Storage of frozen food Thawing

Ice-cube production . Defrosting

. Maintenance . Internal cleaning . External cleaning . Periods of non-operation. Interior light.

. Customer service 34 WARNINGS It is most important that this instruction book should be retained with the appliance for future reference. Should the
appliance be sold or transferred to another owner, or should you move house and leave the appliance, always ensure that the book is supplied with the
appliance in order that the new owner can be acquainted with the functioning of the appliance and the relevant warnings. These warnings are provided in the
interest of safety.

@@This appliance is designed to be operated by adults. @@@@This product should be serviced by an authorized Service Centre, and only genuine spare
parts should be used. @@@@Frozen food must not be re-frozen once it has been thawed out. Manufacturers' storage recommendations should be
strictly adhered to. Refer to relevant instructions.

There are working parts in this product which heat up. Always ensure that there is adequate ventilation as a failure to do this will result in component failure
and possible food loss. See installation instructions. Parts which heat up should not be exposed. Wherever possible the back of the product should be against a
wall.

Before any cleaning or maintenance work is carried out, be sure to switch off and unplug the appliance. If the appliance has been transported horizontally, it

Defrosting Frost is automatically eliminated from the evaporator of the refrigerator compartment every time the motor compressor stops, during normal use. The defrost water drains out through a trough into a special container on the back of the appliance where it evaporates. Periodically clean the defrosting water drainage hole of the refrigerator, using the special cleaner already inserted into the discharge hole. D068 When defrosting is completed, dry the interior thoroughly. Keep the scraper for future use. Replace the plug in the socket and, after letting the appliance run for at least half an hour, replace the previously removed food into the compartment. Important: A temperature rise of the frozen food packs, during defrosting, may shorten their safe storage life. @@ Rinse and dry thoroughly. @@@@ If it still does not light up, change the bulb. @@ Do not use abrasive products. @@@@ If the appliance seems too noisy, check that the sides are not touching furniture that can transmit or amplify a noise or a vibration.

Also, check that the piping of the refrigerant system does not vibrate. If there are water drops on the bottom of the cabinet, check that the defrost water drain opening is not obstructed. If your appliance is still not working properly after making the above checks, contact the nearest service centre. To obtain fast service, it is essential that when you apply for it you specify the model & serial number of your appliance which can be found on the rating plate. 41 .
