This owner's manual assumes that you are already familiar with basic Windows/Mac operations.

If you are not, please refer to the owner's manual which came with your Windows/Mac software before using the MOXF6/MOXF8 Editor. For information about hardware requirements, the interconnection of devices and the installation of the MOXF6/MOXF8 Editor software, refer to the separate Installation Manual as well as the Owner's Manual for the respective MIDI device. MOXF6/MOXF8 Editor Owner's Manual 1 What is the MOXF6/MOXF8 Editor? What is the MOXF6/MOXF8 Editor? MOXF6/MOXF8 Editor is a convenient tool which lets you edit and save the various parameters of your MOXF6/MOXF8 tone generator. These include Voice and Mixing parameters (edited in the Voice or Mixing mode of the MOXF6/MOXF8) such as Volume, Pan, EG, and Cutoff and other settings. Thanks to its easy-to-understand graphical interface, you can edit various parameters of the MOXF6/MOXF8 right from your computer — using the mouse to adjust the virtual knobs, sliders, and buttons and entering values from the computer keyboard.

Finally, all the changes you have made can be saved to your computer or transmitted to the MOXF6/MOXF8 instrument. The MOXF6/MOXF8 Editor, based on the "VST3 technology" by Steinberg, works as a VST3 plug-in with the Cubase series. The MOXF6/MOXF8 Editor also works the same way as other VST instrument software, allowing you to save the edited settings of the MOXF6/MOXF8, or use them for another project. In addition, you can handle the MOXF6/MOXF8 Voices in the Media Bay window in Cubase series when using the MOXF6/MOXF8 Editor with Cubase series, allowing you to search for, listen, and load the MOXF6/MOXF8 Voices within Media Bay in Cubase series. The MOXF6/MOXF8 Editor provides a comprehensive and seamless music production environment — making the use of hardware and software both easier and much more efficient.

And, the MOXF6/MOXF8 Editor can also be used as a stand-alone application. The MOXF6/MOXF8 Editor lets you adjust the hue as desired (page 6). This manual uses example screen shots having the most universal color visibility, allowing the manual to be easily viewed by many people having different types of color recognition. Default Adjusted to universal hue MOXF6/MOXF8 Editor Owner's Manual 2 Data Structure of the MOXF6/MOXF8 Editor Data Structure of the MOXF6/MOXF8 Editor The MOXF6/MOXF8 Editor lets you create the following data and save them as a single file (extension: .X6E). •••• Current Global data (latest status of edited global parameters) Current data in the Voice mode (latest status of edited Voice) Current data in the Song/Pattern mode (consisting of Mixing setup, latest status of edited Voice and 16 Mixing Voices) User Voice data (consisting of three Normal Voice Banks and one Drum Voice Bank) Current settings includes the latest settings of the Common and Element parameters for the Voice last assigned to each of Parts 1 – 16, as well as Mixing parameter settings such as Voice assignment, pan, volume and effect for each Part. Among the Voice Banks, only the Mixing Voice Bank data belongs to the Current settings. The MOXF6/MOXF8 Editor lets you edit parameters (including Element parameters) of the Voice assigned to each Part and save the latest edit status as a file without storing it as a User Voice or a Mixing Voice. This means that you can easily recall the latest status of the previous edit simply by opening the file. n The MOXF6/MOXF8 Editor handles the Global data which includes some of the parameters shown on the "G" row in the Mixer section and all the parameters in the Global Settings of the Parameter Category section (pages 19 and 27).

