Final Standard Profile or Profile 1.1) that supports interactive content encoded on the disc, such as picture-in-picture. This means you can play the primary video and secondary video simultaneously.

Chapter Just as a book is split up into several chapters, a title on a Blu-ray Disc™-video or DVD-video is usually divided into chapters. Digital Audio Digital Audio is a sound signal that has been converted into numerical values. Digital sound can be transmitted through multiple channels. Analogue sound can only be transmitted through two channels. Dolby® Digital The system to compress digital sound developed by Dolby Laboratories.

It offers you sound of stereo (2ch) or multichannel audio. Dolby® Digital Plus Dolby Digital Plus is the next generation digital audio compression technology developed as an extension to Dolby Digital. Blu-ray Disc™ supports 7.1 multi-channel surround sound output. DTS® DTS is a multi-channel surround sound system. By connecting to DTS decoder, you can enjoy movie dynamic and realistic sound like movie theater. DTS surround sound technologies were developed by DTS, Inc. DTS-HD® DTS-HD is a lossless coding technology developed as an extension of the original DTS Coherent Acoustics format. Blu-ray Disc™ supports 7.1 multichannel surround sound output.

DTS-HD Master Audio™ A disc encoded with DTS-HD Master Audio delivers ALL of the information from the original master recording — bit-for-bit, it's identical to what the sound engineers laid down. Audio doesn't get any better than this. HDCP High-bandwidth Digital Content Protection. This is a specification that provides a secure transmission of digital contents between different devices (to prevent unauthorized copyright).
