..... @@@@The TWAIN driver for Microsoft Windows 2000/XP provides scanning from WorkCentres/Pros to applications that are compliant with the TWAIN standard.

**Installation Requirements** The following are required for installing TWAIN drivers: . . . The workstation must be running the Microsoft Windows 2000 or XP Professional Operating System. You must possess Administrator rights on the workstation to install the driver. Domain and local user accounts are supported. Note that some older WorkCentre Pros do not support domain accounts. . . . . The workstation must have TCP/IP enabled and be connected to the same Workgroup as the WorkCentre/Pro.

Simple File Sharing must be disabled on the workstation to allow for proper device authentication. The WorkCentre/Pro must be connected, configured, and functioning as a network scanner with TCP/IP and HTTP enabled. The WorkCentre/Pro must be configured with the SNMP GET community string set to "public" or the TWAIN driver will not detect the device properly. For WorkCentres/Pros that support the Scan Template Management Service, you must enable this service on the device. SSL must be enabled on the device prior to enabling the Scan Template Management Service.

Windows XP Professional Service Pack 2 has Windows Firewall turned on by default or your site may have Windows Firewall enabled for security reasons. @@@@For Windows XP Classic view, continue with step 2. 2. Open Scanners and Cameras. Add an imaging device for all Windows XP views. For Windows 2000, click Add. 3. The Scanners and Camera Installation Wizard opens. Click Next. 4.

Click Have Disk and browse to the location of the installation files. 5. Open the appropriate .inf file for the WorkCentre/Pro. 6. Select a WorkCentre/Pro TWAIN Scanner from the model list. Click Next. For Windows 2000, choose a port type. Select "Automatic Port Select" and click Next. 7. Accept the default scanner name or enter a new name. Click Next. 8. Click Finish. Files are copied to the PC. 9. For Windows XP, the Hardware Update Wizard opens. Click Next. For Windows 2000, a dialog opens. 10.

Enter the Host Name or IP Address of the desired scanner. Click Confirm. @@11. @@12. Click Next and then click Finish to complete the installation. 13. @@@@Common names such as Administrator or Guest cannot be used. To set your profile and access driver properties: 1. @@For Classic view or Windows 2000, continue with step 2. 2.

Open Scanners and Cameras. 3. @@4. Select the Login Setup tab. This tab displays the default settings for your scan template. @@The template name begins with an "@" symbol. @@@@JPG--A graphic format ideal for complex pictures or photographs. Each document page becomes a separate JPG image. @@Each document page becomes a separate TIFF image. @@PDF--A universal file format that preserves all fonts, formatting, graphics, and color in a source document regardless of the application and platform used to create it.

All pages in the document are saved in a single file. Resolution: The resolution setting affects the amount of detail reproduced on scanned images. Sides To Scan: Select whether your original document is one-sided or two-sided. . . 3 . Original Size: If you scan a document from the platen glass rather than the document feeder, you can specify a particular scan size. This enables you to scan only a specific portion of a document page.

Delete Image After Import: If this option is checked, the scanned image is deleted and is no longer visible once it has been imported into an application. . 6. @@@@Click Apply or OK when finished. @@@@2. @@3.

@@4. @@When you import a scanned image into an application, the scanned image is placed and is viewable in the Xerox Scan Utility window of the TWAIN driver interface. Property information about a scanned image appears when the cursor is hovered over an image. The following options are available for the scanned images: Refresh--updates the scanned images which appear in the window. Retrieve--imports a scanned image into the application.

Delete--removes a scanned image from the window. Scanning Using an Application's Interface 4 Scanning Using an Application's Interface You can scan and import a document into an application that does not use the Xerox Scan Utility interface or supplies its own scan user interface. Some steps of this procedure that pertain to the import options may vary by application. To scan a document into an application: 1. Create a user template on the WorkCentre/Pro from which you intend to scan by performing the steps in the Configuring the TWAIN Driver procedure.

2. At the PC, open the application you are using to import the scan document. 3. @@4. @@5. @@@@The device template that you created at the device (step 1) is overwritten with the scanning options selected in the application. 6. At the WorkCentre/Pro control panel, select All Services > Network Scanning, then select the template. The format for the template name is <username>\_<domain or PC name>\_<suffix>. 7. @@@@8. Scan your document without overriding any.