The diagram illustrated below indicates the structure of the data created via the MOXF6/MOXF8 Editor, the structure of the data stored in the internal memory of the MOXF6/MOXF8 instrument and the relationship between those two types of data. MOXF6/MOXF8 Editor Owner's Manual 6 An Example of MOXF6/MOXF8 Editor in Use: Editing in the Voice mode An Example of MOXF6/MOXF8 Editor in Use There is no single way to use the many components in the MOXF6/MOXF8 Editor. Your editing needs and preferences may differ; however, the following example gives you a simple step-by-step guide in how to use the MOXF6/MOXF8 Editor. As an example, this section explains how to edit a Voice in the Voice mode, edit a Mixing program in the Song mode, then store the edited data to the memory of the MOXF6/MOXF8 instrument and save the final results of your editing to a file. Editing in the Voice mode n If the [Song] or [Pattern] indication (at the top left of the display) is on, perform the instructions below from step 1. If the [Voice] indication is on, perform the instructions below from step 2. 1. Change the mode to the Voice mode by clicking the [Voice] indication (at the top left of the display). If the [ONLINE]/[OFFLINE] indication is set to [ONLINE] before changing the mode, the Auto Sync window will be called up automatically when this step is executed.

As step 2 is thus unnecessary, you should proceed to step 3. 2. Click the [OFFLINE] to call up the Auto Sync window if the [ONLINE]/[OFFLINE] indication is set to [OFFLINE]. 3. On the Auto Sync window, set communication-related parameters such as Input Port, Output Port and Device Number in the Data Port section, then set the direction of Data Auto Synchronization (Global, Current and Voice) in the Auto Sync Setting section. When number as destination, then enter the name of the Voice in the box at the top of this window. MOXF6/MOXF8 Editor Owner's Manual 9 An Example of MOXF6/MOXF8 Editor in

Use: Mixing edit in the Song or Pattern mode 6-4 Click [Store] to store the edited Voice to the selected number in the selected Bank. Performing this operation will store the Voice data to the User Voice Bank in the MOXF6/MOXF8 instrument as well as that within the Editor. NOTICE When you execute the Store operation, the settings for the destination memory (of both the Editor and instrument) will be overwritten. Select the destination Voice number carefully to prevent important data from being erased accidentally.

For this reason, important data should always be saved to a separate USB storage device. n You can store the settings of the parameters in the "G" row except for the Chorus and Reverb settings by clicking [Store Global] under [Edit] in the menu bar. Mixing edit in the Song or Pattern mode This section explains how to edit a Mixing program in the Song mode. 1. Change the mode to the Song mode by clicking [Song] of the [Voice]/[Song]/[Pattern] indication. The Auto Sync appears automatically during ONLINE status. 2. From the Auto Sync window, click [Start] at the bottom. Data synchronization will be started if the Port settings are correct. As soon as data synchronization is completed, the Auto Sync window is closed.

3. Edit the parameters of the Mixing and Voice assigned to each Part. If you want to change the parameter values from the original ones of the selected Song or Pattern, click (drag and drop) each of the parameters such as EQ and effect lined up to the right of "G" in the Global/ Multi section and "1" – "16" in the Part section. MOXF6/MOXF8 Editor Owner's Manual 10 An Example of MOXF6/MOXF8 Editor in Use: Mixing edit in the Song or Pattern mode To confirm how the parameter edit affects the Voice sound, click any note on the virtual keyboard. To make detailed settings of the selected Multi, click the arrow button next to the main window to call up the Detailed Parameter section. at the top of the right panel n The MOXF6/MOXF8 Editor lets you edit the Voice parameters in the Song or Pattern mode as well as Voice mode. In the Voice mode, you can edit only the selected Voice. In the Song or Pattern mode, on the other hand, you can edit the parameters of the Voice assigned to each Part as well as the Mixing parameters. The edited Voice can be stored to the same Voice Bank as a User Voice regardless of the mode used for editing. 4.

Store the edited Voice or a Mixing, as necessary. 4-1 Select the [Mixing Store] under [Edit] in the menu bar then store the edited Mixing.

