Transcend® **RecoverX™** Software

(Windows Version 1.2)
(Mac Version 1.0)

Transcend memory and storage products are built to extremely high quality standards to ensure long-term reliability. However, accidents are always bound to happen, and one wrong click can erase your precious photo collection. RecoverX is an incredibly useful software tool that allows you to recover accidentally deleted image files from your Transcend brand memory products. With RecoverX, photos previously thought lost forever can now be brought back to cherish and enjoy!

..... 14 2 Hardware Requirements 1. Transcend memory card 2. Memory card reader Supported Operating Systems RecoverRx supports the following operating systems: . . . Windows® 2000 Windows® XP Windows Vista® · Windows® 7 · Mac® OS 10.5 or later NOTE: You must have Administrator privileges to run the RecoverRx software in Windows 7 and Vista. 3 Getting Started You do not have to install any software on your computer to run RecoverRx. Download RecoverRx from www.transcend.com.tw/downloads, unzip the file and double-click "RecoverRx.exe" to begin (for Mac users, the filename is "RecoverRx.app"). 4 Recovering Lost Files Windows 1. @ @ 2. Double-click "RecoverRx.exe" to start the program. 3. Choose a location for your recovered files by clicking Settings (default location is C:\Saved Files\). The directory path must be in English alphanumeric characters. . NOTE: Never select a destination folder on the memory card you are recovering files from. Doing so can render lost files permanently unrecoverable. 5 4. @ @ @ @ @ @ @ @ @ @ @ @ @ @ @ @ 2. Double-click "RecoverRx.app" to start the program.

3. @ @ @ @ Doing so can render lost files permanently unrecoverable. 8 4. @ @ @ @ @ @ @ @ @ @ @ @ @ @ Click OK to continue and scan a different partition or exit the program. 10 Closing the Program To close RecoverRx, simply click on the "Exit" icon in the lower left-hand corner of the window. 11 Precautions 1. When changing the folder path for recovered files, NEVER select the memory card you are recovering file from as the destination drive. 2. The destination folder path for recovered files must be completely in English. Ex: "C:\Recovered Files\CF Card Pics\" RecoverRx will not be able to save recovered files to a location with folder or subfolder names that contain non-English characters.

3. Never unplug the memory card or the card reader during the recovery process. 4. For best results, do not use the "Format" function on your digital camera (even if instructed to), as this will greatly reduce your chances of recovering lost data. 12 FAQ doesn' Q: RecoverRx doesn't detect my memory card. A: Your memory card might not be inserted correctly into the card reader. Try reinserting it to make sure it fits all the way inside the reader. If you are using a USB card reader, try disconnecting it from the USB port for a few moments and then plug it back in. Q: Unknown." A partition on my memory card is detected as "Unknown."

" Can I still recover data from it? A: Partitions that are bootable or use file systems other than FAT16 or FAT32 will show up as "Unknown" in the RecoverRx interface. @ @ How hasn' long does the recovery process usually take? @ @ Try waiting patiently a little longer for the process to complete. @ @ What's wrong? A: You might not have Administrator privileges on the computer you are using. To run RecoverRx in Windows 7 and Vista, click "Allow" when prompted for Administrator privileges. 13 More Help If you cannot find the answer to your problem in this manual and are having difficulty with the RecoverRx software or your Transcend card reader, Please visit our Tech Support website at www.transcendusa.com/support © 2010 Transcend Information, Inc.
