Manual abstract:

We want to introduce children to reading in a dynamic, engaging way that will make them readers for life. That's why we created V.Reader™, where reading comes alive with animated storytelling! In these animated books, stories come to life through colorful scenes, voices, sounds and music. V.Reader™ creates a magical world that keeps children interested in the story while they learn letters, words, comprehension, and more! Watching their favorite characters in fun-loving stories engages children in play, as they gain the tools to grow from a pre-reader into a fluent and confident reader. As their reading skills grow, their self-esteem grows, and their appetite for reading will, too! With a USB connection to a computer, you can even track your child's reading progress, and download and print awards for each completed story. At VTech®, we are dedicated to helping kids discover the magic of reading. We thank you for trusting