4-2 Select the Part to which the desired Voice is assigned, select [Store Voice] under [Edit] in the menu bar to call up the Store window (page 46) then store the Voice via the same operations as in steps 6-1, 6-2, 6-3 and 6-4. 5. Select [Save] or [Save As] under [File] on the menu bar to save the edited data as a file (extension: *.X6E). All the settings you made and the Voice data you stored to the User Banks will be saved as a single file (extension: .X6E). When you open this file next time to call up the Auto Sync window, click [Start] to synchronize the status of the parameter settings between the MOXF6/MOXF8 Editor and the MOXF6/ MOXF8 instrument. The Save operation from the Cubase series File menu will save the Project file including the settings made via the MOXF6/MOXF8 Voice Editor VST.

This means that opening the same Project file next time will call up the settings lastly made via the MOXF6/MOXF8 Voice Editor VST. MOXF6/MOXF8 Editor Owner's Manual 11 An Example of MOXF6/MOXF8 Editor in Use: Mixing edit in the Song or Pattern mode NOTICE It is recommended that Auto Save be set to off in the Preferences - General window of Cubase series. If Auto Save is set to on, a backup of the Cubase series Project file will be created automatically, resulting in the Indicators showing the Editing Status being turned off, even though the Voice Edit settings have not been saved yet. This allows you to open a new file or different file, resulting in the settings being lost. In other words, to best avoid losing your editing data, set Auto Save to off.

The name of the selected VST Preset will be shown in this box.

No name is shown in this box if no Preset VST is recalled. n The data of the MOXF6/MOXF8 stored as VST Preset can be handled like the other VST Presets in the Media Bay of Cubase series. NOTICE Note that recalling the VST Preset will overwrite or erase the current settings of the MOXF6/MOXF8 Editor VST. 2 File, Edit, Bulk, Help Refer to page 35. 3 Voice/Song/Pattern mode Determines the mode of the MOXF6/MOXF8, Voice, Song or Pattern. As soon as "Voice," "Song" or "Pattern" is selected here, the mode of the MOXF6/MOXF8 instrument changes accordingly and the Auto Sync window (page 50) opens.

After setting parameters as necessary on this window, click [Start] to execute data synchronization between the MOXF6/MOXF8 Editor and the MOXF6/MOXF8 instrument. 4 ONLINE/OFFLINE Clicking this switches the status of the Editor between "ONLINE" and "OFFLINE." When "ONLINE" is indicated, the edited status is completely synchronized between the MOXF6/MOXF8 Editor and the MOXF6/MOXF8 instrument, meaning that any parameter edit you make on the MOXF6/MOXF8 Editor is reflected in the same parameter on the MOXF6/MOXF8 instrument and vice versa. When OFFLINE is selected, editing on the MOXF6/MOXF8 Editor will not affect the MOXF6/MOXF8 instrument and vice versa even if the MOXF6/MOXF8 instrument is connected to a computer.

Note that the indication here is automatically changed according to the status of communication between the MOXF6/MOXF8 Editor and the MOXF6/MOXF8 instrument. For example, the ONLINE status changes automatically to OFFLINE when the cable is disconnected accidentally. 1 Indicates that the current status is set to ONLINE. Clicking this calls up OFFLINE (2) described below. Keep in mind that the ONLINE indication cannot be enabled when the MIDI Port is not set properly or the MOXF6/MOXF8 instrument is not properly connected to a computer. 2 This OFFLINE indication shows that the MIDI Port is set properly and the MOXF6/MOXF8 is properly connected to a computer. Clicking this calls up the Auto Sync window. From the Auto Sync window, you can synchronize the settings between the MOXF6/MOXF8 Editor and the MOXF6/MOXF8 by clicking the [Start] button. As soon as data synchronization is completed, the Auto Sync window is closed and the status of the Editor changes from OFFLINE to ONLINE. MOXF6/MOXF8 Editor Owner's Manual 13 MOXF6/MOXF8 Editor Window: Overall section n When the Global, Current and Voice settings are set to "Off" and Auto Start is set to "On" in the Auto Sync window, clicking here changes the Editor status from OFFLINE to ONLINE without opening the Auto Sync window.
